

WM started Garbage Cart Delivery for Universal Curbside Collection Service

Sebastian, FL – June 14, 2023 – WM started delivering a new 96-gallon cart to each residence for the transition to universal curbside collection service beginning July 1. Current subscription customers may receive their new cart before their current cart is removed. To ensure a smooth transition, it is extremely important customers place their current cart curbside on all regularly scheduled collection days (empty or full) until the exchange has been completed. If your current cart has not been removed by **June 25**, please keep it curbside daily until removal.

Current subscription customers may begin using their new cart garbage cart immediately. Residents who do not currently receive curbside collection service may begin using their garbage cart when universal service begins on July 1, 2023.

Beginning July 1 only new carts will be serviced. An old cart placed curbside after July 1 will be emptied and removed. If you would like a second cart, please contact WM at (772) 569-1776. There will be a one-time charge of \$87.55 for a second cart.

If residents are not completely satisfied with the standard 96-gallon cart size, they may contact WM beginning October 1, 2023 to request an exchange for a 64-gallon or 35-gallon cart at no additional charge.

Additional information about universal curbside collection service can be found at www.cityofsebastian.org

About WM

WM (WM.com) is North America's largest comprehensive waste management environmental solutions provider. Previously known as Waste Management and based in Houston, Texas, WM is driven by commitments to put people first and achieve success with integrity. The company, through its subsidiaries, provides collection, recycling and disposal services to millions of residential, commercial, industrial and municipal customers throughout the U.S. and Canada. With innovative infrastructure and capabilities in recycling, organics and renewable energy, WM provides environmental solutions to and collaborates with its customers in helping them achieve their sustainability goals. WM has the largest disposal network and collection fleet in North America, is the largest recycler of post-consumer materials and is the leader in beneficial reuse of landfill gas, with a growing network of renewable natural gas plants and the most gas-to-electricity plants in North America. WM's fleet includes nearly 11,000 natural gas trucks – the largest heavy-duty natural gas truck fleet of its kind in North America – where more than half are fueled by renewable natural gas.
