CITY OF SEBASTIAN
ALL ABOARD FLORIDA (AAF)
SURVEY RESULTS
Response to
Draft Environmental Impact Statement (DEIS)
November 19, 2014
Response to the Draft Environmental Impact Statement

- City Council approved $50,000 for the All Aboard Florida project.
- The Draft Environmental Impact Statement was released in September 2014. This is a document that is required by the National Environmental Policy Act (NEPA) because the AAF applied for a loan under the Federal Railroad Association’s Railroad Rehabilitation and Improvement Financing Program.
- The DEIS purpose is to disclose all environmental effects associated with the project alternatives, whether they are adverse or beneficial and to allow the public to review and comment on the document.
- The City of Sebastian held a public workshop on October 15, 2014 where approximately 68 people were in attendance.
- In attendance were representatives from All Aboard Florida.
- Surveys were disbursed at community events and could be picked up at City Hall.
- Comments to the DEIS are due by December 3, 2014 to the Federal Railroad Administration.
We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- Positively: 8%
- Negatively: 79%
- No or minimal impact: 10%
- No response: 3%

Total Surveys 229
What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- Strongly Support AAF: 3%
- Moderately Support AAF: 3%
- Neither Support or Oppose AAF: 6%
- Strongly Oppose AAF: 82%
- Do not have enough information to have a position: 6%

Total Surveys 229
My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors? Mark all that apply.

- Access to a passenger rail stop in Indian River County: 35%
- Increased safety measures along the tracks: 43%
- No local or federal taxpayer dollars are used to finance the proposed passenger rail service: 33%
- No Support: 52%
- No Response: 3%

Total Surveys 229
In the Environmental Impact Statement (Page 300 under "No Action Alternative), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

![Pie chart showing survey responses]

- This increase will have a negative impact: 76%
- Moderately negative impact: 5%
- No Impact: 1%
- Moderately positive impact: 3%
- High positive impact: 5%
- I do not have enough information about the projected number of trains to have an opinion: 6%
- No Response: 4%

Total Surveys 229
What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? **Check all that apply.**

- Noise from moving trains: 77%
- Noise from train horns or stationary crossing horns: 74%
- Vehicle and pedestrian safety issues: 80%
- Length of time it takes for the trains to pass through a street crossing: 76%
- Emergency services access: 86%
- Negative impact on our eco-system: 64%
- Negative impact on structures: 53%
- Local ability to deal with potential rail accidents: 67%
- Vibration: 62%
- General Quality of life: 70%
- No Response: 4%
- Other: .8%

Total Surveys 229
Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

![Pie chart showing the distribution of responses: 6% positive, 68% negative, 12% no or minimal impact, 14% no response. Total surveys 229.]
Summary of Survey Comments

- Emergency Response (#1 reason) – hospitals and doctors on east side of tracks.
- Safety of vehicles and pedestrians at Railroad crossings.
- Increased noise from the freight trains.
- Vibration from additional trains.
- Loss of property value.
- Lack of benefits to Indian River County – Lack of new jobs for residents; Lack of a Railroad station.
- Public opinion has it that the second set of tracks is for hauling freight.
- Who will be responsible for the maintenance and payment of the maintenance of the tracks and railroad crossings?
- Fear of increased property taxes due to maintenance of the railroad crossings.
- Impact on historical properties/landmarks.
- Impact to the environment.
Where do we go from here?

- December 1, 2014 comments will be submitted by the City of Sebastian to the Federal Railroad Administration regarding the Draft Environmental Impact Statement.
- Submittal package will include the City of Sebastian’s Technical Review, Public Surveys and citizen letters as well as any other forms of information submitted to the City in response to the DEIS.
- City is still waiting for final set of plans for the railroad crossings.
- City staff anticipates a supplemental Draft to be released for additional comments.
Port Canaveral new cargo era underway
- One company will handle 700,000 - 53’ containers/year

The Question: Hypothetical Scenario
- How long would it take to move 700,000 containers @ 2 containers/railcar if the freight train was 1 mile long?
- How many railcars equal 1 mile or 5, 280’?

What do we know:
- A container is 53’ long = a truck trailer to haul on the road.
- 1 Railroad car is 75’ long including hook-ups and can hold 2 containers.
- The company will handle 700,000 containers will be moved in 1 year.
- By the year 2016 there will be a possibility of 20 Freight trains (trips) carrying cargo per day on the tracks.
- 5,280’ = 1 mile

Calculations
- 2 containers - 53’ semis/railcar = 350,000 railcars (700,000 containers/2 containers/ railcar)
- 80 railcars = 6,000’ which is close to the 5,280’ = 1.1 mile (80 X 75’ length of railcar)
- 350,000 railcars to carry the 700,000 containers @ 80 railcars/trip = 4,375 trips
- 20 Freight Trips in 2016 = 4,375 trips/20 trips/day using 80 railcars = 218 days

Answer
To haul 700,000 containers, at a minimum of 80 railcars (1 mile in length) carrying 2 - 53’ containers per railcar at 20 trips/day for one company from one Port takes 218 days.

Speed:
According to research : A train one mile long going 40 MPH takes 1 min. & 30 seconds to pass a station; 45 MPH – 1 min. 20 sec.; 50 MPH – 1 min. 12 sec.
If a train was 1 ½ miles long: 40 MPH – 2 min. & 25 sec.
How long is a one mile freight train?

1.1 miles – the length of 80 rail cars
From Main Street to Vining Lane which is close to the fruit stand at the southern entrance to Indian River Drive. The train blocks Main Street and East and West CR 512.

Do you have any other comments you would like to provide in regard to the proposed AAF high speed passenger service?

This is a clear case of putting the financial power of a few pitted against the welfare of the community.
Really, what is the proposed charge for a ticket from Miami to Orlando? Will there be enough users to make it "profitable"?
Let's be realistic and not emotional as most of this survey is worded.
No high speed train
Unguarded crossings
Much too much noise and accidents
Overall bad idea.
People in community must have input to such major changes.
Dangerous at crossings.
Tracks now are falling apart, vibration is a huge issue now.
Do not allow this to happen.
It will be very important to our children, grandchildren due to loss of cheap oil
For it!
This project needs to go on a different route. They should really make a deal with CST.

I know a lot of people moved to Florida to retire but people still have to work here so progress brings jobs all for the general good.
Move the high speed rail program to areas of less population.

The positives would be a stop in Melbourne, Sebastian, or Vero Beach and if it will decrease the amount of semis on the interstate.
There is no positive impact on our community.
Do they think that the train will have enough passengers to pay?
Sebastian is a peaceful place to live. AAF will cause many seniors to move too much for our nerves.
We are senior citizens! Ambulances and a timely response are critical.
Too many trains to much noise, makes access in and out of homes difficult.
This along with freight will slow down the future and will highly impact many of the residents especially the elderly who exist in 55+
communities on the west side of the current track with the hospital on the east of the railroad.
I see absolutely no gain in any form for the Treasure Coast! I feel it will detrimentally affect our peaceful life in Sebastian and discourage families from choosing to settle here.
This will probably be good for the state but it will be terrible for us. I cannot think of one good positive thing about this train. Noise, Vibration and inconvenience.
I think that the county and city should cargo a freight and passenger train car tax for every train that goes thru.
Use Amtrak if you need to get from Orlando to Miami—Quick ride to fly --- Amtrak is very comfortable.
Not a necessity of transportation issue to Florida. This would also increase air traffic and pollution from airport in Orlando.
Why not a monorail type of transportation stopping at all small towns.

We can see the train from our house not going to be a good thing for us. Many of our friends are selling and moving while they can.
Too many interruptions for school buses, hospital, emergencies and boating traffic.

I feel that AAF should follow the FLA turnpike. Too many interruptions too school, hospital, emergency services and navigation traffic.
I believe they should reroute the tracks west of I-95.
I doubt the passenger service will be viable.

Why were we not contacted before access was granted and permits written?

There are no benefits for Treasure Coast residents.
The area west of the turnpike has wide open space. This is not where high speed trains belong. It is too close to our river, our schools, our homes and emergency transit locations.
I don't believe for one minute that passenger rail will succeed. It's just a "con". In my opinion, it's all about freight, and there'll be government money involved, taxpayers money, no matter what we are told.
Who benefits from this debacle??
I do not understand how anyone can justify all the negatives being outweighed by the positives since only a small percentage will be benefited by this.
Bay Street crossing closed years ago --- if Roseland Road is compromised it is a long way around.
Make it a private enterprise and move to unpopulated area. No need to be on the coast if you are not stopping for passengers. Put it inland.

**Understand there is already rail service to Orlando so why do we need a high speed one?**

I am thinking the investors in train will make money and most of residents will see no benefits. Owners are wealthy so they will benefit and become more wealthy. This has to be greed to the detriment of many lives. Use tracks in middle of state or make new tracks down I-95.

There is not need for it. Build it to the west; put it in middle of state. Too much noise.

The amount of proposed passenger travel without local stations along the Treasure Coast will not materialize as long as motorists can make the trip in the same period of time and more comfortably. Put in the middle of the state.

Build west of I-95

**Should only run in non-populated areas**

I feel this is a huge waste of taxpayer money. No passenger rail service world wide has ever made money and are always subsidized by the local government federal levels.

A dinner train is the only thing that should be allowed given the east coast Florida population. This whole project only benefits Miami and Palm Beach. It is of no value to the Treasure Coast.

Where are they getting passengers for 32 trains every day? We all know that the passenger service is a cover for moving freight. AAF refuses to release projected ridership figures.

We can drive to Orlando or Miami in a relatively short time so why put up with all the noise and traffic delays the train will cause. Do anything possible to stop it.

If state and federal money involved, it will be a huge boondoggle. It is hard to believe that they will have enough passengers to fill all those trains.

Totally unfair to residents that live nearby tracks — their property value will decrease. Railroad may buy their houses, but they will be worth nothing. These hard working people will not be able to afford to stay and relocate in Sebastian. Don’t do it. At least not on the proposed rail. Quality of life will be lessened.

I really feel that our comments are just for PR and this is a done deal. Sad for my feelings toward state government and real public input. I will be contacting all our state representatives. Are any of them for this rail?

The cost to ride will make it financially unsuccessful. Can’t imagine who will need to ride it. That’s a lot of trains. Who is going to use it?

**Tracks will deteriorate—How can they support all this traffic?**

It won’t be financially successful. The cost to ride will probably equal the cost of driving. The time is the same.

Why can’t this be done more inland where there is much open territory?

**Why no stops along the Treasure Coast?**

Passenger trains always lose money. This about profit from freight.

They are trying to short cut the phases and there are no benefits for our area. The accident potential is greatly increased.

I resent a private corporation having the power to go against the will of the people. Harmful to wildlife - migrating birds, etc.

Please do not Cali fornicate Florida.

Every source of investment income should be disclosed by AAF also who are their investors and how much money they have spent lobbying state reps.

A sham and a ruse for mega freight traffic from Panama Canal.

I don’t see any benefit to Indian River County and none to me and my finances personally. If there were a stop in IRC directly from/to Orlando airport, that would be the only occasional benefit to me.

My information is that other high speed rail lines in Europe, Japan, N.E. US and newly planned Texas line do not trains through successive towns/cities with many crossings. They stay rural.

The railroad should go through the middle of the state where the population is scarcest.

Why would we want a high speed train passing through not offering transportation to 90% of the public effected. The two are linked and the communities impacted should band together to sue to stop it.

Build another track in the middle of the state.

I don’t believe 16 trains a day is feasible. Tourists who rent cars can stop at many places along our coast and is therefore better for our tourist economy than corralling them in Orlando and Southern Florida.
How can the train stop in time if the crossing gate malfunction with the speed the train is going 110 MPH X 30 seconds prior to reaching intersection.

Why so many daily trips?
Besides freight train passing how does this effect the building of casinos in Miami?

It will not benefit Sebastian in any way.
How many people will go from Miami to Disney?
I don not believe it should run thru small communities. AAF should be near I-95
If it doesn't pay for itself the taxpayers will be stuck with the bill and the train tracks will then be improved for freight business without Amtrak having to pay for it.

Do you have any other comments you would like to provide in regard to an increased number of freight trains?

It would create a never ending problem for the communities in the path of this juggernaut of trains.
Which do you want? Trucks or trains
This will run the economy of the region for the benefit of a few in Miami and Orlando. Where are our elected leaders?
Noise - Train horns will increase safety issues
Rethink.

Enough is enough.
Do not want.
Good train moving equals jobs.
This will ruin the quality of life on the Treasure Coast.

AAF is not going to increase freight train traffic. The opening of the new Panama Canal is going to do that.
There is no positive benefit to any community on the proposed east coast corridor.
How many more freight trains? Will trains be carrying any material that would be explosive?
I believe the increased train frequency will negatively impact property values (residential) in the vicinity of the tracks.
There is no positive impact on our community.
Please help us so we can continue to enjoy a healthy life.
My...noise and slow lumbering trains...accidents... More trains to middle of the state. Freight.
Put the freight trains along I95 or in the middle of the state.
Vibration of noise and access to the park issue; Delays at crossing

Very concerned about the noise of the whistle and emergency vehicles being held up at crossings.
Too much noise.

It will command all problems with noise and increased problems with health issues and response times of police, ambulance, etc.
Hospital will be impacted.
Freights all night vibrating our house while we are sleeping. Cracks driveway and shakes our house.
This program only helps some rich New York investors only.
It can be very noisy and congestive. I grew up blocks from Medley, FL where FEC has a freight yard...noise all the time.
Increase of noise and pollution, and crossing accidents.
Need to hear future plans for increased freight carriers.

They will significantly increase.

Concerned about decreased quality of life and increase risks to public safety.
I see nothing good coming from this increase.
Concerned about traffic being backed up. There are already long delays, especially if trains have to slow down in Barefoot Bay to pass each other. Roseland Road becomes very backed up.
Safety - Content of freight - dangerous chemicals transported through our area.
Increased number of freight trains will cause god-awful waits at crossings, waits at bridges for cars and boats. Last year, at Barber St., near US1 in Sebastian, I waited 40 minutes for an ordinary freight train to go by. How much worse will it be with AAF's increased freight traffic?

30 MPH freight trains are a lot different than high speed passenger trains.
The anticipated noise factor and graphics will definitely be a negative to the peace and quiet we have now.

Put it inland

Trains are probably the lease expensive way to move freight.
I do not look forward to this train and I don't believe it will happen!
They should have quiet zones for that many freight trains uses if they don't have high speed trains.
Do we have any say over decisions of the corporate ruling class?
The freight business is the only reason for this great expedition of time and monies.
Have the ships unload in Jacksonville, FL.
Noise and vibration
Should only be allowed in non-populated areas
The existing level of freight service is acceptable to increase the amount will create very long traffic delays.
Do it right. Put an elevator rail up the center of the state. Not through the most populated areas.
This is a worse problem than the high speed ones (freight).

More freight trains moving slowly on top of 32 passenger trains will be devastating.
Toxic substances are often transported in cars and we don’t know about it. What provisions does AAF to clean up spills if they occur? Can our City sue AAF when such an accident occurs?
We already have plenty of train traffic - no more is needed or wanted.
The lines should be moved to the less populated areas of the state not on the populated east coast.
Move to the center of the state.
Homes in our community already suffer from extreme vibration. This will also affect the value of our homes; ability to sell homes in our community that has received a words in the past.
Need our passes over roads. I need to review right of way and tariff.

Raise Rail
The real issue in this project is freight---long speeding freight trains. How will they stop in time if there is a safety issue?
Safety is paramount. Children on school buses will be delayed. Ambulances and police will not be able to answer emergency calls.
Wildlife that we treasure will not wander freely.
It will be more stressful living here. The tranquility of the area will be lessened.
The freight car numbers will increase why add passenger cars when we, along the rail route can’t even use it?
Increased freight trains would be horrible for our neighborhood where the houses are close to the tracks. Use the tracks in the middle of the state.
Traffic slowed all to often at crossings/noisy/smelly. Put the freight in the middle of the state.
Why not put tracks along I-95 or Florida turnpike? Sounds much too logical.
They will deterolate the rail bed and accidents may occur spilling dangerous chemicals. Move them to the west of I-95 or middle of the state.
Noise - disruption of traffic --- pollution
Noise delays --- safety
Hospital is close by and many elders live in nearby residences, including large Collier Club subdivision with approximately 450 lots, with about 375 homes built.
Traffic, noise, emergency traffic, taxes for local noise abatement
I am not typically an activist in these issues, but I am adamantly opposed to this plan and feel it is unsalvageable.
Again this is nothing but profit for a private company and it will be a worsening situation with time.
Terrible hold up of emergency vehicles.
You have an alternative on CSX.

Madness - this whole business all around and freight traffic destroys the living on over 200 miles of towns and hinder thousands of people.
Noise/vibration/safety/inconvenience. No good - no upside, only downside. ...
If/when our homestead goes on the market for sale, it’s in print that the worth of our property will be negatively affected 10-20% due to proximity of AAF high speed tracks.
There are other alternative to move freight.
I believe the main reason we are facing this problem is to accommodate the freight trains.
We have enough trains now. We do not need anymore.
Take the freight and locate another track away from the coast.

Once the passenger train service fails and there are no more passenger services, will it be replaced with freight trains?
Freight trains moving during night hours will not effect the normal life in Sebastian.
Accidents and hold ups on train tracks.

Other Comments
Noise, Vibration Safety and Congestion
Noise! Possible auto delays. If there was a stop in Indian River County, that would be the only positive benefit for passenger use to/from airports.

2016 - 20 freight and 32 passenger. If spread over 24 hours = more often than every half hour. If passenger trains run 5 AM-11PM = 6 hrs. @ more than 5 an hour.

As a youth and later in college, I lived near or within a block of major RR. The noise and traffic delays were significant. In one 4 hour period (while I was in college) 19 trains passed in one direction or the other.

Noise, traffic congestion and safety

Too much noise
Safety issues, noise, congestion, vibration.

Noise, noise, noise. What happened to our "quiet" fishing village? Stores and businesses will suffer.

Traffic back up for train crossings
Waiting on coming trains backs up traffic
Very near the tracks—much frequent noise

Noise. They (visitors) may not want to visit Sebastian again. Seasonal renters will far down; go other places.

Safety issues.
Noise and vibration will negatively impact residences and businesses along those current corridors.

We can't enjoy our outside patios with all the noise trains will bring to our home areas.

Between noise and traffic; not able to get to Rt. 1.

This will increase delays at crossings, especially if we believe that there will be a large increase in freight traffic (as well as passenger trains); Freight - much longer delay at crossings compared to passenger trains.

Only noise and traffic disruptions.

Safety
Noise and blocking of roadway.

Concern for access with public safety, Fire, EMS, PD.

Noise and too much traffic on this line.

The noise level will disturb my peaceful living life style

Delay in crossing to Highway 1 & noise.

Traffic, noise

Noise - traffic - inconvenience - delays at crossing - also at waterway bridges; the constant rumble of the high-speed train.

I wake up all night with the sound of the whistle with the traffic now.

Noise - traffic holdup.

Too much noise

Noise - We live in Park Place as far from the tracks as possible yet noise enters and shakes our house.

I live within 1000 feet of the tracks. It affects my quality of life. It is of no benefit to Sebastian. It brings noise and vibration to our home.

This is going to be a terrible situation for us and our community. So many trains, so many crossings closed so often and so much noise.

Whistle blowing — noise level.

Present loud, annoying noise in a peaceful community

Quiet neighborhood - peaceful community - Noise — Do not need increased noise disruption.

Traffic flow and noise

Potential for accidents.

While the passenger trains are supposed to be quieter but the increase in freight trains will increase the noise pollution.

Traffic delays due to the number of passing's. Quality of life will decline throughout the coast.

Degradation of quality of life due to noise, vibration and delays.

Creates traffic problems, increased noise - no benefit to Sebastian, just dangerous.

Safety will be impacted. Noise, pollution, loss of small town charm.

We have so many people that walk and ride bikes— their safety will be jeopardized.

Freight trains are not an issue now. It is the 32 additional trains that are going to be the demise of the quality of our life.

Will definitely be much noisier where I live.

They are noisy enough now. More trains will just make it worse.

Noise abatement.

Noise and vibration

It will be very noisy, house will vibrate more, fear of pedestrian getting injured as many people walk or ride bikes in our neighborhood.

There are many elderly drivers in the area also.

I live near the tracks. Noise and inability to access points on the other side.
Noise and danger will increase.
Noise and vibration

Between the noise! The inconvenience! No Benefits! I would hate to be on the wrong side of the tracks from the hospital or any emergency.
Noise and dangerous factors will negatively impact all.
Noise and frequency of track crossings.
Noise/Crossings midrail access

Visitors will not come to visit. They come here for quiet and environment. Train will destroy all that.
Noise, pollution, safety of our community.

This community belongs to the people and the animals, the safety of both will be compromised.
Increased crossing wait times; higher potential for train accidents

Disrupted sleep patterns with the increase in train traffic will occur. Noise, fumes, wait time, what about emergency vehicles, taxes, zoning changes, the look and feel of this community...which is why people want to live and invest here.

Would only support if using Central Florida line.

Personally, I now hear the freight trains and horns especially during the night. With the sizable increase expected, no doubt there will be a much greater noise level.

Noise
Vibration

Being cut off from US1

Our location is very near to the tracks. Excessive noise; possible accidents.
Noise, hospital access is a safety issue.

AAF will greatly increase noise and inhibit access to US1. I do not believe it will be safe due to its high speed.
Noise, disruption of highway traffic,

Constant highway traffic disruptions, reduction in residential property values.

I can hear all the trains from my house and will have to wait at train crossings numerous times to get anywhere from where I live.

Noise, vibrations for people close to tracks — safety for pedestrians and autos and police. All emergency services will be hindered.
Noise, vibration, road closure over tracks to Rt. 1

Inevitable accident frequency

Define "Quiet Zone"

Noise and vibrations

Danger for rail accidents to community members and inability of community to respond appropriately and without fiscal liability is too great. I own a camp in Maine and Farmington, ME (nearby town) is sister community of Lac Megantic Quebec, and firefighters responded to a town's 7/6/13 rail derailment, when 42 were confirmed dead and 4 others were presumed dead with huge amounts of property damage. Freight trains can derail and do carry unsafe products.

Noise, increased taxes (local) for abatement - No local benefit

Nothing is going to help with railroad crossings and number of times they are closed
Noise, safety time spent at train stops.

Noise will impact my home and reduce emergency response vehicles.
Noise, traffic safety, business lost
Noise. Delay at crossing - 3 tracks closer to buildings.

I feel since the crossings are in small congested areas with traffic lights it will complicate the intersections. I also cross the tracks several times a day so I am sure I will be affected.

Noise will be three times or more in my community. Wait at crossing will be too long.

House vibration, noise, impeded traffic flow

Noise and vibrations; Air horns blasting thru intersections as train goes thru Sebastian. Redesign crossing stations for high speed crossings that don't break down. No more blasting of air horns thru Sebastian; and a safety concrete 6 foot high plus barrier as seen in construction zones, etc. Either one of the above to keep people, kids, animals from wondering onto tracks and being killed by a train going over 100 mph. Property taxes dismissed! Repairs and damages to our homes from all these freight trains and high speed passenger trains day after day, year after year after year.
Emergency

Hospitals, emergency services are east of the tracks...schools and majority of residents are on the west side.

Most of the communities have no overpasses. Thus cutting a large population off from emergency medical care and fire/storm reactions.

Emergency vehicles delayed as tracks are very near US1. Do not want public funds.

Emergency responses and normal vehicular traffic will be greatly delayed by an increase in track usage.

Hard to get to my doctors and hospital

Hospitals are all on east side of tracks.

Hospital, Police, and Fire Dept. on the west side of existing tracks could really impact their response.

Access to emergency vehicles and hospitals, safety issues, disturbing our eco system with vibrations and noise.

Can’t get through in case of emergency

Access to hospital

Crossing closed to emergency travel and dangerous to all.

Wait of emergency vehicles

Safety issues for emergency vehicles, student crossing, school buses, children and pets.

Limits access to hospitals.

Trying to get to a hospital will be a nightmare.

Pollution, emergency vehicles will be held hostage

I live west of the tracks. Our visitors and relatives are all senior citizens. If anyone at our house gets sick and need a hospital the train could prevent their getting to the hospital in an emergency.

I won't have access to fire department, ambulance service, hospital or doctor, as I reside on the "wrong side of the tracks."

Most medical facilities are located east of the tracks. Tens of thousands of elderly persons live west of the tracks in an emergency situation; minutes can mean the difference between life and death (stroke, heart attack, accident, etc.) Such a great increase in train traffic. and the emergency response delays puts a large percentage of our population unnecessarily at high risk. I am 78.

Cannot get to hospital, doctor, church, grocery, etc.

Fire Services/ambulances won’t be able to get to calls. It's all about freight use; use the rail lines in the middle of the state.

Living in a retirement community emergency service access is of great concern. We will be on the "wrong side" of the tracks for any medical emergency.

We have heart/stroke health issues that could be greatly impacted by a train when emergency time response is critical.

The cargo/shipping companies should unload at ports nearest to the cargo final destination. We should not be burdened with the greed of the Port of Miami and Port Everglades.

Interfere with emergency vehicles - Cuts city in half; noise vibrations; safety of people; wildlife along right of way

My doctors and my hospital are east of the tracks as an 81 year old senior I could die in the ambulance.

Area is comprised mainly of senior citizens, majority of which live on the west side of the tracks and have health issues requiring emergency visits to the hospital. Emergency vehicles on the east side cross to west then have to cross back. I personally had to call an ambulance. I stopped breathing on the way to the hospital. The paramedic was giving me CPR. If the ambulance had to stop for a train, I wouldn’t be standing before you today. I am only one example of them any seniors in our area whose life stands in the balance if 31 additional trains are allowed to pass.

To many trains; emergency to hospital hampered.

Emergencies will be hindered getting to us.

Fire trucks, ambulances won’t be able to get to calls. Its all about freight and use the CSX lines in the middle of the state.
Businesses will benefit in Miami/Orlando at stops
The only people and businesses that will benefit from AAF are those in Miami and Orlando.

Financial Impacts
I believe this will only have negative impacts to this area and its residents. I believe it is being pushed through by a select few to benefit a select few. None in this area.

Negative impacts will cause an exodus of families and businesses from this area. Will not encourage new business to relocate to the Treasure Coast. Will be like living in a tenement in an inner city. The lower quality of life will discourage any growth or business to relocate to this area. The movement will be out of this area.

My taxes will go up to support the local (City, County and State) improvement needed to counter Noise, Environmental and Infrastructure resulting from this "limited service".

Property taxes
Please don't let this happen. Sebastian is a great place to buy property new. With the proposed AAF high speed train, I'm sure it will not be so nice.

Real Estate Values
Property values will be negatively impacted in an area already stressed by foreclosures.
Degradation of property values.
I believe our taxes will increase and property values will decrease.
I will sell my home December 2014 to get best value before new trains are approved. Living 5 houses away from tracks now is tolerable, but not after the project continues.

Historic Sebastian and vacation destination will be negatively impacted.
Remediation for decreased property.
You will surely see a devaluation reflected in your property values.
Will affect my property value and quality of life.
Property values will decrease
Property values will tank. Who want stop live near the train? No benefit to us in the Treasure Coast at all.

Property values go down.
Will cause value of our home to decrease.

Lower property values

Decrease in property values: 9

Negative impact on residential property values
No liability or what about financial drain on Sebastian local or federal taxes.
Real Estate Agent - Who wants to live in a fishing village where the train traffic is a negative point and where you live.
Bought a house and moved to Sebastian to get away from trains. Would like Sebastian to stay a small quiet place.

Environmental impacts

Negative impacts: financial, pollution noise pollution, negative impact on environment and wildlife; negative safety impact.
Pollution
Sebastian River impacted.

Idle traffic at crossings will result in choking exhaust fumes and cause loss of productivity. There are environmental and financial burdens

Other

The impact on schools, hospitals, environment is all negative
This is not the inner city and no one moves to this area to be near AAF, just the opposite.
The entire issue of AAF should never been considered in its present form.
Visitors can't believe that this idea was even considered. Quote, "I can't believe they're going to do this. Why?"

This should go up the center of the state - not through residential and downtown areas. People should not be put ahead of money.
REALY? if the AAF rail service did not already have a "relationship" with the Florida East Coast RR, would this really be the most economic and "environmental" route?

Will not support it.
We have too many unguarded crossings much too much noise and potential for accidents
People will hate the inconvenience of waiting for trains to pass --- traffic will be impacted.
This is something that has a negative impact on all aspects of life without any advantage to us.
Church is directly across from tracks.
Don't want under any condition
We have enough trains going through Sebastian. Constant noise and vibrations take away the living quality of life and constantly wake us up at night, etc.

Coming from N.E. trains are one thing I don't like close to residential home - take away from property values and quality of life.
Negatively impacts communities on the Treasure coast significantly.
78 grade crossings along Treasure Coast all of which serve those communities.
Why not support the development of brand new tracks along the central portion of the state where the impact to a highly populated east coast would not be so great.
Add another Auto-train to the AAF concept and then you really have something to "toot your horn" about.
Will create problems for home foundations
Sleep deprivation.
Need wall for safety.
I don't think this proposal has anything to do with passenger service, I think it is moving freight.
This train project will cause unnecessary disruption of life on the Treasure Coast.
With visitors, we would try to avoid the train track crossings.
We need to improve rail systems in our state and county.
Waiting for freight trains & noise from all trains.
Oppose if run down delay populated east coast corridor. Could possibly support if rail using central Florida.
Can not support if freight trains are significantly increased.
We get all the negative. It will hurt our community.
This is the wrong corridor for that venture.
Sharing some tracks for freight and passenger; Sound barriers.
No benefit - only all negative impact on our neighborhood.
Put freight trains in the middle of the state.
This train does nothing good for the Treasure Coast and should be routed west of town.
Could go down the middle of the state.
Long lines, late appointments, hazardous waste, problems that people don't even think about.
Impact will continue to worsen over the years and will completely change the county.
They will probably think we should move like the rest of our neighbors have. No one wants to live by the train. We only have a few trains at the moment. We live in paradise that will become a nightmare if the train comes within 1000 feet of our home. It will ruin the quality of our life.
We do not need another track installed for more freight cars so that the wall street hedge fund - Fortress Investment Group can make its investors more money! While we would have to deal with all these extra trains/vibrations from the weight that is destroying our homes and our property values! Loud locomotive engines screaming thru our quiet community night and day! Air horns blasting at all hours day and night!
Time waiting at crossings.

Do not support it - 48 residents
This is a great idea for a "non-populated area".
Not getting truth from AAF about plan and purpose.
Increase of time waiting at crossing more cost of taxes to residents.
This will be the end of life in our community as we know it today!
This will have negative impact on tourism.

This summer in the Commonwealth of Virginia a freight train carrying oil cars fell into the James River when an older road bed collapsed from underneath the tracks. The James River is the drinking source of water for the lower tier of Virginia and luckily no oil leaked. The East Coast rail system is over 100 years old and built to service train cars of that time period. How is AAF going to ensure the current rail beds, including bridges, are safe to service both the weight of the new train cars and the frequency they plan to run them?

AAF has stated it plans to run freight trains on the tracks they are building for the lighter shorter passenger cars. This practice has caused widespread devastation in other parts of the country. One example, in Maryland, a machine shop successfully operating near the freight train tracks had to close down when the freight train started to run on the new for "passenger use only" tracks. The vibrations were sufficiently greater and the shop could no longer keep its machines properly lined up. The building and the surrounding area is now deserted. Since All Aboard Florida has said it plans to use these tracks for freight trains, it is going to upgrade the railroad beds to current industry standards for vibration absorption for freight trains before it lays down the new tracks?

Reroute using western route to avoid populated towns and cities on east coast.

Look for alternate route.
I don't believe there is any "buffer" that will positively effect the project. Our small towns will loose millions and become a ghost town (businesses will leave).
My office is directly 1/2 block from tracks. It may cause grid lock at the intersection with the increase of passenger trains. I moved here from CA to pursue a career in Real Estate and to enjoy the beautiful and quiet life style.
Should have a stop in Vero Beach.

Use existing Amtrak right of way for high speed rail
How about an overpass for Police and Fire Equipment?
All the airports are on the "wrong side of the tracks."
I live three houses from the track. The potential speed of the train is frightening, especially if accident occurs. Will be noisy, disrupt our quiet neighborhood.
This is not appropriate for our area. This is a quiet small town. Not Ft. Lauderdale or Palm Beach or Miami.
Nothing will "positively" influence me. It's a dreadful, expensive, boondoggle, will cause long, waits for cars and boats and interfere with emergency services. It's all about freight, not passenger services.
Should not run through small town Florida. Run it alongside Rt. 95 where it won't bother anybody.
We live on Bay St. by train bridge and the noise will bother us and destroy our property value.
The trains that run all night long we are use to --- sleep right through them.
Live nearby. I kayak the river and the idea of the bridge being replaced over the St. Sebastian River is terrible.
I don't believe the ridership would support this venture.
It does nothing for our area.
Move it to the center of the state.
Let NAFTA companies build their own transportation of goods made in China; let Warren Buffet feed, house and free health care for these illegals or Hispanics.
Keep imports out of America materials, products and people.
All these things forced on Americans so companies like Walmart make profit at our misgivings.
It is the worst thing that could happen.

This train is not a service; only a detriment to those who settled here. It is definitely not an asset or enhancement to lives of residents. AAF did not determine our feelings.

I live in an Okeechobee cracker house in historic area of Indian River County and near the track. I now have enough noise and vibrations from current train service. More would be dangerous, embarrassing and not compatible.

Have them buy right of way to west. Primarily by disruption of every day travel within east and west sections of our City. This may be 4-5 crossings per day.

Small businesses along the tracks having noise problems and no access to the railroad service will suffer losses in property values. The historical structures in counties along the route will suffer impacts in building structures.

I grew up not so far from I-95 in Miami (1960) - it destroyed the neighborhood and quality of life. Go take a look 145 St. & 7th Ave. N.W.

Wait times at crossings - no way to get to waterfront, restaurants, etc. Noise from whistles at S12 intersection. No Access to train.

Run the interior corridor

We in Indian River County will receive no benefit. However, we may find ourselves much inconvenience.

Put west of I 95

I believe this service is a means to allow FIG to bring in new tracks for cargo service which will be financed by USFED Tax dollars. No stops in Sebastian.

I think AAF/FIG should play nice with their Florida neighbors an dues the existing rails cut west. I also think they should do a trails for rails type of track as something. Donate the FEC tracks for scenic trail and or use them for dinner trains. Then any community that wants a stop for tourism purposes could get it.

AAF won't release ridership figures and no passenger railroad has ever made money - taxpayers subsidize it.

Elevating tracks; taxpayers don't fund it after it fails.

I am sure AAF violates some EPA regulations.

It will make access to US1 from my residence much more difficult - also access to Publix, Walgreens, etc.

Passenger rail service is a farce - why not be honest and call it high speed freight service?

Being on the west side of US1 there will be too many hold ups to cross the tracks. Also a safety issue. Too much noise also.

This is probably a done deal but I feel we should keep up our protests.

It will turn to freight service, hold up crossings, put emergency services in jeopardy.

There is no profitable rail passenger service anywhere. This all about getting federal and state money to improve FEC property. And no federal loans. If FEC believe passenger service profitable, then convince the private sector.

I live about 1 1/2 miles from track and hear not just the horn but also a rumble. It will disrupt the peaceful nature of where we live without any benefit to Sebastian.

No support unless they move track. A small group of hedge fund investors should not benefit if the expense of the safety and peace of mind of 600,000 people.

High speed rail is an idea whose time has come, but the tracks should be located west of town.

They will run night and half long double decker trains, freight and passenger through our quiet town 32 times a day blocking traffic, emergency vehicles, and police from reaching their destinations in a timely manner.

This project negatively impact Sebastian in every way. So much for sleepy fishing village.

Sebastian wants to stay a small town—eventually you may have a stop in Indian River County. We want homeowners here, not people from south Florida.

Visitors will not want to be sitting on roads watching trains go by. Businesses will suffer because people will avoid going over tracks and will take alternate route.

What about overpasses?

Change location to run alongside Highway 95 which I know they don't own but wish they did.

Have historic buildings that need to be protected will lose my vacation rental with 400 to 500 horns.

I dread the day that my house burns down or I or a family member can't get to the hospital in time waiting for a train. More trains increase the danger.

I have many times had to wait to cross the tracks for running trains and had to find alternative ways to cross when trains have stopped and signals don't work.

No benefit.

Buildings close to the tracks may be harmed.
Will ruin our way of life. (Not just us but many others along the waterway.)

There is nothing positive about AAF. Except getting people back and forth to businesses in Orlando and to a lesser degree Miami. Good at north end and good at south end; bad for everyone in between Disruption to the peaceful environment we moved to 6 months ago. It should be along I-95, not impacting so many residential communities, especially when there are no benefits. Increased time that gates are down cause more traffic delays. No not believe Sebastian residents will receive any benefits and, therefore, should not incur any associated costs related to installation, maintenance and or correction of problems. Sebastian relies on tourism, and additional freight trains and high speed AAF trans will not benefit the historic fishing community feeling of Sebastian. Delays in crossing tracks. Doomed to fail just like all other passenger trains. Locate tracks closer to I-95. Delays at R. R crossing are already creating congestion and the flood of cars upon gates opening take a long time to cycle through nearby traffic lights (intersections). In my opinion people will book flights to Miami, West Palm Beach and Orlando and not need a train and or renting a car gives more flexibility. There aren't many people who enjoy the screeching of metal on metal. Instead of vacationing in Sebastian people will find a quieter place and locals will also not get the need to "get away" from the incessant noise. Locate west of I-95. Time wasted in cars lineup. Trains will bisect our town, will hamper access to hospital, will increase noise, will increase accidents, will have only negative impact on our county, is being "railroaded" through.

There is totally insufficient evidence of passenger support for this AAF project. It seems clear there is another agenda driving this project. Relocate west of I-95. So 52 daily trains by 2016??? That's more than 2 per hour; 24 hours a day. Employees driving from west of track would be continually delayed going both ways. This project will effect the every day quality of life: noise, vibration, environmental, pace of life, and effect on nature. It will turn a quiet resort town into an area totally unappealing to tourists and to its citizens. Watch out for freight traffic to increase exponentially.

Move it to the middle of the state. It will delay all appointments and meetings. Feel it is a high-speed freight train, rather than a passenger train. Under crossings or raised crossings not smart.

How long with the crossings be closed? Look at future passenger need and freight need. General FL with tracks to major cities. There is not one benefit for the people of Indian River County. No way would I agree to that many trains at that speed. The track runs close to my home/subdivision. It will disrupt traffic, be noisy and dangerous. Cost of maintenance on a local level. I live 1/2 block from the tracks so noise, inconvenience, cost, loss of property values, higher taxes for maintenance, etc. None of the above resolves the most significant negative impacts of the planned proposed project. Just as I-95 was constructed to the west of populous areas, AAF, West Palm to Orlando needs to build west of Treasure Coast. The vibrations from the train, the noise, the lack of employment will adversely affect Vero Beach. The ultimate purpose of this project is to increase profits of the stakeholders - without give back to communities affected. I live 2 blocks from tracks (noise and vibration). Our wildlife will be endangered particularly the in North Sebastian Conservation Area (scrub jays, gopher tortoises, etc. cross tracks) Build it west, along I-95. Travel from tree 95 to rite. A1A will be negatively affected.

This is very important issue please listen to the public cry. It will kill our way of life. Right of way moved west to farm and ranch area. Our community is just on the west side of tracks; not good for environment. We are a community of 55 and older we do not need environmental and safety issues. Use only electric train above ground.
Congestion and noise will deteriorate the community and county. Should be financed independently.

**Will taxpayer dollars pay for upkeep of the tracks?**

Waited 1/2 hour for one train to pass, then another com by. Already a difficulty getting to US 1.

**Questions:** How may commuters are there to support 32 trains? Vacationers to Disney with children don’t go to Miami night spots and vice versa. Don’t know schedule. Will it run at night?

How much for tickets? Where is parking located at each end? Top Speed is suggested at 130 mph, what is actual average speed due to bridges, turns side track, etc. What actual speed are they going to guarantee? What is total time from entry of station to exit at other station? Any time savings from existing bus running at 70 MPH on 95? What actual speed are they going to guarantee? What is total cost including parking or secondary transportation? Has anybody tried to do 130 MPH on this run? Anybody want to do it? People get killed at 70 what happens when you almost double it?

Second track impact on existing businesses. Freight traffic will probably double at night. Get used to gate closings every 20 minutes. We all live on the wrong side of the tracks. And don’t forget noise, energy pollution. Don’t even suggest local jobs.

Increased traffic due to RR crossing closing more often. Increased noise in the area. I would support AAF if the Amtrak route/rail was used instead.

Going to doctors, hospital, store, drug store; too many trains as it is now. Put train tracks up over road.

Everyone we know has to come over tracks to see us.

I drive a van transporting clients of special needs and cross the tracks several times a day. It will disrupt the normal flow of traffic.

I manage a 70 unit Senior Apt. Community with homes located within a few hundred feet from the tracks. This will be a horrible impact on 70 families. Many of the residents of Graces Landing have health issues and need quick access to the hospital which is on the other side of the tracks. EMP response times can be affected by this train. Move the trains for this high speed train along 95 where there are less homes with elderly and children.

We are a small community close to the tracks and cannot see more train traffic than we have right now. Okay near I-95; think it is needed. Will support if near I-95.

I live west of the R.R. tracks, approximately 2 miles. I am 79 years old and all of my doctors and hospital are east of the tracks on US 1 in Sebastian. I have COPD and RA and Glaucoma and cataracts. All my doctors are on US1 east of the tracks. To spend 3 or 5 minutes for freight train to go through Sebastian may possibly be deadly for me. Please do not loan or fund or guarantee taxpayers money - federal or state - to All Aboard Florida. I am strongly opposed to AAF.

Port Canaveral and Port Miami just completed huge container unloading operations that can receive the largest container ships in the world. Carrying thousands of 53 foot cargo containers that will be double stacked on hundreds of railroad cars going right through our town. The Panama Canal is currently being widened to allow passage of these massive container cargo ships that will be unloading millions of truck trailer 53 foot cargo containers that will be double stacked on railroad cars and run right thru our town so the rich can get richer. There is no reason to have this opposed high speed passenger train, it is all another scam to cover up the real plan of having more freight cars double stacked and double the weight going thru our community and destroying our homes and property values and we receive absolutely nothing for dealing with all this. Quiet zones will not be enough. Tall security fences running along side tracks will not be enough. Thicker rubber pads to replace the 1/4 inch plastic vibration pads currently installed between concrete rail support and solid steel track rails will be not enough. A tall concrete sound deafening wall like you see along some highways to block out the vehicle traffic noise going into those neighborhoods will not be enough. The constant day and night railroad crossing closures so that all these trains can pass thru our town so they can get rich is a violation of our freedom. To travel to stores/hospital/river/beach/schools where ever we would like to go to because of all these trains constantly coming thru our town is unacceptable. We must not allow this to happen to our Sebastian. I love this town and moved here because it is one of the last by the river/kick back/quiet communities. They want to make it so we will all feel like we live at a train station night and day. No way stop the train. Pictures showing how close the second set of tracks will be to his property. Picture of vibration pads torn and broken. The street is 25 mph when kids playing however 30 mph and the train will be going 110 mph.

**Positive Comments**

We will need this service as fuel costs rise. A service we must get the sooner the better. Where the funds come from is unimportant.
As time moves forward overpasses and underpasses will come so no negative impact. This is what happened on the North East corridor - Washington, DC to Boston, MA.

Fun groups going north to Orlando and south to Miami. Easy trip from north or south.

If it works eventually we might have passenger service from all of our county.

If the train stopped in Melbourne, Sebastian or Vero Beach, I would be for it.

Would be more agreeable if the train stopped in Vero Beach or Melbourne.

I have nothing against the freight trains, they are economical for transportation.

Build it now.

Freight lines are an efficient way to transport goods and I can accept the FEC business. A passenger train that any serves a few areas but impact many is a bad idea.
CITY COUNCIL AGENDA TRANSMITTAL FORM

Council Meeting Date: November 19, 2014

Agenda Item Title: Summary of the All Aboard Florida (AAF) Survey which is a response to the Draft Environmental Impact Study

Recommendation: Approve the attached surveys which will be an attachment to the City of Sebastian's Response to the Draft Environmental Impact Study as indicated in step 3 of the NEPA process

Background:
The City Council approved a budgeted amount of $50,000.00 for the AAF project. The AAF project proposes to construct and operate a privately owned and operated intercity passenger railroad system that will connect Orlando and Miami, with intermediate stops in Fort Lauderdale and West Palm Beach, FL. A second set of tracks will be installed for 16 new round-trip intercity passenger train trips (32 one-way trips). Because AAF has applied for a loan under Federal Railroad Association’s (FRA’s) Railroad Rehabilitation and Improvement Financing (RRIF) program, FRA is required under the National Environmental Policy Act (NEPA) to conduct an analysis of the potential environmental impacts resulting from the Project. NEPA compliance is a prerequisite for RRIF approval, and FRA will not approve the Project for a RRIF loan until the NEPA process is complete.

An Environmental Impact Statement (EIS) is a document required by NEPA that describes the environmental effects of a project to inform decision-makers and the public. NEPA is a federal environmental law that facilitates public disclosures and establishes policies for federal agencies to study a reasonable range of alternatives and assess environmental impacts of projects. An EIS must be prepared by a federal agency for any major federal action significantly affecting or with the potential to affect the quality of the natural and built environment. Environmental effects can be both positive (beneficial) or negative (adverse).

The Draft Environmental Impact Statement’s (DEIS) purpose is to disclose all environmental effects associated with the project alternatives, whether they are adverse or beneficial and allow the public to review and comment on the document.

The City of Sebastian held a Public Workshop on October 15, 2014 to obtain comments regarding the DEIS. In addition, The Department of Transportation, Federal Railroad Administration, held a meeting November 5, 2014 to obtain comments. All comments must be submitted in writing to Mr. John Winkle, Federal Railroad Administration, 1200 New Jersey Avenue, SE Room W38-311, Washington, DC 20590 by December 3, 2014.

City Manager Authorization:

Date: 

FYI on a response letter to a concern citizen. There will be more of these concerns from residents.

Mr. Tallant:

I have been asked by our Mayor to respond to your recent e-mail to him. First, I am very impressed regarding your technical knowledge of the issue. I hope you realize that you, or any other citizen, may respond to the DEIS with direct questions to the FRA. Your technical questions, in my opinion, definitely qualify for an answer from the FRA.

Second, the City of Sebastian is in the process of preparing our questions during the public comment period. In addition, we will be conducting a “open house” on 15 October 2014 to receive public input so that staff can incorporate public concerns into our submissions to the FRA.

Third, and perhaps most important. You state that the City Council has decided to ‘support’ AAF’s plan. That is incorrect. Council recently directed me to submit, through our City Engineer, a grant application for ‘possible’ quiet zones. It is my view that I must act in a way to provide for the safest rail crossings possible if AAF comes to fruition. We are applying for those FDOT grants as a contingency. In addition, Council recently passed a resolution requesting the Florida Attorney General to review the AAF/Orlando Expressway Authority as to its legality, and a resolution demanding that ‘no public money’ be used for AAF expansion. There have been no actions by Council that would hint of any ‘support’ for AAF’s plans.

In conclusion, I consider the City still in the information gathering phase. We are working on our responses to the DEIS. We have been as pro-active as anyone in trying to develop contingencies, in monitoring the diagnostic surveys, and in keeping before the public this issue. Frankly, I am the person in charge of developing our Council Agendas. An inspection would reveal that we have the AAF issue ‘talked about,’ or a presentation made on the subject matter, at roughly every other meeting—since December 2013. That is by design, in order to keep the public informed as to the importance of the issue. In addition, we are fully cognizant that FEC/Fortress/AAF controls the rail bed. The City’s actions are meant to protect our citizens to the greatest extent possible.

Joe Griffin

Subject: AAF EIS

Good Morning,

As a resident of the City of Sebastian I am appalled by the decision of the City Council to support AAF’s plan for the High Speed Train from Orlando to Miami. It will be a detriment to our small fishing village that we all have worked hard to keep! Below are just a few of my concerns that I feel you have overlooked and should take the time to investigate.

No where can I find in the EIS showing the results of: "Buildings where Rayleigh waves would cause structural damage." As just using the term "vibrations" does not cover everything accredited to all vibrations in a whole. No where in the EIS does it address the Rayleigh waves. Why? Explain.

What geographical land type was used in the study to determine the impact of the vibrations/Rayleigh waves from the trains passing by?

Where there any distinctions made on the type, age and conditions of the structures in close proximity to the train tracks? And if so, what?

In the Summary of the EIS it states (page S-18), "The Project would have no direct or indirect effects (noise, vibration or change in setting) to the historic resources located adjacent to the N-S Corridor." This is NOT AT ALL the case, there is historic properties directly adjacent to the N-S Corridor in Indian River County alone not to mention the other counties affected.

What if any will be done to mitigate these issues with the areas that will be impacted by the vibrations/Rayleigh waves from the High-Speed trains and increased freight train traffic?

In Rayleigh surface waves the particle motion has both horizontal and vertical components. No where is this discussed in the EIS. The problem to find out a low-cost method to install barrier walls against train-induced ground vibrations has been under investigation. The purpose is to isolate buildings from the traveling Rayleigh surface waves. This usually happens when the soil consists of soft layers of clay. Such places are locating very often in coastal places, where the soil originates from the sea bottom sediments or erosion sludge conveyed by rivers. One promising work method is sheet-piling, in which case the barrier has to be composed of sheet-pile wall with soft isolation layer at its building side. The purpose of the wall is to reduce the amount of soil masses to be removed and also to support the isolation layer. Isolation material could be air cushion or granular material like artificial gravel. The installation work can be
carried out by computer controlled boom system, which allows drive the pile wall in prescribed inclination angle. The boom is equipped with an integrated gripper-driver unit and may belong to an excavator with track wheels or it may be mounted on a customized wagon. By changing cyclically the bucket and sheet piler, the work process can run in piling-digging-layering-filling phases semi-automatically, where the operator assists changes from one internally automatic task to a next one.

In all of the material it shows that the trains will be traveling at a distance of 50 feet from structures, this is not the case in most cities along the Treasure coast. In Figure 4.2.2-4 the AAF EIS shows Locomotive Powered Passenger or Freight trains traveling at 50 mph. However, with existing speeds of the freight trains that travel along the N-S Corridor at 54.2 mph, no where does it show what the impact of the High-Speed train traveling at 103.34 mph through Indian River County, 93.38 mph in St. Lucie Co. and 76.96 mph in Martin Co. Why? Explain.

Thanks for your time and commitment to our beautiful city. Have a great day!

Sincerely,

Joel L Tallant Sr.

Get 6 to 8 hours of sleep nightly

In one multistudy analysis, researchers at the University of Warwick in England found that people who slept less than five or six hours a night were 28 percent more likely to develop diabetes than those who slept six to eight hours. And even though we’ve been told you can’t “catch up” on sleep on the weekend, another study found that sleeping for 10 hours a night on the weekend—after getting just six hours a night during the week—greatly improved insulin sensitivity.

No Relief for Homeowners
And Business Owners
Many people today find that there are not enough waking hours to accomplish all we need to do. Work, long commutes, email, family responsibilities and household chores can eat up much of our waking time.

In order to get chores done or get in a little extra leisure time, many cut corners on sleep. We rationalize that a few hours here and there won't make much difference.

But sleep deprivation can have effects on both your mental and physical health.

So what are these negative effects of not getting enough sleep?

**Negative Effects of Not Getting Enough Sleep**

**Lower stress threshold.** When you’re tired, routine activities, such as stopping at the grocery store on the way home from work, walking the dog or picking up the house can feel like overwhelming tasks.

**Impaired memory.** Deep sleep fosters the formation of connections between cells, and REM sleep aids in memory formation. Students considering pulling an all-nighter to study for that big exam might do better to get some sleep.

3. **Trouble concentrating.** When you’re dragging yourself through the day, it’s hard to stay alert and focused. This is why we don’t want our pilots and surgeons to lose too much sleep. Sleep-deprived people have trouble focusing on tasks and overestimate their performance.

4. **Decreased optimism and sociability.** Whether it’s the effort we have to put into staying awake or other factors, sleep deprivation makes us less hopeful and less friendly.

5. **Impaired creativity and innovation.** A growing body of research suggests that sleep deprivation may have a particular effect on cognitive processes that rely on our experience of emotions.

6. **Increased resting blood pressure.** Several studies have found that sleep deprivation leads to increased blood pressure (Fujikawa et al., 2009) and even half a night of sleep loss has been reported to increase blood pressure in people with hypertension or pre-hypertension (Lusardi et al., 1996).

7. **Increased food consumption and appetite.** Research indicates that acute sleep loss enhances pleasure response processing in the brain underlying the drive to consume food (Benedict et al., 2012). The researchers raise the question of whether chronic sleep deprivation is linked to rising levels of obesity.

8. **Increased risk of cardiac morbidity.** A number of factors can lead to an increased risk of heart attacks, and sleep deprivation is one of them. During experimental sleep deprivation of healthy participants, increases in inflammation associated with the future development of cardiovascular disease occurred.

Why we experience all of these health problems related to sleep loss is not entirely known. The strain of staying awake, alterations in hormone levels that the body releases during sleep, upsetting the strong circadian drive for sleep, loss of REM sleep and other factors may all play a role.

Although scientists may still debate the function that sleep provides us, it is clear that lack of sleep is associated with mental and physical dysfunction.

If you’re one of the chronically tired or if you view sleep as a waste of precious time, it might be time to change the way you think about sleep. You may not be aware of what your brain and body are doing during sleep, but that time is vital to your ability to function and potentially to your life.

Need help with getting to or staying asleep? Try these tips for shutting off your brain before bedtime.

**References**

Andre,

Thanks for the clarification on the percent of FDOT funding for this grant application. Per our conversation, attached is the revised grant letter, NOI letter, construction cost estimate and the schedule. I am waiting for Tom Drake to provide me with the inventory of the rail crossings. Please let me know if there are any additional questions or comments.

Thanks for your assistance

Frank Watanabe
Community Development Director/City Engineer
City of Sebastian
(772) 388-8228

Hi Frank,

Quiet zones historically are requested and funded by a local jurisdiction (applicant). Consequently, the language explaining the grant program (shown below) anticipates that 100% of the total improvement cost would be incurred by the applying jurisdiction. As a result, the program construct requires that total improvement cost (to the applicant) be determined subsequent to and independent of any improvements performed by entities that are not a party to the joint participation agreement, by which the state grant will be allocated. This point was explained thoroughly in our recent conference call.

Please provide a copy of the agreement binding you to a 10% match ($50,000) for the Supplemental Safety Measures (SSM’s) at the crossings in Sebastian along with the other documents you indicated below. Once validated this amount would be the total cost incurred by the local entity applicant (City of Sebastian). The state grant (if awarded) would provide the applicant (by agreement) up to 50% of this total cost.

If you have any additional questions please let me know.

Regards,

André W. Goins, P.E.

Operation Lifesaver  
Always Expect a Train! Look, Listen & Live

Per request here is the information on the Quiet Zones Grant Program.

The Department of Transportation (Department) State Grant Funding Program for Quiet Zones requires a letter of request (attached as - Sample Grant Request Letter) which must include:
- Complete Notice of Intent to Establish a Quiet Zone package (NOI information included in FRA QZ Document Package attachment)
- Estimated costs; including the percentage to be provided by the Quiet Zone Applicant
- Projected project schedule

Information on FDOT candidate selection priorities are shown in the FDOT Quiet Zone Interest Letter (attached) with principal criteria also shown below.
Instructions on completing the Notice of Intent (NOI) and a sample NOI are provided inside the FRA QZ Document Package (attached).

Please note, the $10 M State Grant Funding Program for Quiet Zones is to be distributed statewide within the July 1, 2014 – June 30, 2015, fiscal year through a Joint Participation Agreement (Included in packet – Joint Participation Agreement). This funding will not exceed 50 percent of the total costs of any Quiet Zone capital improvement project. The Department will distribute the funds with consideration given to the percentage contributed by the Quiet Zone Applicant, the number of rail crossing closures submitted within the Quiet Zone corridor to enhance safety, and the availability of funds within the fiscal year deadline.

The deadline for submitting your Quiet Zone Grant Request Letter is October 15, 2014.

So that we can ensure that uniform information is disseminated, please advise all interested parties to direct their questions to the individuals shown below:

Information on the Quiet Zone process can be found at http://www.fra.dot.gov/search?q=Quiet+Zones. If you need clarification on the Notice of Intent to Establish a Quiet Zone process or have other technical Quiet Zone inquiries, please contact Tom Drake, FRA, at (770) 251-6186.

For grant funding questions and to discuss any questions or concerns, please contact Andre Goins, FDOT’s Rail Operations and Programs Administrator at (850) 414-4620 or andre.goins@dot.state.fl.us.

Subject: Sebastian Quiet Zone NOI

Andre,

Thanks for reviewing our draft Quiet Zone Grant Application submittal. Per our conversation on our submittal, I will revised and resubmit the following:

- Revised letter per the sample format with the local match % and requested grant amount
- Resend the Quiet Zone NOI
- Submit the rail inventory for the five crossing

I emailed Tom this afternoon to request for the rail inventory for the five crossing. As you know he is quite busy, so is there another rail person at FDOT that can assist me to locate and pull this information for the submittal?

Thanks
Frank Watanabe
Community Development Director/City Engineer
City of Sebastian
(772) 388-8228
Cindy,

More info on AAF to add to our submittal letter.

Joe and Frank,
Please find attached an update of the original list I sent to you. I filled it out some and put it in a better format to read. I know you may not be interested in most of the stuff, so just use what you need. Note the archaeological in or near the St. Sebastian bridge landing at Roseland.
Last night, I talked to Ken Hardin of Janus Research and kidded him about missing two NR Districts... didn't tell him where, he had no clue where. Obvious he did not do the report, but he is probably looking at it this morning.
When I ask him and the FRA head guy (David) separately about no local input, no coordination, and not contacting local people before DEIS was written - David was concerned and seems sincerely interested. Of course, his answer was to write a letter and they would be sure to answer. Ken gave the "song & dance" about contacting CLGs and "informants" - none, of course, are connected to Indian River County.
Hope this is of help. If you need anything else, please let me know.

Joe and Frank,
For your information and file. Kate may send this to you too. We had a conference call with the outside council in New York and he was very interested in the lack of coordination under NEPA 106 and also the major cultural resources that were not discussed in the DEIS. That led to the short list below.
Still working on the waterfront...looking good.
Ruth

Subj: Short list for outside council

Kate,
Attached is the "short" list you requested. There are two archaeological sites - Vero Man and Gifford Bones, also, the two National Register Districts in Sebastian. The attached map is from the walking tour for Sebastian and shows the RR and many of the "contributing" buildings to the Districts.

I did add two possible Section 4 (f) projects - Pocahontas Park and the Hallstrom Farmstead and Conservation Area.

Have fun!
Ruth

We still need to do Gifford Community!
National Register of Historic Places

Current Function: Commerce/Trade, Domestic
Current Sub-function: Business, Multiple Dwelling, Single Dwelling
Contributing Resources:

List of Contributing Resources

There are a total of 40 contributing resources, including outbuildings, in the Sebastian Old Town Historic District and 28 are primary buildings. Many were significant to the development of the town for being associated with Sebastian’s early citizens. The residence at 1063 Louisiana Avenue has had some fire damage, but is still considered a contributing resource, because it was the first doctor's office in town and the fire did not completely destroy the building's historic integrity. (PHOTO 32)

Non-Contributing Resources:

Non-contributing buildings are found scattered throughout the district. There are 14 non-contributing buildings and 11 are primary structures. The starkest non-contributing resource is a Bell South Telephone Commercial building located at 1137 U.S.1 (PHOTO 33) Most, however, are outbuildings constructed within the last fifty years. Other non-contributing buildings include residences built in the 1960's. These are heavily obscured by the landscape. (PHOTO 34). A few are historical buildings that have endured significant alterations that haven't left much of the original exterior fabric exposed. (PHOTO 35) A non-contributing building located at 700 Main Street was constructed in 1957 and was the first city-owned City Hall. Although it does not currently meet the fifty-year rule to be considered a contributing structure, the local Sebastian Area Historical Society is certain to put it on their list in 2007.

E. Statement of Significance

Applicable National Register Criteria
(Place "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

☐ A Property is associated with events that have made a significant contribution broad patterns of our history.

☐ B Property is associated with the lives of persons significant in our past.

☒ C Property embodies the distinctive characteristics of a type, period, or method of construction of represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations
(Place "x" in all the boxes that apply.)

Property is:

☐ A owned by a religious institution or used for religious purposes.

☐ B removed from its original location.

☐ C a birthplace or grave.

☐ D a cemetery.

☐ E a reconstructed building, object, or structure.

☐ F a commemoritive property.

☐ G less than 50 years of age or achieved significance within the past 50 years

(Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)
**Visualize This:** A True High-Speed Train System built along either the I-95 or Florida Turnpike Transportation Corridors West of our Coastal Cities and Towns. The Florida East Coast Railway Tracks have been replaced with a Landscaped Linear State Park Greenway with Bicycle and Walking Paths that are highly utilized by our citizens and enhances the quality of life rather than destroying it.

You may recall that a True Florida High-Speed Rail Project with speeds of up to 186 mph was proposed with initial service between Tampa and Orlando and with plans to extend the service south to Miami along the existing I-95 and Florida Turnpike Corridors that already have traffic overpasses and noise abatement walls along the populated areas and which would allow the trains to attain much higher speeds. There would be no issues with the trains bisecting the towns and stopping Automobile, Public Safety Vehicles, Marine Traffic and Pedestrians along the way 32 times (or more) each day.

Governor Rick Scott, during his second month on the job in 2011 rejected a whopping $2.4 Billion Dollars in Federal Money to help build this Proposed High Speed Rail Line from Tampa to Orlando and Orlando to Miami. Why?

Now Privately Owned Florida East Coast Railway is trying to force a Second Class Not-So-High-Speed System on us using a century old rail right of way that has long outlived its usefulness. This Route through the Treasure and Space Coasts bisecting our cities and towns will significantly damage the Quality of Life, Health and Safety of our Citizens and the Economies of the Region.

One of the major incentives for FECR to upgrade the tracks is to allow more Freight Trains through our region as a result of the Port of Miami Improvements which will allow Huge International Container ships to unload there and the containers to be transported via rail with more potential for derailment disasters along the way.

Scott has now pledged $215 Million in Florida State funds to build a massive Orlando Transit Hub with an additional $467 Million from the Greater Orlando Aviation Authority totaling $682 Million to serve the Privately Owned All Aboard Florida. This helps only Miami, Ft. Lauderdale, Palm Beach and Orlando and does nothing for the Treasure and Space Coasts as both passenger and freight trains loudly rumble through our cities and towns and across our waterways at least 32 times per day.

I suggest the following: Offer Florida East Coast Railway / All Aboard Florida an easement along the Florida Turnpike or I-95 to build new tracks in exchange for vacating and abandoning the existing tracks through the centers of our coastal cities and towns and deed the land and right of way to the State to be used as Linear Park. The State, in cooperation with the Cities and Towns along the route can then remove the tracks and install bicycle and walking paths with Florida Landscaping along the Greenbelt.

**Two Much Better Route Options:**

- **The Turnpike Route is more direct** and would significantly cut the travel time - Downtown Miami to Orlando International Airport is approximately 230 Miles.

- **The I-95 to SR-528 Route** is approximately 273 miles but runs closer to 4 International Airports along the way: Miami, Ft Lauderdale-Hollywood, Palm Beach and Melbourne. Shuttles from the airports delivering people to a True High Speed Train Terminal would greatly increase the number of passengers utilizing the trains and boost the Florida economy.

Looks like a Win-Win solution to me

Re: All Aboard Florida

Dear Sir:

CSX Transportation is one of only five Class One railroads in the United States. CSX presently furnishes passenger rail service between Miami and Orlando via Amtrak. If high-speed rail is such a great opportunity, I wonder why CSX has not jumped at the chance to provide that service.

In fact, no railroad company is planning to provide the high-speed rail service. The current proposal is by a Wall Street hedge fund, Fortress Investment Group (FIG). Fortress bought the FEC in 2007 and has set up All Aboard Florida as a subsidiary. At Monday's meeting with the Board of County Commissioners, the All Aboard Florida representative acknowledged that the money being borrowed by All Aboard Florida would be used to build a second and third set of tracks that would be used by the FEC in its freight operations.

That's only half of the story. The first, second and third set of tracks and the roadbed will be owned by the FEC and will not be subject to the lien of the mortgage given by All Aboard Florida to secure its debt.

If All Aboard Florida should fail, then the FEC has the improved roadbed and the second and third set of tracks free and clear of any lien.

This was signed
by Richard Neill
That strikes me like a bank lending someone the money to build and furnish a home and taking back a mortgage on only the furniture.

If the FEC is not willing to guarantee the loan to All Aboard Florida and secure it by a mortgage on the real estate and all improvements, then the loan should not be made.

With best regards.

Yours very truly,

Richard V. Neill

Deb and Paul Nelson

1309 Louisiana Ave.

Sebastian, Florida 32958

To whom it may concern: October 15, 2014

We are writing this letter with deep concern to the proposed expansion of All Aboard Florida. As a new home owner on Louisiana Avenue in Sebastian, Florida, it concerns us that there is a potential of additional train tracks and train activity directly in front of our home. The increased train activity will not only affect us as homeowners but it will negatively impact those who do business in Sebastian, those who shop in Sebastian and those who visit Sebastian.

Increased volume of freight trains or use of high speed passenger trains brings no direct gain or value to our community; in fact, it will substantially decrease the value of our community. We strongly vote “NO” All Aboard Florida. However, if we cannot stop this project we would ask that there is consideration to moving it from the East Coast of Florida to a less populated area. If this project is supported and comes directly through our small communities in Florida, we would expect there to be a substantial decrease in property taxes for both residents and business owners along the route.

Please pay close attention to who is profiting from and who is losing from this venture.

Respectfully submitted,

Deb and Paul Nelson
ALL ABOARD FLORIDA
WILL DESTROY VERO BEACH

32 high speed trains + 20 freight trains = 52 trains per day
110 m.p.h. trains ripping through our neighborhoods
Threat to safety: 221 deaths in FEC corridor in 15 years
Cut off from hospital and emergency services
$1.5 billion in taxpayer money
5% - 20% decline in real estate values near the tracks
Transit Oriented Development = high density population +
Stack-and-Pack high rises---Infrastructure overload
Traffic congestion, pollution, noise, vibration, disruption to

Good Morning Cynthia,
I am sorry I didn’t get these to you soon, but here are some of the research I have found regarding rayleigh / love waves causing structural damage to buildings in close proximity to railway lines. I hope this helps as I do not wish to see our small community be destroyed along with history. Thanks and have a great day!

Accepted: FL-603 Public Assistance Grant Training
Mayor McPartlan and members of the city council:

As we learn more about the plans of All Aboard Florida it is clear this will be disastrous for Sebastian and all Treasure Coast residents and businesses.

A representative of AAF told the St. Lucie County Commission that two more train tracks (not one) are planned to run through our towns. So we can multiply the number of track closings that will cut off our people from their emergency room and doctors.

Just as upsetting is the fact that more freight trains will be running through our towns. A few nights ago a late night show cited the number of train wrecks throughout the US and Canada. These wrecks not only blocked rail crossings for hours, but killed town residents when freight trains carrying oil, gas and other dangerous cargo exploded sending walls of fire blocks wide.

Also cited was the fact that freight trains are pulling 100 cars at a time.

AAF has misrepresented their financial plans to the public. A now proven fact. So what about their stated plan to run high-speed passenger trains? Passenger trains are unprofitable. This explains no passenger train stops. But freight trains make money.

The expanded Miami Port is bringing in more large cargo ships that need transport of their cargo.

Put these facts together and AAF plans are clear. They plan freight trains picking up ship cargo in Miami to move it north. Very bad news for all Treasure Coast towns where train tracks run right through high population neighborhoods.

I hope our city council will take a firm stand, on the record, against AAF. Tell them to go to I-95.

Ruth Sullivan, Sebastian business and home owner
To: City of Sebastian  
Re: All Aboard Florida & Quiet Zones  

We all live in Sebastian & Indian River County for its bedroom community & quiet living.  

That seems this is all going to change for our community in the next few years with All Aboard Florida doubling the freight trains. What a disaster this will be for all living close to & even miles from the track, not to mention engineering delays on the west side of the tracks.  

This should be voted on by the people of the counties to be subject to such an invasion of our lives, this is like a dictatorship. Safety issues, "Accidents would destroy homes & life close to tracks."

This morning alone from Main St to the 5/8, the horn blew 13 times at 8:15 a.m. Oct 13, 2014 3:40 a.m. horn blew 8 times at 5:13 a.m. 9 times. WE NEED TO SLEEP! WE NEED A QUIET ZONE.  

Sleep is extremely essential to good health, ask any doctor & without a quiet zone hundreds of thousands of people along RR Tracks & miles away will be affected with health issues.  

All these trains will eventually
Compromise our homes & pools by shifting the ground within a short period of time, leading cracks in floors, walls & pools.

What gives you people from All About Florida, the right to destroy so many wonderful communities.

What happens to our Property Values? They will plummet. Do we get a Tax Break as our homes become unsellable or Rental Property won't rent due to 60 or more trains a day?

Why is this Happening? Where are our State laws to protect Tax Paying Citizens from losing what we have worked so hard to achieve. Let them put this track thru their gated communities if they want it so bad, & leave us alone, they don't want all this noise where they live!

C. Dayke
25 Palmer Dr.
Orlando, Fl. 32858

P.S. Why should the State be punished for people in Orlando & Marine who's only to BENEFIT?
All Aboard Florida Comments—October 15, 2014

To: Sebastian City Council

From: Betty Mattiford
1985 E. Lakeview Drive
Sebastian, Florida 32958
772-228-9207

1. I am against adding passenger trains on the tracks along Rt. 1 that pass Barber Road.

2. We in Park Place although not directly adjacent to the tracks can hear the freight trains that pass blowing their horns.

3. One of the reasons I moved there was because shopping at Publix and Walgreens on the corner of Rt. 1 and Barber was close by. I could be held up countless times a day trying to reach these close locations.

4. All of my doctors are along Rt. 1 in Sebastian or south in Vero Beach. These trains would add to my time trying to keep appointments.

5. I have to cross the tracks to get to all the cultural activities and restaurants in Sebastian and Vero Beach at some point if not at Barber Road.

6. These 32 additional trains will lower the value of my house because of the noise and inconvenience they will cause.

7. With that many trains going 100 mph there is bound to be an accident at some point in time either with the passenger trains or concurrently running freight trains.

8. Although only speculated, I do believe there will be increased freight traffic with the new additional tracks.

9. I also think the passenger train service will not be financially feasible and thus will want a government bailout which means my tax dollars will be paying for this.

10. I see no local benefit at all in any way to approving this passenger service.

John Winkle
Federal Railroad Administration
1200 New Jersey Ave. S.E.
Room W 38-31
Washington, D.C. 20590

Dear Mr. John Winkle:

The purpose of my letter today is to urge you to OPPOSE the All Aboard Florida Project. Any increase in the current usage of those East Coast Florida rail tracks would negatively impact communities on the Treasure Coast significantly.

There are 78 grade crossings along the Treasure Coast all of which currently serve those communities. Emergency responses and normal vehicular traffic will be greatly delayed by an increase in track usage. The ALL Aboard Florida Project will impact services daily in those areas and create unacceptable roadway conditions. Any delays are unacceptable.

Property values will be negatively impacted in an area already stressed by foreclosures. Noise & vibration will negatively impact residences and businesses along those current corridors.

Low interest loans from the Federal Railroad Administration may help the All Aboard Florida Project to get underway. What it does to the taxpayer in these areas is disgraceful. It will degrade their property values, impede emergency response assistance and then ask them to subsidize the project with their tax dollars. Talk about adding insult to injury. Surely the Federal Railroad Administration would not wish to desecrate the Treasure Coast.

Why not support the development of brand new tracks along the central portion of the state where the impact to a highly populated east coast would not be so great. Add another Auto-Train to the All Abord Florida concept and then you really have something to "toot your horn" about.

Thank you for your prompt attention to this very serious matter. There are some very high stakes with All Aboard Florida's current Plan.

Yours truly,

Janet M. Bucossi

Kate,

Here are the papers I was speaking with you about last night. I have included the titles, in case the links don't work.

The Distributional Impact of High Speed Rail Upgrade in Ching – No County Left Behind? Y Qin October 21, 2013

High Speed Rail Upgrade Leads to Economic Slowdown in Counties: Yu Qin

There are other papers out there that address HSR in Korea and in Europe. B.

Beth L. Mitchell  
President / CEO
Kate,

The following write-ups are for the two archaeological sites and two historical districts not discussed in the DEIS report. I have also added a “possible” list of Section 4 (f) sites with an explanation.

I hope this is what you wanted. This would be the short list – I still have the long list.

Ruth

******************

Archaeological Sites - These are two known “paleo” sites located along the FEC corridor where upgrading of the railroad bridges are to take place. Without detailed plans (only the 30% plans are available) it is difficult to determine impacts. - The Vero Man site is eligible for National Register and the Gifford Bones may also be eligible.

Vero Man:

This site is located along the Main Relief Canal (Van Valkenburg Creek) – The railroad bridge currently over the Main Relief Canal is slated to be upgraded. Historically, the Main Relief Canal was a tidal creek called Van Valkenburg and was joined by several smaller creeks in the area near present day U.S. 1

The channelization of this creek was part of the Plan of Reclamation proposed by Indian River Farms Land Development when they purchased land from Florida’s Trustees of the Internal Improvement Fund (C. 1913)

As the channelization of Van Valkenburg Creek took place not only fossilized “paleo” bones of mega fauna appeared out of the canal banks, but human bones were unearthed at two separate sites – male and female – hence Vero Man.

This is a large site (approximately 18 acres or more) and extends east under the railroad and U.S. 1 - originally Dixie Highway. The site also extends to the north and to the southwest. The construction of a City stormwater project was halted several years ago because of the impacts to this expanded site.
Archaeologists from Mercyhurst University, the local Old Vero Ice Age Committee, and scientists from the University of Florida have been working at this site over the past few years. Significant artifacts along with value information have been uncovered during recent excavations that continue to support the theory that this area was important to a large number of extinct species and to the Paleo-Indians that hunted them. The timeline has been established at 12,000 to 14,000 years ago and may be even older. The archaeological activities, the research, and continued excavations are providing valuable information about the earliest people to inhabit Florida. The Vero Man site - Florida Master Site File #8IR09 - has been determined to be eligible for the National Register by Florida’s State Historical Preservation Officer (SHPO). The present of Paleo-Indians, extinct species, possibly hunting weapons, and an authenticated prehistoric art etching may make this site considered a potential World Site.

**Status:** Listed NRHP

**Impacts:** Disturbance and destruction during bridge upgrade. Only 30% of plans available.

**Gifford Bones:**

Located at the North Relief Canal/Houston Creek, the archaeological site is recorded as Florida Master Site File #8IR07 and #8IR08. These sites are locally known as the Gifford Bones and in Rouse (1951) page 171, a description of the sites are given. FMSF #8IR07 is noted as “in side of drainage ditch” where bones of ground sloth, camel, mastodon and other animals were found. At FMSF #8IR08 a stemmed flint projectile point “Dug out of top of ... brown sand in new canal north of Gifford ...”.

The drainage ditch was constructed for the Plan of Reclamation of the Indian River Farms Land Development Company. This narrow canal on both the west and east sides of the RR bridge and Old Dixie Highway Bridge have yielded fossilized bones for decades. This is a “paleo” site and the present of mega fauna and a possible stemmed flint projectile (#8IR08) could prove these sites to be as significance as the Vero Man site that is just few miles to the south.

In the 1990 archaeological survey conducted by Indian River County, this area was not investigated because of the active uses of both a working railroad and busy roadway.

**Status:** These sites may prove to be one large site and are potentially eligible for NRHP.
**Impacts:** Disturbance and destruction during bridge upgrade. Only 30% plans are available.

**Historic Districts:**
The two Districts listed below are National Register Districts. These two National Register Districts were not acknowledged or discussed in the NEIS.

**Old Town Sebastian Historic District East***:
- **Status**: Listed August 2003 on National Register of Historical Places.
- **Impacts**: Vibration, noise, safety, viewshed

**Old Town Sebastian Historic District West***:
- **Status**: Listed January 2004 on National Register of Historical Places.
- **Impacts**: Vibration, noise, safety, viewshed

These two Districts are separated by the Florida East Coast Railway Corridor FMSF #8IR1518.

Old Town Sebastian Historic District West includes a segment of the original Dixie Highway (now called Louisiana Street) along with a number of buildings and structures in a narrow strip between Louisiana and the RR tracks to the east. While Old Town Sebastian Historic District East faces U.S. 1 with the RR tracks to the west.

There are over 40 contributing sites or buildings in these two districts with a mixture of both residential and businesses. The period of significance is 1893 with other important dates of 1893, 1920 and 1946. The Bama Lawson House is located in the East District and was placed on the NRHP in 1990.

These two Districts were presented to SHPO in Tallahassee as one application for review, but the National Register Review Board recommended two Districts because a third linear district eligible for National Register would compliment both an East and West District. That linear district was the Florida East Coast Railway – FMSF #1497/8IR1518.

Today, we have Old Town Sebastian Historic District East and Old Town Sebastian Historic District West with the original alignment of the Florida East Coast Railway (eligible for NRHP) dividing the two Districts. [See Map]

*Viewseshed: The Indian River Lagoon National Scenic Byway follows U.S. 1 south from Brevard County. In the vicinity of the two National Register Districts in Sebastian [Old Town Sebastian East and West] the viewsesh includes the Atlantic Coastal Ridge (an ancient dune line), the Byway (U.S. I), the Sebastian “working waterfront”, and the Indian River Lagoon. - Ruth
Possible Federal Transportation Act - Section 4(f):

Pocahontas Park was discussed as a Section 4(f) in Table 4.4.5-2, page 4-125. The Park is owned and managed by the City of Vero Beach, not Indian River County as reported. The DEIS did not discuss that this City Park also contains two historic buildings (see below). - Ruth

1. Pocahontas Park and Historic Buildings
Indian River Farms Land Development Company platted the Town of Vero for their 55,000 acre land development. In the 1913 plat for the town, Pocahontas Park was incorporated as the town’s park and located adjacent to the Florida East Coast Railway. Pocahontas Park’s facilities include a playground, tennis courts, shuffle board, fountains, and shaded benches. It is located within the boundaries of the designated Vero Beach Main Street Program, a recognized statewide program.
Status: Potentially eligible
Impacts: Vibration, noise, and safety.

Also, located within Pocahontas Park are the two buildings below. This Park is listed on page 4-141 of 4.4.5 Cultural Resources of the DEIS. The write-up for Pocahontas Park is incorrect. This is a Park belonging to the City of Vero Beach. No mention is made of the location or the buildings within the Park and their functions. - Ruth

Community Center (C.1955) – FMSF #8IR1464 is located at 2266 14th Avenue. This is the City’s main community center. It is locally significance as a cultural resource. It is not in the APE as described for cultural resources, but the use of this building for community events would be impacted by the AAF proposal. Noise, vibration, and safe issues will be a challenge in this C.1955 building. The parking is in the APE and without fencing, barriers, and buffers to prevent people, especially children, from visiting the tracks; it is just accidents waiting to happen. This building is located within Pocahontas Park.
Status: Locally significance
Impacts: Vibration, noise, safety.

Vero Heritage Center (C.1936) – FMSF #8IR624 (aka Physical Arts Center) is located at 2146 14th Avenue. It was listed on the National Register of Historical Places in January 1993. Built during the depression years, this was the City’s first community center. Leased and restored, the Vero Heritage, Inc. has continued to provide a place for events and meetings while operating a small museum dedicated to the citrus industry.
Again, noise, vibration, and safe issues will be a challenge for this non-profit and this C. 1936 building. The building is not in the APE as described for cultural resources, but the use of this building for events, meetings, weddings, and community affairs would be greatly impacted by the AAF proposal. The parking for this building is in the APE and without fencing, barriers, and buffers to prevent people, especially children, from visiting the tracks; it is just accidents waiting to happen. This building is located within Pocahontas Park.

**Status:** Listed on NRHP  
**Impacts:** Vibration, noise, and safety.

***********

Neither the Hallstrom Farmstead nor the Conservation Area were discussed in the DEIS. The Hallstrom House Museum is NOT in the APE but the barns are. The barns are considered a Phase II of the House Museum project. Roland and Andy may know whether this should be considered a Section (f). – Ruth

2. Hallstrom Farmstead and Conservation Area:  
Hallstrom House Museum and Barns – 1723 Old Dixie – FMSF #8IR385 – This three-story brick house was built C. 1918 by Swedish immigrants growing pineapple and citrus along the Atlantic Coastal Ridge. It was listed on the National Register of Historic Places in June 2002. The Indian River County Historical Society inherited the House and five acres of the surrounding farmstead. This house was restored and is currently a House Museum. Phase II of this restoration will be the leased barns that are located across Old Dixie Highway, immediately adjacent to the FEC Tracks, within the APA as outlined in the DEIS. Indian River County purchased the remaining acreage (approximately 100 acres) from the Hallstrom estate as the Hallstrom Conservation Area. The acreage surrounding the House Museum on the Atlantic Coastal Ridge (ACR) is home to a number of endangered species – gopher tortoises, scrub jay, and indigo snakes. Lakela's mint, listed by the U.S. Fish and Wildlife as a rare and endangered plant is found growing on the ACR and only in this area. Approximately 14 acres of the County’s conservation lands are found east of Old Dixie and immediate adjacent to the FEC tracks. This includes the barns that are to be leased to the Historical Society for a Phase II restoration. This 14 acre tract contains both wetlands and shrub. The eastern border of these 14 acres is in the APE of the AAF project.

The Historical Society and Indian River County has worked together to restore the cultural and natural resources of the entire Hallstrom Conservation Area.  
**Status:** Listed on NRHP - Society property only  
**Impacts:** Vibration, noise, and safety.

Dear Andrea Coy!

   Hey! Mark Lund Here!

   1053 Louisiana Ave. Sebastian.

   I did not know who to give this to and I knew you would. Please help me get this to the right people! Thank You!

   This is mine and other peoples Responses to:

   Train Tracks,

   (NOISE and VIBRATIONS),   (Use Anti-Vibration Pad Isolators)

   Info. Enclosed

   AIR Horns Blasting Thru Intersections as Train goes thru Sebastian,

   (Redesign Crossing Stations For High Speed Crossings That Don’t Break Down)   (NO MORE BLASTING OF AIR HORNS THRU SEBASTIAN)

   And

   A Safety Concrete 6 FOOT High Plus Barrier as seen in Construction Zones , Etc!!!

   Or

   6 FOOT High Plus Safety Fence with Barb Wire Top Wires.

   Either one of the Above to Keep People, Kids, Animals from Wondering onto tracks and being Killed by a train going over 100 Miles Per Hour!!!!

   PROPERTY TAXES DISMISSED!!!! Repairs and Damages to OUR HOMES From ALL THESE FREIGHT TRAINS and HIGH SPEED PASSENGER TRAINS DAY AFTER DAY AFTER DAY, YEAR AFTER YEAR AFTER YEAR!!!!!!!
Mayor McPartlan and members of the city council:

As we learn more about the plans of All Aboard Florida it is clear this will be disastrous for Sebastian and all Treasure Coast residents and businesses.

A representative of AAF told the St. Lucie County Commission that two more train tracks (not one) are planned to run through our towns. So we can multiply the number of track closings that will cut off our people from their emergency room and doctors.

Just as upsetting is the fact that more freight trains will be running through our towns. A few nights ago a late night show cited the number of train wrecks throughout the US and Canada. These wrecks not only blocked rail crossings for hours, but killed town residents when freight trains carrying oil, gas and other dangerous cargo exploded sending walls of fire blocks wide.

Also cited was the fact that freight trains are pulling 100 cars at a time.

AAF has misrepresented their financial plans to the public. A now proven fact. So what about their stated plan to run high-speed passenger trains? Passenger trains are unprofitable. This explains no passenger train stops. But freight trains make money.

The expanded Miami Port is bringing in more large cargo ships that need transport of their cargo.

Put these facts together and AAF plans are clear. They plan freight trains picking up ship cargo in Miami to move it north. Very bad news for all Treasure Coast towns where train tracks run right through high population neighborhoods.

I hope our city council will take a firm stand, on the record, against AAF. Tell them to go to ------ I95.

Ruth Sullivan, Sebastian business and home owner
To: City of Sebastian

Re: All Aboard Florida & Quiet Zone

We all live in Sebastian & Indian River County for its bedroom community & quiet living. That seems this is all going to change for our communities in the next few years with All Aboard Florida & double the freight trains. What a disaster this will be for all living close to & even miles from the tracks, not to mention emergency delays on the west side of the tracks.

This should be VOTED on by the people of the Counties to be subject to push an increase of our lives this is like a dictatorship, safety issues & accidents could destroy homes & life close to tracks.

This morning alone from Main St to the 518, the horn blew 13 times at 8:15 AM Oct 13, 2014, 3:40 AM, horn blew 8 times at 5:15 AM 9 times. WE NEED TO SLEEP! WE NEED A QUIET ZONE.

Sleep is extremely essential to good health, ask any doctor & without a Quiet Zone, hundreds of thousand of people along R R Tracks & miles away will be affected with health issues.

All these trains will eventually
Compromise our homes & pools by shifting the ground within a short period of time leading cracks in floors, walls & pools.

What gives you people from All about Florida, the right to destroy so many wonderful communities.

What happens to OUR Property Values, they will plummet. Do WE get a Tax Break as our homes become unsalable or Rental Property won't rent due to 60 or more trains a day?

Why is this Happening? Where are our State laws to protect Tax Paying Citizens from losing what we have worked so hard to achieve. Let them put their tracks thru their gated community if they want it so bad, let us alone, they don't want all this NOISE where they live. 

C. Dayke
35 Palms Dr.
Sebastian, Fl. 32958

P.S. Why should the State be punished for people in Orlando & Miami, GA use only to BENEFIT?
Bite The Bullet Train

How many Commuters are there to support 32 trains? Vacationers to Disney with children don’t go to Miami night spots and vise versa? Don’t know schedule. Will it even run at night?

How much for tickets? Profit margin for 3 year pay back of 1.6 Billion? If there was a $25 profit per rider it would take 64 million Passengers. 80 per car, 5 cars, 400 per train X 32 = 12800 per day into 64 million = 5000 days or 13.6 years. Without interest!

Where is parking located at each end? How much (3000 To 6000 cars)? Alternate transportation accessibility for 400 people every 20 minutes? Traffic jams near terminals! Are there hidden property purchases involved? Who presently owns?

Top Speed is suggested at 130 MPH What is actual average speed due to bridges, Turns side tracks, etc.? What actual speed are they going to guarantee?

What is total time from entry of station to exit at other station? Any time savings from existing bus running at 70 MPH on 95? Any cost saving LOL.

What is total Cost including parking or secondary transportation?

Has anybody tried to do 130 MPH on this run? Does anybody want to?

People get killed at 70 what happens when you almost double it?

Second track impact on existing businesses. Freight traffic will probably double at night. Get used to gate closings every 20 minutes. We all live on the wrong side of the tracks. AND don’t forget Noise. Energy pollution? Don’t even suggest local jobs.

Re: All Aboard Florida

Dear Sir:

CSX Transportation is one of only five Class One railroads in the United States. CSX presently furnishes passenger rail service between Miami and Orlando via Amtrak. If high-speed rail is such a great opportunity, I wonder why CSX has not jumped at the chance to provide that service.

In fact, no railroad company is planning to provide the high-speed rail service. The current proposal is by a Wall Street hedge fund, Fortress Investment Group (FIG). Fortress bought the FEC in 2007 and has set up All Aboard Florida as a subsidiary. At Monday's meeting with the Board of County Commissioners, the All Aboard Florida representative acknowledged that the money being borrowed by All Aboard Florida would be used to build a second and third set of tracks that would be used by the FEC in its freight operations.

That's only half of the story. The first, second and third set of tracks and the roadbed will be owned by the FEC and will not be subject to the lien of the mortgage given by All Aboard Florida to secure its debt.

If All Aboard Florida should fail, then the FEC has the improved roadbed and the second and third set of tracks free and clear of any lien.

This was signed
By Richard Neill
Letters to the Editor
Page 2
September 19, 2014

That strikes me like a bank lending someone the money to build and furnish a home and taking back a mortgage on only the furniture.

If the FEC is not willing to guarantee the loan to All Aboard Florida and secure it by a mortgage on the real estate and all improvements, then the loan should not be made.

With best regards.

Yours very truly,

Richard V. Neill

Complaints About Railroad Growth Thru Sebastian: Today: 10/15/14

Today is a Perfect Example With All Railroad Crossings Thru Sebastian Broke Down and (ALL) Vehicles Unable To Cross. Personal Vehicles/Emergency Vehicles/Fire Trucks/Ambulances/My Grand Kids School Bus/Nothing Can Get thru Today. This Wednesday Afternoon @ 3:45 PM. Crossings have now been down for over an hour. I am even running late now to the meeting about All Aboard Florida to turn in my complaints! Well Here’s the Perfect Example!!!! I even had to Park my vehicle and walk across tracks to make it to Today’s Meeting!

My Complaints Are As Follows:

WE DO NOT NEED ANOTHER TRACK INSTALLED FOR MORE FREIGHT CARS SO THAT THE WALL STREET HEDGE FUND- (F.I.G)

(FORTRESS INVESTMENT GROUP)

CAN MAKE ITS INVESTORS MORE MONEY! WHILE WE WOULD HAVE TO DEAL WITH ALL THESE EXTRA TRAINS/VIBRATIONS FROM THE WEIGHT THAT IS DESTROYING OUR HOMES AND OUR PROPERTY VALUES! LOUD LOCOMOTIVE ENGINES SCREAMING THRU OUR QUIET COMMUNITY NIGHT AND DAY! AIR HORNS BLASTING AT ALL HOURS DAY AND NIGHT!

WE DO NOT NEED A HIGH SPEED PASSENGER TRAIN PERIOD BECAUSE THERE HAS NEVER EVER BEEN ENOUGH PEOPLE THAT TRAVEL BY TRAIN TO FINANCIALLY SUPPORT THIS.

THIS IS NOTHING BUT A LIE TO THE PEOPLE SO THAT MORE FREIGHT TRAINS WITH HUNDREDS OF CARS CARRYING THOUSANDS OF STACKED
CARGO CONTAINER SHIPMENTS CAN BE DELIVERED TO FURTHER FUND THE RICH!

VERY DANGEROUS CARGO TOO!!!!

THAT CAN DESTROY OUR TOWN IF THERE WAS A DE-RAILMENT OF CARS! DESTROYING HOMES THAT THESE TRAINS RUN RIGHT THRU THEIR BACKYARDS RIGHT UP AGAINST THERE HOUSES!

ALSO KILLING THE PEOPLE INSIDE.

(MY FAMILY LIVES ON THESE TRACKS-SEE PHOTOS INCLUDED!!!!!!)

PORT CANAVERAL HAS JUST COMPLETED A HUGE CONTAINER UNLOADING OPERATION THAT CAN RECEIVE THE LARGEST CONTAINER SHIPS IN THE WORLD! CARRYING THOUSANDS OF 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON HUNDREDS OF RAILROAD CARS GOING RIGHT THRU OUR TOWN!

MIAMA HAS JUST COMPLETED A HUGE CONTAINER UNLOADING OPERATION THAT CAN ALSO RECEIVE THE LARGEST CONTAINER SHIPS IN THE WORLD! ALSO CARRYING THOUSANDS OF 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON HUNDREDS OF RAILROAD CARS GOING RIGHT THRU OUR TOWN!

THE PANAMA CANAL IS CURRENTLY BEING WIDENED TO ALLOW PASSAGE OF THESE MASSIVE CONTAINER CARGO SHIPS THAT WILL BE UNLOADING MILLIONS OF TRUCK TRAILER 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON RAILROAD CARS AND RUN RIGHT THRU OUR TOWN SO THE RICH CAN GET RICHER!

THERE IS NO REASON TO HAVE THIS SUPPOSED HIGH SPEED PASSENGER TRAIN, IT IS ALL ANOTHER SCAM TO COVER UP THE REAL
PLAN OF HAVING MORE FREIGHT CARS DOUBLE STACKED AND DOUBLE THE WEIGHT GOING THRU OUR COMMUNITY AND DESTROYING OUR HOMES AND PROPERTY VALUES!

AND WE RECEIVE ABSOLUTELY NOTHING FOR DEALING WITH ALL THIS!

QUIET ZONES WILL NOT BE ENOUGH!

TALL SECURITY TYPE FENCES RUNNING ALONG SIDE TRACKS WILL NOT BE ENOUGH!

THICKER RUBBER PADS TO REPLACE THE ¼ INCH PLASTIC VIBRATION PADS CURRENTLY INSTALLED BETWEEN CONCRETE RAIL SUPPORT AND SOLID STEEL TRACK RAILS WILL NOT BE ENOUGH!

A TALL CONCRETE SOUND DEAFENING WALL LIKE YOU SEE ALONG SOME HIGHWAYS TO BLOCK OUT THE VEHICLE TRAFFIC NOISES GOING INTO THOSE NEIGHBORHOODS WILL NOT BE ENOUGH!

THE CONSTANT DAY AND NIGHT RAILROAD CROSSING CLOSURES SO THAT ALL THESE TRAINS CAN PASS THRU OUR TOWN SO THEY CAN GET RICH IS A VIOLATION OF OUR FREEDOM:

TO TRAVEL TO STORES/HOSPITAL/RIVER/BEACH/SCHOOLS WHERE EVER WE WOULD LIKE TO GO TO BECAUSE OF ALL THESE TRAINS CONSTANTLY COMING THRU OUR TOWN IS UN-ACCEPTABLE!!!!

WE MUST NOT ALLOW THIS TO HAPPEN TO OUR SEBASTIAN!

I LOVE THIS TOWN AND MOVED HERE BECAUSE IT IS ONE OF THE LAST BY THE RIVER/KICK BACK/QUIET COMMUNITIES!

THEY WANT TO MAKE IT SO WE WILL ALL FEEL LIKE WE LIVE AT A TRAIN STATION NIGHT AND DAY! NO WAY! STOP THE TRAIN!
This is what I have to say about ALL ABOARD FLORIDA! STOP IT!

Port Canaveral’s new cargo era is born

Port Canaveral and Gultainer signed a deal that will increase the Port’s cargo business for years to come. By Craig Rubadoux and Tim Walters Posted June 23, 2014

Dave Berman and Wayne T. Price, FLORIDA TODAY 6:45 p.m. EDT June 23, 2014

The deal, in the works for a year, was known as ‘Project Pelican.’

Port Canaveral’s new cargo era is underway.

The port and a unit of a United Arab Emirates-based company signed a 35-year deal Monday for the company to operate a cargo terminal at the port.

Port officials say the deal with privately owned Gultainer and its new U.S. unit, GT USA, would create 2,000 direct and spinoff jobs when fully operational, including 500 at the port itself. They said Gultainer plans to make a $100 million investment locally in infrastructure, equipment and staff.

"Gultainer has an incredible history of success, expansion and growth, and will be invaluable partners," Canaveral Port Authority Chairman Tom Weinberg said. "They are a great partner for the future. This is an incredible new chapter here at Port Canaveral. This is a true game-changer that will strengthen our cargo operations."

Port Canaveral Chief Executive Officer John Walsh said Monday’s signing ceremony at the port’s Cruise Terminal 6 is the celebration of "a new beginning here" — one in which cargo begins to emerge from the shadows of the port’s huge cruise business.

Walsh said Monday was the culmination of a two-year effort to bring Gultainer to Brevard County, dating back to initial contacts with the company by Walsh’s predecessor, Stan Payne. Walsh renewed discussions with Gultainer when he became CEO a year ago.

What helped seal the deal with the company, Walsh said, was the port’s acquisition of two massive cargo cranes and its plans for rail connections to the port.

Badr Jafer, chairman of the executive board of the Gultainer Group, said he expects his company eventually would handle 700,000 containers a year from Port Canaveral.

On-dock Rail

The PortMiami-Florida East Coast (FEC) Railway connection offers the fastest access to Southeastern U.S. consumer markets.

PortMiami is an oceanfront port with only 2.5 miles from buoy to dock which reduces pilot costs and improves turn-around times. With FEC Railway offering backhaul opportunities to increase roundtrip efficiencies, the port offers significant opportunities to save money and time.

- 50-foot channel
- On-dock intermodal rail service
- Direct highway access via tunnel
- Foreign Trade Zone 281
- Convenient customs service
- Super Post-Panamax cranes
- Up to 1.5 million sq. ft. of dry and refrigerated space
- Warehouse / distribution and transloading space co-located with the FEC intermodal ramp

Phase One of the rail restoration project was completed in October 2013. The scheduled completion of Phase Two is summer 2014, and the final phase is scheduled for completion, making the track fully operational, by the end of 2014. Once complete, PortMiami will have 9,000 feet of track and will be running daily train service.

Increased Speed To Market

Deepening its channel to ~50 feet, PortMiami will be the closest U.S. port to the Panama Canal, capable to berth mega-ships from Asia following completion of the expansion projects, expected in 2016. Featuring double stack service from FEC.

ANTI-VIBRATION RAIL TO CONCRETE VIBRATION PADS

http://sell.lulusoso.com/upload/20120305/anti_vibration_rubber_pad.jpg
Partnership Agreement

Product Description: anti vibration rubber pad

1) anti vibration rubber pad Available materials: silicon, NBR FKM SBR NR EPDM CR
2) All manufacturing process confirm to the ISO9001
3) RoHS directive compliant green products
4) Rapid development line from drawing, tooling design to mold support and samples
5) Customers designs and specifications are accepted
6) Available in various sizes and colors
7) Rubber pad use in machine

Re: St. Lucie River and Loxahatchee River bridge comments

Date: November 13, 2014 & November 14, 2014

On behalf of the Citizens Against Rail Expansion Florida (CARE FL) Steering Committee, please find the attached formal comments that I am submitting regarding the impact of rail bridges over the St. Lucie River and Loxahatchee River and associated waterways.

In August of 2013 I retired from a position in U.S. federal Senior Executive Service as the nation’s maritime navigation authority. As part of my duties, I was responsible for permitting and regulation of over 18,000 bridges over the navigable waters of the United States. I also served as Dept. of Homeland Security representative to the White House’s “President’s Steering Committee on Federal Infrastructure Permitting and Review Process Improvement.” And I am a retired USCG Captain, with more than 40 years of maritime experience. (Please see my attached full biography.)

I am deeply troubled by the current and future retention of the totally inadequate St. Lucie and Loxahatchee bridges for the reasons detailed in the comments I am respectfully submitting for consideration by the Coast Guard. I am submitting two complementary but different sets of comments: One details my observations and suggestions related to the St. Lucie bridge and waterway; the second addresses the Loxahatchee bridge and waterway.

Jupiter, Tequesta, Stuart and southern Martin County are water-oriented communities whose economies and attractions depend on accessible and usable waterways. As detailed in the attached comments, I believe that the current bridges negatively and unreasonably impact waterway traffic, which is inextricably tied to regional economies and local quality of life. This will be made even worse if rail activity is expanded.

Thank you for the Coast Guard’s proactive stance to address these issues. Anticipated growth in rail traffic will only aggravate existing problems. And, while I understand that you are not addressing any specific proposals for entirely new services, such as All Aboard Florida, that would impact these bridges, this process and your thoughtful consideration now will prepare us all to address those issues as well.
Please feel free to reach out to me directly should you have additional questions, or require further clarification.

Sincerely,

[Signature]

Comments for USCG – Port St. Lucie Bridge Operations

November 2014

Summary:
Changes in rail traffic and maritime activity since 1938 have caused the Florida East Coast Railroad bridge at Port St. Lucie over the St. Lucie River to become an unreasonable obstruction to navigation. The bridge must either be completely removed, or replaced with one that is not unreasonably obstructive.

In the interim, strict, highly predictable, long term scheduling of bridge openings and closings must be instituted to mitigate obstruction of the waterway.

Background:

Waterway Description & Navigation Considerations

The waterway connects the communities of Palm City, Port St. Lucie, parts of Stuart, and the Okeechobee Waterway to the Atlantic and the north-south portion of the intracoastal waterway. The Okeechobee Waterway connects the east and west coasts of Florida, is maintained at a depth of 8 feet and is suitable for both commercial tug-barge and recreational traffic. The 165 mile waterway from Stuart on the east coast to Ft. Myers on the west coast saves approximately 360 miles compared to rounding the Florida peninsula. The Army Corps of Engineers reports that approximately 10,000 vessels and 26,000 tons of cargo transit the waterways’ nearby St. Lucie lock each year.

The navigable waterway passes through a 50’ wide opening between the protected abutments of the FEC railroad bridge. This is the narrowest point that mariners must navigate on the 154 mile Okeechobee Waterway where the canal varies from 80 to 100 feet wide (some of the locks are 50’ wide, but they are not in open water, subject to cross currents and do not pose navigation safety issues).

1 These comments address only the current operation and condition of this bridge as of November 2014. A supplement will be provided to address proposals for increased use of the bridge included in the All Aboard Florida Draft EIS.
When the bridge is closed it comes within 7' of the surface of the water, effectively closing the waterway - vessels that require less than 7' vertical clearance usually have very shallow drafts and do not need to use the channel portion of the waterway as they can safely pass under the bridges at numerous points. When the railroad bridge is open, waterway vertical clearance in the area is 65' under the adjacent Route 1 Highway Bridge, and 14' under the adjacent draw bridge on N. Dixie Highway. This drawbridge is manned by a bridge tender and will open upon demand.

Transiting through these three bridges is challenging for many vessels because of the configuration of the waterway. Vessels must pass through three narrow bridge openings, which are not perfectly aligned, within less than a quarter mile. As with any choke point between large bodies of tidal waters, currents are strong except for brief windows during slack tide. Captains of tug and barge operations report that they must time their transits carefully so as to arrive when the tide is changing and the current is at its weakest. And while smaller vessels are able to pass each other safely, transits of the quarter-mile gauntlet by vessels of any size are limit the waterway to one way traffic.

Changes in Rail Traffic and Waterway Use

When the rail bridge was built, circa 1938, use of the waterway was much lower and trains were very infrequent. In the last 76 years:

- The population in St. Lucie and Martin counties has grown from a few thousand to over 350,000 full time residents. The winter population in many areas increases by 20%.
- The regional economy and lifestyle has shifted from mostly agriculture (pineapple farming) to waterway-oriented residential, and water-oriented commercial
- The Atlantic intra-coastal waterway was built and intersected with the St. Lucie River
- The Okeechobee Waterway was built connecting Ft. Myers, Palm City, Stuart, St. Lucie, the Atlantic intra-coastal waterway, and the Atlantic Ocean.
- Waterway use between the St. Lucie River west of the FEC rail bridge and points east has greatly increased. During one 53 day period almost 13,000 transits were observed. This equates to over 88,000 per year.
- The number of railroad bridge closures per day has greatly increased, and the closure times have gotten longer.
Waterway users from both sides of the bridge transit to use the waterways. Most of the marina (fifteen marinas) and dockage space in the area is west (upstream) of the bridge. These vessels, and those transiting from the Okeechobee Waterway, must pass through the FEC rail bridge to access the Atlantic Ocean and/or the Atlantic intra-coastal waterway, and contribute to the estimated 88,000 transits per year.

The Gulf Stream is often within 8 to 14 miles off the coast making offshore fishing particularly attractive. According to the FECR, the bridge closes the waterway approximately 14 times each day and the closures last approximately 20 minutes. Local residents, though, report more extended closures and indicate that closures of an hour are not uncommon when the bridge does not open in between trains. None of the closures are scheduled, nor are they announced more than a few minutes in advance. Users also have no way of knowing how long the closure will last.

Bridge closures discourage users on both side of the bridge from fully using the waterways, especially since the closures are at random and of unpredictable length.

The Bridge Does Not Meet the Reasonable Needs of Navigation Because:

1. It interferes with primary economic engine of the local economy and undermines the foundation upon which the local water-oriented communities were built.

Huge-water oriented communities in Stuart, Palm City, St. Lucie and the surrounding areas, marine services, marine retail, and all the supporting business and economic activity would not exist, but for the presence and usability of the waterways.

The importance of this type of economic activity is essential to the entire state of Florida and is well documented. The Florida Oceans and Coastal Council reported that the state's coastal counties contribute about 79 percent of the state's economic productivity. "Florida's Ocean and Coastal Economies Report, Phase II."

Dr. James Cato, an economist, Florida Oceans and Coastal Council member, and former Director, School of Natural Resources and the Environment, University of Florida has testified that "Anything affecting coastal tourism, recreation and marine transportation has a huge impact on Florida's ocean economy...These sectors of economic activity represent 88 percent of Florida's ocean economy..." "Oceans and Coast Drive Florida's Economy" Environmental News Service, 1 Oct 2008.

Over 450 vessels per day transit through the bridge on peak days. These can be a varied combination of large and small recreational vessels and
larger tugs with barges. This mixture increases wait times as larger vessels must pass through more slowly and do not safely allow for traffic in the opposite direction. Many vessels must loiter for some period waiting for the bridge to open, burning fuel, increasing air emissions, and wasting time. Loitering also increases the risk of vessels colliding with each other, running aground or being set upon the bridge by strong currents.

Rail bridge closures deter waterway use. While it is impossible to measure events that do not occur, it is, nevertheless, obvious that waterway use would be higher if the bridge never closed, and the surrounding community’s economies would be that much stronger. ²

2. The bridge’s age and condition risks structural and mechanical failures that obstruct the waterway.

While information on past bridge malfunctions was not immediately available for this paper, a casual inspection of the bridge shows that it has suffered from lack of attention and maintenance.

As the 76 year-old bridge structure, materials and mechanisms continue to age and degrade, mechanical and material failures are certain.

3. Alternatives to obstructing the waterway exist, are available and feasible.

Waterway users have only one route available to them, the railroad has several.

Railroad tracks farther to the west are available, and in use, for both freight and passenger service.

An elevated rail bridge is feasible. Bridges with grades of up to 4% support freight operations in other locations.

Alternatives to using a 76 year-old, poorly maintained bridge that unreasonably obstructs the waterway are more expensive for the FECR. By not using these alternatives, though, FECR is imposing much greater costs on the citizens of the surrounding area.

² While the local area is prosperous and growing, regional economic information is unfortunately not readily available. This information is crucial to public policy decisions, however, and such data and analyses must be incorporated into any decisions. For example, if an obstructive rail bridge decrements a $20B/yr local economy by half a percent, that would be a cost shift from the private rail company to taxpayers of $100M/yr. Similarly, if it degraded the value of $50B in property by half a percent, that would be a loss of $250M to taxpayers.
4. Competent government agencies have determined that the bridge height does not provide for the reasonable needs of navigation.

If FECR were to seek a permit to build this bridge today, it would be denied.

US Coast Guard and US Department of Transportation policies specifically state preferences for fixed bridges over mobile bridges, whenever possible, as they minimize negative impacts to all transportation modes at these important intersections of systems.

When the State of Florida constructed the Route 1 bridge over the St. Lucie River and adjacent to the FEC rail bridge it made a deliberate decision that a fixed bridge at 65’ over the waterway would meet the needs of both navigation and highway traffic. Highway traffic is more continuous than rail traffic, so the parallel is not exact. However, as rail traffic has increased, both in the number of trains and their length, the parallel between the two has become much closer. For example, local officials and waterway users report that the rail bridge often does not open between individual trains to allow navigation, even if it means another 20 minutes the waterway will be closed.

The FEC RR bridge is approximately 7’ above the water when closed. The USCG Bridge Clearance Guide calls for bridges in this area to be 21’ above the water when closed. Guidance for bascule bridges on the Okeechobee waterway between St. Lucie locks and the Atlantic inter-coastal waterway – see: http://www.uscg.mil/hq/cg5/cg551/bridge.asp From this web site: Bridges at the guide height “...will ordinarily receive favorable consideration under the bridge permitting process (33 CFR Chapter 1, Subchapter J - Bridges) as providing for the reasonable needs of navigation.”

The Bridge Does Not Meet the Reasonable Needs of Navigation. The Coast Guard must designate this bridge as an unreasonable obstruction to navigation under the Truman-Hobbs act and mandate its replacement.

Mitigation Pending Removal or Replacement of the Bridge

Until the bridge is removed or replaced, its negative impact on the waterway must be minimized. This requires that:

1. The waterway be open to navigation for at least 31 minutes each hour,
2. The length of openings allow passage of all vessels waiting,
3. The amount of time for any single closure does not exceed 15 minutes as this would discourage waterway use, and
4. The times that the waterway will be open are highly predictable and easily understood.

Openings

The law gives deference to waterways users because of their limited alternatives, and the multiple alternatives available to surface transportation.

The waterway must be open at least 31 minutes per hour, and for at least 15 minutes per opening.
Safe vessel transits are often limited by the narrow passage to one direction at a time, and the need for a slow to modest speed (no more than 10 to 15 knots). The length of the openings must allow passage for all vessels waiting on both sides to cross. With 88,000 transits per year and up to 450 per day, including large commercial vessels, waiting lines can be long. Less than 15 minutes would often be insufficient for vessels on both sides of the bridge to organize, accelerate, and individually pass under the bridge. Note that it is too narrow for safe two way traffic for many vessels.

Waiting for the bridge to open degrades the boating experience significantly, and can drive potential waterway users to just stay home. According to one authority:

"Americans spend roughly 37 billion hours each year waiting in line. The dominant cost of waiting is an emotional one: stress, boredom, that nagging sensation that one's life is slipping away. The last thing we want to do with our dwindling leisure time is squander it in stasis."

Informal interviews with users show that they consider a wait of 15 minutes or less reasonable. This is predicated upon the schedule of such waits being highly predictable so that users can structure their arrivals so as to avoid most closures altogether.

As mentioned earlier, vessels loitering and trying to position themselves for when the bridge opens unnecessarily waste fuel, have increased air emissions due to the addition fuel burn and typically low engine speed, and run greater risk of collision, grounding and being set upon the bridge by strong currents.

Predictability and Clarity

Safe and enjoyable waterway use requires time and preparation. Numerous items of equipment, some of which is time consuming to prepare and requires special transport, is often involved. It is also often a group activity, so schedules of multiple people must be coordinated, sometimes weeks in advance.

Minimizing the negative impact of rail bridge closures on waterway use requires that users have a long term predictable schedule of when the waterway will be open. This certainty will manage expectations, and allow users to adjust their activities and schedules accordingly.

It is also important that schedules be clear, easily understood and recalled from memory. For example: “The bridge will open on the hour and half hour, and stay open for 20 minutes.”

We prefer that the schedule for the waterway being open is published in the Federal Register as part of the rulemaking. Less preferred, but acceptable, would be that the rulemaking provide for the schedule to be published at least 90 days in advance and that all schedules remain unchanged for at least 90 days.
Comments for USCG - Loxahatchee Bridge Operations

November 2014

Summary:

Changes in rail traffic and maritime activity since 1935 have caused the Florida East Coast Railroad bridge over the Loxahatchee River to become an unreasonable obstruction to navigation.

The bridge must either be completely removed, or replaced with one that is not unreasonably obstructive.

In the interim, strict, highly predictable, long term scheduling of bridge openings and closings must be instituted to mitigate obstruction of the waterway.

Background:

Waterway Description & Navigation Considerations

The navigable waterway passes through a narrow, 40’ space between the protected abutments of the FEC railroad bridge. When the railroad bridge is open, waterway vertical clearance is 25’ which is controlled by the adjacent Route 811 fixed highway bridge. The 3,000 mile intra-coastal waterway that traverses the Atlantic and Gulf coasts is immediately to the east of the two bridges. A third of a mile downstream the Route 1/A1A fixed highway bridge has 26’ vertical clearance.

When the railroad bridge is in use the waterway into and out of the Loxahatchee River system is closed as the bridge comes within 4’ of surface of the water.

---

1 These comments address only the current operation and condition of this bridge as of November 2014. A supplement will be provided to address proposals for increased use of the bridge included in the All Aboard Florida Draft EIS.
Boats waiting for the bridge to open must often contend with strong tidal currents estimated at 7 to 8 knots. This is caused by the tide surging through a narrow river neck into and out of the very large basin and recreation area comprised of the three forks of the Loxahatchee River and the extensive, wide confluence area just west of the bridge. Boats waiting for the bridge to open can have difficulty avoiding being set onto the bridge, the shore, and each other.

The narrow passage and strong current beneath the bridge make it impossible, or at best unsafe, for even small vessels to pass each other. So traffic is almost always limited to one way at a time.

Changes in Rail Traffic and Waterway Use

When the rail bridge was built, circa 1935, use of the waterway was much lower and trains were very infrequent. In the last 79 years:

- The local population has grown by approximately 10,000%
- The regional economy and lifestyle has shifted from working agriculture to waterway-oriented residential, and water-oriented commercial
- The intra-coastal waterway was built and intersected with the Loxahatchee
- Waterway use between the Loxahatchee River system and other waterway areas has greatly increased. For 193 days during the first half of this year, the Jupiter Inlet District observed over 48,000 vessel transits through the rail bridge. This equates to over 90,000 a year.
- The number of railroad bridge closures per day has greatly increased, and the closure times have gotten longer.

While there are more than 1,200 boat slips upstream, waterway users from both sides of the bridge transit to use the waterway on the other side. Boaters from the east side of the bridge transit west to the broader and more sheltered areas of the river to water ski, jet ski, picnic on a wide and long sand bar at low-tide, and visit Jonathan Dickinson State Park. Boaters from the west side transit east to use the intra-coastal waterway, visit marinas, patronize restaurants, and enter the Atlantic.

The Gulf Stream comes closer to shore in this area than anywhere else in the United States (between 1 and 2 miles) making offshore fishing particularly attractive. Average year-round water temperature is 78 degrees adding to the attractiveness of in-water and water-borne recreation.

According to the FECR, the bridge closes the waterway approximately 14 times each day for approximately 20 minutes. Residents report that the closures can be much longer, though, lasting up to an hour when the bridge does not open between trains. Data collected by the Jupiter Inlet District, though, shows that the number of times per day the waterway is open for navigation during daylight hours varies greatly between zero and 16. None of the closures are scheduled, nor are they announced more than a few minutes in advance. Users also have no way of knowing how long the closure will last.
Bridge closures discourage users on both side of the bridge from fully using the waterways, especially since the closures are at random and of unpredictable length.

The Bridge Does Not Meet the Reasonable Needs of Navigation Because:

1. It interferes with primary economic engine of the local economy and undermines the foundation upon which the local water-oriented communities were built.

Huge-water oriented communities in Jupiter, Tequesta, southern Martin County and northern Palm Beach County, marine services, marine retail, and all the supporting business and economic activity would not exist, but for the presence and usability of the waterways.

The importance of this type of economic activity is essential to the entire state of Florida and is well documented. The Florida Oceans and Coastal Council reported that the states coastal counties contribute about 79 percent of the state's economic productivity. "Florida's Ocean and Coastal Economies Report, Phase II."

Dr. James Cato, an economist, Florida Oceans and Coastal Council member, and former Director, School of Natural Resources and the Environment, University of Florida has testified that "Anything affecting coastal tourism, recreation and marine transportation has a huge impact on Florida's ocean economy...These sectors of economic activity represent 88 percent of Florida's ocean economy..." “Oceans and Coast Drive Florida’s Economy” Environmental News Service, 1 Oct 2008

Over 500 vessels per day transit through the bridge on peak days. Many, if not most, must loiter and wait for the bridge to open, burning fuel, increasing air emissions, and wasting time. Loitering also increases the risk of vessels colliding with each other, running aground or being set upon the bridge by strong currents.

Rail bridge closures deter waterway use. While it is impossible to measure events that do not occur, it is, nevertheless, obvious that waterway use would be higher if the bridge never closed, and the surrounding community’s economies would be that much stronger.²

² While the local area is prosperous and growing, regional economic information is unfortunately not readily available. This information is crucial to public policy decisions, however, and such data and analyses must be incorporated into any decisions. For example, if an obstructive rail bridge deprecations a $20B/yr local economy by half a percent, that would be a cost shift from the private rail company to taxpayers of $100M/yr. Similarly, if it degraded the value of $50B in property by half a percent, that would be a loss of $250M to taxpayers.
2. The bridge’s age and condition has caused failures that obstructed the waterway. The risk of additional and more frequent obstructions is increasing.

Upon one occasion a large piece of metal fell from the bridge and obstructed the waterway. Because it was not visible from the surface, several boats struck the metal and reported minor damage. Requests to the railroad for it to be removed went unheeded. The large metal object was eventually cleared from the waterway by the Jupiter Inlet District.

Mechanical failures of the bridge mechanism have obstructed the waterway while it was being repaired.

Extended waterway closures have resulted from a faulty locking system or signal system. With the bridge in the down position, trains have repeatedly stopped short of the crossing for the engineer to dismount, walk up to the bridge to ensure it is locked down and safe to cross. For south-bound trains this also blocks all three streets exiting the City of Tequesta and has resulted in complaints to FECR by the mayor.

Very little to no preventive maintenance or care is evident to anyone walking out onto the bridge (the bridge is entirely accessible to casual pedestrians and even lacks land-side warning or “no trespassing” signs.)

As the 79 year-old bridge structure, materials and mechanisms continue to age and degrade, an increase in mechanical and material failures is certain.

3. Alternatives to obstructing the waterway exist, are available and feasible.

Waterway users have only one route available to them, the railroad has several.

Railroad tracks farther to the west are available, and in use, for both freight and passenger service.

An elevated rail bridge is feasible. Bridges with grades of up to 4% support freight operations in other locations.

US Coast Guard and US Department of Transportation policies specifically state preferences for fixed bridges over mobile bridges, whenever possible, as they minimize negative impacts to all transportation modes at these important intersections of systems.

When the State of Florida constructed the route 811/A1A bridge over the Loxahatchee and adjacent to the FEC rail bridge it made a deliberate decision that a fixed bridge at 25’ over the waterway would meet the needs of both navigation and highway traffic. Highway traffic is more continuous than rail traffic, so the parallel is not exact. However, as rail traffic has increased, both in the number of trains and their length, the parallel between the two has become much closer. For example, local officials and waterway users report that when individual trains are separated by 20 minutes or less, the rail bridge will not open to allow navigation between train crossings.
The FEC RR bridge is approximately 4’ above the water when closed. The USCG Bridge Clearance Guide calls for bridges on the adjacent intra-coastal waterway to be 21’ above the water when closed. Guidance for bascule bridges on the Atlantic intra-coastal waterway between Jacksonville and Miami—see: [http://www.uscg.mil/hq/cg5/cg551/bridge.asp](http://www.uscg.mil/hq/cg5/cg551/bridge.asp) From this web site: Bridges at the guide height “...will ordinarily receive favorable consideration under the bridge permitting process (33 CFR Chapter 1, Subchapter J - Bridges) as providing for the reasonable needs of navigation.”

 Alternatives to using a 79 year-old, poorly maintained bridge that unreasonably obstructs the waterway are more expensive for the FECR. However, by not using these alternatives, FECR is imposing much greater costs on the citizens of Tequesta, Jupiter and the surrounding area.

 **If FECR were to seek a permit to build this bridge today, it would be denied.**

 **The Bridge Does Not Meet the Reasonable Needs of Navigation.** The Coast Guard must designate this bridge as an unreasonable obstruction to navigation under the Truman-Hobbs act and mandate its replacement.

 **Mitigation of Negative Impact Pending Removal or Replacement of the Bridge**

 Until the bridge is removed or replaced, its impact on the waterway must be minimized. This requires that:

 1. The waterway be open to navigation for at least 31 minutes each hour,

 2. The length of openings allow passage of all vessels waiting,

 3. The amount of time for any single closure does not exceed 15 minutes as this would discourage waterway use, and

 4. The times that the waterway will be open are highly predictable and easily understood.

 **Openings**

 The law gives deference to waterways users because of their limited alternatives, and the multiple alternatives available to surface transportation.

 The waterway must be open at least 31 minutes per hour, and for at least 15 minutes per opening.

 Safe vessel transits are limited by the narrow passage to one direction at a time, and the need for a slow to modest speed (no more than 10 to 15 knots). The length of the openings must allow passage for all vessels waiting on both sides to cross. The Jupiter Inlet District has observed an average of 288 vessel bridge transits each day, and even more vessels would do so, but for the obstruction of the bridge. With over 500 transits per day on peak days, waiting lines can be long. Less than 15 minutes would often be insufficient for vessels on both sides of the bridge to organize, accelerate, and individually pass under the bridge (it is too narrow for safe two way traffic).

 Waiting for the bridge to open degrades the boating experience significantly, and can drive potential waterway users to just stay home. According to one authority:
“Americans spend roughly 37 billion hours each year waiting in line. The dominant cost of waiting is an emotional one: stress, boredom, that nagging sensation that one’s life is slipping away. The last thing we want to do with our dwindling leisure time is squander it in stasis.”

Informal interviews with users show that they consider a wait of 15 minutes or less reasonable. This is predicated upon the schedule of such waits being highly predictable so that users can structure their arrivals so as to avoid most closures altogether.

As mentioned earlier, vessels loitering and trying to position themselves for when the bridge opens unnecessarily waste fuel, have increased air emissions due to the addition fuel burn and typically low engine speed, and run greater risk of collision, grounding and being set upon the bridge by strong currents.

Predictability and Clarity

Safe and enjoyable waterway use requires time and preparation. Numerous items of equipment, some of which is time consuming to prepare and requires special transport, is often involved. It is also often a group activity, so schedules of multiple people must be coordinated, sometimes weeks in advance.

Minimizing the negative impact of rail bridge closures on waterway use requires that users have a long term predictable schedule of when the waterway will be open. This certainty will manage expectations, and allow users to adjust their activities and schedules accordingly.

It is also important that schedules be clear, easily understood and recalled from memory. For example: “The bridge will open on the hour and half hour, and stay open for 20 minutes.”

We prefer that the schedule for the waterway being open is published in the Federal Register as part of the rulemaking. Less preferred, but acceptable, would be that the rulemaking provide for the schedule to be published at least 90 days in advance and that all schedules remain unchanged for at least 90 days.
Dana Goward is the Proprietor at Maritime Governance, LLC, a consultancy offering advice and counsel on a wide variety of maritime navigation, search and rescue, maritime domain awareness, and governance issues.

Capt. Goward has more than 40 years of experience in the maritime industry; he is also a bridge expert. He retired in 2013 from the U.S. federal Senior Executive Service as the nation's maritime navigation authority, with 12 business lines budgeted at over $1.3B/yr. He has represented the US at IMO, IALA, the UN anti-piracy working group, and other international forums.

A licensed helicopter and fixed wing pilot, he commanded the US Coast Guard's air station in New Orleans and served as the service's first Chief, Office of Board Forces, before retiring as a Captain.

He is also President of the Resilient Navigation and Timing Foundation, Chairman of the Board for the Association for Rescue at Sea, and is a member of the governing council for the Institute of Navigation.

**Bridge Administration Specific:** Capt. Goward was responsible for permitting and regulation of over 18,000 bridges over the navigable waters of the United States and a nationwide staff of 45. The portfolio included $225B in bridge construction projects requesting permits.

He also served as Dept of Homeland Security representative to White House's "President's Steering Committee on Federal Infrastructure Permitting and Review Process Improvement," a Deputy Secretary-level group created by presidential executive order. Negotiated agreements between competing interests and authorities on highly charged, nationally significant, $1.3B to $3.4B bridge construction and modification projects publicly tracked by White House.
ANALYSIS OF MICRO-VIBRATION IN BUILDINGS

Haridayal Jaswal

Home Institution: College of Engineering, The City College of New York, 138th Street & Convent Avenue, New York, NY 10031

Host Institution: College of Engineering, The City College of New York

Advisor: Dr. Anil Agrawal

ABSTRACT

Vibrations are produced during various operations from railway and roads to foot traffic, it propagates in different mediums. Following are examples of the reactions, due to vibrations, caused in parent mediums and its surrounding:

- damage during the production of Micro-Nano scale equipments, for instance silicon-chips and devices related to Nanotechnology;
- produces error during experiments in labs equipped with lasers, sensors or microscopes;
- creates hazardous environment in operation-theaters at hospitals, particularly Neurosurgery;
- long-term contact causes damages in buildings; minor effects such as cracks, which in critical cases could result in collapse, especially in historical buildings.
- Perceptible sustained vibration can cause nuisance for occupants of buildings.

Our proposal is a structural-design that will resist vibration. The design is of a floor isolated from its vibrating base, which has sandwiched a system of isolator, dampers and springs. This Single Degree Of Freedom (SDOF) structure reduces intensity of propagating vibration.

This research will be helpful in different areas of industries. The application of technology includes: semi-conductor facilities, hospitals, high precision labs, and manufacturing and maintaining equipments related to Nanotechnology. This outcome could be applied to protect historical buildings and resist vibrations in industrial machineries. The objective of this research is to investigate the effectiveness of floor isolation systems in isolating vibration transmitted to a building in New York.
INTRODUCTION:

PROBLEM STUDIED:
Vibration is one of the main factors for fatigue in structures. Produced by different sources vibrations propagate from one medium to another. This could cause serious damage in industries producing Micro and Nano scale equipments. Vibrations could also produce error during experiments in high-precision labs equipped with lasers, sensors or microscopes. Surgery could be hazardous in operation-theaters affected of vibrations. Long-term contact to vibrations can causes damages in buildings, minor effects such as cracks, which in critical cases could result in collapse, especially in historical buildings. Perceptible sustained vibration can cause nuisance for occupants of buildings, which could cause diseases such as mild-deafness, memory-loss, and aggressive-behavior.

My research was done to: analysis effect of vibration in building, and find efficient way to reduce intensity of vibration propagating in structures. A building at Riverside at 156th Street, New York City, USA, was chosen as the site for investigation. Accelerometer was used to collect the data for theoretical analysis; acceleration of vibrating floor was measured. Computer programs, Matlab and Working Model, were used to calculate and analysis theoretical results. Analysis was done to reduce intensity of the vibration.

OBJECTIVE
Objective of this investigation is to:
1. Analyze the effects of micro-vibrations in structures
2. Conduct research on various buildings heavily effected by vibration, especially bridges and tunnels
3. Build a model that demonstrate feasibility of the researched theoretical calculations

BACKGROUND RESEARCH

Common sources of vibration were investigated (Table 1). Table 1 gives us an idea of the magnitude of frequency and amplitude of vibrations induced by sources in a typical urban area. This information is helpful to understand the characteristics of the vibration-sources and the vibration induced.

*Table 2: Effects of Vibration on People and Buildings according to Transport and Road Research Laboratory (U.K.)

paper 09

Seattle, Washington | August 8-12, 2007
Usually micro-vibration in buildings is expressed in terms of amplitude of micro-vibration in one-third octave band versus the center frequency of the band. The one-third octave plot of any velocity time history is calculated from its Fourier transformation as (Yang and Agrawal, 2000):

$$X_{1/3}(n_c) = \left[ \sum_{0.89}^{1.12} X(n) \Delta n \right]^{1/2}$$

Where,
\(\Delta n\) = resolution of FFT;
\(n\) = Frequency in Hz;
\(n_c\) = Centre frequency

The centre frequency is given by \(n_c = 2^m\), where \(m\) is an integer. The one-third octave bandwidth is approximately 23% of its centre frequency. One-third octave plot obtained from Eq. (1) is constant in the frequency band from 0.89\(n_c\) to 1.12\(n_c\). To evaluate \(X_{1/3}(n_c)\) in terms of the BBN vibration criteria it is also expressed in dB referenced to \(V_0 = 1 \text{ mm/s}\), that is

$$V(n_c) = 20 \log \left[ X_{1/3}(n_c) / V_0 \right]$$

*Table 3: Effects of Vibration on People and Buildings according to Transport and Road Research Laboratory (U.K.)*
Following is comparison of solution currently available:

1. Building wave barriers to isolate from vibration sources by digging trenches around building boundary. Wave barriers are expensive to build and take lots of space for implication thus it is not viable for urban area.
2. Building facility far away from the vibration sources. (i.e. away from railways and roads). Site of location increases transportation cost of human and goods also it makes facility isolated for individuals.

RESEARCH APPROACH

Primary study was done to measure vibration in building under Riverside in New-York. Objective is to use building for office. Building seems to have high level of traffic-induced vibration, one possible solution is to use isolated floor.

Acceleration of vibrating floor was measured using sensitive accelerometer for theoretical analysis; this data was collected during medium rush hour. Computer programs, Matlab™ and Working Model™, were used to calculate and analysis theoretical results. Acceleration data was passed through high-pass filter to remove low frequency static component in Matlab. A high pass filter with cutoff frequency of 1 Hz was used. Acceleration data was integrated using Simpson’s Method to obtain velocity and time history. Further analysis was done to obtain One-Third Octave Spectrum from velocity data. This analysis was done to reduce intensity of the vibration.

*Table 4: Peak Particle Velocity (PPV) for the vibrating floor*

The experimental data was obtained 7 and 6 times respectively for room 1 and room 2 using two accelerometers, this makes a total of 26 cases. Above table has been prepared calculating the Peak Particle Velocity (PPV) of each case. Comparing these data with the background research it could be concluded that for blocks in yellow, vibrations exceeds the safety level of (<2.0 mm/s) and is harmful for historical building. While data in red blocks in the table (velocity < 2.5 mm/s) shows that vibration level is harmful for human. Further analysis could be done from reported data; as discussed in background research this data was taken during medium rush hour (i.e 3pm), the intensity of vibration could change if data is taken during rush-hour (i.e. 5pm).
Above is a One-Third Octave Spectrum, graphical demonstration of Fourier Transformation (FFT) of the data obtained through the experiments, where Velocity vs. Frequency is axis. The thick blue-line (at 90 db re 1 micro inch/sec) is safety level of vibration in a typical office.

By a Matlab program the data was analysis to a visual illustration as shown in above graphs. The Acceleration data was passed through high-pass filter to remove low frequency static component in Matlab. A high pass filter with cutoff frequency of 1 Hz was used. Further analysis was done to obtain One-Third Octave Spectrum from velocity data. The data could be easily compared with the safety level in this program.

The safety level of the vibrating floor could be approach by changing the variable in the Matlab program, i.e. damping and weight of floor. This approach is helpful to understand the required amount of damping and the weight of floor to reduce intensity of vibration to safety level.
Matlab program was used to analyze the data plotting One-Third Octave Spectrum from velocity data. Visual data could be easily compared with the safety level (i.e. 90 dB re 1 micro inch/sec) in this graph.

The level of the vibration in the floor could be approached isolating the vibrating floor using dampers and isolators. Theoretical calculations are done using this Matlab program to decide required damping and the mass of the floor. This approach is helpful to understand the required quality of dampers and the weight of floor in order to reduce intensity of micro-vibration.
Model of proposed structure:

A structural design is introduced; a floor isolated from its vibrating base, which has sandwiched a system of isolator, dampers and springs. This Single Degree Of Freedom (SDOF) structure was analyzed using Matlab™ for various values for: damping of the sandwiched system (i.e. isolators, dampers and springs), mass of the isolated floor, and the natural frequency of the isolated floor. The design will reduce vibration at location.

Figure 9: Vibration resistant Base Isolator (NASA)

Figure shows a 2-D model of proposed design were the floor (light violet) is isolated from its vibrating base (dark violet), which has sandwiched a system of isolator, dampers and springs. This Single Degree Of Freedom (SDOF) structure reduces intensity of propagating vibration.

Building floor has significant vibration contribution in the frequency range of 14 to 17 Hz.

Following are possible dimensions of the design of an isolated floor:
Floor size = 50ft x 50ft
Floor mass =~ 130000 lb OR 6000 Kg
Isolated floor freq. =~ 5 Hz
Damping = 5 %

SYNOPSIS

Construction vibrations may be harmful to adjacent and remote structures, sensitive instruments and people. Construction vibration sources have a wide range of energy, displacement, velocity and acceleration transmitted on the ground. Effects of different dynamic sources and soil conditions on construction vibrations is analyzed. Consequences of construction vibrations are developed in various ways. It is important to assess intolerable vibrations before the beginning of construction activities. Guidelines for preconstruction survey are presented. Preconstruction survey and prediction of anticipated vibrations by IRFP method, monitoring and control of measured vibrations are important steps in preventing intolerable vibration effect.

INTRODUCTION
Implementation of construction projects involves various sources of construction vibrations such as pile driving, dynamic compaction, blasting and operating heavy equipment. These sources generate elastic waves in soil which may adversely affect surrounding buildings. Their effects range from serious disturbance of working conditions for sensitive devices and people, to visible structural damage.

The effect of construction vibrations on surrounding buildings, sensitive devices and people in the urban environment is a significant consideration in obtaining projects approvals from appropriate agencies and authorities. Disruption of some businesses, possible structural damage and annoying people are the problems.

The dynamic effect of construction vibrations on adjacent and remote structures depends on soil deposits at a site and susceptibility ratings of structures. It is likely that intolerable structure vibrations may be induced in close proximity of the driven piles, but foundations settlements resulting from soil vibrations in loose soils may occur at various distances from the source.

There are two opposite extreme opinions regarding vibration effects on surrounding neighborhood. On the one hand according to human perception and psychology, construction vibrations are the causes of all damage in structures, but on the other hand the vibration effect from construction activities is negligible, Oriard (26). Both opinions are wrong and misleading. Proper evaluation of vibration effect is necessary.

It is important to assess the dynamic effect before the beginning of construction activities and at the time of construction. Therefore monitoring construction vibrations have to be started prior to the beginning of construction works at a site and be continued during construction to provide the safety and serviceability of sound and vulnerable structures.

Monitoring and control of construction vibrations were studied by a number of researchers e.g. Attewell and Farmer (1), Barkan (2), Crockett (6), Clough and Chameau (4), Dowding (8), Heckman & Hagerty (13), Lacy and Gould (16), Massarsch (21), Mayne (23), Richart et al. (29), Svinkin (37), Wiss (42), Wood and Theissen (43), Woods (44) and others.

This paper presents some guidelines for preconstruction survey, prediction, measurement, analysis and control of soil and structure vibrations generated by construction activities at a site.

CONSTRUCTION VIBRATIONS

Vibrating, impacting, rotating, and rolling construction equipment is used for soil excavation, modification and improvement. Machinery with dynamic loads and blasting are sources of construction vibrations. The most prevalent powerful sources of construction vibrations are pile driving, dynamic compaction, and blasting. Blasting energy is much larger than energy of other sources of construction vibrations. For example, the energy released by 0.5 kg of TNT is 5400 kJ, Dowding (8). Such energy is 50 to 1000 times the energy transferred to piles during driving and 15 to 80 times the energy transferred to the ground during dynamic compaction of soils, Svinkin (37).

Vibration Classification

Ground vibrations generated by construction sources can be roughly separated into two categories: transient and steady-state vibrations.

The first category includes single event or sequence of transient vibrations and each transient pulse of varying duration is dying away before the next impact occurs. Such vibrations are excited by air, diesel or steam impact pile drivers, by dynamic compaction of loose sand and granular fills, and also by highway and quarry blasts. The dominant frequency of propagating waves from impact sources ranges mostly between 3 Hz and 60 Hz, Svinkin (37).

The vibration records of ground vibrations close to the pile driver are similar to those from forge and drop hammers, Steffens (31). The vibration effects from impact hammers are alike to those from vibrations generated by forge hammers because of comparable energy released and the dominant frequency range.

The second category contains continuous harmonic or some other periodic forms. These forced vibrations are caused by vibratory pile drivers, double acting impact hammers operating at relatively high speeds, and heavy machinery.
Vibratory pile driving equipment is wide spread dynamic source of construction vibrations. The most important characteristics of this machines are frequency with the resultant relationships between dynamic force and eccentric moment. Low frequency machines have vibratory frequency between 5-10 Hz and used mainly for piles with big mass and toe resistance such as concrete and large steel pipe piles. Medium frequency machines have the vibratory frequency range of 10-30 Hz and used with light weight piles such as sheet piles and small pipe piles. High frequency machines operate at frequencies of more than 30 Hz. The major advantage of these machines is their lowered transmission of ground excitation to adjacent structures. Warrington (40).

Vibration Propagation

Sources of construction vibrations generate body (compression and shear) waves and surface waves of which Rayleigh waves are the primary type, Barkan (2) and Richart et al. (29). These waves transmit vibrations through soil medium. Rayleigh waves have the largest practical interest for design engineers because building foundations are placed near the ground surface. In addition, surface waves contain more than 2/3 of the total vibration energy and their peaks particle velocity are major on the velocity records.

Rayleigh waves induce vertical and radial horizontal soil vibrations. In horizontal layering soil medium, a large transverse component of motion could be caused by a second type of surface waves called Love waves rather than other wave types. Waves propagate outward the source in all directions. Spectra of the radial and transverse components of horizontal soil vibrations may have a few maxima and the one corresponding the frequency of the source is not always the largest. In general, faster attenuation of high frequency components is the primary cause of changes of soil vibrations with distance from the source. However, some records can not be explained by this mechanism and the effect of soil strata heterogeneity and uncertainties of the geologic profile should be taken into account, Svinkin (34).

The waves travel outward from the construction source and attenuate in the results of geometrical spreading and material damping. It is common to calculate displacement amplitude reduction of the Rayleigh wave between two points at distances \( r_1 \) and \( r_2 \) from the source as \( (r_1/r_2)^{0.6} \) with a factor \( \exp[-(\alpha r_1-r_2)] \) where \( \alpha \) is the coefficient of attenuation. Golitsin (10). However, there are certain difficulties in determination of the coefficient, \( \alpha \), for ground vibrations from construction and industrial sources. This coefficient could be inadequate for different distances between points of measurements. On account of wave refraction and reflection from boundaries of diverse soil layers, an arbitrary arrangement of geophones at a site can yield incoherent results of ground vibration measurements because waveforms measured at arbitrary locations at the site might represent different soil layers, Svinkin (37).

Besides, the coefficient, \( \alpha \), depends on the soil resistance to pile penetration. During hard driving, these coefficients tend to be higher than those where hard driving is not encountered. According to experimental data from Clough and Chameau (4), the coefficients, \( \alpha \), were 1.3-2.5 times greater for hard driving than those for normal driving.

A scaled-distance approach, Wiss (42) and Woods (44), uses relationship between energy, \( W \), of source and surface distance, \( D \), where velocity, \( v \), is calculated as \( (D/W^{0.5})^n \) where the value of \( n \) yields a slope in a log-log plot between 1 and 2. The modified scaled-distance approach provides calculation of the peak particle velocity (PPV) of ground vibrations as a function of the source velocity, Svinkin (35).

Mayne (23) suggested for dynamic compaction a relationship between the impact velocity of a free falling weight and PPV of ground vibrations as \( PPV = 0.2252gH^{0.8}(d/r_0)^{1.7} \) where \( g \) = gravitational constant, \( H \) = falling height, \( d/r_0 \) = distance normalized to the weight radius.

Empirical equations employed for assessment of expected soil vibrations from construction and industrial sources usually only allow calculation of a vertical peak amplitude of vibrations and not always with sufficient accuracy. These equations cannot incorporate specific differences of soil conditions at each site because heterogeneity and spatial variation of soil properties strongly affect characteristics of propagated waves in soil from construction and industrial vibration sources.

A new Impulse Response Function Prediction method (IRFP) has been originated by Svinkin (34, 36) for determining complete time domain records on existing soils, structures and equipment prior to installation of construction and industrial vibration sources. The IRFP method has significant advantages in comparison with empirical equations and analytical procedures.
Vibration Damage and Disturbance Criteria

A number of attempts have been made to connect vibration parameters (displacement, velocity and acceleration) with observed human annoyance, disturbances of sensitive devices, and structural damage, for example, Crandell (5), Medearis (24), Nichols et al. (25), Raush (28), Siskind et al. (30) and others. Richart et al. (29) demonstrated some results of such studies in graphical form for structure and machine vibration limits combined with human perception limits.

It was found that structural damage could be well correlated with the peak particle velocity (PPV) of structure vibrations. The same criterion for structural damage of residential buildings was set at 50 mm/s peak particle velocity in the frequency range of 3-100 Hz, Nichols et al. (25). For commercial and engineered structures, Wiss (41) suggested to use a conservative limit of 100 mm/s.

Building damage occurs in the result of combined influence of structure vibration displacement, velocity, acceleration and frequency. The necessity to take into account the vibration frequency to assess the vibration effect on structures was underlined in a number of publications, for example, Dowding (7, 8), Medearis (24), Siskind et al. (30), Svinink (32) and others. Intensive studies of residential structural damage in connection with measured displacement and velocity was made by the U.S. Bureau of Mines, Siskind (30). As the results, a set of criteria was developed for the frequency range of 1-100 Hz, involving both displacement and velocity, Figure 1.

The peak particle velocity is the parameter most commonly used to evaluate the effect of construction vibrations on structure. However, other vibration parameters should be used in assessment of vibration effects as well. So Figure 1 shows the importance of displacement limits to evaluate structural damage. Displacement of 0.1 mm, and acceleration of 2.5 m/s², not velocity, are vibration limits for computing systems, Boyle (3).

There are simple mathematical relationships between peaks of displacement, velocity and acceleration. Displacement calculations from velocity records are correct, but analogous acceleration calculations do not always yield proper results because velocity measurement cannot detect high frequency components of ground vibrations. Accelerometers and geophones have the opposite principles for vibration measurements. If acceleration limits are available for sensitive devices or foundation settlements, acceleration must be measured in parallel to velocity measurements. For example, Clough and Chameau (4) made acceleration and velocity measurements at the same time. One more important point is to use devices with proper calibration curves. Otherwise it is possible to receive misleading results.

SURVEY OF CASE STUDIES

There are numerous publications regarding vibration effects from construction operations. Several references are presented in the introduction section of this paper. In this section, an attempt was made to analyze obtained results and assess contribution of different factors on construction vibrations.

Source Effect on Ground Vibrations

Pile Type. In general, piles being driven as displacement piles generate the greatest ground vibrations, e.g. Woods (44), Svinink et al. (38) and others. However, there effects are varied and depend on pile cross-section shape and soil conditions. The more pronounced effects of displacement piles on ground vibrations occurs predominantly at distances less than 10 m from pile driving.

A pile shape may affect ground vibrations around the driven pile. Martin (20) found that driving of sheet piles do not generate large horizontal vibrations in perpendicular direction to the line of the sheet piles.

Figure 1 Safe level of blasting vibration for houses using a combination of velocity and displacement, after Siskind et. al. (30)
Pile impedance is a significant factor in the transfer of dynamic longitudinal force into the pile and from the pile into the surrounding soil. The greater the pile impedance, the greater the pile capacity and the greater the dynamic force that can be transferred to the ground. However, pile impedance affects the intensity of ground vibrations in two opposite ways at the same time. On the one hand, increasing pile impedance increases the force transmitted to the pile and surrounding ground, but on the other hand, increasing pile impedance decreases the peak particle velocity of pile and ground vibrations. An increase of hammer energy magnifies ground vibrations until the pile impedance allows to increase the force transmitted to the pile and the surrounding soil. The impedance affects in opposite ways the force and the velocity transmitted to the ground and therefore the pile impedance effect on the intensity of ground vibrations is not obvious. Pile impedance cannot be always used as a predictor of intensity of ground vibrations, Svinkin et al. (38).

Soil Resistance and Pile Length. During driving, the various soil resistances to pile penetration are developing as the pile penetration depth is increasing. Pile-soil load transfer is realized by means of both concentrated loads from the pile toe and distributed loads generated along the pile shaft. Generally speaking, dynamic loads transferred from the pile to the ground should be increasing with augmentation of a pile penetration depth. However, this does not always occur. Accumulated experience in pile driving shows that the intensity of ground vibrations is mostly independent of the pile penetration depth and depends on soil properties, for example, Clough and Chameau (4), Holloway et al. (15), Svinkin et al. (38) and others.

In soils with a low penetration resistance such as loose fill, peat or silt, a large portion of the hammer energy is used in overcoming soil friction and thereby moving piles down. Therefore less energy is transmitted for generating ground vibrations in comparison with pile driving in soil with a high penetration resistance. The high blow count resulted in increased ground vibrations at the pile penetration depth approximately between 4-8 m below the ground surface but did not effect ground vibrations at the greater depth. These results were obtained from driving of concrete, steel shell and H piles and also of sheet piles.

Dynamic Compaction. For dynamic compaction of loose sands and granular fills, large and heavy steel or concrete blocks weighing typically 49.1-137.3 kN are usually dropped from heights of up to 30 m, Hayward Baker (12). The size of weights could be larger at some construction sites. The maximum falling weight found in publications was 397.3 kN, Gambin (9).

The wide range of impact loads on the ground determines a wide range of ground vibrations. Vibration levels increase as the treated field becomes densified. A maximum level of particle velocity might be achieved after one or two passes of heavy tamping. It is necessary to point out that localized liquefaction may occur around the contact area of impact, Mayne (22).

Dynamic loads on the ground induce elastic waves in the soil medium and these waves are transmitted through the soil in all directions. The spectra of soil vibrations excited by impacts show a few maximums with the dominant frequency of the surface wave. Actually, these frequencies are the natural frequencies of the soil layers and the values obtained do not practically depend on conditions at the contact area where impacts are made directly on the soil. In general, soil profiles are nonlinear systems and the dominant frequency of soil profiles depends on the applied impact. Nevertheless, over a certain range, the system behavior may be linear and if the system is restricted to this range it is possible to safely use the linear approach. However if sizes of falling weights are considerably different, such impacts on the same contact area might generate surface waves with different dominant frequencies, Svinkin (33, 34).

Blasting. Blasting energies are much larger than energies of other sources of construction vibrations. Blast design depends on the large number of factors and is aimed to enhance blasting productivity and diminish generated ground vibrations without increasing the cost. The following describes effects of different factors on ground vibrations, Nicholls et al. (25), Dowding (8) and OZA Inspections (27).

Explosive type and weight, delay-timing variations, size and number of holes, distance between holes and rows, method and direction of blast initiation, geology and overburden are the most important causes which effect ground vibrations. The explosive types affect ground motion through detonation velocities of explosives and a square root of the charge weight. Microsecond-delayed blasts are used for reduction of PPV of ground vibrations which are connected with the maximum charge weight detonated per delay. A choice of the proper delay is not a simple
problem. Wave propagation might differ with direction if there is geologic complexity. The effect of overburden manifests itself in attenuation of high-frequency components of ground motion.

Energy of Dynamic Sources. The energy of construction sources is important source property which effects intensity of surface waves. e.g. Attewell and Farmer (1), Mayne (23), Wiss (42), Woods (44) and others. In general, ground vibration level increases if the source energy increase. However the energy of source is not always the dominant factor in determination of the intensity of ground vibrations. The following case studies shows that influence of other factors should be considered.

The effect of energy level of dynamic compaction on PPV of ground vibrations at different distances from the source was studied by Mayne (23). It was revealed that the exponent term for energy of the source, W, decreases with distance away from the point of impact. At distances of 6.1, 15.25, and 30.5 m, the observed effect of energy level was \((W)^{0.6}\), \((W)^{0.5}\), and \((W)^{0.4}\), respectively, as determined from linear regression analysis of obtained data.

Martin (20) reported similarity of PPV of vertical ground vibrations observed for displacement piling on peat and corresponding PPV observed for sheet piling on silt and clay. Although the impact energy of the hammer used for driving of close-ended steel pipes was in ten times the energy of the hammer used for sheet piling, the intensity of vertical ground vibrations was similar at the compared construction sites. The minor reason of these results was explained by differences in the geometry of the piles. The displacement pile had a circular section and the energy transmitted from this pile to the ground was shared between vertical and two horizontal components of ground vibrations. The sheet pile had a 'U' shaped section and driving of this pile produced predominantly vertical ground vibrations. The major reason for the comparatively low level of vertical vibrations from displacement piling operation was the low penetration resistance of the peat. A large portion of the energy transferred to the pile was absorbed in moving the pile through the peat.

Dowding (8) made comparison of ground vibrations induced by pile driving with a diesel hammer and by Franki pile driving and revealed that the latter developed two times more energy but induced smaller ground vibrations at the same distances from the sources. Perhaps the cause of this phenomenon was a higher attenuation of surface waves in the loose soil deposits where Franki piles were driven. This observation underlines the significance of soil contribution to the formation of ground vibrations.

Soil Effect on Vibrations Propagation

Distance from Sources. Waves travel in all directions from the source of vibrations forming a series of fairly harmonic waves with the dominant frequency equal or close to the frequency of the source. Higher frequencies being attenuated faster than lower frequencies with distance from the source. However, the soil medium does not consistently play the role of a low-pass filter and ground vibrations with higher frequencies and amplitudes may arise after certain vibration attenuation.

The inherent spacial variations of soil properties are not always readily identifiable by routine boring, sampling, and testing. For instance, Hammond (11) reported a case history of the influence of heterogeneity in soil strata on soil and building vibrations at the site where a foundation was installed for a forge hammer with a falling weight of 75.8 kN. The dominant frequency of propagated waves was 22.0 Hz to the west of the hammer foundation, while, at the same time, in opposite direction to the east of the source, the dominant frequency was 10.0 Hz. In another interesting case, Svinin (34), forge hammer foundation vibrations with a frequency of 14.0 Hz excited soil vibrations with a similar dominant frequency except at one location where the dominant frequency was 25.0 Hz with enhanced amplitudes.

Soft and Stiff Soils. Attenuation of surface waves with distance from the source is important for reduction of ground vibrations. Clough and Chameau (4), Wiss (42) and Wood and Theissen (43) made intensive measurements of ground vibrations from construction sources and revealed that values of geometric and material damping are higher in soft soils than those in denser, firmer soils. Moreover, PPVs of ground vibrations tend to increase as soil materials become more dense with the number of blows, Mayne (22). Nevertheless, there is an opposite point of view. Taniguchi and Okada (38) described a case where soft ground was improved to depth of 12 m by means of the lime pile method. As a result, the acceleration at the ground surface decreased to 10-60 % in the frequency range less than 10 Hz. Indeed, various soil conditions require different solutions to diminish ground vibrations.
Martin (20) reported results of measured ground vibrations which had been induced by Love waves. A closed-ended pipe pile was being driven by a drop hammer into the soft clay to the depth of about 8 m and then into the gravel layer. When the pile reached the gravel level, PPV of transverse ground vibrations increased two times but PPV of vertical and radial motion were almost the same. The large transverse vibrations were a Love surface wave. Similar large transverse ground motion was recorded by Clough and Chameau (4) during driving sheet piles through the rubble layer by an ICE Model vibratory hammer at an operated fixed frequency of 1,100 rpm.

CONSEQUENCES OF CONSTRUCTION VIBRATIONS

Vibrations transmitted through the ground during construction operations may annoy people and detrimentally effect structures and sensitive devices.

Construction vibrations effect structures in two major ways. Those vibrations may produce direct damage to structures and make damage due to vibration-induced settlement.

Structure Vibrations. Structure vibrations depend on soil-structure interaction which determines a structure response to the ground excitations. Structure vibrations measured from construction operations vary in a wide range of frequency content and intensity.

Case studies made by Wood and Theissen (43) included ten projects with vibration levels measured in buried structures and buildings supported on piles at soft soil sites and on spread footings at firm soil sites. It was concluded that vibratory hammers of about 23 kg-m eccentric moment or impact hammers of about 94 kJ rated energy with a weight of striking parts of 43.3 kN operating immediately adjacent to unreinforced brick or reinforced concrete structures in poor conditions may be in some degree dangerous for building. Similar construction sources operating immediately adjacent to reinforced concrete structures in good conditions will probably do not produce dangerous structure stresses. Results obtained by Mallard and Bastow (19) and Martin (20) showed that vibrations of light floors are larger and concrete floors are smaller than ground vibrations.

The proximity of the frequency of soil vibrations to one of the structures natural frequencies may generate the condition of resonance in the building. Continuous forced vibrations produced by vibratory hammers have potential to set up resonant vibrations in certain building structures. Moreover transient vibrations might trigger resonant vibrations as well. Levin (17) found that 3-4 cycles of ground vibrations could generate the condition of resonance in the building. Rausch (28) described a case history where intolerable vibrations occurred in an administrative building located 200 m from the foundation of a forge hammer with a falling weight of 14.7 kN. This weight was considerably less than that in the described above case, Wood and Theissen (43), but obviously the condition of resonance played the major role.

The damage criteria in Figure 1 are used as a threshold level, but it does not mean that exceeding this level immediately entail some structural damage. For example, ground vibrations measured nearby the school building located at distance of 24.4 m from a construction blast are shown in Figure 2. OZA Inspections (27). It can be seen that PPV of vertical, radial and transverse ground vibrations were higher of the threshold levels for the wide frequency range. Such vibrations did not result damage of one story brick school building supported on concrete foundations.
One more important comment. The damage criteria displayed in Figure 1 do not make distinction of type, age and conditions of structures and foundations. Probably more objective and informative damage criteria are a subject for future research.

Crockett (6) and Dowding (8) suggested to take into account the accumulated effect of repeated dynamic loads, for example from production pile driving. This approach is especially important for historical and old buildings.

On the basis of probabilistic analysis of a numerous published data, Siskind et al. (30) made a damage description for Uniform Classification. The three damage categories included the following. Threshold: loosening of paint, small plaster cracks at joints between construction elements. Minor: lengthening of old cracks, loosening and falling of plaster, cracks in masonry around openings near partitions, hairline to 3 mm cracks, fall of loose mortar. Major: cracks of several millimeters in walls, rupture of opening vaults, structural weakening, fall of masonry, load support ability affected. This classification can be useful in assessment of structural damage from construction vibrations.

Settlements Induced by Vibrations. Vibrations may change properties of loose sands saturated with water. This physical phenomenon produces settlement of the ground around the pile and building foundations. Lacy and Gould (16) collected 19 reported cases with different settlements of sands caused by pile driving, described a few approaches to calculate ground settlement, and underlined problems in calculation of settlement of loose sand during pile driving.

It is not clear what vibration parameter and its value should be considered as a trigger of a liquefaction phenomenon of sand. Lacy and Gould (16) consider PPV of ground vibrations of 2.5 mm/sec as a threshold of possible significant settlements at vulnerable sites. Clough and Chameau (4) and Lukas and Gill (18) used an acceleration for assessment of ground and foundation settlement. Barkan (2) reported an important role of the static pressure on the soil for dynamic settlement of a foundation. Therefore different criteria should be taken into consideration in assessment of potential liquefaction problem.

Human Responses. Human perception of vibrations is subjective and human response to arisen vibrations may have false reasoning. Therefore contractor have to provide proper public relations to inform residents regarding possible negative effects of construction vibrations.

MITIGATION OF VIBRATION PROBLEMS

A pre-construction survey is the first step in the control of construction vibrations to ensure safety and serviceability of adjacent structures and/or distant structures with sensitive equipment like hospital facilities and offices with precision instruments. According to pile driving practice, construction vibrations may cause direct damage to structures at a distance about of one pile length from the driven pile. However, there is no single opinion regarding the maximum radius of a preconstriction survey area with buildings surrounding a construction site. Dowding (8) suggested a radius of 120 m of a construction activities, or out to a distance at which vibrations of 2 mm/s occur.
Woods (44) considered distances of as much as 400 m to be surveyed to identify settlement damage hazards. Obviously, a radius of the area of preconstruction survey is various and depends on building condition and utilization.

The preconstruction survey includes a few steps of site investigations.

- Inspect present conditions of surrounding buildings.
- Perform damage susceptibility study to establish vibration control limits.
- Measure vibration background at the area under investigation.
- Assess problems such as cracking of building or foundation failure.

First of all a preliminary desk study of a layout of the area for a preconstruction inspection and a site walk-over observation should be made. Existing cracks found in buildings have to be marked. It is necessary to distinguish cosmetic and structural cracks. Most attention should be paid to cracks in the structures themselves. The width of cracks should be measured with a proper ruler. Determining the cause of cracking is important to predict lengthening and dilatation of old cracks under the vibration effect of pile driving.

For assessment of the dynamic effect on surrounding structures it is necessary to take into account the thresholds of damage, cracking and perception. Buildings inspected under the contract requirements are commonly classified depending on structure susceptibility to cracking and proximity of structures to pile driving operations.

Structure susceptibility is usually related to the threshold of cosmetic cracking. Dowding (7), and depends on a degree of degradation of the building structural and nonstructural systems. Apparently this terminology should be used in the broad sense as susceptibility of the building-soil system depending on degradation of building systems, utilization of buildings and soil conditions. It is important for certain cases. For example, a building, located in the proximity of the driven piles, identified as having low susceptibility and built on liquefiable soils might have substantially larger deformations than a building identified as having high susceptibility but erected on non-liquefiable soils at long distance from the driven piles. Certainly, for some sites only the threshold of cosmetic cracking could be sufficient.

Measurement of a vibration background at soil and buildings with sensitive equipment and/or computerized technology should be a part of the preconstruction survey. The vibration measurement might reveal microvibrations and vibrations induced by industrial machinery located nearby. A waveform recorder has to be used for these measurements.

Assessment of the dynamic effect of construction operations on surrounding structures can be made on the basis of prediction, monitoring and control of soil and structures vibrations from pile driving.

CONCLUSIONS

- Construction operations involve various sources of vibrations such as pile driving, dynamic compaction, blasting and operating heavy equipment. Construction work often creates problems of disruption of some businesses, annoying people and possible structural damage.
- Dynamic loads transmitted to the ground change in a wide range of frequency content and intensity and generate elastic waves in soil medium.
- Empirical equations provide only calculation of a vertical amplitude of ground vibrations and not always with sufficient accuracy.
- The impulse response function prediction method (IRFP) has obvious advantages in predicting time domain ground and structure vibrations prior to the beginning of construction activities.
- Parameters of dynamic sources and soil conditions effect soil and structure vibrations. Various factors such as pile type and length, soil resistance, specific peculiarities of dynamic compaction and blasting should be considered in analysis of vibration effects.
- The preconstruction survey should be made to ensure safety and serviceability of adjacent structures and/or remote structures with sensitive equipment like hospital facilities and offices with precision instruments.
- It is important to assess the dynamic effect before the beginning of construction activities and at the time of construction. Therefore monitoring construction vibrations have to be started prior to the beginning of
construction work at a site and be continued during construction to provide the safety and serviceability of sound and vulnerable structures.

Vibrations Can Cause Structural Damage

On the Scene E-Newsletter, Edition 139, June 8, 2011

Most people are familiar with natural causes attributed to foundation cracking such as earthquakes, wind, poor soil conditions, freezing and thawing cycles, tree roots, and moisture in the soil. Although vibrations caused by natural causes endanger structures, vibrations caused by man-made efforts may be troublesome as well. Common construction activities such as large equipment traffic, drilling, blasting and soil compaction produce ground vibrations which conceivably damage nearby buildings or homes.

Demolition and new foundation work are common sources of vibrations that can cause an area effect. The tools and methods used in demolition and construction, such as pile drivers, jack hammers, wrecking balls, pavement breakers and rock blasting produce vibrations that may be transmitted to and can result in claims involving:

- exterior cracking of façades
- interior cracking of walls
- roof collapse / structural failure
- pavement & foundation cracking

The underlying issues are often:

- differences in materials where they join
- insufficient or defective materials
- inadequate water management techniques used for drainage or rainwater
- settling of soil
- voids existing within grading of soil
- fasteners may become loose with excessive vibration
- inadequate maintenance
- insect invasion

What can be done to verify how the damage occurred? First, an engineer will examine and evaluate damages to the structure and second, they will evaluate the construction activities. This is accomplished by determining the following:

- if any vibration imparted to the soils, violate the “Peak Particle Velocity” guidelines
- seismograph readings (often taken during time of work/construction)
- whether adjoining structures were evaluated or photographed to measure potential shifts, cracks, settling or uplifting to them
- was the water table evaluated in cases where dewatering would be a necessary construction technique
- evaluate and/or analyze the following:
  - type of construction or equipment being utilized
  - proximity of damage to location of work being completed
  - was blasting close and how large were the explosives
  - see if items fell off shelves
  - documentation provided by those undertaking the construction
  - what are weights of the machinery and vehicles traversing the site
  - age of the cracks
  - sharpness of the crack edges
  - growth of the cracks
  - older paint present
  - other witness marks
  - look for other potential causes of the cracking such as a water leak, blunt force, etc.

As you can see by the above list, evaluating structural damage is not a simple process. CED engineers’ training and experience allows them to uncover the extent and cause of structural damages – whether the cause turns out to be nearby construction, storms, or defective materials or techniques. Our engineers understand the methods of vibration measurement and analysis and follow established procedures during testing. Therefore, should you require assistance in structural damage assessment due to suspected vibration, call us at (800) 780-4221 or please visit our website at www.cedtechnologies.com.

Abstract: Structural vibrations induced by train traffic have to be damped to increase the quality of life in buildings close to railway tracks. The problem becomes more serious in places, where the propagation speed of Rayleigh surface waves is low due to the low elasticity of the soil. To overcome the problem it has been proposed different vibration isolation barrier constructions, which may be composed of sheet piles, artificial gravel layers and air cushion walls to modify the waves traveling along the ground. Because the barrier lines may be relatively long it has been developed an automatic sheet piling system to make the installation fast and economical.

Keywords: railway foundations, wave barrier, ground vibrations, sheet piling

1. INTRODUCTION

Ground vibrations excited by moving vehicles like cars and trains are disturbances, which reduce the quality of life and working conditions in buildings close to heavily loaded roads and tracks [4]. Architectural damages are also long term consequences of vibrations especially in case of historically valuable buildings. In order to avoid extreme vibration levels, sometimes the maximum train speeds must be limited dramatically in such areas. The problem has been understood to be so serious that new international standards are under preparation work in European Communities for stating limits to acceptable vibration levels. This is an important element leading towards environmentally friendly surface traffic especially in the neighborhood of highly populated urban towns. On the other hand, demands to increase the performance of ground transportation are forcing the expedition and railway companies to use heavy wagons with increasing speeds. It has been observed that higher speeds lead to higher structural and ground responses especially in case of soft soil [3]. Because this development is in conflict with both building protection and environmental requirements it has been initialized research work to find out technical ways to reduce ground vibrations close to railroads. There are two leading strategies in vibration reduction: a) to modify the vibration excitation mechanism b) to modify the vibration response before the waves reach the object to be protected. The design problem is also different when 1) building a completely new railroad or 2) when upgrading an existing one to higher speed class. Because the combinations a1 and a2 are related to the railway foundation design this paper is concentrated to combinations b1 and b2 e.g. to the question of how to damp the wave motion before the object building in case of new or existing railroad. The main elements of this vibratory system are shown in the topology drawing in figure 1.
It has been introduced and used both stiff (concrete [1], [2]) and soft (air cushion [7]) ground vibration isolator barriers as well as medium hard (barrier walls [3]) between the vibration source and object. According to the field tests the methods mentioned have been shown to be relatively effective in their primary function and, therefore, it has opened the discussion on how these structural elements could be installed also in a cost-effective way. Costs include in this case all costs related to materials, machinery, brakes in traffic flow, energy consumption and recycling. Because the complete track line length to be isolated may be several kilometers the most economical solution is worth of deep investigation. During this work it has been found a very promising work method, namely excavator-based sheet piling (figure 2, [5]). This method utilizes automatic control to repeat the correct drive line when constructing complete sheet pile walls (figure 3, [6]).

In this particular application the potential to use automatic sheet-piling method is exceptionally good for the following reasons:

1. Vibratory sheet piling can be used in soft clay soils only, in which the problem of high wave response also exists.
2. The rail track can be used as a mechanical guiding element to keep the wall-track distance constant.
3. The walls can be temporary or permanent and may be combined flexibly with other foundation materials or elements.
4. The installation method must be fast to minimize the disturbances of traffic flow.

The purpose of this paper is to develop an intelligent work method based on automatic sheet piling to produce different barrier constructions for damping the train-induced waves. The complete work may be divided into three different subtasks:

1. The development of the barrier construction.
2. The development of the automatic work process.
3. The development of the machine system.

**2. BARRIER DEVELOPMENT**

Barrier construction may be developed under the condition that the whole work cycle should be carried out with excavator and sheet piler only. This is a limitation in the development but, on the other hand, a good starting point, because similar process has already shown its feasibility in foundation works of buildings [5]. Possible combinations, where sheet pile walls and air cushion layers work together, are shown in figure 4.
The sheet pile wall is hit in to the soil at a desired angle $\alpha$ (see figure 5) defining the unit vectors for normal $\mathbf{n}$ and tangential $\mathbf{t}$ directions of the interface. Similarly, the motion components $\mathbf{u}$ and $\mathbf{v}$ of sheet pile wall in axial and bending directions are governed by wide beam differential equations

$$\rho A \ddot{\mathbf{u}} = L_1(\mathbf{u})$$  \hspace{1cm} (2)
$$\rho A \ddot{\mathbf{v}} = L_2(\mathbf{v})$$  \hspace{1cm} (3)

The sliding boundary condition is frictional so that shear stresses winning the adhesion or friction capacity $c_a$ of the interface may lead to sliding condition instead of sticking. If we use notation $\sigma$ for the stress tensor, this may be written in form

$$\mathbf{n}^T \sigma \mathbf{t} = \text{sgn}(\mathbf{t}^T \dot{\mathbf{s}} - \dot{\mathbf{u}})c_a$$  \hspace{1cm} (4)

for sliding but for sticking condition

$$\mathbf{t}^T \mathbf{s} = \mathbf{u}$$  \hspace{1cm} (5)

The locking boundary condition connects the motion of soil particles to the motion of the sheet pile in normal direction

$$\mathbf{n}^T \mathbf{s} = \mathbf{v}$$  \hspace{1cm} (6)

If an air cushion bed will be used, it should be installed against the sheet pile wall at the building side, because installing to track side may possibly lead to track settlements later. Boundary condition between the sheet piles and back side soil field is in this case simply an elastic layer condition in momentum form

$$\mathbf{n}^T \sigma \mathbf{n} = k_1 (\mathbf{n}^T \dot{\mathbf{s}} - \dot{\mathbf{v}})$$  \hspace{1cm} (7)
$$\mathbf{t}^T \sigma \mathbf{n} = k_2 (\mathbf{t}^T \dot{\mathbf{s}} - \dot{\mathbf{u}})$$  \hspace{1cm} (8)

Under these conditions the angular orientation of the sheet pile wall is a very interesting parameter, because the wave profile will be modified significantly. Analysis of the barrier performance may be carried out using finite elements [3]. In FE computations it is possible to model the whole topology and dynamic loads including the track excitation, slopes, barriers, building and the soil field for analyzing how the wave will travel from the source to the foundation of the building.

3. WORK PROCESS DEVELOPMENT

Sheet piling by side-grip is a work process, in which the working cycle typically consists of phases (see figure 6):

1. Off-loading the piles from the lorry.
2. Lifting and transporting the piles to the driving place.
3. Giving to the piles a desired position and orientation.
4. Hitting the piles in to the ground.

7. Using the automatic slope digging mode remove the soil material away to make a space for the air cushion element. Use the excavated soil to fill the previous dig place.
8. Using the bucket lift and install the air cushion element in parallel contact with the sheet pile wall.
9. Replace the bucket by the sheet-piler.
10. If using temporary sheet pile walls drive the pile out from the ground and continue from step 2.
11. If using permanent sheet pile walls start from step 1.

Figure 6. Work phases in side-grip piling method.

Conventionally there has been a need of an excavator, a crane and a piler and a number of 3…4 workers to do the job. In contrast to that in Movax side-grip piling method only one operator and one excavator-mounted piler can do the whole work process. This advantage is based on the integration of vibratory and gripper units in one compact device, which can do flexibly all the materials handling, manipulation, positioning, automatic steering and driving tasks required.

Adaptation of side-grip piling method to railway construction applications is relatively straightforward.

The work process could include phases:

1. Using the gripper take the pile from the wagon.
2. Using the positioning system move the pile in desired position and orientation.
3. Using the steering system drive the pile in to the ground
4. Drive the wagon (or excavator) along the track a distance corresponding to the pile width.
5. Repeat phases 1…4 to reach total distance of one air cushion element.
6. Using the quick hitch adapter system replace the piler by the bucket.

Figure 7. Barrier installation by automatic sheet-piling system.
This kind of work process can be understood as a window traveling slowly along the track. The steps are illustrated as side views in figures 7 and 8. The process can be continued flexibly so far as the terrain and soil material are suitable for sheet piling.

![Figure 8. Finishing works in barrier installation.](image)

Work costs in this method are proportional to the earth volumes excavated. This volume may be computed approximately by formula

\[ V' = \frac{1}{2} adLb^2 \]  \hspace{1cm} \text{(9)}

where \( L \) is the total wall length and \( b \) is the depth dimension of the isolation layer in pile direction (see figure 9).

As the barrier performance in damping the wave motion is depending on the vertical depth

\[ d = bs \sin \alpha \]  \hspace{1cm} \text{(10)}

one has to compromise between the work costs and barrier effectiveness.

4. SYSTEM DEVELOPMENT

Movax piler has been originally developed for an optionally accessory to an hydraulic excavator. The device can be mounted also to other booms, which have the standard bucket interface. On the other hand, there is available track wheels for excavators also so that the along track mobility of the boom can be solved easily (see figure 10a).

Main advantages of the use of excavator are of course the best suitability for digging and piling works but a wagon is still needed for transporting the piles to the place where the current working window is. Another problem is to find a platform, where to keep the bucket or piler when the other tool is in usage and the other one has to be temporarily stored to wait for the next working step.

Railway companies have also mobile maintenance wagons with their own power source for driving purposes. Another Diesel driven hydraulic power unit could be added to the wagon and its power supply could be used for the boom and pile driving. This machine lay-out is drawn in figure 10b.
The main elements in the automation system are the upper level supervising system, the boom steering system, pile driving system and the vehicle driving system.

The upper level supervising system communicates with the human operator for reporting the system state and asking permissions to continue with the next phase. One important element in this task is a monitoring system that makes diagnosis of disturbances observed in individual work phases in the complete work cycle.

The boom-controlling system fully utilizes the earlier development work, in which the bucket pin of the boom tracks a desired trajectory in a desired inclination angle. In this particular case the system has to steer the pile to follow straight line in a given orientation angle. Boom motion is controlled by means of inverse kinematic algorithm based on boom position measuring by gravitational angular sensors. Initial positioning can be done semi-automatically so that the drive line and pile orientation will be found automatically but the axial positioning will be done manually. To guarantee that the relative position of the gripper and the pile will remain constant pile after pile the grip has to be taken from a known reference place before the steering. After each pile the excavator or the wagon has to be moved along the track a displacement same as the pile width.

Boom controller can be used also in the digging work so that the bucket motion follows the surface of the building side of the sheet pile wall. This makes a significant time saving in digging.

During the pile driving the upper level controller unit has to monitor the penetration speed giving also a diagnosis of possibly found hard obstacles that prevent the pile to penetrate. Existence of large stones is of course a weakness in the whole method.

Based on earlier experiences of the piler steering in foundation works, the possibilities to fully robotize the complete work process are relatively poor, because the work object and the work space are not so precisely known as in industrial applications. So, a realistic step of the development of this barrier wall installation system could be a human-assisted system that better fits to this partly unstructured work environment. Human operator could control the changes between the work phases and also fine adjust the local positioning tasks while within each task the lower level controller could work automatically.

5. CONCLUSIONS

The problem to find out a low-cost method to install barrier walls against train-induced ground vibrations has been under investigation. The purpose is to isolate buildings from the traveling Rayleigh surface waves. This usually happens when the soil consists of soft layers of clay. Such places are locating very often in coastal places, where the soil originates from the sea bottom sediments or erosion sludge conveyed by rivers. One promising work method is sheet-piling, in which case the barrier has to be composed of sheet-pile wall with soft isolation layer at its building side. The purpose of the wall is to reduce the amount of soil masses to be removed and also to support the isolation layer. Isolation material could be air cushion or granular material like artificial gravel. The installation work can be carried out by computer controlled boom system, which allows drive the pile wall in prescribed inclination angle. The boom is equipped with an integrated gripper-driver unit and may belong to an excavator with track wheels or it may be mounted on a customized wagon. By changing cyclically the bucket and sheet piler, the work process can run in piling-digging-layering-filling phases semi-automatically, where the operator assists changes from one internally automatic task to a next one.

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - [ ] Positively
   - [x] Negatively
   - [ ] No or minimal impact
   Open Comment: **INCREASED NOISE = DELAYS AT CROSSINGS**

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - [ ] Strongly support All Aboard Florida
   - [ ] Moderately support All Aboard Florida
   - [ ] Neither support or oppose All Aboard Florida
   - [x] Strongly oppose All Aboard Florida
   - [ ] Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [x] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [x] Access to a passenger rail stop in Indian River County
   - [x] Increased safety measures along the tracks
   - [x] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [x] This increase will have a high positive impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have a high negative impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ________________________________

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: **DO NOT USE FEC RR TRACKS**

**CONSTRUCT NEW TRACKS INLAND**

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: **N/A**
CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Christine Celano Date: 11-5-14
Address: 6240 E. Mirror Lake Dr #1301 Sebastian, FL 32958

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

☐ Positively
☐ Negatively
☐ No or minimal impact
Open Comment: ADDITIONAL TRAIN NOISE AND BACKUPS ON ROUTE I AND CROSSINGS

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
☐ Strongly support All Aboard Florida
☐ Moderately support All Aboard Florida
☐ Neither support or oppose All Aboard Florida
☐ Strongly oppose All Aboard Florida
☐ Do not have enough information about this project to have a position
Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
☐ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
☐ Access to a passenger rail stop in Indian River County
☐ Increased safety measures along the tracks
☐ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
Other? State below (DECREASE IN THE NUMBER OF TRAINS)

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
☐ This increase will have a negative impact
☐ This increase will have a moderately negative impact
☐ This increase will have no impact
☐ This increase will have a moderately positive impact
☐ This increase will have a high positive impact
☐ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

☐ Noise from moving trains
☐ Noise from train horns or stationary crossing horns
☐ Vehicle and pedestrian safety issues
☐ Length of time it takes for the trains to pass through a street crossing
☐ Emergency services access
☐ Negative impact on our eco-system
☐ Negative impact on structures
☐ Local ability to deal with potential rail accidents
☐ Vibration
☐ General quality of life
☐ Other: ____________________________

CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: MARK G. LUND  Date: 10/15/14
Address 1053 LOUISIANA AVENUE SEBASTIAN

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - [X] Negatively
   - [ ] No or minimal impact
   - [ ] Positively

Open Comment:

   (NO FENCING ON BARRIERS ALONG TRACKS) MORE FREIGHT CARS DOUBLE STACKED / MORE NOISE
   MORE HUMANS, MORE VIBRATION AND DESTRUCTION OF OUR HOMES AND PROPERTY. MORE AIR HUMANS, BLASTING, GROUND FASTEN.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - [ ] Strongly support All Aboard Florida
   - [ ] Moderately support All Aboard Florida
   - [X] Neither support or oppose All Aboard Florida
   - [ ] Do not have enough information about this project to have a position

Open Comment: "ALL ABOUT FREIGHT!"

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [X] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [X] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

   ANTI-VIBRATION PADS BETWEEN STEEL PLAWS AND CONCRETE STEEL BEAM SUPPORTS.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [X] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: DE-RAILMENT OF CARS/ LOSS OF HOMES AND LIVES

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

TOO CLOSE TO THE BACK OF MY GRAND KIDS HOUSE. I GARAGE IS WHERE THEY ARE PUTTING SECOND RAIL.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

ONLY TO SAY THAT IS WHY CAPE CANAVERAL NOW HAS A HUKE SHIP CONTAINER UNLOAD FACILITY AHEAD WITH MY NAME, BOTH WITH RAISE CONNECTION TO HUNDRED OR THOUSANDS OF CONTAINERS A YEAR.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

Positively

Negatively

No or minimal impact

Open Comment:

ITS TOU LOUD ALREADY, IF I AM IN THE FRONT YARD NOW AND THE TRAIN IS GOING BY I HAVE TO STOP TALKING TO MY PHONE & FRIENDS BECAUSE ITS SO LOUD YOU CAN NOT HEAR A WORD ANYONE IS SAYING, EVEN IF THEY ARE STANDING RIGHT NEXT TO YOU.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- Positively
- Negatively
- No or minimal impact

Open Comment:
We live about 1 1/2 miles from track and hear not just whee but also rumble. It will disrupt the peaceful nature of where we live without any benefit to Sebastian at all.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- Strongly support All Aboard Florida
- Moderately support All Aboard Florida
- Neither support or oppose All Aboard Florida
- Strongly oppose All Aboard Florida
- Do not have enough information about this project to have a position

Open Comment:
No support unless they move track. A small group of hedge fund investors should not benefit at the expense of the safety and peace of mind of 600,000 people.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

- Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
- Access to a passenger rail stop in Indian River County
- Increased safety measures along the tracks
- No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below
High speed rail is an idea whose time has come, but the tracks should be located west of town.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

- This increase will have a negative impact
- This increase will have a moderately negative impact
- This increase will have no impact
- This increase will have a moderately positive impact
- This increase will have a high positive impact
- I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: __________________________________________

Open Comment: 
This project negatively impacts Sebastian in every way. So much for the sleepy fishing village.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?
Open Comment: 
It is hard to believe that they will have enough passengers to fill all those trains.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?
Open Comment: 
The real issue in this project is freight. Long speeding freight trains. How will they stop on time if there is a safety issue?

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?
- Positively
- Negatively
- No or minimal impact
Open Comment: 
At the Sebastian meeting scheduled for Oct 15th all the train crossings in Sebastian were closed! Promoted traffic police from getting across. It prevented people how get to the meetings but it was also indicative of what could happen. The crossings were blocked too at least in hour & ½. How safe is that?
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact
   
   Open Comment:
   "I can hear all the trains from my house and will have to wait at train crossings numerous times to get anywhere from where I live."

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   ___ Positively
   ___ Negatively
   ___ No or minimal impact
Open Comment: Noise, vibrations for people close to tracks - Safety for pedestrians + autos + police. All emergency services will be hindered

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ___ Strongly support All Aboard Florida
   ___ Moderately support All Aboard Florida
   ___ Neither support or oppose All Aboard Florida
   ___ Strongly oppose All Aboard Florida
   ___ Do not have enough information about this project to have a position
Open Comment: Sebastian wants to stay a small town. Eventually you may have a stop in Indian River County. We want homeowners here not people from South Florida.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ___ Access to a passenger rail stop in Indian River County
   ___ Increased safety measures along the tracks
   ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
Other? State below: Absolutely no level of support

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ___ This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life

Other: ____________________________

Open Comment:
Totally unfair to residents that live nearby tracks - their property value will decrease.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:
Railroad may buy their houses, but they will be worth nothing. These hard working people will not be able to afford to stay or relocate in Sebastian.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:
Safety is paramount. Children and school buses will be delayed. Ambulances and police will not be able to answer emergency calls.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?
   - Positively
   - Negatively
   - No or minimal impact

Open Comment:
Visitors will not want to be sitting or roads watching trains go by. Business will suffer because people will avoid going over tracks - will take alternative routes.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

   ___ Neither support or oppose All Aboard Florida
   x  Strongly oppose All Aboard Florida
   ___ Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   x  Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   x  Access to a passenger rail stop in Indian River County
   x  Increased safety measures along the tracks
   x  No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below
   __________
   Overpasses
   ___ change location to run alongside Highway 95 which I Kend they dont even know what they doing.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   x  This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ______________

Open Comment: Quality of life will be lessened. Property values could drop.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: don't do it. At least not on the proposed rail.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: It will be more stressful living here. The tranquility of the area will be lessened.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: ______________
1. 4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [x] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion

   _____________________________________________________________
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

   - No or minimal impact
   Open Comment:

   We have heart/stroke health issues that could be greatly impacted by a train when emergency time response is crucial.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position
   Open Comment:

   My support is zero, zilch, nada!

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below:

   None of the above will alleviate the disruption to the peaceful environment we moved to 6 months ago.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - X This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other: __________________________

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?
Open Comment: I believe it should be along I-95 – NOT impacting so many residential communities, especially when there are no benefits.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?
Open Comment: STOP them too! Put all of the trains along I-95.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: Visitors can't get to us in a quick/safe/quiet manner.

Open Comment:
Crossing Hwy Post Oak-Rte 1 is dark at night and even with arms down, it is difficult to see.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?
Open Comment:
Hospital is close by and many elders live in nearby subdivisions including Laurel Hills subdivision with approximately 950 lots with about 3,750 homes.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?
Open Comment:
Danger for rail accidents to community members and inability of community to respond appropriately and without fear. I am a 60-year-old retired firefighter and Farmington, ME (nearby town) is sister community of Lesc Mileville, Quebec. If other ME firefighters responded to that town’s 7/6/13 rail derailment, where 42 were confirmed dead + 4 others were presumed dead with huge amounts of property damage.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger rail and increased freight traffic? 

- Positively
- [x] Negatively
- No or minimal impact

Open Comment:
Seabrook relies on tourism and additional freight.

High-speed All Aboard Trains will not benefit the brookside fishing community feeling of Seabrook.
1. CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Sharon Knowles Date: Nov. 5, 2014
Address: 130 Chinaberry Ln. VB

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact
   Open Comment: Trains will bisect our town, will hamper access to hospital, will increase noise, will increase accidents, will have ONLY Neg. impact on our county, is being railroaded through."

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position
   Open Comment: There is insufficient evidence of passenger support for this AAF project. It seems clear there is another agenda driving this project.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below: Only relocation of the planned route, have them go west of 95.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high-speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: 

Open Comment:

Fast-West traffic would have major traffic jams affecting US 1. North-South traffic also.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high-speed passenger service?

Open Comment:

I am not typically an activist in these issues, but I am adamantly opposed to this plan and feel it is unsalvageable.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

See top of page. Take 52 and increase freight by 3% annually.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high-speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:

Employees driving from west of track would be continually delayed going both ways.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

____ Positively
X____ Negatively
____ No or minimal impact

Open Comment: Noise, safety, time spent at train stop

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

____ Strongly support All Aboard Florida
____ Moderately support All Aboard Florida
____ Neither support or oppose All Aboard Florida
X____ Strongly oppose All Aboard Florida
____ Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

X____ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
____ Access to a passenger rail stop in Indian River County
X____ Increased safety measures along the tracks
X____ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

Take the train to center of state away from our small communities on the beach

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

X____ This increase will have a negative impact
____ This increase will have a moderately negative impact
____ This increase will have no impact
____ This increase will have a moderately positive impact
____ This increase will have a high positive impact
____ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- [ ] Positively
- [x] Negatively
- [ ] No or minimal impact

Open Comment: 

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- [ ] Strongly support All Aboard Florida
- [ ] Moderately support All Aboard Florida
- [ ] Neither support or oppose All Aboard Florida
- [x] Strongly oppose All Aboard Florida
- [ ] Do not have enough information about this project to have a position

Open Comment: 

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

- [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
- [ ] Access to a passenger rail stop in Indian River County
- [ ] Increased safety measures along the tracks
- [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

- [x] This increase will have a negative impact
- [ ] This increase will have a moderately negative impact
- [ ] This increase will have no impact
- [ ] This increase will have a moderately positive impact
- [x] This increase will have a high positive impact
- [ ] I do not have enough information about the projected number of trains to have an opinion
Open Comment:

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other: Cost of maintenance on a local level

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: Problem with increased freight traffic from Sarasota.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: Noise, vibration, safety, frequency.

   Neg good - no upside, only downside.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?
   - Positively
   - Negatively
   - No or minimal impact

   If there were a stop in IRC directly from/to Orlando airport, that would be the only occasional benefit to me.
CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Gary McCabe  Date: 11/5/14
Address: 4525 Bridge Pointe Way #163, Vero Beach 32967

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - [ ] Positively
   - [x] Negatively
   - [ ] No or minimal impact

Open Comment: Degradation of our personal quality of life day today, Aug 2 + Trains/hr to interfere with emergency vehicles - cuts city in half, Noise/vibrations of train traffic, safety of people/wildlife along right-of-way, and crossings, cost through taxes or upkeep of crossings - infrastructure, cost of bailout/subsidies

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - [ ] Strongly support All Aboard Florida
   - [ ] Moderately support All Aboard Florida
   - [ ] Neither support or oppose All Aboard Florida
   - [x] Strongly oppose All Aboard Florida
   - [ ] Do not have enough information about this project to have a position

Open Comment: We are negatively impacted by all above factors with nothing positive to show for it.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below:
None of the above resolves the most significant negative impacts of the proposed project. Just as I-95 was constructed to the west of populous areas, AAF west Palm to Orlando needs to build west of Treasure Coast.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. X ___ Strongly oppose All Aboard Florida
___ Do not have enough information about this project to have a position
Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
___ Access to a passenger rail stop in Indian River County
___ Increased safety measures along the tracks
___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
Other? State below: None of the above. Just don't want the train through our town.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

X ___ This increase will have a negative impact
___ This increase will have a moderately negative impact
___ This increase will have no impact
___ This increase will have a moderately positive impact
___ This increase will have a high positive impact
___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- ✓ Noise from moving trains
- ✓ Noise from train horns or stationary crossing horns
- ✓ Vehicle and pedestrian safety issues
- ✓ Length of time it takes for the trains to pass through a street crossing
- ✓ Emergency services access
- ✓ Negative impact on our eco-system
- ✓ Negative impact on structures
- ✓ Local ability to deal with potential rail accidents
- ✓ Vibration
- ✓ General quality of life
- ✓ Other:

   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
Open Comment:

Freight lines are a efficient way to transport goods and I can accept the FEC business, a passenger train that only serves a few areas but impacts many is a bad idea.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: When it becomes a hassle to pass through track areas every time people will avoid doing things around those areas and that will have a definite economic impact.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

Tourists who rent cars can stop at many places along our coast and is therefore better for our tourist economy than corraling them in Orlando & S.FL.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment

If there comes a time where they begin to affect daily life too much it should be regulated.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

  - Positively
  - Negatively
  - No or minimal impact

Open Comment:

I'm sure if I take visitors through the intersection and we encounter trains at every moment I'm sure it will not leave a good impression.

   - [ ] Do not have enough information about this project to have a position
   - Open Comment: "Congestion and noise will deteriorate the community and county."

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   - Other? State below:

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   "...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016.

   This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

   - [ ] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other: ____________________________

Name: Brenda Stumbrecht
Date: October 28, 2014

Address: Park Place, Sebastian

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

   □ Positively
   ☑ Negatively
   □ No or minimal impact

Open Comment:

   Wait at crossing will be too long.
   Noise will be three times or more in my community.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

   □ Strongly support All Aboard Florida
   □ Moderately support All Aboard Florida
   □ Neither support or oppose All Aboard Florida
   ☑ Strongly oppose All Aboard Florida
   □ Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

   □ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ☑ Access to a passenger rail stop in Indian River County
   ☑ Increased safety measures along the tracks
   ☑ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

   Should be financed independently

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.

   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

   ☑ This increase will have a negative impact
   □ This increase will have a moderately negative impact
   □ This increase will have no impact
   □ This increase will have a moderately positive impact
   □ This increase will have a high positive impact
   □ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   ______ Noise from moving trains

We are all aware that this area is comprised primarily of senior citizens, the majority of which live on the West side of the RR tracks. As seniors many of us have health issues that often require emergency visits to the hospital. In many cases, time is of the essence when a 911 call is placed. Since our hospital and, often, the emergency vehicles, are on the East side of the tracks, the residents of our beautiful city will have their lives put in danger if an ambulance is stopped by a train. With 31 trains passing through our city every day, the emergency vehicle could be held up in both directions. That could be catastrophic for anyone of us. Yes, we have freight trains going through our city now but the frequency is far less than 31 times a day. The railroad company who is pushing All Aboard Florida is thinking only of their financial gain and has no regard for the safety of the residents of this area.

As a case in point, I am widowed, live alone west of the RR tracks and have AFib. Without going into great detail, in April I got pretty sick and was having difficulty breathing so 911 was called. The response time was very quick; the paramedics put me in the ambulance and started an IV then transported me to the hospital. While I was in the ambulance on the way to the hospital I stopped breathing. I was told the siren was turned on and the ambulance sped to the hospital with the paramedic giving me CPR. If that ambulance had been stopped by a train either responding or transporting, I might not be standing before you today. I am only one example of the many seniors in our area whose life stands in the balance if 31 additional trains are allowed to pass through our city holding up traffic each and everyday.

Please tell me what benefits there could possibly be to Indian River County to have high speed trains racing through our city causing disruption to our way of life but more importantly our safety.

Sincerely,

[Signature]

   Too many trains as it is now

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [X] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   - Other? State below
   
   

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...
freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. 
FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [ ] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [X] This increase will have a moderately positive impact
   - [X] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other:

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: __________________________
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below
   NO GRANTS, NO TAXES DEFERRED

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - X Noise from moving trains
   - X Noise from train horns or stationary crossing horns
   - X Vehicle and pedestrian safety issues
   - X Length of time it takes for the trains to pass through a street crossing
   - X Emergency services access
   - X Negative impact on our eco-system
   - X Negative impact on structures
   - X Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other: ________________________________

Wistle Blowing - Noise level

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

___ Strongly support All Aboard Florida
___ Moderately support All Aboard Florida
___ Neither support or oppose All Aboard Florida
X ___ Strongly oppose All Aboard Florida
___ Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
___ Access to a passenger rail stop in Indian River County
___ Increased safety measures along the tracks
X ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below:

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

X ___ This increase will have a negative impact
___ This increase will have a moderately negative impact
___ This increase will have no impact
___ This increase will have a moderately positive impact
___ This increase will have a high positive impact
___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - □ Noise from moving trains
   - X Noise from train horns or stationary crossing horns
   - X Vehicle and pedestrian safety issues
   - X Length of time it takes for the trains to pass through a street crossing
   - X Emergency services access
   - X Negative impact on our eco-system
   - □ Negative impact on structures
   - □ Local ability to deal with potential rail accidents
   - X Vibration
   - □ General quality of life
   - Other: __________________________

This summer in the Commonwealth of Virginia a freight train carrying oil cars fell into the James River when an older road bed collapsed from underneath the tracks. The James River is the drinking source of water for the lower tier of Virginia and luckily no oil leaked, the East Coast rail system is over 100 years old and built to service train cars of that time period. How is AAF going to ensure the current rail beds, including bridges, are able to service both the weight of the newer train cars of the frequency they plan to run them?

AAF has stated it plans to run freight trains on the tracks they are building for the lighter shorter passenger cars. This practice has caused widespread devastation in other parts of the country. One example, in Maryland, a machine shop successfully operating near the freight trains tracks had to close down when the freight train started to run on the new for “passenger use only” tracks. The vibrations were sufficiently greater and the shop could no longer keep its machines properly lined up. The building and the surrounding area is now deserted. Since All Aboard Florida has said it plans to use these tracks for freight trains, is it going to upgrade the railroad beds to current industry standards for vibration absorption for freight trains before it lays down the new tracks?
1. 1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.  
   ___ Positively  
   x Negatively  
   ___ No or minimal impact  

   Open Comment:  
   Traffic delays due to the number of passengers. Quality of life will decline throughout the coast  

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?  
   ___ Strongly support All Aboard Florida  
   ___ Moderately support All Aboard Florida  
   ___ Neither support or oppose All Aboard Florida  
   x ___ Strongly oppose All Aboard Florida  
   ___ Do not have enough information about this project to have a position  

   Open Comment:  

   3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:  
   ___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad  
   ___ Access to a passenger rail stop in Indian River County  
   ___ Increased safety measures along the tracks  
   ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service  

   Other? State below  
   Nothing could change my negative opinion of this project  

   4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:  
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.  
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?  
   x ___ This increase will have a negative impact  
   ___ This increase will have a moderately negative impact  
   ___ This increase will have no impact  
   ___ This increase will have a moderately positive impact  
   ___ This increase will have a high positive impact  
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: __________________

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

   ☑ Negatively
   ☐ No or minimal impact

   Open Comment:
   Safety issues for Emergency Vehicles. Student crossing school buses, children & pets. Also degradation of property values & quality of life due to noise, vibration, and delays.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ☑ Strongly oppose All Aboard Florida
   ☐ Moderately support All Aboard Florida
   ☐ Neither support or oppose All Aboard Florida
   ☐ Strongly support All Aboard Florida
   ☐ Do not have enough information about this project to have a position

   Open Comment:
   Strongly oppose current plans to route through Sebastian and Indian Towns receiving no benefit.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ☑ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ☑ Access to a passenger rail stop in Indian River County
   ☑ Increased safety measures along the tracks
   ☐ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   ☑ Other? State below

   Re-route using western route to avoid populated towns & cities on east coast.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016.    ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other: ________________________________

Open Comment:

Trying to get to a hospital will be a nightmare.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

We have so many people that walk + ride bikes - their safety will be jeopardized.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

The trains (railroad) should look into an alternate route - farther inland - less people would be affected.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:

People will not want to buy property if they believe the trains will constantly be coming + going.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact

   Open Comment: I will sell my home Dec 2014 to get best value before new trains are approved.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position

   Open Comment: Living 5 houses away from tracks now is tolerable but not after the project continues.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   - Other? State below

   I don't believe there is any "buffer" that will positively affect the project. Our small towns will lose millions and become a ghost town (businesses will leave).

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...
   freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.

   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
Open Comment: The proposed project by the Independent Corporation is corrupt and profit driven. They are not concerned about the general welfare of our residents. Tourism is not an excuse.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns (Residential & Commercial Property)
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: Property Values

Open Comment: Historic Sebastian + Vacation Destination Will Be Negatively Impacted

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: How will our elected officials be able to help?

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: Freight trains are not an issue now. It is the 32 additional trains that are going to be the demise of the quality of our life.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: My office is directly 1/2 block from Tracks. It may cause gridlock at the intersection with the increase of passenger trains. I moved here from CA to pursue a career in Real Estate & to enjoy the beautiful & quiet lifestyle.

☐ Other: Property value will tank! Who wants to live near the train? No benefit for us in the Treasure Coast at all!

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

I don't believe for one minute that passenger rail will survive. It's just a "con" - in my opinion it's all about freight, and there's no government money involved. The passengers' money is wasted. That's what we're told.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

Increased # of freight trains will cause longer waits at crossings, delays at design in cars and boats, etc. How far will you go to get to work? How much time will it be worth the AAF's increased freight traffic?

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

☐ Positively

☐ Negatively

☐ No or minimal impact

Open Comment:

I live on the west side of the tracks. Our district is all senior citizens. If anyone of our home is sick or need to go to the hospital the train could prevent their getting to the hospital in an emergency.

All in all, A.A.F. is a potential disaster for the Treasure Coast.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   Positively
   ☑ Negatively
   ☐ No or minimal impact
   Open Comment: BETWEEN THE NOISE, THE INCONVENIENCE, NO BENEFITS, I WOULD NOT WANT TO BE ON THE WRONG SIDE OF THE TRACKS FROM THE HOSPITAL OR ANY EMERGENCY!

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ☐ Strongly support All Aboard Florida
   ☐ Moderately support All Aboard Florida
   ☐ Neither support or oppose All Aboard Florida
   ☑ Strongly oppose All Aboard Florida
   ☐ Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ☑ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ☑ Access to a passenger rail stop in Indian River County
   ☑ Increased safety measures along the tracks
   ☑ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below:
   THE RAILROAD SHOULD NOT RUN THROUGH SMALL TOWN FLORIDA, RUN IT ALONGSIDE RT 95 WHERE IT WONT BOTHER ANYBODY!!!

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ☑ This increase will have a negative impact
   ☐ This increase will have a moderately negative impact
   ☐ This increase will have no impact
   ☐ This increase will have a moderately positive impact
   ☐ This increase will have a high positive impact
   I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other: [ ]

CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Jackie James 
Address: Roseland FLA 
Date: 10.18.2014

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

___ Positively
___ Negatively
___ No or minimal impact

Open Comment: I won't have access to fire dept, ambulance service, hospital or doctor, as I reside on "wrong side of tracks".

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

___ Strongly support All Aboard Florida
___ Moderately support All Aboard Florida
___ Neither support or oppose All Aboard Florida
___ Strongly oppose All Aboard Florida
___ Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
___ Access to a passenger rail stop in Indian River County
___ Increased safety measures along the tracks
___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below: This train is not acceptable only a detriment to those who settled here. It is presciently not an asset or enhancement to lives of residents. All aboard for a disaster that determined our feelings.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:

...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.

FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

___ This increase will have a negative impact
___ This increase will have a moderately negative impact
___ This increase will have no impact
___ This increase will have a moderately positive impact
___ This increase will have a high positive impact
___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues (FEAR OF ANIMALS)
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: Property values go down.

Open Comment:
No one including private owners of all Ab. Fla., would want to reside close to such.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:
I’m thinking the investors in train will make money & most of residents I will see no benefits. Owners are unhealthy so they will benefit if I become more wealthy. This has to be resolved to the detriment of many riders.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:
I do not look forward to this train and I don’t believe it will happen!

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:
I live in an ole’ Fla. Walker Horse sta. historic area of Julian Rice Co. I hear the trains. We have enough noise & vibrations from current train service. More would be dangerous & embarrassing & not compatible. J.S.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   Positively
   Negatively
   No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   Strongly support All Aboard Florida
   Moderately support All Aboard Florida
   Neither support or oppose All Aboard Florida
   Strongly oppose All Aboard Florida
   Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   Access to a passenger rail stop in Indian River County
   Increased safety measures along the tracks
   No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016.    ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   ____ Noise from moving trains
   ____ Noise from train horns or stationary crossing horns
   ____ Vehicle and pedestrian safety issues
   ____ Length of time it takes for the trains to pass through a street crossing
   ____ Emergency services access
   ____ Negative impact on our eco-system
   ____ Negative impact on structures
   ____ Local ability to deal with potential rail accidents
   ____ Vibration
   ____ General quality of life
   ____ Other: ________________________________

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: "freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?"
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion

☐ Noise from train horns or stationary crossing horns
☐ Vehicle and pedestrian safety issues
☐ Length of time it takes for the trains to pass through a street crossing
☒ Emergency services access
☐ Negative impact on our eco-system
☐ Negative impact on structures
☐ Local ability to deal with potential rail accidents
☐ Vibration
☒ General quality of life
☐ Other: __________________________________________

Open Comment:________________________________________

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:________________________________________

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:________________________________________

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

☐ Positively
☐ Negatively
☐ No or minimal impact

Open Comment:________________________________________
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   [ ] Positively
   [x] Negatively
   [ ] No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   [ ] Strongly support All Aboard Florida
   [ ] Moderately support All Aboard Florida
   [ ] Neither support or oppose All Aboard Florida
   [x] Strongly oppose All Aboard Florida
   [ ] Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   [ ] Access to a passenger rail stop in Indian River County
   [ ] Increased safety measures along the tracks
   [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   [x] This increase will have a negative impact
   [ ] This increase will have a moderately negative impact
   [ ] This increase will have no impact
   [ ] This increase will have a moderately positive impact
   [ ] This increase will have a high positive impact
   [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ____________________________

CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name:  Adam H. Geesey  Date: 10/15/2014
Address: 108 WOOD STORK WAY, SEBASTIAN, FL 32958

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

[ ] Positively
[ ] Negatively
[ ] No or minimal impact

Open Comment:
DECREASE IN PROPERTY VALUES; INCREASED CROSSING WAIT TIMES; HIGHER POTENTIAL FOR TRAIN ACCIDENTS

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

[ ] Strongly support All Aboard Florida
[ ] Moderately support All Aboard Florida
[ ] Neither support or oppose All Aboard Florida
[ ] Strongly oppose All Aboard Florida
[ ] Do not have enough information about this project to have a position

Open Comment:
SEE REASONS ABOVE

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

[ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
[ ] Access to a passenger rail stop in Indian River County
[ ] Increased safety measures along the tracks
[ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: "freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016." This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

[ ] This increase will have a negative impact
[ ] This increase will have a moderately negative impact
[ ] This increase will have no impact
[ ] This increase will have a moderately positive impact
[ ] This increase will have a high positive impact
[ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other: **DECREASE IN PROPERTY VALUES**

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?
Open Comment:

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

\(\times\) Negatively

- No or minimal impact

Open Comment:

Most medical facilities are located east of the tracks. Tens of thousands of elderly persons live west of the tracks. In an emergency situation, minutes can mean the difference between life and death (stroke, heart attack, accident, etc).

Such a great increase in train traffic, and the emergency response delays puts a large percentage of our population unnecessarily at high risk. I am 78.
1. 1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   □ Positively
   □ Negatively
   □ No or minimal impact
   Open Comment: Personally, I now hear the freight trains and horns, especially during the night. With the possible increase or stop, I doubt there will be a much quieter noise level.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   □ Strongly support All Aboard Florida
   □ Moderately support All Aboard Florida
   □ Neither support or oppose All Aboard Florida
   □ Strongly oppose All Aboard Florida
   □ Do not have enough information about this project to have a position
   Open Comment: We in Indian River County will receive no benefit. However, we may find ourselves much inconvenience.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors – mark all that apply:
   □ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   □ Access to a passenger rail stop in Indian River County
   □ Increased safety measures along the tracks
   □ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

[ ] This increase will have a high positive impact
[ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other:

Open Comment:

No stops in Sebastian.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

I feel this is a huge waste of taxpayer money. No passengers ride trains and freight trains now give miracle money to a local station got a deal.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

The existing level of freight service is already too congested. More will create even longer traffic delays.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:

I think AAF/FIG should play nice with their neighbors who are already connected. I also think they should do a TRAILS type of tracks for something. A light rail type of track and also use them for cleaner trains. Then any community that wants a stop for a particular purpose could get one.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

___ Positively
___ Negatively
___ No or minimal impact

Open Comment:
One and half block West of tracks. Noise! Traffic delays. Emergency response delays!

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

___ Strongly support All Aboard Florida
___ Moderately support All Aboard Florida
___ Neither support or oppose All Aboard Florida
___ Strongly oppose All Aboard Florida
___ Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
___ Access to a passenger rail stop in Indian River County
___ Increased safety measures along the tracks
___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

There is NOTHING that will make support AAF

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

___ This increase will have a negative impact
___ This increase will have a moderately negative impact
___ This increase will have no impact
___ This increase will have a moderately positive impact
___ This increase will have a high positive impact
___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- [x] Noise from moving trains
- [x] Noise from train horns or stationary crossing horns
- [ ] Vehicle and pedestrian safety issues
- [x] Length of time it takes for the trains to pass through a street crossing
- [x] Emergency services access
- [x] Negative impact on our eco-system
- [x] Negative impact on structures
- [x] Local ability to deal with potential rail accidents
- [x] Vibration
- [ ] General quality of life
- [ ] Other: __________________________________________

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: **A dinner train is the only thing that should allowed given the East Coast Florida population.**

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: **Do it right. Put an elevator rail up the center of the state, not through the most populated area.**

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- [x] Positively
- [ ] Negatively
- [ ] No or minimal impact

Open Comment:

   - [x] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
Open Comment: How can it be positive when it's noisy and prevents access to our hospital. We are also afraid that the land AAF owns will be used to put many cell towers near the tracks.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: __________________________

Open Comment: I am sure AAF violates some EPA regulations

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: We all know that the passenger service is a cover for moving freight. AAF refuses to release projected ridership figures.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: Toxic substances are often transported in cars and we don't know about it. What provisions does AAF have to clean up spills if they occur? Can our city sue AAF when such an accident occurs?

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: Limited access to business
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

_____ Positively

X Negatively

_____ No or minimal impact

Open Comment:

It will make access to U.S. 1 from my residence much more difficult - also access to Publix, Walgreens, etc.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

_____ Strongly support All Aboard Florida

_____ Moderately support All Aboard Florida

_____ Neither support or oppose All Aboard Florida

X Strongly oppose All Aboard Florida

_____ Do not have enough information about this project to have a position

Open Comment:

AAF will greatly increase noise and inhibit access to U.S. 1 - I do not believe it will be safe due to its high speed

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

X Addition of "quiet zone" infrastructure at street crossings paid for by the railroad

X Access to a passenger rail stop in Indian River County

X Increased safety measures along the tracks

_____ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below

CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Janet Smiths      Date: 10/15/14
Address: 245 Kelly Dr, Sebastian, FL 32958

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   ____ Positively
   □ Negatively
   □ No or minimal impact

Open Comment:
Being on the west side of US1 there will be too many holdups to cross the tracks - also a safety issue. Too much noise also.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ____ Strongly support All Aboard Florida
   ____ Moderately support All Aboard Florida
   ____ Neither support or oppose All Aboard Florida
   □ Strongly oppose All Aboard Florida
   ____ Do not have enough information about this project to have a position

Open Comment:
This is probably a done deal but I feel we should keep up our protests.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   □ Addion of "quiet zone" infrastructure at street crossings paid for by the railroad
   □ Access to a passenger rail stop in Indian River County
   □ Increased safety measures along the tracks
   □ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FE/CR (Florida East Coast Railroad) Corridor is predicted to increase.
   FE/CR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   □ This increase will have a negative impact
   ____ This increase will have a moderately negative impact
   ____ This increase will have no impact
   ____ This increase will have a moderately positive impact
   ____ This increase will have a high positive impact
   ____ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - Noise from moving trains
   - Noise from train horns or stationary crossing horns
   - Vehicle and pedestrian safety issues
   - Length of time it takes for the trains to pass through a street crossing
   - Emergency services access
   - Negative impact on our eco-system
   - Negative impact on structures
   - Local ability to deal with potential rail accidents
   - Vibration
   - General quality of life
   - Other:

   Open Comment:
   We can drive to Orlando or Miami in a relatively short time, so why put up with all the noise and traffic delays the train will cause.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

   Open Comment:
   The lines should be moved to the less populated center of the state — not on the populated East Coast.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

   Open Comment:

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?
   - Positively

   ___ Increased safety measures along the tracks
   ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below: will NEVER support it

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ___ This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ____________________________

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: Do anything possible to stop it

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: Move everything to the center of the state

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

   ✔ Negatively
   ___ No or minimal impact

Open Comment: Noise, disruption of highway traffic, negative impact on residential property value.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

   ___ Strongly support All Aboard Florida
   ___ Moderately support All Aboard Florida
   ___ Neither support or oppose All Aboard Florida
   ___ Strongly oppose All Aboard Florida
   ___ Do not have enough information about this project to have a position

Open Comment: There is no profitable rail service anywhere. This is all about getting federal and state money to improve FEC property.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

   ✔ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ___ Access to a passenger rail stop in Indian River County
   ___ Increased safety measures along the tracks
   ✔ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below:

   And no federal loans. If FEC believes passenger service profitable, then convince the private sector.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:

   freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016.    ✔ This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
Open Comment:
But, I have no problem with freight traffic increase. Am opposed to AAF which, as currently proposed, will end up costing taxpayers billions.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

☑ Noise from moving trains
☑ Noise from train horns or stationary crossing horns
☐ Vehicle and pedestrian safety issues
☐ Length of time it takes for the trains to pass through a street crossing
☐ Emergency services access
☐ Negative impact on our eco-system
☐ Negative impact on structures
☐ Local ability to deal with potential rail accidents
☐ Vibration
☑ General quality of life
☐ Other: ____________________________

Open Comment:
constant highway traffic disruptions, reduction in residential property values

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:
If state and federal money involved, it will be a huge boondoggle.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

INCREASES WILL CONT. LONG AFTER 2016
Open Comment:

Improvements will continue to worsen over the years & will completely change the county.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other:

Open Comment:

Current trains cause long lines waiting to cross with increases of passenger & freight will cause lines to go out on US Hwy I

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

This along w/increase will impact [in] the future. It will highly impact many of the residents especially the elderly who live in 55+ communities on the east side of the current track w/the hospital West of the Railroad.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

It will compound all problems w/noise & increased problems w/health issues & response times of police, ambulance, etc. Hospital will be impacted.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:

Long lines, late appointments, hazardous waste, problems that people don't even think about.
CITY OF SEBASTIAN AAF SURVEY – response to DEIS

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: 

I see absolutely NO gain in any form for the Treasure Coast. I feel it will detrimentally affect our peaceful life in Sebastian and discourage families from choosing to settle here!

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Just a note

October 29, 2014

Joan W. Hawke
3301 E. Derry Dr
Sebastian, FL 32958

Dear Ms. Coy,

We live in Park Place and have for 30 years. We love it here.

I could not attend the HOA meeting on Tuesday night so I am sending my survey to you.

Thank you,

Joan Hawke

Thomas Hawke
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   ___ Positively
   ___ Negatively
   ___ No or minimal impact

Open Comment:
I live within a few feet of the tracks. It affects my quality of life. It is no benefit to Sebastian. It brings noise and vibration to our home.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ___ Strongly support All Aboard Florida
   ___ Moderately support All Aboard Florida
   ___ Neither support or oppose All Aboard Florida
   ___ Strongly oppose All Aboard Florida
   ___ Do not have enough information about this project to have a position

Open Comment:
This is going to be a terrible situation for us and our community. So many trains, so many crossings closed so often and so much noise!

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ___ Access to a passenger rail stop in Indian River County
   ___ Increased safety measures along the tracks
   ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below
I do not support the AAR but if we must have it please keep it quiet!

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ___ This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: All of the above

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: This will probably be good for the state, but it will be terrible for us. I cannot think of one good positive thing about this train. Noise, vibration, inconvenience.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: Freight all night vibrating our house while we are sleeping. If we can check our driveway & shaking our house.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: They will probably think we should move like the rest of our neighbors have. No one wants to live by the train. We only have a few trains at the moment. We live in paradise that will become a nightmare if the train comes with 1000 feet of our home. It will ruin the quality of our life!!
1. Bite The Bullet Train

How many Commuters are there to support 32 trains? Vacationers to Disney with children don’t go to Miami night spots and vise versa? Don’t know schedule. Will it even run at night?

How much for tickets? Profit margin for 3 year pay back of 1.6 Billion? If there was a $25 profit per rider it would take 64 million Passengers. 80 per car, 5 cars, 400 per train X 32 = 12800 per day into 64 million = 5000 days or 13.6 years. Without interest!

Where is parking located at each end? How much (3000 To 6000 cars)? Alternate transportation accessability for 400 people every 20 minutes? Traffic jams near terminals! Are there hidden property purchases involved? Who presently owns?

Top Speed is suggested at 130 MPH What is actual average speed due to bridges, Turns side tracks, etc.? What actual speed are they going to guarantee?

What is total time from entry of station to exit at other station? Any time savings from existing bus running at 70 MPH on 95? Any cost saving LOL

What is total Cost including parking or secondary transportation?

Has anybody tried to do 130 MPH on this run? Does anybody want to?

People get killed at 70 what happens when you almost double it?

Second track impact on existing businesses. Freight traffic will probably double at night. Get used to gate closings every 20 minutes. We all live on the wrong side of the tracks. AND don’t forget Noise. Energy pollution? Don’t even suggest local jobs.
1. THE ENTIRE IDEA OF ALL ABOARD SHOULD NEVER BEEN CONSIDERED IN ITS PRESENT FORM.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?
Open Comment:

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?
Open Comment:
IT WOULD CREATE A NEVER ENDING PROBLEM FOR THE COMMUNITIES IN THE PATH OF THIS SUBSEQUENT OF TRAINS

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?
   ✓ Positively
   ● Negatively
   ● No or minimal impact

Open Comment:
VISITOR CANT BELIEVE THAT THIS IDEA WAS EVEN CONSIDERED. QUOTE "I CAN'T BELIEVE THERE GOING TO DO THIS" WHY?
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact

Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   - Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ___________________________

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

    X Negatively
    No or minimal impact

Open Comment:

    Negative impacts: financial, pollution, noise pollution, negative impact on environment and wildlife. Negative safety impact

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

    X Strongly oppose All Aboard Florida
    Moderately support All Aboard Florida
    Neither support or oppose All Aboard Florida
    Strongly support All Aboard Florida
    Do not have enough information about this project to have a position

Open Comment:

    I believe this will only have negative impacts to this area and its residents. I believe it is being pushed through by a select few to benefit a select few. I live in this area.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

    X Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
    Increased safety measures along the tracks
    No local or federal taxpayer dollars are used to finance the proposed passenger rail service
    Other? State below

    This should go up the center of the state -- not through the residential and downtown areas. People should be put ahead of money.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.

   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

    X This increase will have a negative impact
    This increase will have a moderately negative impact
    This increase will have no impact
    This increase will have a moderately positive impact
    This increase will have a high positive impact
    I do not have enough information about the projected number of trains to have an opinion

Open Comment:

    Will be like living in a tenement in an inner city. The lower quality of life will discourage any growth or business to relocate to this area. The movement will be out of this area.
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other:

Open Comment:
Negative impact will cause an exodus of families and businesses from this area. Will not encourage new businesses to relocate to the Treasure Coast.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:
This is a clear case of putting the financial powers of a few pitted against the welfare of the community.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:
This will ruin the economy of the region for the benefit of a few in Miami - Orlando. Where are our elected leaders?

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:
2016 - 20 freight + 33 passenger, if spread over 24 hours, much better than century neighbors.
If passengers being run 5-7 pm, -6 hrs @ 130mph

than 5 an hour?

   9. Vibration
   10. General quality of life
   Other: **Taxation**

Open Comment:

Most of the communities have no over passes, thus cutting a large population off from emergency medical care and fire/ storm reactions.

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

Really, what is the proposed charge for a ticket from Miami to Orlando? Will there be enough users to make it profitable?

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

More people are concerned of increased freight traffic than the passenger traffic. Must understand this is a PR screen to get subsidized track improvement up and down the coast. Why is the East-West corridor the only possible quiet zone? Is there not a greater population concentration on the North-South route?

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

   - Positively
   - Negatively
   - No or minimal impact

Open Comment:

Noise! + possible auto delays. If there was a stop in Indian River County, that would be the only positive benefit for passenger use to/from airports.
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

___ This increase will have a negative impact
___ This increase will have a moderately negative impact
___ This increase will have no impact
___ This increase will have a moderately positive impact
___ This increase will have a high positive impact
___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - [x] Noise from moving trains
   - [ ] Noise from train horns or stationary crossing horns
   - [x] Vehicle and pedestrian safety issues
   - [x] Length of time it takes for the trains to pass through a street crossing
   - [ ] Emergency services access
   - [x] Negative impact on our eco-system
   - [ ] Negative impact on structures
   - [ ] Local ability to deal with potential rail accidents
   - [ ] Vibration
   - [ ] General quality of life
   - [ ] Other: __________________________

   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   - Other? State below:

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other: Safety issues - K/C Values

However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   X  This increase will have a negative impact
   ____ This increase will have a moderately negative impact
   ____ This increase will have no impact
   ____ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other: __________________________

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: ____________________________________________________________

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: ____________________________________________________________

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment: ____________________________________________________________
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- Positively
- Negatively
- No or minimal impact

Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- Strongly support All Aboard Florida
- Moderately support All Aboard Florida
- Neither support or oppose All Aboard Florida
- Strongly oppose All Aboard Florida
- Do not have enough information about this project to have a position

Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

- Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
- Access to a passenger rail stop in Indian River County
- Increased safety measures along the tracks
- No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below:

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: "freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?"

- This increase will have a negative impact
- This increase will have a moderately negative impact
- This increase will have no impact
- This increase will have a moderately positive impact
- This increase will have a high positive impact
- Do not have enough information about the projected number of trains to have an opinion
Open Comment:

For safety reasons alone, 32 more trains a day will cause horrendous chaos to all residents. I strongly oppose this.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

✓ Noise from moving trains
✓ Noise from train horns or stationary crossing horns
✓ Vehicle and pedestrian safety issues
✓ Length of time it takes for the trains to pass through a street crossing
✓ Emergency services access
✓ Negative impact on our eco-system
✓ Negative impact on structures
✓ Local ability to deal with potential rail accidents
✓ Vibration
✓ General quality of life

However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

- This increase will have a negative impact
- This increase will have a moderately negative impact
- This increase will have no impact
- This increase will have a moderately positive impact
- This increase will have a high positive impact
- I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- [x] Noise from moving trains
- [x] Noise from train horns or stationary crossing horns
- [ ] Vehicle and pedestrian safety issues
- [x] Length of time it takes for the trains to pass through a street crossing
- [x] Emergency services access
- [ ] Negative impact on our eco-system
- [ ] Negative impact on structures
- [ ] Local ability to deal with potential rail accidents
- [ ] Vibration
- [ ] General quality of life
- [ ] Other: ____________________________

Open Comment: ____________________________

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment: ____________________________

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: ____________________________

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- [ ] Positively
- [ ] Negatively
- [x] No or minimal impact

Open Comment: ____________________________
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service to Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- [ ] Positively
- [x] Negatively
- [ ] No or minimal impact

Open Comment: Waiting for freight trains - & noise from all trains.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- [ ] Strongly support All Aboard Florida
- [ ] Moderately support All Aboard Florida
- [ ] Neither support or oppose All Aboard Florida
- [x] Strongly oppose All Aboard Florida
- [ ] Do not have enough information about this project to have a position

Open Comment: Oppose if run down densely populated east coast corridor, could possibly support if route using central FL.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

- [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
- [ ] Access to a passenger rail stop in Indian River County
- [ ] Increased safety measures along the tracks
- [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below: CAN NOT SUPPORT IF FREIGHT TRAINS ARE SIGNIFICANTLY INCREASED.

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...frequent traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- ✓ Noise from moving trains
- ✓ Noise from train horns or stationary crossing horns
- ✓ Vehicle and pedestrian safety issues
- ✓ Length of time it takes for the trains to pass through a street crossing
- ✓ Emergency services access
- ✓ Negative impact on our eco-system
- ✓ Negative impact on structures
- ✓ Local ability to deal with potential rail accidents
- ✓ Vibration
- ✓ General quality of life

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment: _________________________

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- ___ Positively
- ___ Negatively
- ✓ No or minimal impact

Open Comment: _________________________
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - [ ] Positively
   - [ ] Negatively
   - [x] No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - [x] Strongly support All Aboard Florida
   - [ ] Moderately support All Aboard Florida
   - [ ] Neither support or oppose All Aboard Florida
   - [ ] Strongly oppose All Aboard Florida
   - [ ] Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [x] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [ ] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [x] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion

   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other:

Open Comment:

- Sharing some tracks for freight and passenger

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

- We are Senior Citizens!! - Punctuality and a timely response are Critical!!

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

- My.... Noise-- and slow lumbering trains...
- More trains to Miami of the state!!

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

Open Comment:

- Hospitals are all on east side of tracks!
1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - Positively
   - Negatively
   - No or minimal impact
   Open Comment: Traffic, noise

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - Strongly support All Aboard Florida
   - Moderately support All Aboard Florida
   - Neither support or oppose All Aboard Florida
   - Strongly oppose All Aboard Florida
   - Do not have enough information about this project to have a position
   Open Comment: No benefit, only all negative impact on our neighborhood

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - Access to a passenger rail stop in Indian River County
   - Increased safety measures along the tracks
   - No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - This increase will have a negative impact
   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.
   - [X] Noise from moving trains
   - [X] Noise from train horns or stationary crossing horns
   - [X] Vehicle and pedestrian safety issues
   - [X] Length of time it takes for the trains to pass through a street crossing
   - [X] Emergency services access
   - [X] Negative impact on our eco-system
   - [X] Negative impact on structures
   - [X] Local ability to deal with potential rail accidents

Unknown.
CITY OF SEBASTIAN AAF SURVEY – response to DEIS

Name: Gregory A. Witt  Date: 10/31/14

Address 1201 Main St. Sebastian, FL 32958

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   ( ) Positively
   ( ) Negatively
   ( ) No or minimal impact
   Open Comment: RISK TO COMMUNITY AT ROAD CROSSINGS.

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ( ) Strongly support All Aboard Florida
   ( ) Moderately support All Aboard Florida
   ( ) Neither support or oppose All Aboard Florida
   ( ) Strongly oppose All Aboard Florida
   ( ) Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ( ) Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ( ) Access to a passenger rail stop in Indian River County
   ( ) Increased safety measures along the tracks
   ( ) No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ( ) This increase will have a negative impact
   ( ) This increase will have a moderately negative impact
   ( ) This increase will have no impact
   ( ) This increase will have a moderately positive impact
   ( ) This increase will have a high positive impact
   ( ) I do not have enough information about the projected number of trains to have an opinion
The increased train traffic will negatively impact traffic, and has the potential to reduce law enforcement responses.

5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- [x] Noise from moving trains
- [x] Noise from train horns or stationary crossing horns
- [x] Vehicle and pedestrian safety issues
- [x] Length of time it takes for the trains to pass through a street crossing
- [x] Emergency services access
- [x] Negative impact on our eco-system
- [x] Negative impact on structures
- [x] Local ability to deal with potential rail accidents
- [ ] Vibration

Open Comment:

Waiting time from increased traffic & maintenance. More use/traffic creates more malfunctions of the rail system (lights, sensors, ropes, etc.).

   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

   Other? State below

   Oppose Rail System regardless

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   
   - [x] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life
- Other: ________________________________

   - This increase will have a moderately negative impact
   - This increase will have no impact
   - This increase will have a moderately positive impact
   - This increase will have a high positive impact
   - I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

☐ Noise from moving trains
☐ Noise from train horns or stationary crossing horns
☐ Vehicle and pedestrian safety issues
☐ Length of time it takes for the trains to pass through a street crossing
☐ Emergency services access
☐ Negative impact on our eco-system
☐ Negative impact on structures
☐ Local ability to deal with potential rail accidents
☐ Vibration
☐ General quality of life
☐ Other: _____________________________

Open Comment:

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

   In my knowledge it will not be discharging passengers in South Florida as there will not be a positive impact to the surrounding community.

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

   Negative impact to businesses located next to the railway.

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

   Positively
   ☐ Negatively
   ☑ No or minimal impact

Open Comment:

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.

- [ ] Positively
- [x] Negatively
- [ ] No or minimal impact

Open Comment:

*NEW RAIL SYSTEM WILL PROVIDE PROBLEMS FOR THIS COUNTY (SOUND, SAFETY OR CRASH CONCERNS, TRAFFIC DELAYS), BUT WILL RECEIVE NO BENEFIT SINCE THERE IS NO STOPS OR STATIONS PLANNED FOR THIS AREA.*

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?

- [x] Strongly support All Aboard Florida
- [ ] Moderately support All Aboard Florida
- [ ] Neither support or oppose All Aboard Florida
- [ ] Strongly oppose All Aboard Florida
- [ ] Do not have enough information about this project to have a position

Open Comment:

*NEED MORE STOPS ALONG THE ROUTE.*

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:

- [x] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
- [x] Access to a passenger rail stop in Indian River County
- [ ] Increased safety measures along the tracks
- [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below:

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?

- [x] This increase will have a negative impact
- [ ] This increase will have a moderately negative impact
- [ ] This increase will have no impact
- [ ] This increase will have a moderately positive impact
- [ ] This increase will have a high positive impact
- [ ] I do not have enough information about the projected number of trains to have an opinion

We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   - [ ] Positively
   - [ ] Negatively
   - [ ] No or minimal impact
   Open Comment:

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   - [ ] Strongly support All Aboard Florida
   - [ ] Moderately support All Aboard Florida
   - [ ] Neither support or oppose All Aboard Florida
   - [X] Strongly oppose All Aboard Florida
   - [ ] Do not have enough information about this project to have a position
   Open Comment:

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   - [ ] Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   - [ ] Access to a passenger rail stop in Indian River County
   - [ ] Increased safety measures along the tracks
   - [ ] No local or federal taxpayer dollars are used to finance the proposed passenger rail service
   Other? State below:
   ______________________________________________________________________________________
   Other: THERE ISN'T ANYTHING THAT COULD SWAY ME TO BE FOR AAF

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that:
   ...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase.
   FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   - [X] This increase will have a negative impact
   - [ ] This increase will have a moderately negative impact
   - [ ] This increase will have no impact
   - [ ] This increase will have a moderately positive impact
   - [ ] This increase will have a high positive impact
   - [ ] I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues
- Length of time it takes for the trains to pass through a street crossing
- Emergency services access
- Negative impact on our eco-system
- Negative impact on structures
- Local ability to deal with potential rail accidents
- Vibration
- General quality of life

Other: [Emergency Vehicle Waiting Times]

6. Do you have any other comments you would like to provide in regard to the proposed All Aboard Florida high speed passenger service?

Open Comment:

IT SOUNDS LIKE A SCAM FOR FREIGHT TRANSPORTATION OR THERE WOULD BE MORE STOPS ALONG THE TREASURE COAST! NO BENEFIT TO ANY TAX PAYER!!

7. Do you have any other comments you would like to provide in regard to an increased number of freight trains?

Open Comment:

IT IS A RIDICULOUS ENDAVOR FOR MONEY MAKERS NOT RESIDENTS

8. Tell us how visitors to your home or customers/clients coming to your business will be impacted by the proposed high speed passenger railroad service and increased freight traffic?

- Positively
- Negatively
- No or minimal impact

1. We are interested in learning how you will be impacted by the proposed high speed passenger rail service that will run along the Florida East Coast Railway tracks which run the length of Indian River County. If positive or negative, please describe the specific ways in which you will be impacted.
   ___ Positively
   ☑ Negatively
   ___ No or minimal impact

Open Comment:
Increased noise, pollution, time (wait) at crossings. Increased wear & tear on existing rail system

2. What is your general level of support for the proposed All Aboard Florida high speed passenger rail service?
   ___ Strongly support All Aboard Florida
   ___ Moderately support All Aboard Florida
   ___ Neither support or oppose All Aboard Florida
   ☑ Strongly oppose All Aboard Florida
   ___ Do not have enough information about this project to have a position

Open Comment:
See above & since I live on the west side of the tracks, as most people do, going to VST would be increasingly difficult.

3. My level of support for the proposed high speed rail passenger service may be positively influenced by the following factors - mark all that apply:
   ___ Addition of "quiet zone" infrastructure at street crossings paid for by the railroad
   ___ Access to a passenger rail stop in Indian River County
   ___ Increased safety measures along the tracks
   ___ No local or federal taxpayer dollars are used to finance the proposed passenger rail service

Other? State below
   ___ My support for would not change — I am against All Aboard Florida

4. In the Environmental Impact Statement (Page 300 under "No Action Alternative"), it states that: "freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016. This is in addition to the proposed 32 high speed passenger trains. How do you believe this increase in train traffic will impact our city and county?
   ___ This increase will have a negative impact
   ___ This increase will have a moderately negative impact
   ___ This increase will have no impact
   ___ This increase will have a moderately positive impact
   ___ This increase will have a high positive impact
   ___ I do not have enough information about the projected number of trains to have an opinion
5. What do you believe are the most critical issues of concern to the community as it relates to the proposed high speed rail passenger service and the increases expected in freight train traffic? Check all that apply.

- Noise from moving trains
- Noise from train horns or stationary crossing horns
- Vehicle and pedestrian safety issues

Dear Andrea Coy!

    Hey! Mark Lund Here!

1053 Louisiana Ave. Sebastian.

I did not know who to give this to and I knew you would. Please help me get this to the right people! Thank You!

This is mine and other peoples Responses to:

    Train Tracks,

(NOISE and VIBRATIONS), (Use Anti-Vibration Pad Isolators)

Info. Enclosed

AIR Horns Blasting Thru Intersections as Train goes thru Sebastian,

(Redesign Crossing Stations For High Speed Crossings That Don’t Break Down) (NO MORE BLASTING OF AIR HORNS THRU SEBASTIAN)

And

A Safety Concrete 6 FOOT High Plus Barrier as seen in Construction Zones , Etc!!!

Or

6 FOOT High Plus Safety Fence with Barb Wire Top Wires.

Either one of the Above to Keep People, Kids, Animals from Wondering onto tracks and being Killed by a train going over 100 Miles Per Hour!!!!

PROPERTY TAXES DISMISSED!!!! Repairs and Damages to OUR HOMES From ALL THESE FREIGHT TRAINS and HIGH SPEED PASSENGER TRAINS DAY AFTER DAY AFTER DAY, YEAR AFTER YEAR AFTER YEAR!!!!!!!
Mayor McPartlan and members of the city council:

As we learn more about the plans of All Aboard Florida it is clear this will be disastrous for Sebastian and all Treasure Coast residents and businesses.

A representative of AAF told the St. Lucie County Commission that two more train tracks (not one) are planned to run through our towns. So we can multiply the number of track closings that will cut off our people from their emergency room and doctors.

Just as upsetting is the fact that more freight trains will be running through our towns. A few nights ago a late night show cited the number of train wrecks throughout the US and Canada. These wrecks not only blocked rail crossings for hours, but killed town residents when freight trains carrying oil, gas and other dangerous cargo exploded sending walls of fire blocks wide.

Also cited was the fact that freight trains are pulling 100 cars at a time.

AAF has misrepresented their financial plans to the public. A now proven fact. So what about their stated plan to run high-speed passenger trains? Passenger trains are unprofitable. This explains no passenger train stops. But freight trains make money.

The expanded Miami Port is bringing in more large cargo ships that need transport of their cargo.

Put these facts together and AAF plans are clear. They plan freight trains picking up ship cargo in Miami to move it north. Very bad news for all Treasure Coast towns where train tracks run right through high population neighborhoods.

I hope our city council will take a firm stand, on the record, against AAF. Tell them to go to ----- I95.

Re: All Aboard Florida & Quiet Zone

We all live in Sebastian & Indian River County for it's bedroom community & quiet living. That seems that is all going to change for our communities in the next few years with All Aboard Florida doubling the freight trains. What a disaster this will be for all living close to & even miles from the track, not to mention emergency delays on the west side of the tracks.

This should be voted on by the people of the counties to be subject to such an invasion of our lives this is like a dictatorship. Safety issues & Accidents would destroy homes & life close to tracks.

This morning alone from Main St to the 518 the horn blew 13 times at 8.15 AM Oct 13, 2014 3:40 AM horn blew 8 times at 5:15 AM, 9 times. We need to sleep! We need a QUIET ZONE.

Sleep is extremely essential to good health, ask any doctor with or without a quiet zone, hundreds of thousands of people along RR tracks miles away will be affected with health issues.

All these trains will eventually
Compromise our homes & pools by shifting the ground within a short period of time, leading cracks in floors, walls & pools.

What gives you people from Alt About Florida the right to destroy so many wonderful communities.

What happens to our Property Values, they will plummet. DO WE get a Tax Break as our homes become unsalable or Rental Property won't rent due to 60 or more trains a day?

Why is this Happening? Where are our State Reps. to protect Tax Paying Citizens from losing what we have worked so hard to achieve. Let them put this track thru their gated Community if they want it so bad, & leave us alone, they don't want all this Noise where they Live!

C. Dayke
35 Palma Dr.
Sebastian, Fl. 32958.

P.S. Why should the State be punished for people in Orlando & Miami. This only to BENEFIT?
Bite The Bullet Train

How many Commuters are there to support 32 trains? Vacationers to Disney with children don’t go to Miami night spots and vise versa? Don’t know schedule. Will it even run at night?

How much for tickets? Profit margin for 3 year pay back of 1.6 Billion? If there was a $25 profit per rider it would take 64 million Passengers. 80 per car, 5 cars, 400 per train X 32 = 12800 per day into 64 million = 5000 days or 13.6 years. Without interest!

Where is parking located at each end? How much (3000 To 6000 cars)? Alternate transportation accessability for 400 people every 20 minutes? Traffic jams near terminals! Are there hidden property purchases involved? Who presently owns?

Top Speed is suggested at 130 MPH What is actual average speed due to bridges, Turns side tracks, etc.? What actual speed are they going to guarantee?

What is total time from entry of station to exit at other station? Any time savings from existing bus running at 70 MPH on 95? Any cost saving LOL

What is total Cost including parking or secondary transportation?

Has anybody tried to do 130 MPH on this run? Does anybody want to?

People get killed at 70 what happens when you almost double it?

Second track impact on existing businesses. Freight traffic will probably double at night. Get used to gate closings every 20 minutes. We all live on the wrong side of the tracks. AND don’t forget Noise. Energy pollution? Don’t even suggest local jobs.

Re: All Aboard Florida

Dear Sir:

CSX Transportation is one of only five Class One railroads in the United States. CSX presently furnishes passenger rail service between Miami and Orlando via Amtrak. If high-speed rail is such a great opportunity, I wonder why CSX has not jumped at the chance to provide that service.

In fact, no railroad company is planning to provide the high-speed rail service. The current proposal is by a Wall Street hedge fund, Fortress Investment Group (FIG). Fortress bought the FEC in 2007 and has set up All Aboard Florida as a subsidiary. At Monday’s meeting with the Board of County Commissioners, the All Aboard Florida representative acknowledged that the money being borrowed by All Aboard Florida would be used to build a second and third set of tracks that would be used by the FEC in its freight operations.

That’s only half of the story. The first, second and third set of tracks and the roadbed will be owned by the FEC and will not be subject to the lien of the mortgage given by All Aboard Florida to secure its debt.

If All Aboard Florida should fail, then the FEC has the improved roadbed and the second and third set of tracks free and clear of any lien.

This was signed
by Richard Neill
Letters to the Editor
Page 2
September 19, 2014

That strikes me like a bank lending someone the money to build and furnish a home and taking back a mortgage on only the furniture.

If the FEC is not willing to guarantee the loan to All Aboard Florida and secure it by a mortgage on the real estate and all improvements, then the loan should not be made.

With best regards.

Yours very truly,

Richard V. Neill

Complaints About Railroad Growth Thru Sebastian: Today: 10/15/14

Today is a Perfect Example With All Railroad Crossings Thru Sebastian Broke Down and (ALL) Vehicles Unable To Cross. Personal Vehicles/Emergency Vehicles/Fire Trucks/Ambulances/My Grand Kids School Bus/Nothing Can Get thru Today. This Wednesday Afternoon @ 3:45 PM. Crossings have now been down for over an hour. I am even running late now to the meeting about All Aboard Florida to turn in my complaints! Well Here’s the Perfect Example!!!! I even had to Park my vehicle and walk across tracks to make it to Today’s Meeting!

My Complaints Are As Follows:

WE DO NOT NEED ANOTHER TRACK INSTALLED FOR MORE FREIGHT CARS SO THAT THE WALL STREET HEDGE FUND- (F.I.G)

(FORTRESS INVESTMENT GROUP)

CAN MAKE ITS INVESTORS MORE MONEY! WHILE WE WOULD HAVE TO DEAL WITH ALL THESE EXTRA TRAINS/VIBRATIONS FROM THE WEIGHT THAT IS DESTROYING OUR HOMES AND OUR PROPERTY VALUES! LOUD LOCOMOTIVE ENGINES SCREAMING THRU OUR QUIET COMMUNITY NIGHT AND DAY! AIR HORNS BLASTING AT ALL HOURS DAY AND NIGHT!

WE DO NOT NEED A HIGH SPEED PASSENGER TRAIN PERIOD BECAUSE THERE HAS NEVER EVER BEEN ENOUGH PEOPLE THAT TRAVEL BY TRAIN TO FINANCIALLY SUPPORT THIS.

THIS IS NOTHING BUT A LIE TO THE PEOPLE SO THAT MORE FREIGHT TRAINS WITH HUNDREDS OF CARS CARRYING THOUSANDS OF STACKED
CARGO CONTAINER SHIPMENTS CAN BE DELIVERED TO FURTHER FUND THE RICH!

VERY DANGEROUS CARGO TOO!!!!

THAT CAN DESTROY OUR TOWN IF THERE WAS A DE-RAILMENT OF CARS! DESTROYING HOMES THAT THESE TRAINS RUN RIGHT THRU THEIR BACKYARDS RIGHT UP AGAINST THERE HOUSES!

ALSO KILLING THE PEOPLE INSIDE.

(MY FAMILY LIVES ON THESE TRACKS-SEE PHOTOS INCLUDED!!!!!!)

PORT CANAVERAL HAS JUST COMPLETED A HUGE CONTAINER UNLOADING OPERATION THAT CAN RECEIVE THE LARGEST CONTAINER SHIPS IN THE WORLD! CARRYING THOUSANDS OF 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON HUNDREDS OF RAILROAD CARS GOING RIGHT THRU OUR TOWN!

MIAMA HAS JUST COMPLETED A HUGE CONTAINER UNLOADING OPERATION THAT CAN ALSO RECEIVE THE LARGEST CONTAINER SHIPS IN THE WORLD! ALSO CARRYING THOUSANDS OF 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON HUNDREDS OF RAILROAD CARS GOING RIGHT THRU OUR TOWN!

THE PANAMA CANAL IS CURRENTLY BEING WIDENED TO ALLOW PASSAGE OF THESE MASSIVE CONTAINER CARGO SHIPS THAT WILL BE UNLOADING MILLIONS OF TRUCK TRAILER 53 FOOT CARGO CONTAINERS THAT WILL BE DOUBLE STACKED ON RAILROAD CARS AND RUN RIGHT THRU OUR TOWN SO THE RICH CAN GET RICHER!

THERE IS NO REASON TO HAVE THIS SUPPOSED HIGH SPEED PASSENGER TRAIN, IT IS ALL ANOTHER SCAM TO COVER UP THE REAL
PLAN OF HAVING MORE FREIGHT CARS DOUBLE STACKED AND DOUBLE THE WEIGHT GOING THRU OUR COMMUNITY AND DESTROYING OUR HOMES AND PROPERTY VALUES!

AND WE RECEIVE ABSOLUTELY NOTHING FOR DEALING WITH ALL THIS!

QUIET ZONES WILL NOT BE ENOUGH!

TALL SECURITY TYPE FENCES RUNNING ALONG SIDE TRACKS WILL NOT BE ENOUGH!

THICKER RUBBER PADS TO REPLACE THE 1/4 INCH PLASTIC VIBRATION PADS CURRENTLY INSTALLED BETWEEN CONCRETE RAIL SUPPORT AND SOLID STEEL TRACK RAILS WILL NOT BE ENOUGH!

A TALL CONCRETE SOUND DEAFENING WALL LIKE YOU SEE ALONG SOME HIGHWAYS TO BLOCK OUT THE VEHICLE TRAFFIC NOISES GOING INTO THOSE NEIGHBORHOODS WILL NOT BE ENOUGH!

THE CONSTANT DAY AND NIGHT RAILROAD CROSSING CLOSURES SO THAT ALL THESE TRAINS CAN PASS THRU OUR TOWN SO THEY CAN GET RICH IS A VIOLATION OF OUR FREEDOM:

TO TRAVEL TO STORES/HOSPITAL/RIVER/BEACH/SCHOOLS WHERE EVER WE WOULD LIKE TO GO TO BECAUSE OF ALL THESE TRAINS CONSTANTLY COMING THRU OUR TOWN IS UN-ACCEPTABLE!!!!

WE MUST NOT ALLOW THIS TO HAPPEN TO OUR SEBASTIAN!

I LOVE THIS TOWN AND MOVED HERE BECAUSE IT IS ONE OF THE LAST BY THE RIVER/KICK BACK/QUIET COMMUNITIES!

THEY WANT TO MAKE IT SO WE WILL ALL FEEL LIKE WE LIVE AT A TRAIN STATION NIGHT AND DAY! NO WAY! STOP THE TRAIN!
This is what I have to say about ALL ABOARD FLORIDA! STOP IT!

Sincerely,

MARK G LUND  1053 Louisiana Avenue

Port Canaveral's new cargo era is born

The deal, in the works for a year, was known as 'Project Pelican.'

Port Canaveral's new cargo era is underway.

The port and a unit of a United Arab Emirates-based company signed a 35-year deal Monday for the company to operate a cargo terminal at the port.

Port officials say the deal with privately owned Gultfainer and its new U.S. unit, GT USA, would create 2,000 direct and spinoff jobs when fully operational, including 500 at the port itself. They said Gultfainer plans to make a $100 million investment locally in infrastructure, equipment and staff.

"Gultfainer has an incredible history of success, expansion and growth, and will be invaluable partners," Canaveral Port Authority Chairman Tom Weinberg said. "They are a great partner for the future. This is an incredible new chapter here at Port Canaveral. This is a true game-changer that will strengthen our cargo operations."

Port Canaveral Chief Executive Officer John Walsh said Monday's signing ceremony at the port's Cruise Terminal 6 is the celebration of "a new beginning here" — one in which cargo begins to emerge from the shadows of the port's huge cruise business.

Walsh said Monday was the culmination of a two-year effort to bring Gultfainer to Brevard County, dating back to initial contacts with the company by Walsh's predecessor, Stan Payne. Walsh renewed discussions with Gultfainer when he became CEO a year ago.

What helped seal the deal with the company, Walsh said, was the port's acquisition of two massive cargo cranes and its plans for rail connections to the port.

Badr Jafar, chairman of the executive board of the Gultfainer Group, said he expects his company eventually would handle 700,000 containers a year from Port Canaveral.
On-dock Rail

The PortMiami-Florida East Coast (FEC) Railway connection offers the fastest access to Southeastern U.S. consumer markets.

PortMiami is an oceanfront port with only 2.5 miles from buoy to dock which reduces pilot costs and improves turn-around times. With FEC Railway offering backhaul opportunities to increase roundtrip efficiencies, the port offers significant opportunities to save money and time.

- 50-foot channel
- On-dock intermodal rail service
- Direct highway access via tunnel
- Foreign Trade Zone 281
- Convenient customs service
- Super Post-Panamax cranes
- Up to 1.5 million sq. ft. of dry and refrigerated
- Warehouse / distribution and transloading space co-located with the FEC intermodal ramp

Phase One of the rail restoration project was completed in October 2013. The scheduled completion of Phase Two is summer 2014, and the final phase is scheduled for completion, making the track fully operational, by the end of 2014. Once complete, PortMiami will have 9,000 feet of track and will be running daily train service.

Increased Speed To Market

Deepening its channel to ~50 feet, PortMiami will be the closest U.S. port to the Panama Canal and able to berth mega-ships from Asia following completion of the Panama Canal expansion, expected in 2016. Featuring dedicated rail service from FEC.

RE: Draft Environmental Impact Statement
PROJECT: “All Aboard Florida”

Overall DEIS review summary and comments: After review of the DEIS for All Aboard Florida (The Project), we believe it is inadequate. The information regarding Indian River County, Florida and its communities that will be impacted by All Aboard Florida – Sebastian, Gifford, Vero Beach as well as the county along or near the railroad is incomplete.

Support information and appendices are missing from the report. Reputable local historians and cultural heritage experts from Indian River County were never contacted. The DEIS attempts to pass off contacts used in the southern portion Phase 1 of the project (Palm Beach to Miami) as representing and commenting on Indian River County. This is unacceptable, the representation is inaccurate, and the study not at all reflective of our cultural heritage information.

The document is inadequate in addressing primary concerns of the project on our cultural heritage sites, mitigation during demolition and construction of the San Sebastian Bridge, wildlife, social justice and the treatment of the Gifford community, and businesses. Many of the assumptions made in the DEIS are unsupported. Some statements in the report are in conflict with statements made in other parts of the report. Some of what is in the report does not match what has transpired in discussions with All Aboard Florida representatives in our community. For instance, the Gifford community was not told about the impacts the All Aboard Florida project will have in their community.

Indian River County is a “Donor” county to this All Aboard Florida project. There are no direct positive economic benefits to Indian River County, Sebastian, Florida, or Vero Beach, Florida and including the Gifford community.

The Indian River County DEIS community meeting held on November 5, 2014 at the Indian River State College, Mueller Center was a representation of those
items that All Aboard Florida desired to discuss and not necessarily those items of critical importance to the members of the Indian River County community. The project maps that were displayed by Federal Railroad Administration at this community meeting did not even have the names of the towns in Indian River County that will be impacted by All Aboard Florida project! For the record, those towns are Sebastian, Florida and Vero Beach, Florida.

Photo of map on display at public meeting is shown below:

We urge that the Federal Railroad Administration, the All Aboard Florida consulting firm, and All Aboard Florida principals Final EIS incorporate provisions that will address the issues outlined in this DEIS response document and in every other DEIS response document provided by all agencies, organizations, individuals, and governments in Sebastian, Florida, Vero Beach, Florida and Indian River County, Florida.

**COMMENTS AND CONCERNS**
From the Summary
S-18 last paragraph, states that “The Project will not adversely affect ("use") and public parks, recreation areas, or wildlife refuges. Collectively, these properties are protected under Section 4(f) of the department of transportation Act, as are historic properties.” On page S-19 the text continues stating that “The existing N-S Corridor bisects two of these Section 4(f) recreation resources” and names “Hobe Sound National Wildlife Refuge and Jonathan State Park.”
RESPONSE: It fails to recognize that historic Pocahontas Park, the Heritage Center and the Vero Beach Community Center which are all located in an historic park. The document does not include any input from local authorities at Indian River County, Sebastian or City of Vero Beach.

- How will the consulting group address the obvious lack of communication with the Cities of Vero Beach and Sebastian, Indian River County government and local knowledgeable organizations and individuals?

S-19 Visual and Scenic Resources states that “viewsheds along "N-S Corridor would remain primarily unchanged.”
RESPONSE: This area of the document addresses mostly those areas along SR528 while barely noting the railway immediately adjacent to US 1 that runs from Titusville (in Brevard County) through Wabasso (in Indian River County).

See map and information below and on next page of Indian River Lagoon National Scenic Byway which was taken directly from U.S. Department of Transportation, Federal Highway Administration website for “America’s Byways. According to this U.S. Department of Transportation website: http://www.fhwa.dot.gov/byways/byways/16199/maps

Indian River Lagoon National Scenic Byway
National Scenic Byway • Florida
Length 150.0 mi / 241.4 km
Time to Allow Take four hours to drive or two days to enjoy the byway.
   There are no fees to drive the byway; however, some of the state and Fees federal lands charge park fees.

The Indian River Lagoon National Scenic Byway gives access to a National Estuary providing habitat to more species than anywhere in North America. History buffs, bird watchers, anglers, surfers, swimmers, boaters, and vacationers will find excitement at a national seashore, wildlife refuges, state park, museums, the Kennedy Space Center, beaches, and waterways.
Continued Response: Our County's economy is deeply rooted in a thriving eco-tourism industry. The Indian River Lagoon is a tourism generator from activity on the lagoon itself to the Scenic Byway mentioned here. According to Florida Atlantic University Harbor Branch, the lagoon "stretches along 40% of Florida's east coast and yields an estimated $3.7 billion annual economic impact for the state."

- All of the above information should be included in the EIS.
- "viewshed" impacts should be acknowledged and mitigation named.

Section 4: Affected Environment
Land Use and Transportation
Section 4 Appendices have been omitted from the DEIS.

- Why?
- How will this be corrected?
- Public opinions on certain sections are difficult to make without appropriate support information.

Omitted appendices:
- 4.1.1-A Existing land use maps
- 4.1.3-A USCG cooperating agency acceptance
- 4.1.3-BUSCG jurisdictional determination
- 4.1.3-C Navigation discipline report
- 4.2.4-A Potential contaminated sites aerial photographs
• 4.3.1-A USCG Coordination meeting notes August 12, 2013
• 4.3.3-A Characteristic plant species
• 4.3.5-A EFH assessment
• 4.3.6-A Rare species survey reports rare species consultation areas
• 4.4.2-A Minority populations
• 4.3.6-B Poverty populations
• 4.4.5-A SHPO consultation materials
• 4.4.5-B Cultural resources proximate to the project corridor
• 4.4.6-A Noise and vibration contours

Physical Environment
4.3.3 Natural Environment/Wetlands
The DEIS does document direct and indirect impacts to wetlands, protected species, and habitats.
RESPONSE: However,
• the DEIS is inadequate for proper review because no N-S Corridor FLUCCS maps or habitat and wildlife impact area maps were provided at a proper scale to verify conflicts between the proposed railroad improvements and the habitat type or associated species.
• There was no wetland maps shown to verify were track expansions and passing lanes would conflict with isolated wetlands.

4.4.5 Cultural Resources
Table 4.4.5-2 Certified Local Government/Local Informant Contacts Regarding Potentially Locally Designated Cultural Resources.
RESPONSE:
• No one from the public or private sector in Indian River County, City of Sebastian or the City of Vero Beach was contacted for information regarding cultural resources.
• County authorities were completely overlooked.
• This table names Brevard, St. Lucie and Palm Beach County only.
• This is incomplete and inadequate information.
• Who will be contacted in Indian River County to provide this information?
• How will the consultants incorporate this information into the EIS?

Further, 4-122 states “Normally, archeological and other below ground resources will be affected by ground disturbing activities...” as compared with above ground and that survey methods differ because of those differences. At the bottom of 4-122 it addresses the N-S Corridor and says “the Area of Potential Effect was limited to the footprint of subsurface activities within the existing approximately 100 foot wide FECR Corridor. The historic resources APE included the N-S Corridor as well as 150 feet on either side of the N-S Corridor to allow for consideration of indirect impacts.”
RESPONSE: *Archeological Site Significance: The Old Vero Ice Age Site is west, east and under the FEC tracks. Recent excavations by Mercyhurst at a location immediately adjacent to the railroad have uncovered meaningful artifacts and information from the “Vero Man” Sites that continue to support that people and a large variety of extinct animals were in Vero 12,000 to 14,000 years ago. The local continued archaeological activities are essential for providing further information about the earliest inhabitants of the world as well as Florida. In the future, we believe the positive impact on the scientific community, as well as on Florida, Vero Beach and the region, will be profound.

This archeological site has been found eligible as a national historic site. The site will also most likely be considered as a potential World Site as a bone etched with a mammoth found near this site and was authenticated to be over 12,000 years old demonstrating that humans and animals coexisted in Florida during prehistoric times. The art has been declared by top anthropologists as the “oldest, most spectacular and rare work in the America’s.”

Other archeological findings have been made at additional sites along the FEC tracks going northward from the Mercyhurst site at the Main Relief Canal through Gifford (“Gifford Bones” site) and into Sebastian.

Plans for this AAF project have not been developed to a point where our community can comment. As a result, we do not know what impacts there will be on specific archeological sites. For instance, there has been no bridge plan for the area at the location of the Old Vero Ice Age Site.

- The “Gifford Bones” site is not addressed or identified. Therefore no mitigation is issued. Should be included in the report.
- Impacts and the mitigation of impacts from All Aboard Florida on these areas is not addressed but instead completely overlooked or ignored. Site identification, impacts of All Aboard Florida laying added tracks and the additional vibration and mitigation of same needs to be noted in the final report.
- Other sites along the track ridge are known. How will these important sites be accessed for archeological study?
- Sites along the canals and the bridges are at most risk. How will these be handled during Phase 2?
- How do we make further comments about this if the bridge plans for the location of this archeological site are not complete and available to the public?
- How will information about the archeological sites in Indian River County be included in the EIS?

COMMENTS
4.4.5.1 Methodology
Page 4-124
Consultation
This page recounts meetings between AAF and SHPO. It appears there were several determinations established:
- March 28, 2013 SHPO meets with AAF and determines that the need to coordinate with historic preservation planning representatives for the West Palm Beach to Orlando phase of the project “was not warranted.”
- DEIS states that five public “scoping” meetings were held and that those meetings “provided adequate opportunity for consultation.”
- “SHPO determined that no additional separate Section 106 meetings were necessary.”
- Evidently “scoping” meetings were held in other counties but not in Indian River County. And, in Indian River County there were no public notices for “scoping” meetings outside our county.
- Appears the only archeological site identified in the DEIS in the way of the Project is located in Hobe Sound National Wildlife Refuge.
- We learned that Janus research contacted five CLGs and local informants. NONE in Indian River County. We understand these “determinations” went on before the DEIS was released.

Response: Indian River County was completely ignored in this part of the process. Local representation was totally dismissed without further consideration or notification to local representatives. There were no “scoping” meetings held and no publicly advertised “scoping” meetings in Indian River County while there were dozens of such public notices in Ft. Lauderdale, Orlando and Miami. This oversight completely undermines this part of the Section 106 (National Historic Preservation Act), Section 4(f) Federal Transportation Act, and the EIS process.
- How will FRA and AAF address and correct this oversight?
- How will Indian River County be included at this point in the overall DEIS process?
- It appears that, at the highest levels, the "standard" NEPA process was somehow mixed with the "integrated" method. To our knowledge, this is the first time this has been done. Why?
- We are very concerned about the lack of outreach to [only] CLGs and [certain] local informants and believe this denigrates the DEIS process and intent of benchmarked historic preservation guidelines.

Section 5: Environmental Consequences
Land Use, Transportation and Navigation
5.1.1 While the DEIS indicates little or no adverse impacts and states that Indian River County supports efforts for passenger rail,

RESPONSE: It does not indicate the passionate opposition Indian River County Government, Sebastian City Government, Vero Beach Government, and others have for this project which is not simply about "passenger" rail service but also to deliver increased freight services and the impacts of that freight service on the community.
- Indian River County adopted a resolution opposing All Aboard Florida and does not believe the Project fits into the planning for this community.
- Indian River County Chamber of Commerce endorses the County's resolution opposing the project.

On page 5-5 the DEIS states “The MCO Segment and N-S Corridor under the Action Alternatives would not bisect any privately owned properties…”

**RESPONSE:** However, the project will completely bisect the City of Vero Beach, its residents and its medical and business services.

On page 5-6, Table 5.1.2-1 regarding grade crossings refers to the highest volume intersections in Indian River County at Oslo Road and SR 60 east and west. Page 5-12, Table 5.1.2-4 indicates that passenger rail will travel at 106.6 mph through Indian River County which includes these 3 highly traveled intersections/crossing. Page 5-8 mentions that *freight will see an increased length in trains but states that there will be “minor” roadway closures and “minimal” impacts to existing conditions.*

**RESPONSE:** These statements fight with one another and it is clear there will be significant negative impacts to crossings themselves, delays in traffic due to crossing closures, and significant impacts all of the above will have on our residents, public safety equipment, employees, goods being transported, school bus and Senior Resource GoLine public bus schedules, and visitors traveling east and west in our community.

Although the DEIS is triggered only by the All Aboard Florida passenger rail request for a RIF loan, the DEIS does note that FEC freight traffic (once the FEC line is double-tracked and the Panama Canal is opened) will increase. Vibration levels as indicated in the Table 5.1.2-4 clearly state that current number of freight is 22 per day traveling at 54.2 mph and the proposed passenger will be 32 trains per day (to start) at 106.6 mph.
- The vibration issue should reflect the identification of the additional freight and mitigation measures should be identified.

**Senior Resource Association public bus GoLine:** Increased rail crossing closures may present an obstacle in adhering to transit schedules.
- Will FEC and All Aboard Florida be required to coordinate with all public and private local fixed route providers in the corridor to minimize these impacts?

48% of Indian River County population is over the age of 50. Increased rail crossing present a concern for this population to be on time for medical appointments. There is an added risk component to rail crossing since the horns will be on a static pole with reduced horn sound. Individuals with decreased hearing abilities and other handicaps will be at a greater risk in an attempted crossing when a train is approaching.
• How will this disability issue be handled by AAF? There is not mention in the DEIS.

Physical Environment
5.2.2 Noise and Vibration
Page 5-39 states there will be “minor vibration impacts along the N-S Corridor due to the increase (approximately doubling) of vibration events as a result of adding passenger train service to the existing freight operations.”

RESPONSE: This is not accurate. Existing freight today is 8-10 trains daily. Add to 32 proposed N-S passenger trains totals 40-42 trains daily. Table 5.1.2-4 on page 5-12 shows clearly that by 2019 there will be 22 freight trains daily. That does not even consider the number of trains following the opening of the Panama Canal and even more trains to accommodate the Port of Miami.

• Using the number reflected in Table 5.1.2-4 the total trains daily would be a minimum of 52 trains (not 42 as stated)

Along the Vero Beach section of the tracks, the Indian River County Chamber of Commerce has a new (C.O. 2009) 2-story, $1.5 million structure used a community visitor center and business center. There are also multiple cultural historic facilities/tracts which include the Old Vero Ice Age Site (*archeological site), the historic Vero Beach Train Station, Heritage center building, and the historic City of Vero Beach electric plant. The argument we have heard is that these structures are already impacted by train traffic. However, today that traffic is 8-10 trains each day not 42 or more which will put additional vibration on these structures.

• How will new and old structures be impacted by the additional vibration from the increased number and length of freight trains as projected in the DEIS document?

As stated above in the 4.4.5 response –

*Archeological Site Significance: The Old Vero Ice Age Site archeological excavation site is immediately adjacent to the FEC tracks on the east side. However, the archeological site itself is east, west and under the existing track bed. Recent excavations have uncovered meaningful artifacts and information from the “Vero Man” sites that continue to support that people and a large variety of extinct animals were in Vero 12,000 to 14,000 years ago. The local continued archeological activities are essential for providing further information about the earliest inhabitants of the world as well as Florida. In the future, we believe the positive impact on the scientific community, as well as on Florida, Vero Beach and the region, will be profound.

This archeological site has been found eligible as a national historic site. The site will also most likely be considered as a potential World Site as a
bone etched with a mammoth found near this site and was authenticated to be over 12,000 years old demonstrating that humans and animals coexisted in Florida during prehistoric times. The art has been declared by top anthropologists as the “oldest, most spectacular and rare work in the America’s.”

There are additional documented archeological sites located in the northern, northeastern and mid sections of Indian River County. The DEIS has not dealt at all with any archeological finds in Indian River County. And there have not been contacts made with those in Indian River County who are knowledgeable to comment.

- How will the consultant address the remaining archeologically significant sites within Indian River County and describe mitigation of damages to those sites?
- Other response questions on this topic are named in response above 4.4.5

Natural Environment
5.3.6.2 Environmental Consequences
It is specifically stated that “scrub jay meta-populations were not fully evaluated.”

RESPONSE: Scrub Jays are vulnerable to mortality due to collisions with moving vehicles. This is inadequate for proper review and decision making. Habitat loss, incidental take, and mitigation should also have been discussed.

- Why wasn’t this information fully evaluated?
- It is necessary that the Final EIS and the All Aboard Florida project substantively address Scrub Jay mortality and incidental take due to collisions with train sets in the Final EIS?

The DEIS relies on mitigation banking for wetland impact compensation.

- There are not available mitigation banks in all water management basins, therefore if there are areas of isolated wetland impacts in some areas of the project no mitigation is available as proposed.
- This is inadequate and lacking in information as presented.

5.3.3 Wetlands
Page 5-81-91
This section addresses and identifies wetland governing regulations and discusses the types of impacts. Several instances where it states minor or no impacts.

RESPONSE:
• The consultant needs to address/confirm available appropriate wetland mitigation banks for each wetland type per impact basin individually.

5.4 Social and Economic Environment
Page 5-48 states in the first paragraph that the project will result “in an increase in future noise levels and the potential for noise impacts.”

RESPONSE: It is our opinion that this will result in increased difficulty to maintain and operate businesses efficiently and effectively at or within 100 feet of all crossings/intersections of the railway. The increased noise and vibration will be coupled with additional noises and vibrations from sounds emitted from the wayside horns.

• There are no maps available and no back up provided in the DEIS that demonstrate the amount of land owned by FEC.

About 100 yards from the US 1 Ponce de Leon intersection in Vero Beach are over 150 residents, mostly elderly who will also be inflicted with noise from the wayside horns.

The DEIS further states that “the Project will not displace any businesses (page 5-127)” and that the “Project would have beneficial regional economic impacts from increased economic activity, tax revenues, construction jobs, and associated spending.”

RESPONSE: Economic Impact:
As an example, the pet store (Cindi’s Pet Center) located at 721 US 1, Vero Beach is immediately adjacent to the 7th Street crossing. The shop will most likely need to be relocated or will close due to the increased noise and vibration impacts on fish, reptiles, birds and dogs.

5.4.1 Communities and Demographics, 5.4.1.1 Environmental Consequences
Page 5-121 of the DEIS states that “would not result in residential displacement, neighborhood fragmentation or loss of continuity between neighborhoods.”

RESPONSE: While this statement may be true in 2014, Table 5.1.2-4 clearly shows an increase to the total number of trains to 54 daily in 2019 (4 years from now). This table also shows that the 32 passenger trains are moving through Indian River County at speeds over 106.6mph and freight at 54.2 mph in 2019. Of particularly concern are the elderly drivers and those who depend on foot or bicycle to cross over the tracks to get to medical appointments and go to their place of employment.

• The argument that the rail line has already been in place and creates no changes simply is not acceptable when both the number of trains and the speed at which they will travel more than doubles by FEC estimates by 2019. Does not compare apples to apples.
• How will these facts presented in the DEIS (above) not change neighborhood continuity?
• What will be the impact on property values and desirability of neighborhoods near the tracks?

5.4.1.2 Indirect and Secondary Impacts
On page 5-123 the writer describes population and transit growth in South Florida. It goes on to state that All Aboard Florida would be an improvement to address roadway congestion and increase the ability to transport people between major South Florida cities.

RESPONSE: This section only addresses issues from West Palm Beach through Miami. Statements made in 5.4.1.2 do not reflect the northern Phase 2 part of the project. While this may be true between Palm Beach and Miami, it is not at all factual for Brevard, Indian River, St. Lucie and Martin Counties. There are no stops in any of these four northern route counties. These four counties are "donor counties" with no immediate or near-future consideration for any benefit but will encounter tremendous loss of mobility, peace and quiet and quality of life with an additional 32-passenger trains and estimated doubling of freight.

5.4.2 Environmental Justice
Page 5-123 it is stated that this section describes the potential effects to minority and low-income populations Page 5-121 of the DEIS states that "would not result in residential displacement, neighborhood fragmentation or loss of continuity between neighborhoods."

RESPONSE: Again, this statement does not hold up and will no longer be factual when an additional 32 passenger trains a day are blowing through Indian River County at speeds of 106.6mph in 2019. (Table 5.1.2-4)

According to the local history book “Hibiscus City”, When Henry Flagler built the rail line there was a dispute with the John T. Gifford family over land Flagler wanted for his railroad. To retaliate for the delay of the desired rail extension, Flagler’s surveyors named a small labor camp, an exclusive Negro community, “Gifford.” Today, Gifford remain a largely non-Hispanic black and low-income population (average annual wage $20,373 2012 U.S. Census) with many struggles. The area has maintained 2 and 3 tracks and is the only area of Indian River County that continues to see long delays from stopped trains.

Within yards of the tracks through Gifford are-
• a number of homes within 50-yards of the tracks,
• nearby schools,
• a medical center,
• and businesses and employment located in close proximity to the railroad tracks.
The additional passenger and freight trains that are anticipated will have an increased negative social impact on this small black community and as stated on page 5-48 of the DEIS in the first paragraph — “this project will result in an increase in future noise levels and the potential for noise impacts.”

Representatives of the Gifford Progressive Civic League are very concerned about the additional trains, both freight and passenger, and the on-going impact this will have on all emergency services to and from their small community. Currently, this area of the county already has more than one track and experiences longer delays and trains stopping than is experienced in other parts of Indian River County.

Neighborhoods within the Gifford community, and for that matter elsewhere in the County, have developed their own “unofficial crossings.” A number of school children considered “walkers” cross the tracks to attend school in Gifford.

- How will the DEIS and AAF address these “unofficial neighborhood crossings”?

Children have been fascinated with trains and speed for decades. Starting with “Thomas the Train” children love trains! Children within any part of our community have grown accustomed to the speed of the local freight trains. They can judge their “timing” with approaching freight trains moving 35-45 mph. It is a fact that looking down the tracks it is extremely difficult for pedestrians to judge how quickly the passenger rail will approach going speeds 80-100mph and faster.

There is nothing in the DEIS that we can find that describes how AAF will provision for safety in these crossing areas. It is recognized that all areas along the tracks can not be fenced.

- How will AAF accommodate for children and other pedestrians in those “unofficial pedestrian crossing” areas?

In order to comply with the Civil Rights Act of 1964 and the Federal desegregation of schools, school districts are divided by zones. Gifford children are bused (long-runs) to accommodate Federal desegregation regulations and to raise the numbers of African American children attending other neighborhood schools. This causes a disproportionate effect to Gifford students more so than other neighborhoods outside of the Gifford community. Intersections at 45th and 49th Streets are of concern because the children are bused over these intersections twice daily in order to reach their designated out of neighborhood school for Federal compliance reasons.

- What special care will be used by AAF at those intersections to mitigate for the possibility of accidents with school buses?
5.4.3 Economic Conditions
While the DEIS page 5-127 says the Project will not reduce municipal property taxes that is yet to be seen. The DEIS only addresses properties acquired by AAF.
RESPONSE: Florida East Coast and All Aboard Florida are not in the position to determine if property values or property taxes would decrease. Property values are driven by the marketplace which will determine what the private sector will be willing to pay for properties near the tracks and that will have an impact on those privately owned properties.

The DEIS further states that “the Project will not displace any businesses (page 5-127)” and that the “Project would have beneficial regional economic impacts from increased economic activity, tax revenues, construction jobs, and associated spending.”
RESPONSE: This is a broad and generalized statement in which the DEIS consultant is referring to the southern portion Palm Beach to Miami segment of the N-S project corridor.
- This statement does not apply to Martin, St. Lucie or Indian River Counties.

There are no stops, no appreciable economic activity, no tax revenues, no jobs, and no appreciable associated spending that will occur in Indian River County. All increased economic activity and the benefits from such activity will occur from Palm Beach to Miami. And all employment from additional laying of tracks, in all areas of the project are temporary.

The results of a recent survey of our Chamber of Commerce membership shows that:
- 68% of our businesses believe their business operations will be negatively impacted by the Project.
- 59.4% believe that their customers coming to their business will be negatively impacted.
- 60.3% strongly oppose All Aboard Florida

“...freight traffic on the FECR (Florida East Coast Railroad) Corridor is predicted to increase. FECR operated 24 daily trains in 2006 and had projected growth of 5-7% between today and 2016. However, due to delays in the expansion of the Panama Canal and other factors, it is now expected that freight operations will increase from the current number of trains (now 8 to 10 daily) to 20 trains per day by 2016, and at a 3% annual growth after 2016.”

RESPONSE: 71% of business survey respondents say the added 32 passenger train a day will have a negative impact on our country.

Some comments from our business members-
• "If these statistics are accurate, I believe it will increase traffic and wait times for east/west motorists."
• "Rail service is key to the success of any port - you can't move boats on land. So I believe that this really is about increases in freight. They won't run 32 passenger trains a day if only a dozen or so people are on them."
• "Traffic to and from my store will be held up numerous times daily as the trains pass thru Vero."
• "My business property is next to the RR tracks -- Noisy -- distracting -- DANGEROUS to allow 100+ MPH train where 55 MPH is currently the speed limit. 55 MPH is fast enough."
• "Time allowances getting to and from our clients will be negatively affected for all outbound business associates."

As stated earlier: Economic Impact:
• As an example, the pet store (Cindi’s Pet Center) located at 721 US 1, Vero Beach is immediately adjacent to the 7th Street crossing. The shop will most likely need to be relocated or will close due to the increased noise and vibration impacts on fish, reptiles, birds, and dogs.

Table 5.4.3-1 Summary of Economic benefits-
Page 5-128 under Action Alternatives A, C, and E states "The Project would increase federal, state, and local government revenues and have other direct economic benefits to local populations." (References Washington Economics Group)

RESPONSE:
• There are no direct economic benefits to Indian River County.
• The information in this table is inadequate and does not support a "direct economic benefit" at local levels for those counties that do not have a stop or long-term employment relating to the Project.
• We recommend that the consultant provide a similar table showing the DIRECT benefits county by county from "increased economic activity, tax revenues, construction jobs, and associated spending" as stated on page 5-127 of the EIS.

5.4.5 Public Health and Safety
This section addresses removing cars from highways i.e. "fewer vehicle crashes and fewer air emissions" page 5-131.

RESPONSE: Our business community survey respondents reported that:
• 70.1% stated that the Project will create vehicle and pedestrian safety issues
• 63.4% have concerns about emergency services access,
• 39.4% local ability to deal with potential rail accidents.
5.4.5 Cultural Resources

Page 5-137, bottom of page, states "The Project would have no direct or indirect effects (noise, vibration, change in setting) to the historic resources located adjacent to the N-S Corridor. It further states, page 5-138, that "All cultural resource investigations were conducted in accordance with Section 106 of the NHPA and its implementing regulations for protection of Historic Properties (36CFR part 800)." And ends with "The methodology for the balance of the N-S Corridor was consistent with that used in the 2012 EA."

Response:

- The above referenced paragraph describes how the MCO segment and the E-W Corridor was addressed by SHPA in consultation with FRA. It refers to the EA which was done for Phase 1 West Palm Beach to Miami not Phase 2 Martin County through Brevard County.
- This is inadequate as Phase 1 and Phase 2 are not equal comparisons but very dissimilar.

In Indian River County there are the Old Vero Ice Age Site and other archeological sites as already reported. Historic sites including the Holstrom property (house and barns), and others.

- Holstrom property (house and barns) on National Register of Historic Places
- No one from Indian River County was consulted for information.
- In the "North-South Corridor" info, no mention of sites in Indian River County.
- Appears all communication was with SHPO.
  - Why was no one contacted in this part of Phase 2? On page 5-141 it notes Phase 1 of the project from Miami to West Palm Beach.
- Hobe Sound and Fort Capron mentioned but no sites in Indian River County.
- This section is incomplete and inadequate.

Not acknowledged or discussed in the DEIS:

- Old Town Sebastian Historic District East*
  - on National Register of Historical Places (2003).
- Old Town Sebastian Historic District West*:
  - on National Register of Historical Places (2004)
- Why were impacts of vibration, noise, safety, and viewsheds not included in DEIS?

Section 6: 4(f) Evaluation

6.4.2 St. Sebastian River Bridge The applicant indicated the Sebastian River Bridge Table 1-1 is located in Brevard County.

RESPONSE: The bridge is also partially located in Indian River County and will have environmental impacts in Indian River County.

- Demolition and construction impacts should be addressed.
A shell midden site is reported in or adjacent to this bridgehead.
- How will AAF work in and around this archeological site?

This bridge is determined eligible for NRHP by SHPO

6.4.1.4 Measures to Minimize Harm and Mitigate Impacts
This section discusses AAF will conduct historic research, prepare an Historic American Buildings Survey, Historic American Engineering Record and consult with SHPO prior to demolition.

RESPONSE: The St. Sebastian River is a tributary of the Indian River Lagoon. The Indian River Lagoon has for the last several years been the issue of highest importance to all the N-S corridor counties from Brevard through Martin County. Any construction of new bridges to replace the existing historic structures will cause unintended negative ecological impact to the San Sebastian waterway and its habitat for fish and other wildlife in the vicinity. Therefore, will have negative impact on the Indian River Lagoon.

For the sake of those in our communities who are concerned about environmental impacts that will include negative impacts on our eco-tourism, this section of the EIS should include a detailed description of how AAF will mitigate environmental damages to the river bottom, fish and wildlife habitats in and around the bridge location and how mitigation and minimization of harm will be handled during all phases of bridge construction.

Areas of the EIS rely on mitigation banking for wetland impact compensation. There are not available mitigation banks in all water management basins. For instance, the eastern part of Indian River County is in Basin 22 St. Johns River Water Management District and has no freshwater wetland mitigation bank currently operating. There is not a currently authorized Basin 22 mitigation bank, and so there are no mitigation credits available to offset impacts to freshwater wetlands within this basin.

If there are areas of isolated wetland impacts in some areas of the project no mitigation is available as proposed. This is inadequate as presented.

See map inserted below:

Basin22.pdf
This section of the report should reflect that it can reasonably be expected that adverse impacts to manatees will result from St. Sebastian River bridge demolition/construction, as well as the increased frequency and speed of proposed AAF rail traffic. The C-54 canal (historic West Prong of the St. Sebastian River) is a major warm water aggregation area for manatees; thus, the bridge site is in an area of high manatee use. The DEIS states that during demolition and construction of the St Sebastian Bridge, siltation barriers will be used around the construction site that would not impair manatee movement.

- Additional mitigation and caution may be required to allow the manatees to access warmer water in the event of cold weather.
- An aerial overlay should be provided onto the Track Chart 3.3-B4
- When asked at the public meeting held in Indian River County “how will mitigation be described in the final EIS?, the consultant at that station indicated “all of this will be addressed in the project permitting process.” That means he expects this to bypass the EIS and go straight to permitting further demonstrating that the public meeting was no more than an FRA dog and pony show. This should be addressed in the EIS.

Demolition and Construction Noise: When source levels are greater than the thresholds, there are impacts to the organisms. That can be calculated and should demonstrate the distances to which those effects may extend.

- How will noise vibrations via water be addressed and mitigated for in regard to damages to habitat and breeding of species of fish and breeding within this waterway?
- What are the statistics of the level of noise and vibration carried from the bridge construction areas in the St. Sebastian River into the Indian River Lagoon?
- How will AAF research and accommodate for cumulative sound exposure from pile driving noise and vibration during the construction of the new bridge?
- How will AAF determine if noise from the installation of piles has the potential to negatively affect fish, turtles, and manatee?
- How will these source levels be compared to known thresholds?
- How far will the harmful noise and vibration travel before attenuating below threshold values?
- Please gather information and explain in the EIS: How will rust from the demolition will be mitigated?

Section 7: Mitigation Measures and Project Commitments
7.2 Project Commitments
7.2.11.1 West Indian Manatee Mitigation Measures
RESPONSE: This section of the report should reflect that it can reasonably be expected that adverse impacts to manatees will result from St. Sebastian River bridge demolition/construction, as well as the
increased frequency and speed of proposed AAF rail traffic. The C-54 canal (historic West Prong of the St. Sebastian River) is a major warm water aggregation area for manatees; thus, the bridge site is in an area of high manatee use. The DEIS states that during demolition and construction of the St Sebastian Bridge, siltation barriers will be used around the construction site that would not impair manatee movement.

- What additional mitigation and caution will be utilized to allow the manatees to access warmer water in the event of cold weather?
- How will the manatees be protected from rust and other debris that may come from the demolition of the existing bridge structure?

Map clearly shows Manatee Viewing Area -
MEMORANDUM and LETTER REPORT

Date: November 29, 2014

From: Ruth Stanbridge, Research Historian

Re: Draft Environmental Impact Statement - All Aboard Florida Project.

Thank you for the opportunity to comment on this Proposed Project. The following is submitted and specifically directed to the Consultation and Cultural Resources of the above DEIS as it relates to the National Historic Preservation Act (NHPA) Section 106 and Federal Department of Transportation Act (FDTA) Section 4(f).

COMMENTS

From the beginning, the citizens of Indian River County and other Treasure Coast Counties were assured by both the Federal Rail Administration (FRA) and All Aboard Florida (AAF) that all concerns would be answered and the Draft Environmental Statement (DEIS), when released, would be complete and creditable.

After reviewing this DEIS over the past few weeks, the determination has to be made that this document is not complete and far from creditable. It is solely lacking in the most basic information and details, especially in the identification and discussion of the cultural resources of Indian River County.

The DEIS Summary is the first indication that there has been no consideration given to cultural resources of Indian River County. There are no acknowledgements of the significance cultural resources or historic districts that are located in or immediately adjacent to the FECR Railway Historic District. There was no text, table or report in the DEIS to note that a true cultural resource assessment has been done for APE of the N-S Corridor. There is, however, a bold statement on page 5-18 that says that “The Project would have no direct or indirect effect (noise, vibration, and change in setting) in the historic resources located adjacent to the N-S Corridor.” That statement is ridiculous!

A proper survey and discussion of cultural resources (including archaeological sites) cannot be found in the Affected Environment (Chapter 4), or Environmental Consequences (Chapter 5), and is totally missing from Chapter 7 (Mitigation and Project Commitments). That is unacceptable!

Because these resources have not been identified or acknowledged in the DEIS, is it presumed that there are no “environmental consequences”? This DEIS is flawed. It has created confusion and bewilderment not only for the public but for the local governments and cities trying to review the document. Again, this DEIS is unacceptable and a failure of the FRA and their consultants who were tasked to write a complete and creditable document.
As early as July 2013, FRA was being assured by AAF and their consultants that SHPO “was comfortable that AAF has properly consulted with them and that, at this point, [there are] “no adverse effects” to cultural resources from this project.” [8 July 2013 letter - 4.4.5 A2]. Again, this was another bold statement made more than two months before the release of the DEIS and months away from the end of the commenting period.

FAILURE TO COMMUNICATE:

(1) In the letters of March 28, 2013 [4.4.5 A1] and July 8, 2013 [4.4.5 A2] FRA determined “that the coordination with local preservation planning representatives used in Phase I was “not warranted in Phase II” and that “coordination with local entities was not required ...”

(2) Also, FRA agreed “not to use the ‘substitution approach’ to streamline the NEPA and NHPA Section 106 consultation process” which meant that the “standard Section 106” method would be used – 8 July 2013 letter [4.4.5 A2]

(3) In these same pre-DEIS meetings, the determination was also made and concurred with at the highest level that coordination with local planning representatives was “not warranted” (see page 4-124).

These pre-DEIS letters between FRA, AAF, and SHPO were summarized in the DEIS paragraph on page 4-124 and became part of the document. They also set the stage for what happened in Indian River County and other local governments.

No contacts were made with local government (cities or county), historical or heritage organizations or individuals in regard to information or input on cultural resources. No scoping meeting was held in the County. The City of Vero Beach and the City of Sebastian both located along the APE of the N-S Corridor were not contacted. Neither the Indian River County Historical Society nor the Sebastian River Historical Society was asked for information on cultural resources. The planning staff of two Cities and those of Indian River County were never called. Even the County Historian (duly appointed by the Indian River Board of County Commissioners) and who has worked closely with the Department of State, Bureau of Historical Preservation, for over thirty years was never asked for information.

SHPO, when contacted on October 15, 2014 by email about these pre-DEIS determinations, responded that “An agency official may use the process and documentation required for the preparation of an EA/FONSI or an EIS/ROD to comply with section 106 in lieu of the [standard 106 process] if the agency official has notified in advance the SHPO/THPO and the [Advisory] Council that it intends to do so”.

Whatever method was used – the "standard Section 106 process" method or the streamlined and flexible “substitution” approach – local public participation and involvement is guaranteed, but FRA’s determinations in the early pre-DEIS meetings compromised this coordination and consultation.

(4) Table 4.4.5.2 (page 4-125) – This Table explains that 4 Certified Local Governments (CLG), 1 urban planner, and 1 archaeologist were contacted.

The Orlando-WPB Corridor is well over two hundred miles long and runs through 6 counties with a dozen or so large and small local city governments, at least another dozen or so planners with each city and county, many local historical societies, preservationists, and knowledgeable local people, yet only 6 contacts were made with only 3 responses?
A Certified Local Government cannot be a substitute for “local government”, consulting parties, consulting agencies or local preservationists in regards to Section 106. The urban planner in the St. Lucie County cannot be substituted for the urban planner in Indian River County. **FAILURE TO COMMUNICATE!**

**FAILURE TO ACKNOWLEDGE CULTURAL RESOURCES:**

(1) In Section 4.4.5 Cultural Resources: Most of the historical properties and archaeological sites in Indian River County located in or immediately adjacent to the APE of the railway corridor were not acknowledged, surveyed, or discussed in this DEIS. These resources were omitted or simply dismissed from the Section. Therefore, no analysis could take place.

The entire Section (pages 4-120-132) was alarming, no detail discussion of historical buildings and structures appeared and no cultural resource assessment report was included. The most shocking was that no recognition was given to two National Register Historical Districts in the City of Sebastian that are located in or immediately adjacent and on either side of the FECR Linear Historic District. Not only are those National Register Districts in or immediately adjacent to the APE of the N-S Corridor there are over 40 buildings or structures within their boundaries with many of them in the APE and several are individual properties potentially eligible or already listed on the National Register.

Throughout the length of the county in or immediately adjacent to the APE of the N-S Corridor, there are a number of other single historic properties potentially eligible or already listed on the National Register. These were not acknowledged in any way. They would fall under Section 106 (NHPA) and will have impacts from noise, vibration, and safety issues, yet they are not listed or discussed in the entire document.

The “three architectural/historical resources” mentioned on page 4-129 of the DEIS are only identified in the Tables that follow this statement. The railroad corridor, the bridge, and a railroad platform are slated for reconstruction activities or demolition. No other cultural resources were listed or acknowledged in the text or Tables with the text.

In the separate Appendix 4.4.5-B3 which shows the "proximate" cultural resources in relationship to the N-S Corridor APE, there are some resources identified only by their FMSF#s identification. There is no refer, no discussion, or other acknowledgement of these resources in the DEIS text. Again, there is no Cultural Resources Assessment Report (CRAC) or Table attached to this DEIS.

The DEIS also failed to acknowledge or identify several very important archaeological sites located in or immediately adjacent and within the N-S Corridor. These sites are of major significance and have national implications and, even, international importance - unforgivable! Another failure of this DEIS.

(2) **Archaeological Resources (4-131) —** Under this portion of the DEIS only one archaeological site in Indian River County is reported in or immediately adjacent to the APE of the N-S Corridor. This one site is a shell midden not evaluated by SHPO while several more archaeological sites in the Corridor were ignored and/or dismissed.

One of those missed is a site in or immediately adjacent to the bridge landing of the St. Sebastian River Bridge (FMSF#88R3062/8IR1569) near Roseland. This is the St. Sebastian Bridge that will be demolished as part of this
Proposed Project. Again, this site listed on the Florida Master Site File was not acknowledged, surveyed, or investigated.

Two sites with major potential were also ignored or dismissed. Neither the Vero Man site (FMSF#8IR09) nor the Gifford Bone site (FMSF#8IR07 and FMSF#8IR08) were mentioned. Both are potentially eligible for National Register status.

The Vero Man site has gained both national and international attention. In fact, the excavation at the Vero Man Site is now going into its second season. The State Historic Preservation Office (SHPO) is well aware of the potential of this site. Again, this is a total failure of the DEIS in not properly addressing cultural resources along the N-S Corridor and not actively coordinating with local government and local people!

FAILURE TO ACKNOWLEDGE IMPACTS TO CULTURAL RESOURCES:

In Section 4.2.2 and Section 5.2.2, impacts to cultural resources are discussed. Unfortunately, this DEIS has not recognized or acknowledged these resources (including the archaeological sites) and therefore, discussion of the “environmental consequences” and impacts has been limited. Vibration, noise, and safety issues are major concerns.

(1) Table 4.2.2-1 separates noise-sensitive land uses into Categories. Category I lists National Historic Landmarks as one of the “significant outdoor uses”.

In Indian River County there are two National Register Historic Districts and a number of single historic properties listed on the National Register or potentially eligible that falls within this Category. These are in or immediately adjacent to the APE of the N-S Corridor, but, again, they were not identified, acknowledged, or discussed in the text or anywhere in the DEIS document. They would fall under Section 106 (NHPA) and there will be environmental consequences from noise, vibration, and safety issues.

Located in Pocahontas Park (page 4-141) are two historic buildings which are considered community centers (one is on the National Register and another potentially eligible). The Park is listed in Table 4.4.6-2 and is considered under Section 4(f) and Section 6(f). The historic buildings are not acknowledged in the Table as part of the Park. In fact, their existence is not acknowledged anywhere in the text - only as a FMSF# on Map 45 [4.4.5-B3].

These community centers and Pocahontas Park host hundreds and hundreds of people per day, yet the DEIS failed to discuss or acknowledge these buildings and their uses. In fact, the Park, itself, was misidentified as being owned and managed by Indian River County, but Pocahontas Park is a city park in Vero Beach and has been since 1913. Impacts from noise, vibration, and safety issues are major concerns.

A historic farmstead consisting of a house museum (listed on the National Register), barns, and a future as an educational center was totally dismissed. There is no mention made of this property in the document. This Farmstead would be considered under Section 4(f) and is a unique property with over 200-acres of conservation and preservation land including several rare and endangered species onsite. Its eastern boundary is located in or immediately adjacent to the APE of the N-S Corridor. Again, this entire historic farmstead with barns was omitted from discussion as well as impacts from noise, vibration, and safety issues.
(2) The FRA did determine that the N-S Corridor would result in "long-term noise and vibration with adverse impacts to residents and properties". (page 5-39)

(3) They also determined that "the ground-borne vibration already exceeds the criteria" (page 5-51). The N-S Corridor is considered a "heavily used rail corridor" (more than 12 trains per day) with additional impacts if the trains double (FRA 2012a).

Again, vibration, noise, and public safety are major concerns to all the cultural resources in or immediately adjacent to the APE of the N-S Corridor. Since these cultural resources were not acknowledged, recorded, and are missing from the DEIS records and since public involvement was non-existent, no adverse impacts were discussed or recorded.

With the only plans – the 30% plans – available, there was inadequate information to review in regards to impacts. Sixty percent (60%) plans were requested but NOT provided while the ninety percent (90%) plans will not be available until weeks after the DEIS deadline for comments has passed. Plans at 60% are considered standard in any construction project, but for reasons unknown, the FRA and AAF determined that those plans were not necessary for this DEIS. Failure to acknowledge impacts!

There are no way local governments, owners of these properties, preservationists, and the general public will have to accurately address impacts to these resources without information, data, and plans! Failure to acknowledge impacts!

SUMMARY

This "reconstruction" proposal by AAF will add "new" modern infrastructure, additional high speed passenger trains, and increased freight. Impacts of vibration and noise to cultural resources were NOT addressed in this DEIS. Safety issues in and around these cultural resources were NOT discussed. This DEIS simply did NOT acknowledge or recognize these resources and so they presumed they must NOT exist as far as "consequences" from this Proposed Project. (See Cultural Resources, pages 4-120-132 and Table 4.2.2-1- Noise and Vibration – page 4-35)

But these cultural resources do exist and will be impacted not only by the current Proposed Project, but any future increase in rail freight. This freight issue may rapidly increase "if and when" the passenger service proves to be a financial burden. The practical use of this "new" modern infrastructure would then be to return to a freight corridor. History has a way of repeating itself and in 1968 - passenger service was discontinued on the F&G Railway and freight increased - so it could happen again!

What recourse will the public have to address impacts from increased freight when the passenger service decreases or is discontinued? The FRA must find language to add to any final document that will allow the issue of substantially increased in freight service to be re-visited and re-evaluated.

CONCLUSION

All Aboard Florida representatives have promoted this Proposed Project to the public as a "restoration". This term was actually used by one of the agencies, but this is not a restoration. A "restoration" would "restore" passenger service with the trains moving at a slower rate of speed with the original stops "restored" along the way. Again, this is not a "restoration" this is a "reconstruction" with modern tracks, new and upgraded bridges, and NO stops at small and restored railroad stations.
Whether it is a restoration or reconstruction, there are many local citizens, organizations, and governments along this Corridor that are highly displeased and very disappointed with the Federal Rail Administration and how this DEIS was handled. There is also amazement that an Agency with the reputation of the FRA would allow an Environmental Impact Statement, so poorly done, to be released, even, as a "Draft" document.

This DEIS does not represent the goals and objectives of Section 106 and Section 4 (f) nor does it adhere to the criteria that the Federal Rail Administration or any other Federal government agency must have to move forward a Proposed Project of this scope.

The deficiencies in this document are just too much to overcome in an amendment, or, even, in a supplement. By rejecting this DEIS, as it is written, there will be an opportunity to move forward with a "new" document and a realistic timeframe that follows the proper and official guidelines. This will guarantee local governments and the public their right to participate from the beginning and not be "allowed" in at the end!

SUBJECT: All Aboard Florida Comments on the Draft Environmental Impact Statement

Micco Homeowner’s Association represents more than 9,000 residents of unincorporated Brevard County living in the neighborhoods of Barefoot Bay, Fleming Grant, Little Hollywood, Pelican Bay, River Grove, and Snug Harbor Lakes & Village. We are providing for you careful review our list of concerns regarding the demolition and replacement of the St. Sebastian River Railroad Bridge located at the county line between Indian River and Brevard counties as follows:

Page 6-5, 6.4.2 Section 4 (F) St. Sebastian River Bridge - The Project requires that the St. Sebastian River Bridge, a structure located within the FECR right-of-way, be demolished to construct a new structurally sound bridge able to accommodate the future passenger and freight traffic. Page 6-5, 6.4.2.2 Proposed Use - AAF proposes to construct a new twin independent ballast deck structure with concrete piers, located to the east of the existing railroad bridges. The demolition and removal of the westernmost bridge is necessary to protect navigation uses on the waterway, as determined by the USCG. The demolition of the bridge is an adverse effect under Section 106 (see Section 5.4.5 in Chapter 5 for the finding of adverse effect) and therefore constitutes a use under Section 4(f). The bridge is within the FECR right-of-way and no property acquisition is required.

1. The DEIS fails to represent in Bridge Crossing Map Appendix 5.3.1A, Page 6 the curve at the Brevard end (north) of the bridge (photo attached). While the bridge may be in the right-of-way, the tracks are being moved east and at landfall will impact homes in the Little Hollywood neighborhood of Micco in Brevard County.

2. The DEIS fails to comment on new impacts to existing private property adjacent to the tracks in the Little Hollywood neighborhood of Micco in southern Brevard County (photo provided). In the 88 years since the current St. Sebastian River Bridge was constructed in 1926, the Florida East Coast Railway has NEVER operated on a track to the east of its current location as the bridge enters Brevard County. If the proposed eastern track across the St. Sebastian River Bridge reaches land in Brevard County homeowners adjacent to the tracks will find themselves with freight and passenger trains rumbling and vibrating that much closer to their bedrooms. Additionally, when the bridge meets the land in Brevard County the rail-bed is raised about four feet. This
causes further concerns about property damage due to vibrations and possible derailment. The DEIS is silent on these concerns.

3. The DEIS fails to consider any loss of property value and reduced home sales due to the tracks new route to the east. Additionally, should there be an engineering or construction error when building the new bridge, residents have real concerns their property will be taken by eminent domain procedures, also not addressed in the DEIS document.

4. The DEIS fails to include information on the Holly/Azalea Street road crossing, one-half mile south of the landfall of the St. Sebastian Bridge in Brevard County. This crossing is also not included in the list of crossing contained in the FRA Diagnostic Review. Additionally, the new track to the east will somehow have to connect with the existing track near this road crossing. Again, there is no information on whether this crossing will be impacted by the reconfiguration of the tracks, whether the crossing will be realigned or what safety equipment is planned for the crossing.

5. The DEIS fails to comment on where and how construction equipment will be staged, and whether construction noise and vibrations will impact private property.

6. The DEIS fails to comment on how bridge construction and the placement of pilings will impact the annual winter migration of the West Indian Manatee into the St. Sebastian River. The mammal is a year round resident in the river. However, large numbers of wintering manatees begin arriving in November and stay through March. No steps are described that would protect or prevent the West Indian Manatee from being harmed during construction and when driving piling to bedrock for bridge construction.

7. The DEIS fails to include any steps to protect endangered wildlife, fish or their habitat from falling debris or vibration and noise, except to say “will be mitigated.” How do you mitigate a fish kill, dead manatee, dead wood-stork, or loss of their habitat? You can’t create a mitigation bank for these concerns.

8. Page 5-73 Environmental Consequences 5.2.6.2 Local Context: "Sea level is predicted to rise 1 foot from the 2010 level between 2040 and 2070, but a 2-foot rise is possible by 2080."

The DEIS fails to state how the St. Sebastian River Bridge or any other bridge will meet the requirements as stated by the Corps of Engineers Permit application “all new structures would retain existing vertical and horizontal clearances.” Rising sea levels will not only change the height of bridge for boaters, but will likely erode the banks and shoreline where the bridge will make landfall. Again, the DEIS is silent on these issues.

9. The DEIS fails to account for the economic impact on area scenic boat tour operators, commercial blue crab fisherman and fishing guides who make their living on the St. Sebastian River. No information is provided on how those making their living from the river will deal with the consequences of the construction of a new bridge on the St.
Sebastian River as well as the demolition of the current rail bridge. A partial list of area fishing and tour guides can be found here: http://www.sebastianchamber.com/

10. Page 4-77 Affected Environment Table 4.3.4-2 Floodway Crossings within the Project Study Area – Table incorrectly places the St. Sebastian River in St. Lucie County 50 miles south of its actual location in at the Indian River-Brevard County line.

Micco Homeowner’s Association is respectfully asking the Railroad Administration to reject the flawed Draft Environmental Statement and to direct All Aboard Florida to do their due diligence and provide needed facts that truly justify this proposal.

Florida already has a passenger train that goes from Miami to Orlando and no one rides it. It’s called Amtrak

Sincerely,

Micco Homeowner’s Association

The Board of County Commissioners of Indian River County, Florida

Comments on Draft Environmental Impact Statement and Section 4(f) Evaluation for the All Aboard Florida, Orlando to Miami, Florida Intercity Passenger Rail Project

The Board of County Commissioners of Indian River County, Florida (the "Board") respectfully submits these comments to the Federal Railroad Administration ("FRA") with regard to the Draft Environmental Impact Statement ("DEIS"), and Section 4(f) Evaluation dated September 2014 prepared for All Aboard Florida, Orlando to Miami, Florida Intercity Passenger Rail Project (the "Proposed Project"). The Proposed Project's sponsor, All Aboard Florida — Operations LLC ("AAF"), has applied for $1.875 billion dollars in federal funds through the Railroad Rehabilitation and Improvement Financing ("RRIF") program, which is administered by the FRA.¹

The DEIS was prepared to assist the FRA in satisfying its obligations with respect to the Proposed Project under the National Environmental Policy Act ("NEPA"), 42 U.S.C. § 4321 et seq., and applicable NEPA requirements, including the regulations adopted by the Council on Environmental Quality ("CEQ"), appearing at 40 C.F.R. Parts 1500-1508, FRA's NEPA regulations appearing at 49 C.F.R. § 260.35, FRA's "Procedures for Considering Environmental Impacts" published at 64 Fed. Reg. 28545 (5/26/99) ("FRA NEPA Procedures"), and Order 5610.1C "Procedures for Considering Environmental Impacts" issued by the United States Department of Transportation ("USDOT") (9/18/1979) ("USDOT NEPA Procedures").

NEPA requires that "to the fullest extent possible" an environmental impact statement ("EIS"); (i) disclose and assess the impacts of major federal actions significantly affecting the environment; and (ii) consider the reasonable mitigation measures and alternatives to such actions that would avoid or minimize those impacts. See 42 U.S.C. § 4332; 40 C.F.R. § 1502.1. The fundamental purpose of these requirements is to ensure that federal decision-makers understand the short and long-term impacts of their actions, and how such impacts might be addressed, before they take action.

For the reasons discussed in detail below, the Board believes that the DEIS does not take a "hard look" at the environmental impacts of the Proposed Project, and fails to provide FRA with the information needed to satisfy its obligations under NEPA. In particular, the Board has identified a number of potentially significant environmental impacts that were not adequately addressed in the DEIS, and others that were not examined at all.

Moreover, the DEIS contains information intended to satisfy Section 106 of the National Historic Preservation Act ("Section 106"), which requires federal agencies to consider the effect of their undertakings on historic resources, through a consultation process that requires that local governments be invited to participate. FRA failed to follow this mandatory process by electing not to invite most local governments, including Indian River County (the "County"), to participate. As a result, the DEIS missed several historic resources within the County, and probably many others in

¹ On March 15, 2013, AAF submitted two RRIF loan applications to FRA for a total of $1.875 billion.
localities that also were not invited to join in the Section 106 consultation. FRA cannot, therefore, satisfy its Section 106 obligations based on the information presented in the DEIS.

Likewise, the Section 4(f) Evaluation prepared for the Proposed Project is fundamentally flawed. That analysis is supposed to assist FRA in protecting publicly owned parklands, recreation areas, or historic sites of national, State, or local significance. Under Section 4(f) of the Department of Transportation Act of 1966, Pub. L. 89-670 (1966) (now codified at 49 U.S.C. § 303(c)), FRA is prohibited from approving any project that would “use” a Section 4(f) resource unless it finds: (1) there is no prudent and feasible alternative to using that resource; and (2) the program or project includes all possible planning to minimize harm to the resource resulting from the use. 49 U.S.C. § 303(c); FRA NEPA Procedures § 12, 64 Fed. Reg. 28552. As discussed in the comments below, the Board believes the Section 4(f) Evaluation fails to identify or assess the effects of the Proposed Project on significant Section 4(f) resources, and does not provide FRA with a sound basis for issuing findings under Section 4(f).

Similarly, the DEIS does not provide the analysis needed for a consistency determination under the federal Coastal Zone Management Act ("CZMA"), 16 U.S.C. § 1451 et seq.

In light of the serious deficiencies the Board has identified in the DEIS and Section 4(f) Evaluation, the Board is deeply concerned that the Proposed Project has already advanced well beyond the preliminary planning stage, and gives the appearance of becoming a fait accompli. FRA has allowed AAP to segment the environmental review of the Miami to West Palm Beach component ("Phase I") from other portions of the Proposed Project, and construction of Phase I has begun without a cumulative analysis of the impacts of the Proposed Project as a whole. Moreover, according to FRA’s “On-Site Engineering Report – Part 2 for All Aboard Florida” (9/23/2014), engineering plans for portions of the Proposed Project running through (at least) Brevard and Indian River Counties are expected to be advanced to 90% by March 2015. Perhaps most alarming are statements within the DEIS itself that FRA has already made key determinations with regard to the Proposed Project at such an early point in the environmental review process that it did not even have the benefit of NEPA documentation to inform its decision-making. For example, the DEIS states “FRA has determined that the significant delays, costs, and risks associated with the use of elevated structures make raising any of the corridor bridges not feasible.” DEIS at 5-27.

The Board notes that NEPA prohibits federal agencies and applicants for federal agency approvals or funding from taking actions that would limit the choice of alternatives or otherwise signal premature approval of the application in advance of completion of the NEPA process. See FRA NEPA Procedures § 7(c), 64 Fed. Reg. 28549; 49 C.F.R. § 260.35(e); 40 C.F.R. § 1506.1. Typically, agencies within the USDOT use preliminary design work to prepare relevant NEPA documentation, in recognition of the fact that advancing design beyond that stage could tip the agency towards a commitment to a particular course of action without a fair and balanced consideration of reasonable alternatives.
To summarize the problems identified in these comments, the DEIS is grossly inadequate and precludes a meaningful analysis of the Proposed Project. The Board, therefore, requests that no further action be taken by FRA to advance the Proposed Project, unless and until a supplemental DEIS is prepared, and the subsequent requirements of NEPA, Section 4(f), Section 106 and the CZMA are fully satisfied. See 40 C.F.R. § 1502.9(c); FRA NEPA Procedures § 13(e), 64 Fed. Reg. 28354.

Set forth below are the Board’s comments on the DEIS and Section 4(f) Evaluation. Also attached, and incorporated into the Board’s comments, are the technical comments prepared by CDM Smith, the environmental consultant the Board retained to review the DEIS and Section 4(f) Evaluation.

1. **Alternatives:** The Alternatives Analysis Provided in the DEIS is So Narrowly Circumscribed by AAF’s Financial Interests as to be Meaningless.

The alternatives analysis is supposed to be “the heart of the environmental impact statement.” 40 C.F.R. § 1502.14. Accordingly, agencies are directed by the CEQ Regulations to “[e]xpressly explore and objectively evaluate all reasonable alternatives” that might avoid or minimize the impacts disclosed in an EIS. *Id.* While every conceivable alternative need not be examined, a “range of reasonable alternatives” meeting the purpose and need of the action must be considered. *Id.* One example provided by USDOT guidance of the sorts of alternatives to be considered are those “related to different locations … which would present different environmental impacts.” USDOT NEPA Procedures at 3.

Notwithstanding the significant impacts that operation of a high speed train along the Florida East Coast Railroad (“FECR”) corridor would have on the densely populated east coast of Florida, the DEIS lacks a comparative environmental analysis of even one alternative route. Instead, it short circuits the alternatives analysis by narrowly defining the “purpose and need” for the Proposed Project based on AAF’s preferences, and then screening out all the other available routes in a “tiered” approach as failing to meet that sharply circumscribed purpose and need.

Thus, the DEIS states that “AAAF identified its primary objective for the Proposed Project, which is to provide an intercity rail service that is sustainable as a private enterprise.” DEIS 2-10 (emphasis added). “Sustainable,” according to the document, means that operation of the rail service can “meet revenue projections” and “operate at an acceptable profit level.” *Id.; DEIS at 3-1.* Stepping off from the objective of providing a profitable rail service, the DEIS then applied “AAF evaluation criteria” including “six critical determining factors.” Prominent among those factors were those relating to project economics, including the case with which AAF could acquire property, the ability to “commence construction in the near term to control costs,” and limiting the “costs of

---

Likewise, USDOT guidance states that an essential element of an alternatives analysis should be a “rigorous exploration and an objective evaluation of the environmental impacts of all reasonable alternative actions, particularly those that might enhance environmental quality or avoid some or all of the adverse environmental effects.” USDOT NEPA Procedures, Attachment 2 at 3.
development, including cost of land acquisitions, access, construction, and environmental mitigation.” Id. at 3-2. The document then applies such “critical determining factors” to other available routes. Given the fact that AAF had already secured from its parent corporation the land interests needed for the Proposed Project, and AAF put forward a wholly unrealistic build year of 2016, it is no surprise that the analysis came to the preordained conclusion that all the other alternatives are so meritless as to not warrant substantive analysis in the DEIS.

By creating a screen that is tilted in one direction only, the DEIS side-stepped the fact that the Florida High Speed Rail Authority in a 2003 alternatives evaluation entitled “Orlando-Miami Planning Study” rated every other route as superior to the FECR corridor than would be used by the Proposed Project. That study compares the FECR route to three other potentially available north-south corridors in the following table:

<table>
<thead>
<tr>
<th>Route</th>
<th>Travel Time</th>
<th>Capital Cost</th>
<th>Ridership / Revenue</th>
<th>Environmental</th>
</tr>

</tbody>
</table>

Orlando-Miami Planning Study at 7.

Thus, under three of the four criteria applied in that study -- travel time (a factor cited as critical in the DEIS on page 3-5), capital cost and environmental impacts -- the FECR corridor was rated at rock bottom. It is only in terms of revenue that the Proposed Project tied with another alternative and was rated favorably. Thus, if the DEIS were to look beyond the economic interests of AAF, the sponsor of the Proposed Project, to salient issues such as environmental impacts, other routes would certainly merit detailed consideration in the DEIS. However, those routes were ruled to be off limits under self-serving criteria of AAF’s own devising.

The truncated approach utilized in the DEIS does not conform to the requirements of NEPA for one fundamental reason: it is not the project sponsor’s purpose and need that should control the alternatives analysis, but the agency’s purpose and need in taking the action that is the subject of the NEPA review. Thus, AAF’s desire to turn a profit should not dictate the alternatives considered by FRA in determining how it should expend federal rail funds. Guidance issued by CEQ states that “[i]n determining the scope of alternatives to be considered, the emphasis is on what is ‘reasonable’ rather than on whether the proponent or applicant likes or is itself capable of carrying out a particular alternative. Reasonable alternatives include those that are practical or feasible from the

The Board does not dispute that the economic objectives of the Proposed Project sponsor may be taken into account by the agency in defining its purpose and need, and in identifying the alternatives for consideration in an EIS. However, those interests should not be given such weight as to exclude other relevant considerations. This is especially so with respect to high speed rail in Florida, where a number of potentially viable options have been carefully studied in planning documents that have been previously prepared in relation to other projects. According to the Orlando-Miami Planning Study, CSX, I-95 and the Florida Turnpike corridors present far fewer environmental impacts and a much sounder basis for public investment than the FECR corridor. However, the referenced alternatives were summarily dismissed in the DEIS without any sort of analysis considering whether the chosen FECR alternative would cause the most negative impacts to: (a) the health and safety of the citizens of the Treasure Coast of Florida, (b) the historical and archeological sites along the Treasure Coast of Florida and (c) the fragile Indian River Lagoon.¹ FRA cannot simply ignore other legitimate alternatives simply because AAR, the sponsor of the Proposed Project, would like it to do so.

2. **Cumulative and Secondary Impacts: The DEIS Fails to Assess the Cumulative and Secondary Impacts of the Proposed Project, in Combination with Reasonably Foreseeable Future Actions.**

Under NEPA, FRA is obligated to examine not only the direct and immediate effects of the Proposed Project, but also its indirect or secondary impacts and its cumulative impacts, in combination with those of other reasonably foreseeable actions. See CEQ’s NEPA Regulations, 40 C.F.R. §§ 1502.16, 1508.8; FRA NEPA Procedures, 64 Fed. Reg. 28550, 28554; USDOT NEPA Procedures, Attachment 2 at 4; see also CEQ, “Considering Cumulative Effects under NEPA” at 11-21 (1/1997). With respect to indirect effects, the CEQ regulations are clear that impacts that are caused by an action, but “are later in time or further removed in distance, but are still reasonably foreseeable” must be thoroughly considered in an EIS. 40 C.F.R. § 1508.8. More particularly, the growth-inducing impacts of a transportation project must be carefully examined. Id. The CEQ regulations are equally clear with respect to cumulative impacts, requiring that the effects of an action must be “added to [those of] other past, present and reasonably foreseeable future actions regardless of what agency (Federal or non-Federal) or person undertakes such other actions.” Id § 1508.7; see also id. §

¹ The Indian River Lagoon is North America’s most diverse, shallow-water estuary. It spans approximately 156 miles along Florida’s east coast. The total estimated annual economic value of the Indian River Lagoon is $3.7 billion, supporting 15,000 full and part-time jobs and providing recreational opportunities for 11 million people per year. The Proposed Project calls for building a new bridge over the St. Sebastian River. The St. Sebastian River is located in Indian River County. It is one of the Indian River Lagoon’s natural tributaries.
1508.27(b)(7). These principles have been applied by the courts in numerous cases to invalidate EISs for failure to assess indirect and cumulative project impacts.

Inexplicably, the DEIS makes no serious attempt to address the indirect or cumulative impacts that would result from the Proposed Project. For example, indirect or secondary impacts on land use are passed over with the statement that “[t]he project would not result in induced growth, no changes to land use due to induced growth would occur.” DEIS at 5-4. Although the DEIS mentions that the Phase 1 Environmental Assessment ("EA") addressed “development in the vicinity of” the proposed stations in West Palm Beach, Fort Lauderdale and Miami, id at 5-5, close examination of the information provided in that document, in light of other statements made by AAF, make clear that no meaningful attention has been paid to the secondary development associated with either phase of the Proposed Project.

Thus, according to the DEIS, the EA indicated that “at West Palm Beach and Fort Lauderdale, there will be 10,000 square feet of retail space within the station. At Miami, the Proposed Project would include 30,000 square feet of retail within the station, and additional 75,000 square feet of transit-oriented retail, 300,000 square feet of office space, 400 residential units, and a 200-room hotel.” Id at 5-5. Indeed, the Phase 1 EA does recite the same information, and includes a barebones (and inadequate) analysis of the environmental impacts that would result from this development. However, nowhere in either the DEIS or the EA is any meaningful information or analysis provided concerning the additional development that would be induced by the Proposed Project and this transit oriented development.

The obligation to address the potential effects of such induced development cannot be avoided on the basis that it is speculative. In a “Preliminary Offering Memorandum” dated June 4, 2014, AAF confirmed that there are current plans for construction going well beyond the ancillary development identified in the DEIS and EA, and that sufficient information with respect to such planned development is available for a thorough analysis of its impacts. In particular, that document disclosed that: (i) AAF owns 21 acres in the areas surrounding the proposed stations; (ii) that it anticipates demand for 3.5 million square feet of development on those parcels; and that it expects to build 2 million square feet of that new development contemporaneously with the Proposed Project. That initial development is to include 1.3 million square feet in Miami, and 345,000 square feet in both Palm Beach and Fort Lauderdale. AAF also believes there is demand for subsequent future development totaling 1.5 million square feet including a 1.1 million square foot “super tower” for the area adjacent to the Miami station, and an additional 345,000 square feet of residential space in Fort Lauderdale. Thus, the development disclosed in the EA is a fraction of the currently planned and future development resulting from the Proposed Project. Given the specificity of AAF’s articulated intentions, sufficient information is available for a detailed environmental review of the traffic, air pollution, construction, noise and neighborhood character impacts of this reasonably foreseeable future development. The DEIS is deficient in that it failed to include such a review.

The DEIS is also lacking in its analysis of cumulative impacts. For example, it fails to address the cumulative impacts of the Proposed Project together with those of the Tri-Rail Coastal Link Project,
another major initiative that is likely to have significant impacts along 85 miles of the FECR corridor. Under that project, 25 or more commuter round trips will be added to the very same tracks to be used for the Proposed Project. Those additional trains will serve 25,000 passengers each day, at 20-25 new stations. The DEIS specifically excludes this important project and its overlapping impacts from the environmental analysis, stating that it is in the “preliminary planning stage.” DEIS at 5-163. Attempting to justify this characterization, the document goes on to state that the “[t]he Tri-Rail Coastal Link Study is being undertaken by FDOT, and is evaluating the use of the FECR Corridor for the Tri-Rail service, which currently operates on the CSX-controlled railroad right-of-way west of the FECR Corridor.” Id. One would gather from these statements that the Tri-Rail project is in the very early stages of planning, and that the information required for a cumulative impacts analysis of such a speculative project is not available. But that characterization is wholly inaccurate. An example of the degree to which the Tri-Rail Coastal Link Project has advanced is the Letter Agreement dated April 25, 2014, between AAF and South Florida Regional Transportation Authority (“SFRTA”), the sponsor of Tri-Rail Coastal Link Project, which provides the details for the shared use of the rail corridor between the two entities for the provision of high speed and commuter rail. See www.rrc.gov/Public_Notices/Rail/Tri-Rail-Non-Compete.pdf.

In addition, substantial Federal and State resources have been expended in the planning and environmental review of the Tri-Rail Coastal Link project, and there is no informational impediment to a cumulative environmental review. In particular, many studies have already been completed for the Tri-Rail Coastal Link Project, including a Final Conceptual Alternatives Analysis and Environmental Screening Study running for 387 pages issued in 2009; a 189 page Detailed Environmental Screening Report issued in 2010; and a 168 page Final Alternatives Analysis Report issued in 2011. Thus, detailed information has been compiled with respect to that project, its alternatives and environmental impacts as a result of years of exacting analysis. Moreover, a final Preliminary Project Development Report for the Tri-Rail Coastal Link was submitted to FRA’s sister agency, the Federal Transit Administration (“FTA”), in April 2014. Clearly, a project to which such an intense, federally supported planning effort has been devoted is “reasonably foreseeable” within the meaning of NEPA. In fact, the website for the Tri-Rail Coastal Link project (http://trirailcoastallink.com/frequently_asked_questions.html) states that its sponsors have “closely collaborated” with the AAF team, and that the estimated timeframe for completion of the Tri-Rail Coastal Link Project within the same timeframe that would reasonably be expected for the Proposed Project, if it advances. It is also notable that AAF’s June 4, 2014 “Preliminary Offering Memorandum” indicates that use of the FECR corridor by Tri-Rail Coastal Link may cause delays to construction of the Proposed Project, and lead to operational and safety risks that require careful study in a cumulative environmental review.

It is well settled that when several proposals for related actions that will have cumulative or synergistic environmental impacts upon a region are pending concurrently before an agency, their environmental consequences must be considered together. The Tri-Rail Coastal Link project and the Proposed Project are both pending before USDOT agencies, and the Proposed Project has been specifically identified as being related to the Tri-Rail Coastal Link Project. See Tri-Rail Coastal Link's
Preliminary Project Development Report at 1-14. Moreover, this case is not a circumstance where the Tri-Rail Coastal Link project is so speculative as to preclude a meaningful cumulative impact analysis. On the contrary, a wealth of detailed planning and environmental information has been available for years, and that information should have been tapped in assessing the combined impacts of these related projects and whether the Proposed Project, if approved, would adversely affect the operation of the Tri-Rail Coastal Link. The DEIS is fundamentally flawed in that it failed to do so.

3. DEIS Assumptions: The DEIS is Based on an Unrealistic Build Year and Assesses Critical Impacts Only on Opening Day, Thereby Failing to Analyze Projected Full Operational Impacts

The analysis presented by the DEIS is founded upon fundamentally flawed assumptions that provide no basis for an accurate projection of long-term impacts.

First, 2016 is not a proper baseline year for the analysis since that date is a mere two years from today. Given that FRA will be reviewing comments on the DEIS in December 2014, it is wholly unrealistic to believe that all of the following items can be completed by 2016:

- concluding the NEPA review process;
- securing all permits and approvals, including those from the United States Army Corps of Engineers, Federal Aviation Administration, United State Coastal Guard ("USCG"), Federal Highway Administration ("FHWA"), United States Fish and Wildlife Service, National Marine Fishery Service, plus those from multiple state and local agencies;
- finalizing all design documents;
- letting all construction contracts;
- constructing:
  - a new station in Orlando;
  - a new vehicle maintenance facility;
  - dozens of new overpasses, bridges, tunnels, ramps, and related infrastructure and safety features;
  - upgrading/expanding 170 highway-rail grade crossings, including designing and installing safety infrastructure; and
  - hundreds of miles of rail bed and new track; and
- performing diagnostic and system testing of all individual elements and system wide operations for performance and safety.

Nothing in the DEIS gives any indication that extraordinary arrangements have been put into place to accomplish the tasks required for completion of the Proposed Project within such a compressed timetable. In fact, the document does not even call for, or analyze, after-hours work during the construction period. In light of the impossibility of meeting a 2016 opening date, prior to issuing the
DEIS, AAF publicly shifted the opening date to 2017 even though the DEIS was keyed to 2016. See Orlando Business Journal, "3 Reasons Why All Aboard Florida in Orlando Was Delayed" (7/9/2014). However, even 2017 seems like a pipedream, given the long list of items that must be satisfied and the sheer magnitude of the construction that must be completed before the system could become operational. See, e.g., id. (which notes that approval of new station at the Orlando Airport still has many hurdles to overcome and would take three years to construct from final approval).

Utilization of an unrealistically early baseline year would result in the underestimation of certain critical impacts, including and possibly most notably, noise. The reason for this is that the significance criteria set forth in the relevant guidance are based upon a sliding scale that is keyed to ambient noise levels as they are expected to exist in the baseline year. See FRA’s “High-Speed Ground Transportation Noise and Vibration Impact Assessment Guidance Manual” (the “FRA Noise Manual”) at Chapter 3 (12/2012); FTA’s “Transit Noise and Vibration Impact Assessment” at Chapter 3 (5/2006). Under those criteria, the higher the noise levels are during the baseline year, the lower the incremental increase need be to create a significant impact. Id. As the DEIS indicates, freight and vehicular traffic are expected to increase along the FCGR corridor in the coming years, and other projects (including but not limited to Tri-Rail Coastal Link) can be expected to come on-line in the near future. Accordingly, existing ambient noise levels will increase and the noise increment that would produce significant impacts will decrease as time goes on. Therefore, noise impacts may be understated if an unrealistically early baseline year is utilized in the analysis. For these reasons, FRA should require AAF to prepare and submit a well-grounded conceptual development schedule for the Proposed Project that either justifies utilization of the 2016 baseline year or provides for a more realistic timetable for completion. In the event a later baseline year is identified, the noise analysis must be revised to reflect background conditions in that year.

In addition, as a result of the illusory 2016 build year the DEIS omitted any real discussion of construction, including its duration, sequencing, staging, techniques and impacts, claiming that the activities and impacts associated with building the Proposed Project would all be extremely short term. As discussed in the comments below, the details regarding the construction of this massive $1.875 billion dollar project, as well as the impacts that would be experienced during the period of construction, need to be brought to light and analyzed under a realistic construction schedule.

There is a second fundamentally flawed assumption running through the DEIS analyses of noise, vibration and navigation, in that they focus on operations of the Proposed Project as of an opening day, rather than on operating conditions as they will be when the rail line is in full operation. Thus, the DEIS assesses the effects of 16 round trips per day, which reflects the number of trips needed to service passenger demand as of 2016. According to the All Aboard Florida Ridership Revenue Study Summary Report prepared by the Louis Berger Group in September 2013 (the “LBG Study”), which is attached as Appendix 3.3.F to the DEIS, approximately 1 million riders are expected as of that year. However, the DEIS itself reports that ridership is expected to grow sharply in the first few years of operation, and level off at 3.5 million passengers as of 2019.
Moreover, what the DEIS does not mention is that the LBG Study predicts ridership levels for 2019 to range from a low of 3.5 million (in what is characterized as the “base case” which ignores developments that are “subject to some uncertainty”), to 4 million (in the “business plan case,” which takes into account AAF’s plan to expand ridership), to a high of 5.1 million in the “management case” (which accounts for more aggressive marketing strategies by AAF). Moreover, even in the “business plan case” the study predicts ridership to rise to approximately 5.5 million by 2030. LBG Study at 4-4. Thus, based upon AAF’s own study, ridership is expected to be more than 5 times the ridership expected when service begins in 2016.

Most of the operational impacts of rail projects — including but not limited to noise, vibration and navigation delays at draw bridges — are caused by train pass-by incidents. Since the significance of the impacts depends, in important part, upon the number of passbys, the adequacy of the analysis in an EIS for a rail project depends upon the accuracy of the prediction of how many passbys will occur. Under NEPA, an EIS must examine both the short-term impacts of a project, and also the reasonably foreseeable effects of that project over the long-term. Accordingly, the DEIS should have examined the anticipated effects of the Proposed Project not only upon the commencement of service but also over the longer term horizon. There is nothing in the DEIS to indicate that 16 round trips per day would meet ridership demand over the long term, or was properly used as the touchstone for the impacts analysis in the document.

The Board does not dispute the appropriateness of including in the DEIS an analysis of short-term operational impacts of the Proposed Project, utilizing a realistic commencement date baseline year. However, it believes that a second baseline year of 2030 or later must also be assessed to capture the long-term impacts of the Proposed Project in combination with other projects expected to be on line as of that time. This is particularly important because it can reasonably be anticipated that the new two-track FCR corridor created by the Proposed Project will be much more heavily used at that time for both passenger and freight traffic. The DEIS itself indicates that freight traffic is expected to increase sharply upon completion of the Panama Canal improvements, DEIS at 5-17, and other projects such as Tri-Rail Coastal Link can be reasonably expected to be operational a few years after the Proposed Project comes on line. Since it fails to present such a “horizon year” analysis the DEIS is woefully deficient in its assessment of the long-term cumulative operational impacts of the Proposed Project on noise, vibration and other critical issues.

---

4 The DEIS itself makes no mention of traffic and transportation impacts in any years other than 2016 and 2019. However, buried in Appendix 3.3 C, entitled “Grade Crossing Details,” is a brief description of some limited analyses performed for both 2016 and 2036. As discussed below, that analysis was not only obscured by its placement in an appendix to the DEIS, it also revealed exceptionally significant impacts, the implications of which should have been disclosed and thoroughly examined in the DEIS. It should be noted that the discussion in that appendix indicates that there would be a range of 16-19 passbys per day. See, e.g., DEIS App. 3.3C at 4-1.
4. **Climate Change: The DEIS Fails to Satisfy FRA’s Legal Obligation to Adequately Analyze the Effects of Climate Change on the Proposed Project**

The Proposed Project sponsors are seeking $1.875 billion in low interest federal loan funds to facilitate construction of a high speed rail line in a corridor that lies completely within Florida’s coastal zone and skirts in and out of the existing flood plain along 128.5 miles of the Atlantic Coast of Florida. Although the DEIS makes passing reference to the sorts of risks posed by climate change in locating a major new transportation facility in that area, it provides no meaningful analysis of such risks or the alternatives or mitigating measures that might minimize or avoid them.

Thus, the DEIS notes that “[t]ransportation systems [such as the Proposed Project] are vulnerable to extreme weather and climate change effects such as ... sea level rise, and more intense storm events ...” DEIS at 5-71. More particularly, the document acknowledges that “[t]he N-S and WPB-M Corridors of the Project are vulnerable to climate change effects in the near future. Both of these corridors are along the Florida coast and cross several coastal water bodies. Bridge structures, particularly those with lower elevation, will have increased vulnerability over time, and potential infrastructure damage may result from flooding, tidal damage and/or storms.” Id at 5-73.

Nevertheless, the DEIS offers only the most cursory examination of the vulnerability of the Proposed Project to sea level rise or the more intense storm surges the document itself acknowledges will occur in the near future. The DEIS subjects only two of the 18 bridge crossings required for the N-S corridor to any sea level rise analysis at all, and with respect to those facilities it simply compares their elevations to expected sea levels in 2030 and 2060. From this comparison, the DEIS finds that the bottom chord of one of the bridges would be under water at high tide during a 100 year storm in 2030, with no mention at all of impacts in 2060. Id at 5-75. The vague conclusion drawn from this lackluster analysis is that the “vulnerability [of the Proposed Project bridges] will increase as sea level rises” and “there may be increasing periods of time where the train is out of service during storm events.” Id. Nothing is said regarding the nature and extent of the property damage that may be caused to the bridge structures, or whether other components of the Proposed Project located within the substantially expanded future floodplain would also be at risk. Moreover, not a word is mentioned as to whether and how public safety would be put at risk in operating a high speed rail service within the corridor under such conditions, or mitigation opportunities.

The truncated analysis presented in the DEIS with respect to this issue stands at odds with firmly established federal policy on how climate change is to be accounted for in agency planning. In President Obama’s 2009 Executive Order (“E.O.”) 13514 “Federal Leadership in Environmental, Energy, and Economic Performance,” all federal agencies, including USDOT and FRA, were directed to establish Climate Change Adaptation Plans. See 74 Fed. Reg. 52117, 52121, 52124 (10/8/2009). The President subsequently instructed federal agencies to “ensure that climate risk-management considerations are fully integrated into federal infrastructure ... planning” in his “Climate Action Plan” issued in June 2013. Shortly thereafter, the President issued E.O. 13653, “Preparing the United States for the Impacts of Climate Change,” which required all federal agencies to “reform policies and
Federal funding programs that may ... increase the vulnerability of natural or built systems, economic sectors, natural resources, or communities to climate change related risks” and to “integrate consideration of climate change into agency operations and overall mission objectives ...” 2013 Fed. Reg. 66819, 66821 (11/6/2013).

USDOT complied with these directives by first issuing a Policy Statement in 2011, requiring integration of climate change adaptation strategies “into [its] core policies, planning, practices and programs.” USDOT, “Policy Statement on Climate Change Adaptation” at 2 (6/2011). This policy also requires USDOT to use “best-available science” and apply “risk management methods and tools” in assessing and planning for climate change. Id. USDOT then issued a Climate Adaptation Plan which characterized the problem unique to transportation as follows:

Transportation infrastructure is inherently long-lived. Bridges, tunnels, ports and runways may remain in service for decades, while rights-of-way and specific facilities continue to be used for transportation purposes for much longer. In addition to normal deterioration, transportation infrastructure is subject to a range of environmental risks over long time spans, including wildfire, flood, landslide, geologic subsidence, rock falls, snow, ice, extreme temperatures, earthquakes, storms, hurricanes and tornadoes. Infrastructure designers and operators must decide the magnitude of environmental stress that any particular project will be able to withstand over its lifetime.

To deal with this problem, USDOT found that “newly constructed infrastructure should be designed and built in recognition of the best current understanding of future environmental risks. In order for this to happen, understanding of projected climate changes would need to be incorporated into infrastructure planning and design processes, across the many public and private builders and operators of transportation infrastructure.” Id. at 6. More particularly, the agency committed to “take actions to ensure that Federal transportation investment decisions address potential climate impacts in statewide and metropolitan transportation planning and project development processes as appropriate in order to protect federal investments,” id. at 5, and indicates that “FRA will consider potential climate impacts and adaptation during rail planning and corridor program development.” Id. at 15.

The short shrift paid by the DEIS to the climate change-related implications of siting a federally funded high speed rail corridor in the coastal zone and flood plains of Florida falls far short of the careful planning envisioned by the President, and the commitments made by USDOT. It also does not conform to the requirement under NEPA that agencies consider thoroughly the “reasonably foreseeable” short- and long-term environmental impacts of their actions. In the event these
deficiencies are not corrected, billions of dollars in federal resources could be poured into a project that would be under an ever-increasing threat from future sea level rise and storm surges, with no serious attention paid to the ensuing consequences to public safety or the investment itself, and with no consideration paid to the measures that could be taken to avoid them. Indeed, according to the DEIS no action would be taken at all to assure that the Proposed Project is designed to withstand the future risks of sea level rise. On the contrary, AAF has announced its intention to build according to a construction design that would "maintain existing elevations where feasible," DEIS at S-14; and has specifically rejected the USCG request that alternatives be considered to raise the clearance beneath certain low bridges. Additionally, according to the DEIS, FRA has concluded that it would not be feasible to raise the clearance beneath certain bridges due to the significant delay it would cause to the Proposed Project, the overall costs and the risk associated with elevating the structures. Id. at 5-27. One can only assume from this conclusion that the short-term success of the Proposed Project is being given greater weight than the overall safety of the public and of the federal investment. Moreover, since other viable high speed routes were screened out of the analysis, no consideration whatsoever has been given to alternatives, such as the utilization of the interior CSX corridor for high speed rail, that would avoid such risks altogether. The effects of future sea level rise and storm surges on the Proposed Project are "reasonably foreseeable" impacts, and the DEIS was materially deficient in failing to address them.

5. Floodplains: Locating the Proposed Project in Floodplains Is Not Demonstrated to be the Only Practicable Alternative.

The Proposed Project would result in the siting of long stretches of a multi-billion dollar high speed rail line in Florida's currently mapped floodplains, which can be expected to expand as a result of FEMA's ongoing "coastal flood risk study" for the East Coast of Central Florida. In addition, the Proposed Project's encroachment on floodplains would only increase with time as sea level continues to rise. FRA should not approve such a risky endeavor without first taking a hard look at other practicable alternatives, as required by the directives discussed below.

The very real risks of floodplain encroachment to humans and infrastructure were first recognized by President Carter in E.O. 11988, "Floodplain Management," which was intended to "avoid [the federal government's] direct or indirect support of floodplain development wherever there is a practicable alternative." 42 Fed. Reg. 26951 (5/24/1977). This order requires federal agencies that propose to support or allow floodplain development to first consider alternatives to such development. Id at 26952. As mandated by E.O. 11988, USDOT issued its own floodplain directive, which sets forth the department's policy with regard to floodplains. USDOT Order 5650.2 "Floodplain Management and Protection" (4/23/1979). Under that directive, all USDOT agencies, including FRA, must take certain steps before supporting a project that would result in a

---

5 This determination appears to the Board to be premature, since the NEPA process has not yet been completed. Moreover, there is no hard data presented in the DEIS to support the rationale for such a determination.

Page 13

November 14, 2014
"significant encroachment" — a term that includes likely future damage to transportation infrastructure in a floodplain that could be substantial in cost or extent. *Id* at 4, 8.

There can be no doubt that the Proposed Project would result in a "significant encroachment" on floodplains. According to the DEIS, more than three quarters of the Proposed E-W corridor and one third of the N-S corridor would traverse currently mapped floodplains.\(^6\) Thus, overall at least a third of the total project area (or more than a thousand acres) would be located in floodplains.

For FRA to provide RRIF funding for the Proposed Project it must satisfy certain requirements under USDOT Order 5650.2. First, it must ensure that the FIS "reflects consideration of alternatives to avoid [a significant] encroachment." *Id* at 8. Next, the responsible individual at FRA must make a written finding that the proposed significant encroachment is the only practicable alternative. *Id*. Such a finding "requires a careful balancing and application of individual judgment" which should "include the full range of environmental, social, economic, and engineering considerations" where "special weight should be given to floodplain management concerns." *Id*. In addition, the finding must include a description of why the Proposed Project *must* be located in the floodplain, including the alternatives considered and why they were not practicable. The finding must also include a statement that the action conforms to applicable state and/or local floodplain protection standards. *Id*.\(^7\)

The DEIS is entirely bereft of the information needed to satisfy FRA's obligations under E.O. 11988 or USDOT Order 5650.2. For example, due to the so-called "tiered" approach that AAF employed to screen out any meaningful alternatives analysis, neither in the few scant pages dedicated to floodplains nor anywhere else in the DEIS is there any detailed consideration of other possible routes.\(^8\) Moreover, the DEIS does not so much as identify, and certainly does not discuss, applicable state and/or local floodplain protection standards, so FRA would be wholly unable to find that the Proposed Project conforms to such standards. Accordingly, approval of the Proposed Project on the current record would run counter to the letter and spirit of a federal policy aimed at ensuring that federal dollars are not spent on infrastructure projects most vulnerable to the risk of flooding, unless there is no other practicable alternative.

---

\(^6\) These percentages are based on project area (corridor lengths and widths provided in DEIS Chapter 2) and the project study area within the 100-year flood plains identified in DEIS Table 4.3.4.1.

\(^7\) Similar requirements are reflected in FRA's own NEPA Procedures. *See* 64 Fed. Reg. 28555. Under those procedures, the agency may only facilitate floodplains development if: (i) the head of the agency finds that the only practicable alternative to the project is to site it in the floodplain; (ii) the agency designs or modifies the project to minimize potential harm to or within the floodplain consistent with E.O. 11988, and (iii) the agency prepares and circulates a notice containing an explanation of why the action is proposed to be located in the floodplain. *Id*.

\(^8\) *See* the Board's Comment 1, above.
6. **Construction Impacts: The Identification and Discussion of Construction Impacts is Virtually Absent from the DEIS.**

It is well established that a NEPA EIS must discuss and evaluate the construction impacts that would result from a proposed action. See, e.g., FRA NEPA Procedures, 64 Fed. Reg. 28556 (an FRA NEPA EIS “should identify and assess the impacts associated with the construction period of each alternative” (emphasis added)); USDOT NEPA Procedures, Attachment 2 at 13.

Proceeding from the unrealistic premise that the Proposed Project would be constructed by 2016, the DEIS provides only the most superficial description of the construction-related activities that are anticipated, and little substantive assessment of the “temporary” construction period impacts those activities would cause. Thus, no details whatsoever are provided concerning the schedule for the work, the sequence of activities, the nature of those activities, the number and types of equipment that would be used, the level of truck traffic that would be generated in delivering materials to and disposing of waste from the work sites, the routes such trucks would take, road closures, detours, staging and storage area locations, or other matters critical to a meaningful impacts analysis. As a result, nothing of substance is discussed with respect to the impacts of construction activities on surrounding land uses, traffic, emergency response, or other critical issues.

Thus, the DEIS brushes aside construction-related land use impacts with a few words about “short-term construction easements on privately owned properties,” and the assurance that “pre-construction land use patterns would return once the construction period concludes.” DEIS at 5-5. Not a word is mentioned about the nature and extent of the disruption that would be caused to adjacent homes and businesses during the period that a massive infrastructure project is being constructed through the heart of downtown and residential areas. Indeed, rather than addressing the socioeconomic impacts of Proposed Project construction at all, the DEIS merely comes up with a few numbers on the economic benefits and jobs that could be generated by the work. DEIS at 5-130.

Likewise, the DEIS dismisses out of hand the traffic-related impacts of construction activities, stating that “the Project would result in minor, short-term impacts to freight rail transportation, regional highways and local vehicular traffic during construction.” DEIS at 5-14. With respect to freight traffic, the document reaches that conclusion based upon the assurance that “[n]ew truck construction ... would be performed according to best management practices” without specifying what those BMPs might be or how they might avoid disruption to freight traffic. Id. With respect to vehicular traffic, the document mentions that there would be road closures, but states that “typically,” they would last no more than a week. No discussion appears at all as to whether there are certain roads that would be closed for a longer period; nor does the DEIS address whether police, fire or EMS emergency response would be delayed as a result of the road closures (and if so, what could be done to mitigate that impact). Moreover, no analysis is presented with respect to whether construction-related truck traffic would cause significant congestion on the roadways surrounding work sites and staging areas. Instead of disclosing construction period traffic impacts and identifying the mitigation measures to address them, the DEIS simply waves the issue away with
the assurance that "[p]roper planning and implementation and maintenance of mitigation measures (e.g., maintenance of traffic plans) will be specified and required for construction." DEIS at 5-15.

Given the magnitude of the effort required to build the Proposed Project, and the failure of the DEIS to include even a conceptual schedule backing up the contention that work would be completed by 2016, one can only assume that Proposed Project construction would extend over a period of many years. While the DEIS provides no information with respect to possible staging areas, it must also be assumed that such areas would be major facilities that are intensely busy over much if not all of that construction period. The potential environmental impacts associated with such activities and facilities should not have been dismissed with platitudes. Rather, they should have been carefully assessed, and specific mitigation measures should have been proposed to minimize them to the extent practicable.

Predictably, the half-hearted analysis included in the DEIS yields only the most amorphous mitigation measures. To provide a few examples, no mitigation at all is proposed to address the land use, socioeconomic and community character impacts of extended construction activities and prolonged conditions of disruption on affected commercial districts and residential areas; equally lacking are mitigation measures addressing vehicular traffic impacts during the construction period; transportation impacts on freight traffic are wished away with unspecified BMPs; and the only air emissions mitigation identified in the document relates to dust control, with no meaningful measures identified to address the effects of equipment and vehicular emissions of particulate matter of less than 2.5 microns ("PM_{2.5}\) or NO_{2}. Such issues are dismissed with the statement that "[p]otential emissions associated with construction equipment will be kept to a minimum as most equipment will be driven to and kept at affected sites for the duration of construction activities." DEIS at 7-4. While such a practice may help reduce emissions related to the transport of such equipment, left unaddressed is the considerably more important issue of emissions from such equipment while operating at the work site. That issue cannot be put to rest by describing construction-related air impacts as "temporary," because the health-related standards issued by the United States Environmental Protection Agency for the relevant pollutants are short term standards (i.e., 24 hours for PM_{2.5} and 1 hour for NO_{2}).\footnote{Although some analysis is presented in the DEIS with respect to Noise and Vibration impacts during construction, that analysis is deficient for the reasons discussed in the Board's Comment 7.B below, and in the attached comments prepared by CDM Smith.} It is well established that diesel construction equipment emits PM_{2.5} and NO_{2} in quantities that may result in serious air quality and public health impacts.

For these reasons, the DEIS does not take the "hard look" at construction period impacts that NEPA demands.
7. **DEIS Impact Analyses:** The DEIS Fails to Properly Evaluate Two of the Most Potentially Significant Impact Areas to Local Communities: Transportation and Noise and Vibration

A. **Traffic:** The DEIS Omits Mention of the Results of its Own Transportation Appendix, Which Predicts Significant Impacts to Local Traffic Conditions Even Though It Is Based on an Inadequate Analysis.

The N-S Corridor of the Proposed Project would cross 159 roadways at-grade through five counties between Cocoa and West Palm Beach. DEIS at 4-15. The DEIS concludes – after only the briefest discussion of localized traffic impacts – that increased train traffic will "result in minor increased traffic delays at existing roadway crossings." *Id* at 5-11. But that conclusion is belied by the information tucked away in an appendix to the DEIS entitled "Grade Crossing Details," which consists of a report prepared by Amec Environmental & Infrastructure, Inc., in September 2013 entitled "Transportation and Railroad Crossing Analysis for the All Aboard Florida Passenger Rail Project from Cocoa to West Palm Beach, Florida" (the "Amec Report"). DEIS App. 3.3C. Even though the Amec Report is rife with methodological errors and shortcomings, it presents a bleak picture for local traffic conditions if the Proposed Project were to advance. For example, some intersection approaches would experience delays of up to 45 minutes per hour, snarling local traffic, impeding emergency vehicular movement and potentially causing other significant impacts to air quality and the socioeconomic well-being of the affected communities.\(^\text{10}\) *See* DEIS App. 3.3C at 3-22. One can only imagine how dark the picture really would be if the analyses were conducted properly and reported accurately in the DEIS.

Close examination of the information presented in the Amec Report reveals that even based on a skewed and incomplete evaluation, there would be very significant impacts to local traffic conditions at the at-grade crossings along the N-S Corridor. For example, at the FECR grade crossing at Oslo Road in Indian River County, the Amec Report estimates that in 2016 there would be a westbound queue of 1299 feet every time a passenger or freight train passes by. *Id* Notably, there is only 350 feet on Oslo Road between the FECR crossing and US 1. *See id* at 3-8. Thus, the vast majority of vehicles would be backed up onto or beyond US 1, in queues that would extend hundreds of feet in both the southbound and northbound directions. Moreover, US 1 southbound at Oslo Road has a limited 150 foot right-hand turning lane and northbound US 1 at Oslo Road has two dedicated left-turn lanes each measuring 325 feet, for a total length of 650 feet. Accordingly, a 1299 foot queue is likely to consume the 350 feet on Oslo Road between the FECR crossing and US 1, the 150 foot south bound dedicated US 1 right turn lane, and the north-bound left turn capacity on US 1. There is no discussion about how this queue would function, and the Amec Report is devoid of any discussion of impacts on the north and southbound US 1 lanes. In addition, the Amec Report predicts that an *additional* year 2016 westbound queue of 3066 feet (for a passenger train passby, 3072 feet for a freight train passby) would form at the intersection of Oslo Road and US 1. As

\(^{10}\) For example, eastbound delays at the Oslo Road and US 1 intersection in Indian River County would be 700 second at least three or four times per hour in 2036. DEIS App. 3.3C at 3-22.
noted above, this intersection is 350 feet away from the Oslo Road and FEGCR crossing, but neither the DEIS nor the Amec Report make any attempt to discuss how this intersection could operate with a combined queue for both intersections that would extend almost 4400 feet.

These impacts are predicted to significantly worsen in 2036. For example, in that year the eastbound queues that are predicted to form at the intersection of Oslo Road and US 1 each time either a passenger or freight train passes by would extend more than 7000 feet -- well over a mile. Id. at 3-22. Moreover, impacts of this magnitude would not be confined to Oslo Road, or the handful of other intersections considered in the Amec Report. Rather, they can be expected up and down the entire corridor, as trains come and go more than 50 times a day.

No hint of these significant traffic impacts appears in the body of the DEIS. In fact, the document as written reports information for 2016 and 2019, and does not address potential traffic impacts in 2036 at all. See DEIS at 5-6 to 5-14. Likewise, the ripple effect of the long queues predicted on local intersections -- on the ability of police, fire and EMS vehicles to respond to emergencies; on traffic safety; or on economic conditions in affected business districts -- is not addressed in the DEIS. And nothing is said in the DEIS or its appendices about how such impacts could be mitigated or avoided.

Moreover, the analysis presented in the Amec Report is unsupported by technical data or modeling results, and is deficient in several respects. Set forth below are a few examples of the deficiencies that riddle the Amec Report.

- **The number of intersections evaluated was an inadequate sample population.** The Amec Report examined just 6% of the at-grade intersections along the N-S Corridor (10 out of 159 at grade crossings, or 2 intersections for each of the five counties that would be bisected by the N-S Corridor). DEIS App. 3.3C at 3-1. No justification was given for why so few intersections were considered. Since every intersection is unique, a more reasonable sample size should have been selected.

- **Only half of each intersection was evaluated.** The Amec Report only examined eastbound and westbound movements through intersections, and failed to consider the impacts to the north-south movements in the four-way intersections evaluated. This is an egregious omission given that many of the intersections that would be affected by the Proposed Project involve significant regional north/south arterial roadways and there is little doubt that the predicted eastbound and westbound delays and queues would impact the north/south intersection movements, and perhaps regional mobility in general. It is standard protocol for a traffic impacts analysis to consider all movements in an intersection. Without such a full intersection analysis, it is impossible to understand the true impacts of the Proposed Project on local traffic.

- **Wrong baseline used for impacts evaluation.** The Amec Report failed to generate “no action” traffic operations for 2016 or 2036. The impacts of the Proposed Project should be assessed as compared to a no action condition. An appropriate no action
condition would be normal traffic operations plus freight movements as compared to normal traffic operations, plus freight and passenger train operations. The increment that would be derived by comparing such scenarios should have been generated for both 2016 and 2036. However, the Amec Report presents no comparison to a typical no action condition. Instead, it used a “weighted average” approach, that discounted the impacts of the Proposed Project by averaging the delay and queue lengths that would be created by the Proposed Project with those from typical traffic operations and freight movements.

- **No impacts discussion provided.** The Amec Report contains no discussion of the tables appearing at pages 3-1 to 3-26 within the report. Instead, it discusses the maximum crossing closure time, choosing to ignore the predicted queues and delays that would result from the closures.

- **Only the PM Peak Hour Was Modeled.** The Amec Report confined its analysis to the PM peak hour. However, the AM peak hour (which would include school and commuter traffic) or weekend midday peak hour could well represent a worst case scenario for many intersections. All three peak hours should have been examined.

- **Downtimes based on maximum speeds may be underestimated.** The downtime for each crossing was estimated based on passenger trains from the Proposed Project traveling at maximum predicted speeds. It is unknown if the maximum predicted speeds could be safely achieved and maintained along the entire length of the proposed N-S Corridor, therefore a more realistic speed should have been used that would have resulted in longer down times and a more conservative analysis.

- **Impacts for freight and passenger trains similar.** Even though the Amec Report goes to great lengths to highlight that the proposed passenger trains will be shorter and faster than freight trains, the delay and queue impacts are very similar for a passenger train and a freight train crossing. This is not explained in the Amec Report.

The Proposed Project has the potential to disrupt traffic at intersections along the entire length of the N-S Corridor between Cocoa and Miami. Notwithstanding the flaws in the Amec Report, that study provides some sense of the magnitude of the traffic impacts that can be expected. The Board urges FRA to undertake a careful study of those potential impacts, following standard analytical methodologies, and the socioeconomic, public safety, and other impacts that could also be expected to result. Those analyses should be presented in a supplemental draft environmental impact statement.
B. Noise and Vibration: The DEIS Failed to Follow FRA’s Own Guidance in Performing Noise and Vibration Impacts Analyses, And as a Result Underestimates Potential Impacts.

The noise analysis appearing in the DEIS does not take the “hard look” that NEPA requires for a major high speed rail project in the final stages of project planning. As noted above, the analysis focuses solely on noise conditions in 2016, the year assumed for the commencement of operations, and gives no consideration to conditions in later years. Moreover, even the 2016 analysis was wholly inadequate. For example, no monitoring was performed of existing noise levels at sensitive receptors affected by the Proposed Project, and no detailed assessment was provided as to how noise levels in the vicinity of such sensitive receptors might change once high speed rail operations begin. The general calculations presented in the document provide no specific indication of whether and where significant noise impacts might occur, or what reasonably might be done to mitigate them.

As noted in the Board’s Comment 3 above, the FRA Noise Manual sets forth the ground rules for the assessment of noise impacts from FRA projects under NEPA. According to that document, a “General Noise Assessment” of the sort appearing in the DEIS is to be performed “commensurate with the level of detail of available data in the early stages of major investment planning and environmental clearance.” FRA Noise Manual at 4-4. In contrast, according to the FRA Noise Manual:

[a] Detailed Noise Analysis is appropriate for assessing noise impacts for high-speed train projects after the preferred alignment and candidate high-speed train technologies have been selected. At this point, the preliminary engineering has been initiated, and the preparation of an environmental document (usually an Environmental Impact Statement) has begun. Information required to perform a Detailed Noise Analysis includes type of vehicle equipment to be used, train schedules, speed profiles, plan and profiles of guideways, locations of access roads, and landform topography, including adjacent terrain and building features.

FRA Noise Manual at 5-1.

All such information should have been readily available at this point in the planning process for Proposed Project, given the fact that AAF is planning to begin construction next year. Thus, instead of the generalized calculations presented in the DEIS, under FRA’s own manual the analysis should have included:

- Identification of noise-sensitive receivers, which depend on the land use in the vicinity of the proposed project.
• Estimation (based upon measurements taken at representative locations) of the existing noise exposure at each noise sensitive receiver or cluster of receivers using the methods presented set forth in the manual.

• Determination of the technology applicable to the project: steel-wheeled high-speed or very high speed electric (locomotive hauled or EMU), steel-wheeled fossil fuel, or maglev.

• Determination of noise exposure in terms of “sound exposure level” (“SEL”) under reference operating conditions.

• Adjustment of the subsource reference SELs to the anticipated operating conditions of the project (i.e., train consist and speed).

• Development of an SEL-versus-distance relationship for each subsource that includes the effects of shielding along the path.

• Determination of total SEL at each receiver by combining the levels from all subsources.

• Assessment of noise impact at each receiver or cluster of receivers.

The DEIS compounds the deficiencies resulting from use of the wrong methodology by departing from the approach one would expect to see in a DEIS, where project impacts are first identified and all practicable mitigation is then identified to address them. See FRA Noise Manual at 6-36 ("In general, mitigation options are chosen from those below, and then portions of the project noise are recomputed and reassessed to account for this mitigation."). Instead of following this straightforward protocol, the DEIS builds mitigation into its impact analysis and notes that “159 grade crossings where severe, unmitigated impacts would occur” would be “eliminated” by a commitment to install wayside horns, hereby concluding that “the Project would have no permanent noise impacts” as a result of that commitment. DEIS at 5-46, 5-49. That conclusion is not only based upon the use of faulty methodology. It also short-circuits FRA’s obligation to consider mitigation measures other than wayside horns to mitigate the severe impacts that were mentioned in passing. According to the FRA Noise Manual, among the measures that should have been considered are vehicle noise specifications, wheel treatments, vehicle treatments, vehicle body design, guideway support, operational restrictions, path treatments, noise buffers and ground absorption. These alternative and/or additional measures should have been considered by FRA.

8. **Section 106 and Historic Resources: Localities were Excluded from the Section 106 Consultation and Significant Historic and Archeological Resources were Ignored by the DEIS.**

Under Section 106 of the National Historic Preservation Act, P.L. 89-605, codified at 16 U.S.C. § 470 et seq. ("NHPA"), federal agencies must take into account the effect of their undertakings on historic resources that are either listed or eligible for listing on the National Register of Historic Places (the “National Register”). The federal agency must do so in accordance with procedures adopted by the Advisory Council on Historic Preservation (the “Advisory Council”) appearing at 36 C.F.R. Part 800 (the “NHPA Regulations”), unless the agency substitutes the NEPA procedures for those required under the NHPA. See 36 C.F.R. § 800.8(c). Here, FRA elected not to substitute
NEPA procedures for those of the Advisory Council. See DEIS, App. 4.4.5.A.2, ("M. Hassell stated that FRA has decided not to use the substitution approach for streamlining the NEPA and NHPA Section 106 consultation process.").\footnote{11}

The NHPA Regulations require a federal agency to engage in a consultation process to identify historic properties potentially affected by the undertaking, assess its effects on those resources, and seek ways to avoid or minimize any adverse effects that are identified. The NHPA Regulations state clearly that "[a] representative of a local government with jurisdiction over an area in which the effects of an undertaking may occur is entitled to participate as a consulting party." 36 C.F.R. § 800.2(b) (emphasis added). Accordingly, the regulations provide that the "[t]he [federal] agency shall invite any local governments . . ." to join in the consultation. Id. § 800.3(f)(1) (emphasis added). Notwithstanding such clear and explicit mandates, FRA did not invite the County to participate in the Section 106 consultation for the Proposed Project. On the contrary, it appears that a conscious decision was made to not invite the participation of the County and scores of other affected local governments. Thus, the DEIS states that only "four Certified Local Governments (CLG) and two local informants were . . . contacted regarding information on locally designated historic resources." DEIS at 4-125. The reason for this, according to the minutes of the March 28, 2013 meeting between the State Historic Preservation Office ("SHPO") and AAF, is that SHPO "felt that . . . due to past consultations with affected communities (i.e., West Palm Beach, Fort Lauderdale, Miami) additional separate meetings are unnecessary."\footnote{12} DEIS, App. 4.4.5.A.1 at 2.

Thus, only a handful of "certified" local governments were invited to participate in the consultation, leaving numerous other local jurisdictions (which—like Indian River County—are not certified) out of the discussions. As noted in minutes for a July 8, 2013 SHPO-AAF meeting that included the few consulting parties, including FRA, "[for the prior EA, county and local historic preservation staff] were invited" to participate in the consultation, but for this phase no such invitation would be extended because the "project will not involve new station locations that would extend into historic districts." DEIS, App. 4.4.5.A.2 at 1.

The exclusion of virtually all local authorities from the Section 106 consultation was wholly improper. There is no basis in the NHPA regulations to limit participating local governments to those that are "certified."\footnote{13} Moreover, it cannot be argued that the NEPA scoping process

\footnote{11}{The DEIS states on page 4-124 that "FRA is continuing compliance with Section 106 with preparations of the DEIS" (emphasis added). Under the NHPA Regulations, "coordination" is distinct from "substitution." When the historic review is coordinated with the NEPA review, the Part 800 NHPA procedural requirements must be satisfied, along with those under NEPA. When the federal agency seeks to streamline its review by substituting NEPA procedures, those procedures are followed "in lieu" of those required under the NHPA Regulations.}

\footnote{12}{The NHPA Regulations require FRA to consult with SHPO and representatives of local government with jurisdiction over an area in which the effects of the Proposed Project may occur. 36 C.F.R. § 800.2(c)(1), (3). They do not contemplate cutting localities out of the process because SHPO advises that local consultation is "unnecessary".}

\footnote{13}{It should be noted that the NHPA regulations governing consultation do not even mention certified local governments. 36 C.F.R. Part 800. By being "certified" a local government can play a more direct role in nominating resources to the National Register and may be eligible to receive certain historic preservation funds,}
provided a hypothetical opportunity for local governments to provide input regarding the effects of the Proposed Project on cultural resources, as scoping is no substitute for active participation in a Section 106 consultation. It should be noted that Indian River County, like most localities without a proposed station, were not directly notified about, or invited to participate in, the scoping process. See DEIS, App. B.1.B at App. B. FRA could not have expected localities to infer from the generic scoping notice that their only opportunity to provide the information on potentially affected resources, adverse effects and mitigation measures would be to attend and testify at the scoping sessions. This is especially so because in Indian River County’s case, such sessions were not even convened in the county. The publication of a scoping notice does not satisfy FRA’s regulatory obligation to invite local authorities to join in a Section 106 consultation.

Moreover, FRA was not justified in excluding multiple local authorities from the consultation on the basis that the Proposed Project will not affect cultural resources. On the contrary, one of the primary reasons for including local authorities in the process is to assist in the identification of resources that might otherwise be overlooked. That is exactly what happened here: in the absence of input from informed local authorities, the parties failed to identify a number of significant cultural resources or the effects that the Proposed Project would have on those resources. For example, no mention is made in the DEIS of two significant archaeological sites in Indian River County:

The Vero Man site. This site is located along the Main Relief Canal (Van Valkenburg Creek), where project work would be performed to upgrade an existing railroad bridge, and to construct a second track. Archaeologists from Mercyhurst University, the local Old Vero Ice Age Committee, and scientists from the University of Florida have been working at this site over the past few years. Significant artifacts have been uncovered during recent excavations that support the theory that this area was important to a large number of extinct species and the Paleo-Indians that hunted them. The timeline has been established at 12,000 to 14,000 years ago and may be even older. The archaeological activities, research, and continued excavations are providing valuable information about the earliest people to inhabit Florida. The Vero Man site – Florida Master Site File (“FMSF”) #81R09 - has been determined to be eligible for the National Register by the Florida SHPO. Evidence of the presence of Paleo-Indians, extinct species, possibly hunting weapons, and an authenticated prehistoric art etching may make this site a potential “World Site.”

The Gifford Bones Site. This site is located at the North Relief Canal/Houston Creek, and is recorded as FMSF #81R07 and #81R08. FMSF #81R07 is noted as “inside of drainage ditch” where bones of ground sloth, camel, mastodon and other animals were found. At FMSF #81R08 a stemmed flint projectile point was ‘[d]ug out of [the] top of … brown sand in [the] new canal north of Gifford …’." Rouse
(1951) at 171. This narrow canal on both the west and east sides of the railroad bridge and Old Dixie Highway Bridge has yielded fossilized bones for decades.

Since it did not identify these significant historical resources in the course of the Section 106 process, FRA failed to assess whether project construction would affect these resources by disturbing paleo artifacts lying beneath the surface; whether vibration from increased freight and new passenger operations could damage those artifacts; and whether the lateral expansion of active rail operations would foreclose or hinder future artifact recovery efforts. Likewise, the DEIS failed to address ways to avoid, minimize or mitigate any adverse effects on these resources.

In addition, the DEIS fails to identify two affected architectural resources within Indian River County. Thus, nothing is said in the document about the Old Town Sebastian Historic District East or Old Town Sebastian Historic District West. There are over 40 contributing sites or buildings in these two districts, both of which are listed on the National Register. By failing to identify these districts, the DEIS neglected to mention that the FECR corridor bisects them, or to account for the contextual effects (such as noise, vibration, safety and visual impacts) that increased rail traffic associated with the Proposed Project would have on them. Nor did it address the measures that could be implemented to address those effects.

The omissions from the Section 106 Historic Resources analysis noted in these comments provide a few examples of the deficiencies resulting from the exclusion of local authorities from the Section 106 consultation. It is highly likely that additional resources located within other jurisdictions along the corridor were also overlooked as a result of the exclusionary consultation process that was employed. For that reason, FRA should reinitiate the Section 106 consultation by extending invitations to all affected local authorities and other parties entitled to participate under the NHPA Regulations.

9. **Section 4(f): The Section 4(f) Evaluation Failed to: Identify Significant Resources; Evaluate How the Proposed Project Would Use Those Resources; Whether There are Any Feasible and Prudent Alternatives To Those Uses; and Whether All Possible Planning Has Been Taken to Minimize Harm.**

Section 4(f) of the Department of Transportation Act of 1966, prohibits USDOT agencies, including FRA, from approving a project if it “uses” a Section 4(f) Resource unless (i) there is no prudent and feasible alternative to that use, and (ii) the project includes all possible planning to minimize harm to the Section 4(f) Resource. Pub. L. 89-670 (1966) (now codified at 49 U.S.C. § 303(c)). A project’s “use” of a Section 4(f) Resource can either be direct, by physically impacting a resource, or “constructive”, when a project’s proximity impacts are severe enough to impair a

---

14 Section 4(f) protects the following resources: publicly owned land of a public park, recreation area, or wildlife and waterfowl refuge of national, State, or local significance, or land of an historic site of national, State, or local significance (as determined by the Federal, State, or local officials having jurisdiction over the park, area, refuge or site). 49 U.S.C. § 303(c).
Section 4(f) Resource. Regulations codified at 23 C.F.R. Part 774\textsuperscript{15} and the FRA NEPA Guidance establish the process for FRA's compliance with Section 4(f).

As discussed in the Board's Section 106/Historic Resources Comment above, FRA failed to consult with local governments in the Section 106 process, and as a result, failed to identify in the DEIS significant historic resources listed on the National Register. These historic resources are protected Section 4(f) Resources, and the potential for the Proposed Project to "use" them must be assessed in the Section 4(f) Evaluation. See 23 C.F.R. § 774.11((e), (f). In particular, the Section 4(f) Evaluation must assess whether there are prudent and feasible alternatives to any use of these resources, and ensure that the Proposed Project includes all possible planning to minimize harm to them. Without correcting these substantial omissions — and addressing any and all other Section 4(f) Resources that were overlooked in the analyses performed thus far — FRA may not approve the Section 4(f) Evaluation.

10. Coastal Zone Management Act Consistency: The DEIS does not Provide a Basis for Determining Consistency with the Florida Coastal Zone Management Program.

The Florida Coastal Management Program ("FCMP"), codified in Chapter 380, Part II of the Florida Statutes, has been approved by the U.S. Department of Commerce pursuant to the Federal Coastal Zone Management Act ("CZMA"), 16 U.S.C. § 1451 et seq., in 1982. 7 Fed. Reg. 47056 (Oct. 22, 1982). As a result, under the CZMA all federal activities affecting a coastal use or resource in Florida, including the provision of RRIF funding, must be consistent with the FCMP "to the maximum extent practicable." Id.; 16 U.S.C. §§ 1456(c)(1)(A), (c)(2); 15 C.F.R. § 930.50. The Florida Department of Environmental Protection ("FDEP") is responsible for evaluating whether federal activities are consistent with the FCMP, and must either concur or object to a consistency certification submitted for the Proposed Project. 15 C.F.R. §§ 930.62, 930.63. While FRA may intend for FDEP to rely on the information provided in the DEIS in making this determination, it is so lacking in substance as to preclude FDEP from relying upon it.

There is no meaningful discussion in the DEIS of whether and how the Proposed Project is consistent with the 24 statutory programs that comprise the FCMP. Instead, the document presents a "Draft Consistency Determination" consisting of Table 5.2.5-1, DEIS at 5-65, that includes a column with only the most cursory discussion of consistency. One example well illustrates this point. The FCMP identifies Chapter 267, Historical Resources as an "enforceable policy" for purposes of federal consistency. That statute declares that "[t]he rich and unique heritage of historic properties in this state, representing more than 10,000 years of human presence, is an important legacy to be valued and preserved for present and future generations." Accordingly, state agencies are directed to avoid taking or assisting in any action that would substantially alter in a way that

\textsuperscript{15} While the Section 4(f) Regulations are promulgated by FHWA and FTA, FRA has recognized them in the DEIS as being applicable to the Proposed Project. See, e.g., DEIS at 6-3.
would adversely affect the character, form, integrity, or other qualities which contribute to [the historical, architectural, or archaeological value of [a historic property] unless there is "no feasible and prudent alternative" and timely steps are taken either to avoid or mitigate the adverse effects, or to undertake an appropriate archaeological salvage excavation ...." F.S. Sec. 267.061. Table 5.2.5-1 dismisses any concerns with respect to this policy with the statement that "[b]ased on the information available, the Project would have no adverse effect on archaeological sites along the N-S corridor." DEIS at 5-68. However, as discussed in the Board's Section 106/Historic Resources Comment above, the cultural resources analysis presented in the DEIS was prepared without any meaningful consultation with local authorities, and entirely missed several significant historic resources in Indian River County alone. Since the conclusion set forth in Table 5.2.5-1 is not backed up by the facts, it provides no basis for a determination that the Proposed Project is consistent with this enforceable policy. The treatment of other enforceable policies in Table 5.2.5-1 is equally conclusory and unsubstantiated. As a result, the consistency analysis presented in the DEIS cannot serve as a basis for a determination of consistency with the FCMP.

11. **Consistency with Scoping:** The Analyses Committed to in the Scoping Report are Absent from the DEIS

In order to assure that the scope of a DEIS covers all matters of environmental concern identified by an agency in light of comments made by the public, the CEQ regulations clearly require that "[d]raft environmental impact statements ... be prepared in accordance with the scope decided upon in the scoping process." 40 C.F.R. § 1502.9(a). Contrary to this mandate, the DEIS deviates in critical respects from commitments made by FRA in the scoping report issued on June 28, 2013, (Attachment 8.1.B to the DEIS, the "Scoping Report").

For example, with respect to alternatives the Scoping Report indicates that "[t]he EIS will consider additional/alternative stations, including locating stations closer to city/government center[s]. This may include stations in Cocoa/Port Canaveral, Fort Pierce, Melbourne, Port Canaveral, Stuart, St. Lucie, and other cities along the Proposed Project corridor. The EIS will also consider alternative rail alignment locations west of the current corridor, including parallel to the Florida Turnpike." Scoping Report at 18 (emphasis added). Notwithstanding these commitments, the DEIS offers no substantive analysis of either topic. The Board assumes that by promising consideration of alternative routes FRA intended to include in the DEIS something more than the application of AAF's profit-based criteria to screen all alternative routes out of substantive environmental review. Yet as discussed above, such a substantive analysis was omitted from the DEIS. Moreover, no real consideration at all was paid to additional stations along the N-S corridor.

In addition, the Scoping Report commits that "[t]he EIS will assess the primary and secondary (or induced) social and economic impacts of the Proposed Project, which may include relocating residences and businesses, changes in business patterns, employment, local school enrollment, community infrastructure, property values, and tax valuation/revenues. Both local and regional social
and economic impacts will be analyzed.” Scoping Report at 20 (emphasis added). Nevertheless, as discussed in the Board’s Comment 6, above, the DEIS failed to include any analysis whatsoever of the localized impacts that construction and operation of the Proposed Project would have on the socioeconomic conditions in affected commercial and residential areas. This is a glaring omission in light of: (i) the disruption that will be caused by construction activities associated with a major infrastructure project cutting through vibrant downtown areas and residential neighborhoods; (ii) the permanent barrier that would be created by operation of a highly active rail line separating commercial and residential neighborhoods; and (iii) the potential socioeconomic impacts of traffic congestion on the roadways proximate to the grade crossings.

Another commitment in the Scoping Report is that “[t]he EIS will consider cumulative impacts of all resources, to assess the impacts of the Project in conjunction with other rail projects.” Scoping Report at 21. Yet as discussed in the Board’s Comment 2, above, contrary to that commitment the DEIS explicitly rejects consideration of the cumulative impacts of the Tri-Rail Coastal Link project, notwithstanding the availability of the information needed to do so.

The above examples illustrate how far the DEIS strayed from the scope FRA promised to prepare at the conclusion of the scoping process. The Board urges the agency to now keep those commitments in a supplemental DEIS.
Memorandum

To: Mr. Chris Mora

From: Ms. Jill Grimoldi, BCES

Date: November 14, 2014

Subject: All Aboard Florida

On September 19, 2014, the Federal Railroad Administration (FRA) released the Draft Environmental Impact Statement (DEIS) for the All Aboard Florida (AAF) high-speed rail project's Phase 2 (West Palm Beach to Orlando segment). FRA is serving as the lead Federal Agency for the review of the project. An Environmental Assessment (EA), presumably using similar methodology, was completed for the Miami to West Palm Beach segment (Phase 1) of the project in 2012. The FRA issued a Finding of No Significant Impact (FONSI) for Phase 1. A supplemental EA is under review (concurrently with the DEIS) for the revised location of a maintenance facility. The supplemental EA has no bearing on the DEIS review.

CDM Smith has conducted a thorough review of the DEIS. It should be noted that CDM Smith's review comments focus solely on the information presented in the DEIS that pertains to the portion of the Proposed Project within Indian River County’s boundaries (including impacts on municipalities). The detailed summary is provided as Attachment 1 to this memorandum.

After completing the review of the DEIS, CDM Smith has concluded that the evaluation has significant deficiencies when compared to the requirements of the National Environmental Policy Act, which outlines the requirements for an Environmental Impact Statement. The following presents a summary of the deficiencies. Additional discussion on each item is presented in Attachment 1.

Conclusions

Upon review of the DEIS, CDM Smith concludes that the document is incomplete and lacking in the following primary areas:

1. No impacts outside the FECR ROW were included.

2. As presented, the alternatives analysis appears to be insufficient.

3. Noise and vibration impacts assessment is not complete.
   
   a. Vibration data is lacking.
   
   b. General methodologies were used instead of the detailed assessment called for under the FRA manual.
c. Noise levels are underestimated when compared to the existing conditions data collected by CDM Smith.
d. Future condition predicts a near doubling of noise levels.

4. Construction/temporary impacts are not addressed (other than minimal construction noise data).

5. Traffic evaluation is insufficient.
   a. Number of crossings evaluated is not adequate.
   b. Very significant queuing impacts will result from the Project that were not properly disclosed.
   c. Traffic projections not based on actual traffic counts kept by Indian River County (updated annually).
   d. AM peak not included.
   e. Delay and queuing calculations are unclear.
   f. RTC model results do not include impacts to at-grade crossings or the results of multiple trains at rail crossings.
   g. No mention of future greenway plans (for bicycle and pedestrian use).
   h. No data given on the projected emergency vehicle impacts for at-grade crossings; no indication of the local emergency routes that were input into the RTC model to render a solution on possible delay impacts.

6. Wetlands analysis is incomplete. Evaluation must include potential impacts resulting from improvements made at crossings outside of the existing ROW.

7. Threatened and Endangered Species analysis is incomplete. Evaluation must include potential impacts resulting from improvements made at crossings outside of the existing ROW.

8. EJ requirement for community outreach is insufficient; specifically, outreach to disadvantaged communities was not adequate.

9. Regarding Coastal Zone Management, enforceable policies 553 and 597 were not addressed.

10. Cultural Resource evaluation is grossly lacking.
   a. No mention was made of the historic districts or dozens of historic sites.
   b. Local governments/groups/individuals as Section 106 Consulting Parties.
   c. No archaeological survey appears to have been conducted for portions of the project APE.
   d. No vibration analysis information provided as it pertains to cultural or archaeological sites.

In conclusion, CDM Smith believes that the evaluation included in the DEIS is incomplete and recommends that a supplemental DEIS be required prior to issuance of a Record of Decision by the FRA.
cc: Dylan Reingold
    Kate Cotner
    Jane Wheeler
Executive Summary

Upon review of the DEIS, CDM Smith concludes that the document is incomplete and lacking in the following primary areas:

1. No impacts outside the FOCR ROW were included.
2. As presented, the alternatives analysis appears to be insufficient.
3. Noise and vibration impacts assessment is not complete.
   a. Vibration data is lacking.
   b. General methodologies were used instead of the detailed assessment called for under the FRA manual.
   c. Noise levels are underestimated when compared to the existing conditions data collected by CDM Smith.
   d. Future condition predicts a near doubling of noise levels.
4. Construction/temporary impacts are not addressed (other than minimal construction noise data).
5. Traffic evaluation is insufficient.
   a. Number of crossings evaluated is not adequate.
   b. Very significant queuing impacts will result from the Proposed Project that were not properly disclosed.
   c. Traffic projections are based on actual traffic counts kept by Indian River County (updated annually).
   d. AM peak hour included.
   e. Delay and queuing calculations are unclear.
   f. RTC model results do not include impacts to at-grade crossings or the results of multiple trains at actual crossings.
   g. No mention of future greenway plans (for bicycle and pedestrian use).
6. Wetlands analysis is incomplete. Evaluation must include potential impacts resulting from improvements made at crossings outside of the existing ROW.
7. Threatened and Endangered Species analysis is incomplete. Evaluation must include potential impacts resulting from improvements made at crossings outside of the existing ROW.
8. EJ requirement for community outreach is insufficient; specifically, outreach to disadvantaged communities was not adequate.
9. Regarding Coastal Zone Management, enforceable policies 553 and 597 were not addressed.
10. Cultural Resource evaluation is grossly lacking.

   a. No mention was made of the historic districts or dozens of historic sites.
   b. Local governments/groups/individuals as Section 106 Consulting Parties.
   c. No archaeological survey appears to have been conducted for portions of the Proposed Project APE.
   d. No vibration analysis information provide as it pertains to cultural or archaeological sites.

In conclusion, CDM Smith believes that the evaluation included in the DEIS is incomplete and recommends that a supplemental DEIS be required prior to issuance of a Record of Decision by the FRA.
Section 1
General Comments

1.1 Background
The National Environmental Policy Act (NEPA) was signed into law on January 1, 1970. NEPA establishes “national environmental policy and goals for the protection, maintenance, and enhancement of the environment and provides a process for implementing these goals within the federal agencies.”

From the U.S. Environmental Protection Agency’s (USEPA) website, Title I of NEPA contains a Declaration of National Environmental Policy which requires the federal government to use all practicable means to create and maintain conditions under which man and nature can exist in productive harmony. Section 102 requires federal agencies to incorporate environmental considerations in their planning and decision-making through a systematic interdisciplinary approach. Specifically, all federal agencies are to prepare detailed statements assessing the environmental impact of and alternatives to major federal actions significantly affecting the environment. These statements are commonly referred to as environmental impact statements (EIS).”

On September 19, 2014, the Federal Railroad Administration (FRA) released the Draft Environmental Impact Statement (DEIS) for the All Aboard Florida (AAF) high-speed rail project’s Phase 2 (“Proposed Project”). FRA is serving as the lead Federal Agency for the approval of the Proposed Project. An Environmental Assessment (EA), presumably using similar methodology, was completed for the Miami to West Palm Beach segment of the project in 2012. The FRA issued a Finding of No Significant Impact (FONSI) for Phase 2. A supplemental EA is under review (concurrently with the DEIS) for the revised location of a maintenance facility. The supplemental EA has no bearing on the DEIS review.

CDM Smith has conducted a thorough review of the DEIS. It should be noted that CDM Smith’s review comments focus on the information presented in the DEIS that pertains to the portion of the Proposed Project within Indian River County’s boundaries (including impacts on municipalities).

1.2 General Comments
The DEIS limits review of impacts to those activities being planned within the existing right-of-way (ROW) for the Florida East Coast Railroad (FECR), when in fact, the more significant local impacts would fall outside of the corridor, the individual roadway crossings (traffic control and signalization improvements) and bridge crossings. In general, FECR maintains a 100 foot ROW throughout Indian River County. CDM Smith was notified during the diagnostic field evaluation that intersection improvements would include the addition of 100 foot long traffic separating medians on each side of the crossing to address safety requirements for high speed rail projects. This adds up to 200 feet of additional impacts at each of the intersections where the median installation is feasible for the given crossing geometry (exit gates/4-quadrant gates will be used where medians cannot be accommodated). The addition of these medians, at many of the crossings, will require road widening, filling of stormwater swales/ditches, relocation of overhead and underground utilities and potential traffic impacts from shortened queue in turn lanes.
The diagnostic report provided via email by Indian River County staff outlines some of the intersection improvements being proposed; however, this information is not presented in the DEIS. Therefore, the DEIS should be considered incomplete due to the lack of information addressing impacts outside of the ROW.

The DEIS is also silent on the potential impacts from construction activities. The document does not identify construction lay-down or staging areas, information on construction sequencing or duration, dust control measures, or the potential noise and vibration impacts to archaeological or historical sites along the corridor within the Area of Potential Effects (APE).

In addition to the missing construction and intersection improvement impacts, the following general comments were noted during CDM Smith’s review:

1. The presentation of the Miami to West Palm Beach segment (Phase 1), separate from the remaining segments appears to be a clear case of segmentation (i.e. Phase 1 was reviewed and approved independently of and ahead of Phase 2). For a project to be segmented under NEPA, AAF would have had to demonstrate “Independent Utility” in order for project components to be reviewed and considered separately. CDM Smith is not convinced AAF has demonstrated “Independent Utility,” and would request further documentation from AAF that this process was undertaken in accordance with NEPA requirements.

2. AAF applied for federal funds from FRA through the Railroad Rehabilitation and Improvement Financing (RRIF) program. Compliance with the NEPA is a prerequisite for approval of the RRIF loan application. CDM Smith also reviewed the RRIF loan application for the purpose of confirming consistency between the documents.

3. The Proposed Project, as detailed in the DEIS, assumed to include 5 additional passenger train sets; 16 round-trip trips (32 one-way trips). The DEIS does not account for the increase in freight traffic that is noted in the RRIF loan application or the potential for increased passenger rail traffic over time.

4. The U.S. Army Corps of Engineers (USACE) and Federal Aviation Administration (FAA) documents are not included.

5. The DEIS draws conclusions throughout without adequate justification. For example, the document concludes that no significant localized traffic impacts would result from operation of the Proposed Project; however, Appendix 3.3 C indicates that queues stretching for more than a mile would occur at least 4 times a month at certain area intersections. Such impacts, which could occur all along the corridor of the Proposed Project, were not appropriately addressed.

1.3 Indirect and Secondary Impacts

The DEIS concludes that there will be "no induced growth" as a result of the Proposed Project; however, there are direct statements to the contrary within the DEIS. For example, Table 5.2.5-1 states that, "The project would provide linkages between regional and statewide multi-modal transportation networks and promote commercial development within the vicinity of transit systems’ and "The Project would have an indirect beneficial effect on future business opportunities and would likely promote tourism in the region."

Section 5.1.2.3 states “The three proposed stations for the WPB-M Corridor (in West Palm Beach, Fort
Lauderdale and Miami) may result in secondary effects such as creating potential for development and redevelopment outside the development directly associated with the stations. This additional development may also create impacts such as induced traffic generated by those developments." This statement contradicts Section 5.2.1.3, which states "The areas surrounding the proposed stations are already developed; the Project is not anticipated to result in induced growth or development that could generate additional emissions of criteria pollutants, and would not result in indirect or secondary effects to air quality."

1.3 Permitting and Regulatory Reviews

The DEIS fails to include documentation that USACE and FAA agreed to act as cooperating agencies for purposes of reviewing the Proposed Project. The NEPA-required cover page of the DEIS lists USACE, USCG and FAA as cooperating agencies. A "cooperating agency" is an agency that has jurisdiction by law or special expertise with respect to any environmental impact involved in a proposed (or a reasonable alternative) and will typically have some responsibilities for the analysis related to its jurisdiction or special expertise (See 40 CFR 1501.6 and 40 CFR 1508.5). Page 1-5 of the DEIS indicated that USACE was asked to participate as a cooperating agency and USACE agreed; there is a similar statement regarding FAA's involvement on page 1-6. No cooperating agency documentation was provided for either the USACE or the FAA.

An EIS should include detailed statements concerning the environmental impacts of the proposed project; not bypass this obligation to other permitting agencies. On October 7, 2014, the USACE issued a notice stating that, "The applicant has estimated that the north-south component of the proposed railway would occur within the existing FECR ROW and would only require minor impacts to waters of the United States (wetlands and surface waters) at various locations along the corridor. The Corps has determined these minor improvements would be satisfied in accordance with the Corps' Nationwide Permit (NWP) program. Verification by NWP would not require further public coordination." The notice further stated that USACE will use the final EIS as the NEPA document in accordance of the NWP.

Additional discussions with the DEIS Project team, it was indicated that authority for review of the proposed bridge improvements with replacements along the North-South (N-S) segment would be delegated to the USCG, in accordance with Section 9 of the Rivers and Harbors Act. Section 9 states that a USACE permit may still be required pursuant to Section 404 of the Clean Water Act if the construction of a bridge over a navigable waterway requires the discharge of dredged and/or fill material into waters of the United States. Without preliminary design plans for the Proposed Project, it is difficult to evaluate the extent of required dredge and fill activities, and therefore to what extent USACE involvement is required.

In addition to USACE and USCG authority, local permits will be required for the proposed bridge replacements and expansions. The Indian River Farms Water Control District (IRFWCD) maintains the North, Main and South Relief Canals. The referenced canals are listed in Appendix S.3.6-86 of the DEIS (ESA Section 7 Consultation 20140129) to be upgraded (not replaced). CDM Smith spoke with the superintendent of the IRFWCD, who indicated that there has been no contact or coordination to date between the AAF project team and IRFWCD regarding permit or maintenance requirements. IRFWCD further indicated that the existing support for the North Relief Canal Bridge is in a state of disrepair with significant washouts and undermining being observed on the southern support.
Section 2
Affected Environment and Environmental Consequences

The majority of the existing environmental conditions and impacts are summarized in Sections 4 and 5 of the DEIS, and CDM Smith's review of those two sections is presented below.

2.1 Traffic and Transportation Impacts
2.1.1 Railroad Crossings Selected
The DEIS failed to consider a representative sample of railroad crossings in Indian River County and thus the impact has not adequately been analyzed or addressed. Two out of 30 crossings in Indian River County were selected based on the largest 2012 Average Annual Daily Traffic (AADT) on roads crossing the rail line. Oslo Road had a 2012 AADT of 14,400 and 15th Place had an AADT of 11,500. Although these roads have the largest AADT, they may not necessarily have the longest delay and queue caused by train activity. Two out of 30 intersections represents an inadequate sample size.

2.1.2 Traffic Projections
The DEIS failed to follow FDOT guidance by not conducting actual intersection turning movement counts and not conducting an analysis using those actual counts. CDM Smith estimated peak hour intersection traffic at the two Indian River County crossings by applying C (daily traffic occurring in the peak hour) and D (directional distribution) factor to the AADT values. CDM Smith then applied a turning movement volume distribution (left, through, and right) to the PM peak hour traffic to estimate intersection traffic. The DEIS failed to calculate AM peak hour conditions completely. This methodology, according to the Railroad Crossing Analysis report for All Trains-Florida, is shown in the 2009 Florida Department of Transportation (FDOT) Quality Assurance Service Handbook. CDM Smith's concern with this methodology is that the estimated peak hour intersection traffic volumes could be significantly different than actual traffic, and that the references are conditioned when a growth rate is applied. It would be more appropriate to conduct actual intersection turning movement counts and conduct analysis using those actual counts (see FDOT 2014 Florida Traffic Forecasting Handbook Ch.6, Section 6.5 paragraph).

Year 2016 and 2030 traffic projections were based on a one percent annual growth rate. The report states this was based on historical traffic data and is conservative because much of the corridor has seen negative growth over the last several years. It would be more appropriate to utilize the regional Travel Demand Model to project future traffic conditions.

2.1.3 Delay and Queuing Analysis
The DEIS does not properly analyze the delay and queuing calculations. Table 3-10 in the rail crossing report presents some confusing information. First, the automobile delay and queue calculations caused by a passenger and freight train are almost the same, but CDM Smith understands that a freight train is much longer and will create a longer "gate down" condition. Second, CDM Smith is not sure how the delay and queue calculations are done. At Oslo Road and US 1 the eastbound delay and queue at the intersection is
much longer than at the railroad crossing. For example, the year 2036 eastbound delay at the intersection is projected to be 656.2 seconds (10 minutes 56 seconds) (passenger train) versus 87.5 seconds at the railroad crossing. It seems that eastbound traffic would be delayed a similar amount of time whether it is due to the rail gate down condition or the traffic signal at US 1 being preempted by the train. Furthermore, the northbound left and southbound right turn delays and queues for traffic turning from US 1 onto Oslo Road are not shown. It is assumed that the northbound and southbound through movements on US 1 will have a green indication while a train is crossing Oslo Road, but all other movements at the US 1 and Oslo Road intersection oriented towards westbound Oslo Road will be prohibited. This could be substantial and create safety problems at the intersection. For example, the northbound US 1 dual left turn lane will likely reach its capacity of 26 vehicles or approximately 650 feet while a train is crossing Oslo Road such that excess vehicles are blocking the inside through lane. As the left turn lane demand increases, motorists may maneuver unsafely in and out of it as they attempt to travel westbound. Additionally, the southbound US 1 right turn lane at Oslo Road is approximately 150 feet long and can store approximately six vehicles. While a train is crossing Oslo Road, this right turn lane will likely reach its capacity. Finally, it is not clear where the westbound projected queue at the Oslo Road and US 1 intersection would be. For example, at that intersection, the westbound queue is projected to be 4,099 feet in 2036. At the FEC railroad crossing the westbound queue is projected to be 1,594 feet. If the 4,099 foot queue would consume the US 1 lanes feeding westbound Oslo Road, the impact on US 1 would be significant.

As the results appear flawed, the FRA should review the Synchro output to determine assumptions and more details about their methodology. It is not clear where or if the consultant got the actual traffic signal splits and offsets (traffic signal cycle lengths and timings).

The DEIS fails to give an adequate delay and queuing analysis for two trains crossing simultaneously. The results of the delay analysis shown in Table 3-10 and 3-11 seem to represent one train crossing. CDM Smith understands that two trains could cross a road consecutively and that would lengthen the delay and queue. In effect, back-to-back trains crossing would compound the impact even more because queues from the first train would not have a chance to dissipate before the second train arrived.

CDM Smith believes that FRA must reexamine the appropriateness of the weighted average shown in these tables. The weighted average of delay, queue, and LOS does not provide meaningful information.

The DEIS failed to provide any mitigation for the long delays created by the railroad crossing delays. The mitigation could include improvements to US 1 or the perpendicular crossing streets in the form of additional turn lanes, additional through lanes, or improved traffic signal equipment. Other potential mitigation could include improvements to the overall street network to relieve congestion caused by train crossings, or grade separating some of the railroad crossing to provide relief.

2.1.4 Local Traffic Impacts

The frequency projections of freight and passenger trains along the N-S Corridor identified in the DEIS would be anticipated to cause delays at one or multiple at-grade crossings simultaneously through Indian River County, however the DEIS states that there may be minor increased traffic delays at existing at-grade crossings. The report also states there may be delays to trains on a “shared use” environment (both passenger and freight service) which will be controlled by the Train Dispatcher as shown on pages 3-4 and 3-5. There is mention of installing additional passing tracks and from our understanding there are no existing passing tracks within Indian River County. With both the frequency projections of freight and passenger trains along the N-S Corridor it is safe to assume delays could increase at one or multiple at-
grade crossings simultaneously through Indian River county. The train speeds as shown on Tables 5.1.3-1 & 5.1.2-4 for both passenger and freight appear to assume the speeds will be constant throughout the N-S Corridor and/or counties. This assumes all the existing and proposed track length through the counties can accommodate the stated speed and that no trains will require crossing over to the adjacent track or stopping within Indian River County.

The DEIS fails to use the proper model for impacts to at-grade crossings or the results of multiple trains at rail crossings and fails to adequately address mitigation for such impacts. The DEIS does state using Rail Traffic Controller (RTC) model is an acceptable method to predict train movements; however, the report stated results of this model for bridge closures over navigable waterways but not for impacts to at-grade crossings or the results of multiple trains at rail crossings. The software will provide time-table and track occupancy results and animation (see www.berkelysimulation.com) and take into account speed. The report does mention the addition of passing tracks and or universal crossovers (box 3-37) to accommodate trains passing each other; however, there are no indications where these may occur. The DEIS does not present design plans to identify passing options. The DEIS does state there will be adverse environmental effects to at-grade crossings and that each crossing will be reviewed and mitigation measures installed to reduce these impacts (DEIS S-8). Again there are no design plans showing these mitigation measures or what the impact will be to the local authorities for the capital investment or additional maintenance costs.

In addition, it is anticipated that there will be possible footpath crossings to the existing roadway at intersections and possible additional traffic preemption signal lines.

2.1.5 Pedestrian and Bicycle Impacts

The DEIS overlooks impacts on bicycle and pedestrian traffic. Many of the railroad crossings are located in heavily populated and densely developed areas that generate a substantial amount of bicycle and pedestrian traffic. The impacts to a growing segment of the traveling population has not been addressed. The DEIS does state (section 3.3.1) that pedestrian at-grade crossings would be upgraded to enhance safety. The DEIS does not address additional risks to pedestrians crossing the tracks outside of grade crossings as a result of increased freight and new passenger rail traffic traveling at high speeds on two tracks. There are no future projections of growth or stated or statements that discussions have been made to local Transportation and Metropolitan Planning Organizations about their projections for bicycle/pedestrian volumes and about their future plans for crossways.

2.1.6 Emergency Vehicle Mobility

Without the appropriate data, the DEIS does not adequately address the impact on emergency response vehicles. Indian River County has a significant number of hospitals and fire stations that will be impacted by additional railroad crossing blockages. Fire truck and ambulance movements are anticipated to be more inhibited when trains are moving through the grade crossings due to increase rail freight and passenger trains. As stated earlier, the DEIS does state the applicant used an RTC model (see section 4.3.4 on what the software will provide) for projected train movements; however, there is no data given on the projected impacts to at-grade crossings. In addition, there was no indication the local emergency routes were input into the RTC model to render a solution on possible delay impacts.

2.2 Noise and Vibration Impacts

The DEIS failed to include an in-depth assessment of the noise and vibration impacts caused by the Proposed Project. High Speed Ground Transportation Noise and Vibration Impact Assessment
(DOT/FRA/ORD-12/15, September, 2012) provides the basic guidance and procedures for the assessment of potential noise and vibration impacts from proposed high-speed ground transportation projects. This manual is intended for projects with train speeds of 90 to 250 mph. The manual is similar to the FTA Transit Noise and Vibration Impact Assessment manual (which is intended for projects with train speeds up to 90 mph). An important characteristic of the noise from high-speed trains that is absent from the DEIS noise analysis is analysis of the onset rate of the sound signature. Onset rate is the average rate of change of increasing sound pressure level in decibels per second during a single noise event. The rapid approach of a high-speed train is accompanied by a sudden increase in noise for a receiver near the tracks. Based on the absence of discussion of onset rate and use of the FTA manual figure showing typical A-weighted maximum sound levels instead of the FRA manual showing typical A-weighted levels of high-speed train sources, indicates that the noise analysis relies more on the FTA manual than the more pertinent FRA high-speed train noise manual.

The DEIS lacks calculation details and quantitative support for its impact assessment as required by the Federal Railroad Administration manual. In general, the impact assessments are lacking calculation details and quantitative support. The Proposed Project is well beyond the initial planning stages. Therefore, these calculations and support documentation should be required as part of the DEIS analysis.

The DEIS fails to include an evaluation of noise and vibration impacts on subterranean archaeological sites and vertical historical sites along the N-S Corridor. The FRA manual references Section 106 and states with regard to historic and archaeological sites, “Special protection provided by law. Section 4(f) of the DOT Act and Section 106 of the National Historic Preservation Act come into play frequently during the environmental review of transit projects. Section 4(f) protects historic sites and publicly-owned parks, recreation areas and wildlife refuges. Section 106 protects historic and archaeological resources.” The DEIS does not include a complete list of the subterranean archaeological sites and vertical historical sites along the N-S Corridor. It therefore does not evaluate the Proposed Project’s noise and vibration impacts on the subterranean archaeological sites and vertical historical sites along the N-S Corridor.

Moreover, AAF made no attempt to collect representative noise data at a representative sampling of intersections along the corridor, as is required by Section 106 of the NHPA.

Specifically, CDM Smith noted the following deficiencies:

1. The DEIS relied on an inaccurate methodology for determining existing noise levels. The FRA manual recommends that noise be considered in terms of divergence, absorption/diffusion and/or shielding at a distance of 50 feet from the source. Existing noise levels at 50 feet were not monitored in the field, but rather estimated based on the FTA Guidance Manual based on population density or proximity to an interstate highway, airport, or an existing rail line. No figures are presented to show the existing ambient noise levels in the Project Study Area derived from these different estimated noise levels. Existing ambient noise levels would be helpful in comparing existing and future build impacts at sensitive land uses and historic properties. Measurements of existing ambient noise levels, especially at sensitive land uses and historic properties, should have been used as the combination of various transportation and urban noise sources can be complex. See Appendix B of the FRA manual which discusses options for determination of existing noise levels ranging from full measurement (more accurate) to tabular lookup (less accurate).
a. Outdoor measurements were collected by CDM Smith using a Type 1 SoundPro DL sound level meter in October 2014. The noise meter was placed 5 feet above the ground level. Noise levels were measured at each location and the equivalent steady-state sound level ($L_{eq}$) was collected for each site logged in one minute intervals. One minute data log is important to determine any aberrant noise events at each site. Noise levels were measured at six locations within the Project Study Area, as shown in Table 2-1. The purpose of the ambient noise level measurement was to quantify the existing acoustic environment and provide a baseline for assessing the impact of future noise levels on the receptors in the vicinity of the proposed action resulting from the Proposed Project. No documentation of field measurements collected by AAF were presented in the DEIS.

</table>

b. People generally perceive a 10 dB-worth or decibel (dBA) increase in a noise level as a doubling of loudness. For example, a 70-dBA sound will be perceived by an average person as twice as loud as a 60-dBA sound. People generally cannot detect differences of 1 dBA to 2 dBA. Differences of 3 dBA can be detected by most people with average hearing abilities. A 5-dBA change would likely be perceived by most people under normal listening conditions.

c. The DEIS underestimates the noise impacts from the Proposed Project. Table 5.2.2-9 of the DEIS, indicates that the Proposed Project would result in daytime noise levels ($L_{eq}$) ranging from 62.1 to 63.9 dBA close to at-grade crossings (approximately 2.5 dBA) and ranging from 61.4 to 63.5 dBA along the mainline tracks. The 2014 ambient noise levels ($L_{eq}$) collected by CDM Smith in the field ranged from 61 to 71 dBA. As with train events for the existing condition. These values are higher than the selected background conditions used in the DEIS. The DEIS does not address different noise sources and combining of noise sources such as traffic noise, freight noise, and passenger train noise to calculate the increase in the noise levels from the Proposed Project which results in an underestimation of noise levels from the project.

d. The $L_{eq}$ ranged from 62.2 to 64.1 at-grade crossings and 61.6 to 63.6 along the mainline. The future noise levels listed in Table 5.2.2-10 shows the existing $L_{eq}$ noise levels are 75 dBA with the project noise at 64 dBA in Indian River County. Comparing existing $L_{eq}$ from the existing levels of 62.2 to 64.1 to future levels of 75 dBA, there is a 10 dBA increase which equates to doubling of loudness.

2. The DEIS fails to include existing vibration levels in the Project Study Area to compare to future vibration levels. Similarly, generic vibration levels at various distances are only shown for rubber-tired vehicles traveling at 30 miles per hour (mph), light rail traveling at 50 mph, and heavy rail traveling at 50 mph. As suggested by the DEIS, the vibration source in the E-W Corridor is SR 528, where vehicles in the Project Study Area will be traveling at speeds exceeding 30 mph. According to a later reference on
page 5-43, freight trains observed for the Amtrak EA had speeds ranging from 30 to 49 mph. No figures are presented to show the existing vibration levels in the Project Study Area that were used to compare against the future vibration levels.

3. The estimated noise levels for SR528 presented in the DEIS are based on an incorrect classification. The DEIS shows that FRA used FTA noise levels for interstate highways to estimate noise levels near SR 528; however, SR 528 is a state road, not an interstate highway.

4. The DEIS fails to give a detailed explanation of the noise levels associated with both idling locomotives and moving locomotives. The DEIS mentions noise from idling locomotives and moving trains; however, it does not explain what these noise levels are and how the Ldn from moving and idling trains at the VMF were calculated to be 68.8 dBA at 50 feet.

5. The DEIS fails to provide a basis for its declared correction factors for the Proposed Project. On page 5-41, the DEIS states that there is a correction factor for passenger trains of 4 dBA. Moreover, on page 5-50, the DEIS states that there is a correction factor for passenger trains of 10 VdB). These figures, however, are referenced for passenger trains on elevated tracks. No basis is provided for these factors.

6. The DEIS did not adequately account for the noise and vibrations of the construction equipment or the noise and vibrations that occur when you use two pieces of equipment simultaneously. Construction noise is evaluated for the two loudest pieces of equipment. It is not clear whether it was assumed that both pieces of equipment will be operating concurrently. Numerous pieces of equipment operating concurrently may contribute substantially to the overall construction noise, even if the individual equipment may not be as loud as the two selected equipment. The DEIS should have described the other typical construction equipment and the number of various equipment operating simultaneously, and based the analysis on the combined noise from that equipment.

7. The DEIS fails to address the increase in traffic noise along the Proposed Project corridor. The DEIS references existing noise from SR 528 and other roadways as the dominant existing noise source; however, the increase of traffic along these corridors that will occur by the time the Proposed Project is in full operation (future conditions) is not documented. In the DEIS, the total future noise level is calculated by adding the Proposed Project noise level to the existing highway noise level, failing to account for the fact that population growth will result in increased traffic noise in the Project Study Area in the horizon year when the Proposed Project is fully operational. Increases in future traffic noise along Project Study Area travel corridors are not addressed in the DEIS. See the FRA manual, Chapter 3, Noise Impact Criteria, which discusses relationship of project noise impacts to ambient noise levels (the higher the ambient noise level, the lower the noise level increase before onset of impact). The document also does not discuss the freight and passenger rail growth and long term impacts.

8. The DEIS fails to analyze the increase in freight traffic in the alternatives analysis. The DEIS analyzes the increase in freight operation for the No-Action Alternative only. The change in freight operation should have been addressed for the Project Alternatives, as required by NEPA for an EIS.

9. The DEIS failed to discuss the quantitative effects of speed and type of locomotive on the noise and vibration levels. The DEIS indicates that noise and vibration levels were calculated for different train speeds. The document should have discussed the effect of the referenced speed and type of locomotive (i.e., freight vs. high speed passenger train) on noise and vibration levels, such as calculating high speed train onset rate (startle effect) and aerodynamic noise (see FRA Manual).
10. The DEIS did not properly analyze the noise and vibration impacts to land uses, historical structures or archaeological resources that are within 600 feet of the Proposed Project’s Rail Corridor. Page 4-37 of the DEIS specifically states that the Project Study Area for vibration extends approximately 600 feet from the rail corridor; however, on page 4-122, the DEIS deviates from the 600-foot boundary and presented a vibration analysis for archaeological resources that was limited to the footprint of subsurface activities within the existing approximately 100-foot wide FEC ROW for the N-S Corridor.

11. The DEIS fails to disclose the total number of land uses that are sensitive to noise or vibration (a.k.a. sensitive receptors) currently being affected by existing noise levels. In Section 5.2.2.2, numbers of impacted sensitive receptors are presented for various project components. AAF should discuss the total number of sensitive receptors and ones that may already be impacted without the Proposed Project in the Affected Environment section (refer to FRA Manual).

12. The DEIS fails to adequately describe the noise and vibration mitigation. Section 7.2.4 indicates that AAF will implement mitigation measures as part of the project design; however, it is unclear what that mitigation would be, or what its effectiveness would be in addressing significant impacts.

13. The DEIS fails to include a documented mitigation analysis. Moderate and Severe impacts are identified in the DEIS, however, mitigation analysis is not documented. Noise barrier analysis or horn noise assessment using the FTA and FRA noise assessment manuals is not included in the DEIS. The FRA manual for high-speed rail projects is designed to complement the FRA manual. The High-Speed Ground Transportation Noise Spreadsheet Model has been developed in conjunction with the FRA manual for calculating noise from high-speed rail projects.

2.3 Air Impacts

The DEIS did not use the correct methodology to analyze the increase in vehicular emissions caused by the Proposed Project. The Methodology section on page 5-34 of the DEIS states that for vehicular emissions modeling, “all vehicles were assumed to be gasoline burning vehicles.” The assumption is not used by the Federal Highway Administration (FHWA) and is not a U.S. EPA-recommended methodology for NEPA analyses. U.S. EPA, “Policy Guidance on the Use of MOVES2014 for State Implementation Plan Development, Transportation Conformity, and Other Purposes” (EPA-420-B-14-008, July 2014). The DEIS should analyze the vehicular emissions using the latest version of the U.S. EPA’s Motor Vehicle Emissions Simulator (MOVES). MOVES2014. Note that the older version, MOVES2010, is also acceptable. ([79 FR 60343]). The FRA should have obtained MOVES2014 input files from the Florida Department of Environmental Protection or FDOT for Florida vehicle fleet distributions, by geographic area, and run these to obtain accurate, up-to-date, and defensible emissions inventories for a representative mix of vehicle types and ages.

The DEIS fails to examine the negative localized impacts of air emission rates due to the Proposed Project. Tables 5.2-1 and 5.2.2 show the overall regional net benefit in annual mass air emissions due to the induced modal switch from passenger cars to train use. The text suggests that this benefit is not uniformly distributed across the state. The Miami to West Palm section of the project will receive most of the benefit, because that is where train stations are available to travelers; however, it is likely that Indian River County will suffer detriment because the Proposed Project will INCREASE annual mass air emission rates in its area. This is because Indian River County will have no train stations to remove on-road vehicle trips, but will have
increased emissions from passenger trains; induced additional freight trains, and greater idling at at-grade crossings. The Proposed Project's air emissions impacts specific to Indian River County should be modeled and disclosed. The public should have complete information about impacts the Proposed Project will cause in some portions of the state so that other portions of the state can receive benefits.

The DEIS fails to address the Proposed Project impacts to the localized air quality. Potentially significant localized impacts would be expected to be associated with maintenance yards, terminals, and park-to-ride lots. The Proposed Project plans to have third-rail siding at three locations in Indian River County. If the purpose of the third track siding is to hold idling freight trains while the high-speed passenger trains pass, the DEIS should include modeling for these emissions, especially diesel particulate matter emissions. The DEIS should also address potential effects to sensitive receptors nearest these locations.

The intersection carbon monoxide analysis has been generalized from the 2012 Phase 1 studies. An up-to-date analysis with the latest traffic and emissions data is recommended to determine if a microscale dispersion models should be run for carbon monoxide concentrations at the worst-case at-grade crossing in Indian River County (FHWA Technical Advisory T 6640.8A). An analysis for the new one-hour nitrogen dioxide National Ambient Air Quality Standard (NAAQS) should be included. Although quantitative modeling is not required by FHWA Technical Advisory T 6640.8A, this new stringent NAAQS is a possible issue at congested intersections.

Section 5.2.1.4 Construction-Period Impacts Evaluation lacks the detail required for an adequate DEIS. Among other things, the analysis should include: a discussion of the length of the construction period along each segment, identification of areas where contaminated soils would be disturbed (and specific mitigation measures), identification of construction staging areas and their activities, description of and commitment to specific dust control measures, and an evaluation of exposure to diesel particulate matter emissions from construction equipment (FHWA Technical Advisory T 6640.8A).

Regarding DEIS Section 7.2.3 - Mitigation Measures, Air Quality, the discussion of mitigation for fugitive dust control is generic, and there is no mention of mitigation for diesel particulate matter emissions. Mitigation discussion is required under 40 CFR 1502.21(m). The section should identify the Best Management Practices that would be employed at staging areas and at construction sites. CDM Smith recommends also that AAR commit to use of construction equipment meeting U.S. EPA Tier 4 emissions standards, or to retrofitting equipment nor meeting these standards with diesel particulate matter filters.

2.4 Coastal Zone Management

The DEIS speaks to the applicable coastal zone management statutes (Table 5.2.5-1) and concludes that the Proposed Project is consistent but there is very little back-up for this conclusion. Additionally, Table 5.2.5-1 omits applicable, enforceable policies 553 (Building and Construction Standards) and 597 (Aquaculture). As in the rest of the DEIS, the assumption is made that all work will occur within the existing FERC corridor, which does not take into account intersection improvements, staging, noise barriers, stormwater management, etc.

The following excerpts from Table 5.2.5-1 are examples of unsupported statements:

1. "Chapter 163, Part II Growth Policy; County and Municipal Planning: Land Development Regulation: The Proposed Project would be consistent with local, regional, and state comprehensive plans."
Consistency with these plans has been included in the purpose and need criteria matrix used to develop the Action Alternatives.*

Comment: The DEIS fails to adequately address the Proposed Project’s consistency with Indian River County’s local Coastal Zone Element Plan. Under the Florida Coastal Management Program Guide, Chapter 163, Part II, Florida Statutes is an enforceable policy incorporated in the federally-approved FCMP. Chapter 163.3154 provides the legal status of comprehensive plans that have been adopted in conformity with the Coastal Zone Management Act. Therefore, Proposed Project must be consistent with the Indian River County 2030 Comprehensive Plan. There is no information provided in the DEIS specifying how the Proposed Project is consistent with this Comprehensive Plan. Also, the only planning consistency criteria used in the alternatives screening is “Consistency with plans of transportation agencies and landowners.” There is no reference to consistency with local plans in the discussion of purpose and need or alternatives.

2. “Chapter 252 Emergency Management: The Proposed Project would include the development of a passenger rail system within an existing rail corridor and along an existing highway ROW. The E-W Corridor would be located outside of the defined storm surge zones and hurricane evacuation areas for Brevard and Orange counties. Within the N-S Corridor the rail line would be located within Florida Division of Emergency Management-defined storm surge zones; however the development would occur entirely within the FECR Corridor and would be consistent with the existing transportation uses. While the proposed rail system would encourage regional connection as well as growth in the vicinity of the supporting stations, growth would be focused in previously developed areas and would be consistent with existing commercial and industrial land uses. Consequently, the Proposed Project would not affect the state’s vulnerability to natural disasters and would not affect emergency response and evacuation procedures. Further the Proposed Project would be consistent with the emergency preparedness policies within the East Central Florida and Treasure Coast SRPPs.”

Comment: The DEIS does not present any information regarding how the Proposed Project will affect emergency response and evacuation procedures. Under the Florida Coastal Management Program Guide, Chapter 252, Florida Statutes is an enforceable policy incorporated in the federally-approved FCMP. The statement that the Proposed Project would encourage growth contradicts other statements throughout the DEIS that the Proposed Project will not result in induced growth/development. Furthermore, the conclusion that because growth would occur in developed areas, vulnerability to natural disasters would not be affected is not true. Increased development, even in developed areas, can certainly affect emergency response and evacuation procedures by increasing response times and making evacuation more difficult.

3. “Chapter 259 Land Acquisition for Conservation or Recreation: The Proposed Project would likely result in beneficial impacts; compensatory mitigation would be required including the potential acquisition of environmentally endangered lands. Impacts to delineated wetlands would require mitigation as required by Section 404 individual permits. Consequently, while the implementation of the Proposed Project would remove wetlands from the N-S and E-W Corridors, compensatory mitigation would include the potential acquisition of environmentally sensitive habitat types.”

Comment: The DEIS does not acknowledge the potential negative impacts to Indian River County that could result from mitigation activities and loss of environmentally sensitive lands. There is no
explanation of what compensatory mitigation and/or acquisition of environmentally sensitive habitat types is envisioned elsewhere in the DEIS (should be included under "Mitigation Measures and Project Commitments" in Section 7). Furthermore, it is not accurate to say that the Proposed Project would result in beneficial impacts. The Proposed Project would result in negative impacts, thereby requiring mitigation.

4. "Chapter 288 Commercial Development and Capital Improvements: The Proposed Project would have an indirect beneficial effect on future business opportunities and would likely promote tourism in the region."

Comment: Again, this statement in the DEIS contradicts other statements in the DEIS that there will be no induced growth/development.

5. In addition to the unsupported statements, the DEIS states that the Clearinghouse determined that a positive consistency determination from a "similar project" would be valid for the Proposed Project (see below from Section 5.2.5):

"As stated in the 2013 FONSI for the WPB-M Corridor, the Florida State Clearinghouse has reviewed the South Florida East Coast Corridor Transit Analysis. A similar project to the Phase I to the WPB M Corridor described in the 2012 EA. The South Florida project was determined to be consistent with the FCMP, and the State Clearinghouse determined that this consistency determination would be valid for the AAF Project, because the AAF Project Study Area is fully encompassed within the South Florida East Coast Corridor Transit Analysis area which was found to be consistent in 2006 and there have been no relevant changes in the CZMA or FCMP criteria that would affect that determination."

Comment: The Florida State Clearinghouse made a consistency determination without input from all of the Florida Coastal Management Plan agencies. In Florida, under Section 380.23, Florida Statutes, a project can only be found consistent if all commenting agencies (under the FCMP agency umbrella) with relevant statutory responsibilities concur. In this case, the FCMP agencies were not given an opportunity to comment on this project by the Florida State Clearinghouse. Rather the Florida State Clearinghouse made the determination without agency input. Per the Florida State Clearinghouse manual (http://www.dep.state.fl.us/secretary/oip/manual/manual.htm), the Clearinghouse sends the document of application to OIP for coordination of DEP review. The appropriate DEP division or district contacts distribute the project to appropriate division bureaus and satellite offices. Based on the information provided in the DEIS, this process was never conducted. Additionally, the South Florida East Coast Corridor Transit Analysis is cited as similar to Phase I, so the consistency determination for this project would not be valid for Phase II of AAF.

2.5 Environmental Justice (EJ)

The DEIS overlooks the negative impacts to minority and low income communities in those areas of the Proposed Project that do not have proposed stops. The EJ analysis indicates, under indirect and secondary impacts, that the Proposed Project would have a beneficial effect on minority and low income populations in Orlando, West Palm Beach, Fort Lauderdale and Miami by providing an alternative transportation option that would improve access and mobility between Orlando, West Palm Beach, Fort Lauderdale and Miami. There however is no discussion of what type of beneficial effect the Proposed Project would have upon other EJ populations along the rail line. This is also connected to early comments received on the Proposed
Project concerning areas without a station that would be adversely affected, but would not receive any economic or social benefits.

Additionally, AAF failed to conducted significant public outreach to affected minority communities located along the FECR corridor. AAF received a comment during early scoping for the Proposed Project to include significant public outreach to minority communities that are located along the FECR Corridor; however, there is no discussion within the DEIS of such an outreach occurring within Indian River County. Indian River County has confirmed with Freddie L. Woolfork, an Executive Board Member of the Gifford Progressive Community League, that AAF held a meeting at the Gifford Youth Activity Center for local citizens. The required meeting, however, was described as a “generic, shortened version of a previous (non-Gifford-specific) public meeting.” There was no specific information pertaining to the impacts the Proposed Project would have on the Gifford community. In fact, Mr. Woolfork described the meeting with AAF as “more of a discussion to let [the Gifford Community] know that there would be a new passenger project in Florida and that there would be 32 round trips per day going through Indian River County at 120 MPH and that it is a great economic benefit to all of Florida... It is therefore obvious that AAF held a meeting in the Gifford Community to satisfy a NEPA requirement without any intention of taking into consideration the comments, concerns and issues brought forth by those local residents.

2.6 Natural Resources Impacts

CDM Smith notes the following comments/concerns with regards to natural resources impacts:

2.6.1 General Comment

The DEIS does not fully address the environmental impacts to the natural resources located within Indian River County. For example, Sections 7.2.6 and 7.2.10 state that the relative mitigation activities will be identified in the various permit requirements (once issued), rather than identifying the impacts and stating what the mitigation activities will entail. NEPA requires that the environmental impacts be addressed in the DEIS, and not deferred to the permitting process. Moreover, on pages 4-54 and 7-8, the DEIS states that the USACE permitting process will rely on the DEIS as the required NEPA document to complete the Section 404(b) (1) analysis. It is therefore necessary that the issues be sufficiently addressed within DEIS document. Thus the analysis of the impacts is inadequate.

2.6.2 Water Resources

The following are examples from the DEIS demonstrating the lack of sufficient information necessary to adequately address impacts to water resources:

- Section 5 of the DEIS says stormwater Best Management Practices will be installed but gives no specifics on what type of Best Management Practices they intend to use or the location.

- Page 3-35 of the DEIS states that the Proposed Project will include installing a third rail at various locations (3 within Indian River County). On page 5-79 of the DEIS, it states “The Project would include improvements to the existing mainline and reconstruction of the second tracks on the existing track beds. Constructing the Project in the N-S Corridor would not create new impervious surface.”

- The DEIS does not take into account that there will be new impervious surface due to road construction outside the existing corridor. For example, The DEIS fails to address the
environmental Impacts of the new impervious surfaces that AAF is required to install outside the existing corridor to qualify as a sealed corridor. On page 5-79, the DEIS states that constructing the Proposed Project in the N-S corridor will not create new impervious surfaces. This statement is contradicted in several areas throughout the DEIS. Page 3-33 of the DEIS states that the existing railroad system was built and is maintained to FRA Class IV track standards. On page 3-36, the DEIS states that the Proposed Project intends to operate at a speed of up to 110 miles per hour, which, according to the Railroad-Highway Grade Crossing Handbook –Revised Second Edition (2007), would require track improvements to achieve Class VI standards. Specifically, Class VI tracks (high speed rail) requires a sealed corridor, which includes the installation of a 100 foot median on each side of the road crossing (where feasible); quadrant gates can be used as an alternative if crossing geometry does not support the installation of the median) (see Section 3 of the above-referenced handbook). These necessary improvements will cause new impervious surfaces that fall outside of the DEIS ROW. The DEIS should address the additional impacts from these impervious surfaces.

2.6.3 Construction
The DEIS does not address staging or equipment laydown locations or temporary/permanent impacts on the natural environment. Under NEPA, the DEIS is required to address both construction and post-construction impacts of the proposed action. See Federal Register (volume 64, No. 101 dated May 26, 1999). This has not been done.

2.6.4 Mitigation
The DEIS fails to identify specific mitigation measures for the adverse effects the Proposed Project will cause on the natural environment. For example, page 5-10 of the DEIS states: “AAF will obtain an appropriate Section 404 permit from USACE prior to construction, and implement mitigation as required by the wetland permit condition.” NEPA requires that the specific impact be identified and corresponding planned mitigation presented.

The DEIS appears to claim the benefits of mitigation in several instances, without specifically describing the mitigation activity. Under NEPA, the impacts must be analyzed first before mitigation can be considered. According to Table 5.2.5.1 regarding land acquisition for conservation and recreation: “The Project would likely result in beneficial impacts; compensatory mitigation would be required including the potential acquisition of environmentally endangered lands. Impacts to delineated wetlands would require mitigation as required by Section 404 Individual Permits. Consequently, while the implementation of the Project would remove wetlands from the N-S and E-W Corridors, compensatory mitigation would include the potential acquisition of environmentally sensitive habitat types.” There is no explanation of what compensatory mitigation and/or acquisition of environmentally sensitive habitat types would be required in the DEIS. Furthermore, it’s not accurate to say that the Proposed Project would result in beneficial impacts. The Proposed Project would result in negative impacts, thereby requiring mitigation. That mitigation should have been addressed and described in detail in the DEIS.

2.7 Wetland Impacts
The wetlands discussion in Sections 4 and 5 of the DEIS is inadequate. No figures showing wetland locations relative to the Proposed Project area appear in the DEIS text or appendices. The DEIS does, however, include approximate acreages for impacts. IRFW/C staff has indicated that they do not believe
that inclusion of the banks of the North, Main or South Relief canals as wetlands is appropriate. Background information is required to confirm the accuracy of these estimates.

The following are specific examples from Sections 4 and 5 of the DEIS deficiencies:

1. There is a statement in Section 4.3 that “Wetlands were identified and characterized for areas in which the Project would require ground disturbing activities.” Those areas should be specifically identified and include all planned activities (roads, utilities, noise barriers and other mitigation, etc.) as well as staging and equipment laydown locations.

2. Section 4 states that field delineations were conducted for the FECR corridor but there are no figures showing wetland boundaries for that corridor. The text references the land use figures in Appendix 4.1.1-A, which do not show wetlands. The only wetlands figures in the appendices are for the E-W corridor.

3. USACE jurisdictional determination should be included in the DEIS/EIS.

2.8 Threatened and Endangered Species Impacts

The limited geographic scope of the DEIS prevents CDM Smith from fully analyzing the impact of the Proposed Project on threatened and endangered species. As is noted consistently throughout CDM Smith’s review of the DEIS, Impacts to threatened and endangered species are addressed only within the railroad ROW. The USACE, U.S. Fish and Wildlife Service (USFWS) and National Marine Fisheries Service (NMFS) determinations that the Proposed Project will have no adverse effect on threatened and endangered species are based on the assumption that all work will occur only in the existing ROW (reference Sep. 18, 2013 letter from USACE to the National Oceanic and Atmospheric Administration; September 24, 2013 letter from USACE to USFWS; Oct. 25 letter from NMFS to USACE; C-DEC notes from Sep. 6, 2013 meeting with USFWS, USACE and NMFS). The determination needs to take into account any activity outside the ROW. AAF needs to present information about these activities to the agencies and include their feedback in the DEIS.
Section 3

Section 4(f) Evaluation and Cultural Resources

As properly stated in Section 6 of the DEIS, Section 4(f) of the U.S. Department of Transportation (DOT) Act of 1966 requires DOT agencies to avoid using certain public resources when undertaking transportation projects unless there is no prudent alternative and all necessary action is taken to minimize harm. Section 4(f) resources include publicly owned parks, recreation areas, wildlife and/or waterfowl refuges and historical properties of National, State or local significance.

The DEIS includes Section 4(f) comments in both Section 5 and Section 6. However, there are inconsistencies between the two sections. For example, Section 5 does not include historical properties (it should), while Section 6 does. Section 6 refers only to the St. Sebastian River Bridge within Indian River County.

3.1 Cultural Resources

Upon review of the Cultural Resources section of the DEIS it appears that the Section 106 process implemented can best be characterized as minimalistic. FRA’s decision that “…consultation with local entities was not required for Phase II,” is perplexing due to the overall size and nature of the Proposed Project which can affect such a vast array of resources (DEIS 4-124).

In the NHS Section 106 minutes contained in the appendix of the DEIS, it is clear that the SHPO advised AAF to use the 106 process; however, AAF also determined that AAF did not need to fully engage local governments/groups/individuals as Section 106 Consulting Parties to fulfill the NEPA public input requirements of the National Historic Preservation Act (NHPA). This is simply not appropriate. CDM Smith feels strongly that this approach does not properly allow the local communities an opportunity to voice their concerns in a forum that represents to the important resources within the Project Study Area.

The DEIS in regards to the identification, evaluation and effect determinations of historic properties is again minimal. In its context with notable absence of known National Register listed and determined eligible resources, several known archaeological sites that fall within the Proposed Project APE appear to not have been surveyed and evaluated for National Register eligibility and effects. At the very least they are not properly assessed. In addition, it is not clear if an adequate archaeological survey was conducted for portions of the Proposed Project APE. No subsurface testing was done in the N-S FECR Corridor per a letter dated Oct 31, 20_.

According to the DEIS, the FECR, a National Register Historic District, falls within the Proposed Project APE and has contributing resources adversely affected (St. Sebastian Bridge), yet the DEIS states that this same district has no adverse effect determination as a result of the Proposed Project. If a district loses a contributing resource, then the district itself experiences an adverse effect. It is also apparent that not all known historic resources were identified and evaluated within the Proposed Project APE as several National Register Historic Districts are absent from the discussion within the DEIS.
The DEIS either completely omitted or inadequately addressed numerous historical and archaeological sites in Indian River County.

Two other areas of concern relating to cultural resources are:

1. The DEIS does not indicate that vibration studies were conducted in relation to historic structures and archaeological sites.

2. The DEIS does not examine the construction impacts in relation to historic or archaeological resources (overall construction activities and staging areas are not addressed).

While the development of the Proposed Project's APE and methodology appear to have been developed with the input of SHPO, the DEIS's lack of information, and omission of important resources that clearly fall within the Proposed Project's APE are very concerning and raise the question whether the methodology was properly executed. Couple this with the substitutive process used that minimally consulted with local entities results in a DEIS that is lacking in these critical areas.

CDM Smith has worked closely with the Indian River County Historian and other local resources to identify a substantial number of properties missing from the DEIS that appear on either the State of Florida's Master Site File system or in the National Register of Historic Places. As stated above, Section 4(f) requires that consideration be given to "historic properties of National, State or local significance." Aside from those properties listed on the NRHP, there are a significant number of properties alongside the corridor that that are of local significance and importance.

CDM Smith believes that the Cultural Resources evaluation included in the DEIS is incomplete and recommends that a supplemental DEIS be required prior to issuance of a Record of Decision by the FRA.

Subject: RE: Chamber Comments to the EIS

Beth,

I will review and get you any comments by next Monday 11/24. I handed your Chamber Survey results and summary to Cindy Watson, who is handling our city survey summary and the submittal package on the DEIS. Your survey summary will be added to our City submittal package. If you have any questions on the submittal package, please call or email Cindy by next Wed 11/26. Our plan is to also have our official comments submitted to the FRA on Dec 1, 2014.

Thanks
Frank Watanabe

In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

69 Response(s)
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: 
   Positive
   Negative
   ☑ No or Minimal Impact

   Comment: I think it will overall not benefit the city or business since there is no stop here.

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: 
   Positive
   ☑ Negative
   ☑ No or Minimal Impact

   Comment: If the frequency is such that it impacts traffic, it could hurt downtown activities and businesses.

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   Answer: 
   Strongly Support
   Moderately Support
   Neither Support or Reject
   Moderately Reject
   ☑ Strongly Reject

   Comment: No financial benefit to us.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer: 
   Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
   ☑ Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   If it can be stopped, stop it. The freight trains are bad enough.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Positive
   - Negative
   - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Positive
   - Negative
   - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: But only if there is a stop in Indian River County

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.

   Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: 
   
   Positive
   Negative
   ✔️ No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: 
   
   Positive
   Negative
   ✔️ No or Minimal Impact

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   Answer: 
   
   Strongly Support
   Modestly Support
   Neither Support or Reject
   Modestly Reject
   ✔️ Strongly Reject

   Comment: Don’t see the benefits outweigh the noise and increased safety concerns. Current rails in FL less than successful.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer: 
   
   Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   [Blank space for response]

   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the land of the Florida East Coast Railroad near US Highway 1 through the Sebastian Area? If positive or negative, please describe the specific ways in which your business operations will be impacted.
   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the land of the Florida East Coast Railroad near US Highway 1 through the Sebastian Area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.
   - Answer:
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject
   - Comment: 32 trains a day at 110 mph? No thanks.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):
   - Answer:
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - Other: None

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
   - Protest it going through here. And we sure don’t need a stop here. All the low life’s from everywhere would be infiltrating our little town.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Interruption of traffic flow will impact business for all businesses west of the railroad tracks from US 1.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Staff and patients will have to contend with road closing each time the train passes through Sebastian. We have nothing to gain by way of people stopping in this area to shop or use our services.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

Comment: Noise levels will increase and traffic will be disrupted. Not a winner for Sebastian and I would encourage our city leaders to do their job in making Sebastian a good place to live and work.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
- Other: No positive

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Aggressively oppose this waste of tax payer dollars. Noise and traffic disruptions will be intolerable to all the citizens of this county. Our quiet "fishing village" will
1 How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

4 My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

<table>
<thead>
<tr>
<th>Answer</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>✔ Addition of &quot;quiet crossings&quot; infrastructure at intersections of the railroad tracks with public streets or roads</td>
<td></td>
</tr>
<tr>
<td>Addition of a station or stop for passengers using the high speed railroad in the Sebastian area</td>
<td></td>
</tr>
<tr>
<td>✔ Other: build high speed rail tracks along I-95</td>
<td></td>
</tr>
</tbody>
</table>

5 In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Don't fight it, but do support efforts to add the "quiet crossings" at main streets, Roseland rd, etc. I get a laugh at all the small towns on the East Coast that want to get on the bandwagon by having "trains" along the way. What part of "high speed rail" don't they get? Also, it seems very selfish that if it doesn't benefit our town - we don't want it. I'll bet people said that about gas powered motor cars vs. horses.

Our Chamber should encourage the project - but make sure that our quiet (used to be) fishing village is protected.

Ask anyone in the chamber who has ridden the Auto train... non stops from Sanford to Virginia... tracks right next to houses in certain areas with no quiet zones, but it serves the purpose of moving thousands of people and cars from one point to another.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal Impact
   
   Comment: Train track noise. Traffic congestion. Business interruption due to noise, vibration, etc. Environmental concerns.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal Impact
   
   Comment: Traffic congestion is assumed. Interruptions of business operations, conferences, etc. due to noise, vibration, etc.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Answer
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
     - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: I do not see how a high speed train coming through town that does not serve the residents in anyway is a positive. It stopped in Vero Beach to service residents then I think that would serve us... also, how many of those trains will come through at night and what will the noise level be like.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: Depending on the times the train will go through town, it will either impact traffic of sleep.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers along the high speed railroad in the Sebastian area.
   - Other: (please specify)

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Not sure you can stop a train... but I disagree that the residents need to put up with private industry who does not consider the needs of a community needing their services.

1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: The road that my business is on will be directly impacted by the daily traffic of these trains. The noise will bother me and I see no benefit whatsoever.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: The road that my business is on will be directly impacted by the daily traffic of these trains. The noise will bother me and I see no benefit whatsoever.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: The road that my business is on will be directly impacted by the daily traffic of these trains. The noise will bother me and I see no benefit whatsoever.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area
   - Other: None

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   I would like you to keep fighting to keep this resistance out of our town and the treasure coast in general. These trains will not benefit the general permanent population here. And will just be another inconvenience forced upon us. Just to mention the use of the general transportation line for goods from the south and north that already pass through on a frequent daily basis.
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   Organize and deliver information relating to adverse impacts of the trains for the EIS. Coordinate the hiring of legal assistance to fight and block Federal funding for the project.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: The plan is not good for the Treasure Coast as it serves us no benefits and will cause delays, maybe deaths and too much noise.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Too much noise, many delays, most people I speak to don't want it.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

Comment: Great for the shareholders, not good for the Treasure Coast residents too much noise and trouble for not getting any benefits it should be moved west and not be here.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area
- Other, please specify: move it west

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Fight it with all your strength as it will not benefit our citizens.

1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Answer
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
     - Addition of “quiet crossing” infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   [Blank space for response]
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Already being delayed with freight trains. We have a schedule to maintain and any delays would cause us to lose a customer.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Causes customer delays as well.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

Comment: For the above reasons: More traffic and more delays.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of “quiet crossing” infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
- Other: We have no positive feedback.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Definitely oppose this high speed rail.

1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Disrupted traffic and delays causing appointments to be late. Noise of trains running and its horns between 19th Street and Rt 60 intersections will be a constant disruption. At that speed the train will be blaring its horn continuously as it flies through all IRC intersections.

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Schools, recreation programs and businesses I work with in Sebastian and in Vero Beach will be impacted negatively by the noise and physical rumble.

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

Comment: The tracks for high-speed should not be coming through any urban/downtown area where tourists and pedestrians are trying to enjoy the ambiance of the region.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
- Other: Move the project out west along the turnpike & I-95 corridor.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

I am not in favor of high-speed trains going through downtown areas in IRC or through any area where there is high pedestrian traffic on the Treasure Coast. It would be acceptable and even good for business for a slow train to come through and be a connector along cities on the Treasure Coast and THEN connect with the high-speed train outside and away from our cities. High-speed rail needs to be located out west of our interstate highways to take advantage of the growth of heavy established.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Join other Chambers and Community groups and oppose this action by FECRR. Do not write letters of support as they are asking of other chambers. This company blew all their $5 in their real estate development throughout Florida. For ongoing maintenance and repair they place band aids on the train bridges we have seen the results. The trains are not a big deal and traffic moves smoothly. The trains should be limited to a maximum of 55 miles per hour to protect the public from these old structures now add 1000+ homes.
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   Positive
   □ Negative
   □ No or Minimal Impact
   Comment: Noise

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   Positive
   □ Negative
   □ No or Minimal Impact
   Comment: Noise level
   No benefit for Sebastian

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   Answer:
   □ Strongly Support
   □ Moderately Support
   □ Neither Support or Reject
   □ Moderately Reject
   □ Strongly Reject
   Comment: Noise level
   Add a stop in Sebastian

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   □ Additions of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   □ Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   □ Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   Reject unless there is a stop added

1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal impact

   Comment: Those individuals traveling from Miami to Orlando usually use the Florida Turnpike or I95 to S28 and do not come into Sebastian.

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal impact

   Comment: Inconvenience due to the additional RR traffic - crossing closing, noise level.

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: The HSR could relieve some of the traffic on I95 and S28, which would be a benefit, but I believe that there should be additional stops - Vero & Stuart/Jupiter. I understand that each town would like to be designated as a stop, that would be impossible and cause further overall delays.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "level crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

https://ui.constantcontact.com/surveyview/a07e93czzhdht35b4sr/report/response/print... 10/29/2014
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Positive
   - Negative
   - No or Minimal Impact

   Comment: Where is all the money coming from to handle this? More tax money when state of Florida all ready needs more money? Will there be more destruction of trees?

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Positive
   - Negative
   - No or Minimal Impact

   Comment: It appears our little town is starting to be like bigger cities. We are losing our hometown community feel? Never satisfied with what we have?

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Strongly Support
   - Moderately Support
   - Neither Support nor Reject
   - Moderately Reject
   - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other: Too much traffic now.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Please protect our area from becoming a big city with lots of cement. Just leave FT. LAUDERDALE BEACH area for some spring breakin. It's gorgeous and we had a great time but way too much cement and not enough parks and things like we have here.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Positive
   - Negative

   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: There is already too much sound pollution with the train service we do have. Traffic is also affected.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: I feel people will not want to frequent my clients' businesses due to the loud noise and the loss of the small town feel we enjoy here in Sebastian.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

Comment: I am not in support of this for coming through Sebastian at all.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
- Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Even though it would be nice to have a stop here in Sebastian and have quiet crossovers above intersections (they really won't be quiet at all), I feel it would still be more of a nuisance and detriment. I do NOT support it at all. I lived in New York City next to a rail system. This is truly NOT what people will want once they
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: traffic congestion, increased noise

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: traffic congestion, increased noise

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: I would strongly support the railroad if a stop were made available in Indian River County.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of “quiet crossing” infrastructure at intersections of the railroad tracks with public streets or roads
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Lobby for a stop in Indian River County.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal Impact
   
   Comment: Too much noise and delays.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area?    - Answer
     - Positive
     - Negative
     - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Answer
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject
   
   Comment: Move train to the mid state tracks. Limited population and business's

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - Other: Move the train to mid state.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Tell our Gov NO not in our area
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.
   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.
   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact
   Comment: It would be taking out land and business next to the railroad tracks so in marked areas included.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.
   - Answer:
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):
   - Answer:
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
   Please reject this project. I do not think it would be good for our area at all.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer:**
   - Positive
   - Negative
   ✅ No or Minimal Impact

   **Comment:** The tracks are directly behind our business. The current noise and smoke are already heard by the normal train traffic. More traffic would only make this issue worse.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer:**
   - Positive
   - Negative
   ✅ No or Minimal Impact

   **Comment:** All east bound customers would experience more delays in trying to get to our business on U.S. 1.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   **Answer:**
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   ✅ Strongly Reject

   **Comment:** It would make more sense to run trains along a major highway corridor. Overall, I feel it's a waste of money. Few, if any, people will ride this train to justify the expense.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   **Answer:**
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   ✅ Other: Allow the people in the affected areas to vote on it.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   This survey is a good start. Hold public meetings to get a sense of where people stand on this proposal.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: If the train stops here, it might bring more business our way which is extremely positive.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

Answer:
- Strongly Support
- Moderately Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of “quiet crossing” infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
- Other: Stop in Vero Beach

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

I think we should strongly campaign for stops in Indian River County, especially Sebastian and Vero Beach. I think this is a great idea but more importantly having the train stop here will benefit IRC's inhabitants and possibly bring more business to our local businesses in IRC. This needs to be looked into. We may not be as big as West Palm, Ft. Lauderdale or Orlando but Indian River County deserves to have the train stop in Vero and Sebastian. I don't think we should allow this unless mandatory stops at Vero and Sebastian are agreed to by the FECI. If you need any assistance in campaigning for this, I will be more than happy to assist.

Jenny Seemayer
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact

   Comment: Those individuals traveling from Miami to Orlando usually use the Florida Turnpike or I-5 to I-95 and do not come into Sebastian.

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer:
     - Positive
     - Negative
     - No or Minimal Impact

   Comment: Inconvenience due to the additional RR traffic - crossing closing, noise level.

3. Is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   - Answer:
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject

   Comment: The HSR could relieve some of the traffic on I-95 and I-528, which would be a benefit, but I believe that there should be additional stops - Vero & Stuart/Jupiter. I understand that each town would like to be designated as a stop, that would be impossible and cause further overall delays.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer:
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
     - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area
     - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
   - Positive
   - Negative
   - No or Minimal Impact

   **Comment:** Travel to clients east & west throughout Indian River and Brevard will impact or ability to conduct business due to the frequent blockage of rail crossings.

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
   - Positive
   - Negative
   - No or Minimal Impact

   **Comment:** Same as prior but where client is traveling to our business.

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   - Answer
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   **Comment:** No financial benefit to the local business community. The trains will impact travel time, meeting scheduling, safety to community and bring no financial benefit.

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

Join other Chambers and Community groups and oppose this action by the FECRR. Do not write letters of support as they are asking of other chambers.
This company plows all their $2 into their real estate development throughout Florida. For ongoing maintenance and repair they place band aids on the train.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
   - Positive
   - Negative
   - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
   - Positive
   - Negative
   - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Answer
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: I hear pro and con about this issue. Local businesses in Vero more concerned about the impact.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Just stay on top as you have. I appreciate ALL update and info.
   Thank you
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - **Answer**
     - Positive
     - **Negative**
     - No or Minimal Impact

   **Comment:** Disrupted traffic and delays causing appointments to be late. Noise of train running and its horns between 18th Street and Rt 60 intersections will be a constant disruption. At that speed the train will be blaring its horn continuously as it flies between all IRC intersections.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - **Answer**
     - Positive
     - **Negative**
     - No or Minimal Impact

   **Comment:** Schools, recreation programs and businesses I work with in Sebastian and in Vero Beach will be impacted negatively by the noise and physical rumble.

3. Is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - **Answer**
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - **Moderately Reject**
     - Strongly Reject

   **Comment:** The tracks for high speed should not be coming through any urban/downtown area where tourists and pedestrians are trying to enjoy the ambiance of the region.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - **Answer**
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - **Other:** Move the project out west along the A1A & I95 corridor.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   I am not in favor of high speed trains going through downtown areas in IRC or through any area where there is high pedestrian traffic on the Treasure Coast.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: Already being delayed with the freight trains. We have a schedule to maintain and any delays would cause us to lose a customer.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: Causes customer delays as well.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? Please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: For the above reasons. More traffic and more delays.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   - Other: We have no positive feedback.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Definitely oppose the high speed rail.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

These train tracks should be located further west.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal impact

   Comment: think the plan is not good for the treasure coast as it serves us no benefit and will cause delays maybe deaths and too much noise.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal impact

   Comment: too much noise many delays most people I speak to don't want it.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: great for the gamblers not good for the treasure coast residents too much noise and trouble for not getting any benefits it should be moved west and not be here.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other: just move it out west

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Fight it with all there strength as it will not benefit our citizens
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? 1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer**
   - Positive
   - **Negative**
   - No or Minimal impact

   **Comment:** Increased noise, traffic, and physical disruptions (shaking) will adversely affect my business and the desirability of the current location of my business. Also, this will deliberately bypass traffic that would otherwise get an opportunity to view and stop in to our community.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer**
   - Positive
   - **Negative**
   - No or Minimal impact

   **Comment:** I have heard many negative comments from clients. I have not heard any support for this project from members of our community.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   **Answer**
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - **Moderately Reject**
   - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   **Answer**
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - **Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.**
   - Other: Moving the rail lines to a location off US-1 to I-95 corridor.

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

<table>

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   You need to insist on having the Train to stop in the Sebastian area so it benefits the local economy.
1. How will your business operations be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer
   - Positive
   - Negative
   - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer
   - Positive
   - Negative
   - No or Minimal Impact

3. What is your general level of support for the proposed high-speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high-speed railroad.

   Answer
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

4. My level of support for the proposed high-speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high-speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high-speed railroad.

   Whatever needs to be done in order to accomplish this proposed project quickly! It has been in the talk for too long...
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: Will bind up the traffic load on the Main Street crossing onto US Hwy 1

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: This will impact traffic flow to and from the main arteries of Sebastian

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: With no regular stops in Indian River or St. Lucie Counties there is no advantage to having the train disruption in traffic. I feel strongly that the system might be more utilized if there was at least 1 stop in Indian River County.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Continue researching whether there might be need for a stop or stops here in this county.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: Having to wait on trains that have no impact here is not what our city needs. We need services that bring in customers and can take us to other destinations. How many people are really going to pay the extra cost to take a train from Orlando to Palm Beaches or Miami? The planes they come in on will take them to these cities without the hassle of disembarking planes, going to airport, getting on train, getting off train, I feel it is only going to cause a unsafe environment & much stress!

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

Answer:
- Positive
- Negative
- No or Minimal Impact

Comment: See comment above.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

Answer:
- Strongly Support
- Modestly Support
- Neither Support or Reject
- Moderately Reject
- Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer:
- Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
- Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
- Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

Make Sebastian a "DESTINATION" for the train.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: Negative

   Comment: Traffic stopping, noise pollution. Environmental pollutants create anxiety which disrupts performing daily activities and increasing mental instability. Our small town feeling will be disturbed. I predict sanity will decrease and crime will increase just because people feel less at ease.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer: Negative

   Comment: Most of my clients are very elderly. The disturbance of their serenity will be very unhealthy to the body and the mind.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer: Strongly Reject

   Comment: No positive effect for us only negative.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer: Other: reasonable fees

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Must lobby the federal politicians.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal Impact

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   - Answer
     - Positive
     - Negative
     - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   - Answer
     - Strongly Support
     - Moderately Support
     - Neither Support or Reject
     - Moderately Reject
     - Strongly Reject

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   - Answer
     - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
     - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
     - Other

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: TRAFFIC WILL BE BACKED UP AT CROSSINGS MANY TIMES A DAY. WHEN A TRAIN GOES BY NOW OUR BUILDINGS SHAKE LIKE CRAZY. EVERY YEAR WE HAVE TO REATTACH OUR CROWN MOLDINGS AND ALL THE TILES SHAKE ON THEIR RACKS IN OUR SHOWROOM AT JERRY SMITH TILES MAKING IT DIFFICULT TO TALK. I CAN'T EVEN IMAGINE WHAT IT WILL BE LIKE WITH 32 TRAINS A DAY IT IS RIDICULOUS AND OUR PROPERTY VALUES WILL GO DOWN IT MAY PUT US OUT OF BUSINESS THE GOVT SHOULD NOT BE IN THE BUSINESS OF LENDING MONEY MAKE THEM MOVE OUT WEST.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   Answer:
   - Positive
   - Negative
   - No or Minimal Impact

   Comment: WE WILL NOT BE ABLE TO GO ABOUT BUSINESS IN A NORMAL WAY EVER AGAIN ANYWHERE ON THE EAST COAST IF THIS IS ALLOWED TO HAPPEN BECAUSE THE EXISTING TRACKS SPLIT ALL OF OUR TOWNS IN TWO IT WILL BE DISASTEROUS FOR BUSINESSES, PROPERTY VALUES, EMERGENCIES, TRAVEL, TRAFFIC, SAFETY, ETC.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   Answer:
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   Comment: THESE QUESTIONS ARE VERY REPETITIVE!

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   Answer:
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area
   - Other: USE THE TRACKS WEST OF TOWN

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   - Negative
   - No or Minimal Impact

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   **Answer**
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

4. Why level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   **Answer**
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area
   - Other: Residence and business quiet infrastructure

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   - Wildlife protection
   - Business and Residence noise protection
1. How will your business operations be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer:**
   - Positive
   - Negative
   - No or Minimal Impact

   **Comment:** As a healthcare practice, we are concerned with easy access to and from our facility for patients throughout the county. We are also concerned about potential interruptions for EMS and Emergency vehicles.

2. How will your customers or clients of your business be impacted by the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? If positive or negative, please describe the specific ways in which your business operations will be impacted.

   **Answer:**
   - Positive
   - Negative
   - No or Minimal Impact

   **Comment:** Our business is opening a satellite office east of the railroad tracks that impact patient appointment times and emergency access.

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space provided, please explain why you support, reject or neither support or reject the proposed high speed railroad.

   **Answer:**
   - Strongly Support
   - Moderately Support
   - Neither Support or Reject
   - Moderately Reject
   - Strongly Reject

   **Comment:** The entire idea is too-dog-dog.
   We are taught as business people to effectively research an idea before implementing. The proposed riderhip numbers are not based on reality. It is the mindset of bums and they will come.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

   **Answer:**
   - Addition of "quiet crossing" infrastructure at intersections of the railroad tracks with public streets or roads.
   - Addition of a station or stop for passengers using the high speed railroad in the Sebastian area.
   - Other: Move rail path to Center of State

5. In the space below, please describe the steps or actions you would like the Sebastian River Area Chamber of Commerce to take on behalf of its membership with respect to the proposed high speed railroad.

   Find out how we can stop this from going forward.
   As business people and tax paying citizens, we do not want public money (loan or otherwise) used to support this project.

</table>
I do not see how a high speed train coming through town that does not serve the residents in any way is a positive. If it stopped in Vero Beach to serve residents then I think that would serve a purpose. Also, how many of those trains will come through at night and what will the noise level be like?

doer@maronda.com

My business is near the railroad tracks. Infrequent trains pass currently, but there is a lot of noise, with my building shaking, and disruption of normal conversations occurring during the passage of a train. 32 trains a day is too much noise and will negatively effect the quality of life in my community, disrupt my business, and give my county (Indian River County) no benefit, as the railroad does not see fit to even stop once in the county. I oppose the railroad plan.

thecatsrnwocat@ad.com

As a Real Estate Broker, I will have a huge depreciation value on the sale of homes.

keepitbeautiful@gmail.com

I own a florist in Sebastian so it will have a negative impact on getting deliveries as about 80 percent of our deliveries require crossing the tracks.

paradisefloristandgift@gmail.com

Sawyer community waiting for trains.

wcpoehrer@gmail.com

Patients using our services must cross the tracks to get from certain parts of Wabasso, Sebastian and Barefoot Bay to Fellsmere. They can choose to go to another provider on the same side of the tracks, having a negative impact on our business.

vsoule@teleflinc.org

TRAFFIC WILL BE BACKED UP AT CROSSINGS MANY TIMES A DAY. WHEN A TRAIN GOES BY NOW OUR BUILDINGS SHAKE LIKE CRAZY. EVERY YEAR WE HAVE TO REATTACH OUR CROWN MOLDINGS AND ALL THE TILES SHAKE ON THEIR RACKS IN OUR SHOWROOM AT JERRY SMITH TILE MAKING IT DIFFICULT TO TALK. I CAN'T EVEN IMAGINE WHAT IT WILL BE LIKE WITH 32 TRAINS A DAY! IT IS RIDICULOUS AND OUR PROPERTY VALUES WILL GO DOWN IT MAY PUT US OUT OF BUSINESS THE GOVT SHOULD NOT BE IN THE BUSINESS OF LENDING MONEY MAKE THEM MOVE OUT WEST!

tsmith@jerrysmithtile.com

People will not want to wait at train crossings to get to the “east” side of town and will do their business and shopping on the side that is being most convenient.

Anonymous

More Noise and Train Traffic through our rural area and it most likely will not have a stop station new clients. 

vejlyantana@me.com

Noise should be considered.

bunnyvscanlon1@gmail.com

All bad.

Anonymous

Delaying of Traffic tremendously over current RR schedule. Noise and creating a dangerous condition of the town being split in half 32 times a day by a 100 mph missile.

steppark@comcast.net

We already experience vibrations of our buildings when the current trains pass, this will be more frequent.

sebastianogalley@bellsouth.net

no stops, more train traffic. Have we checked as to whether more freight traffic will be coming down the road at some point. That's where the railroad really makes its money.

Anonymous

As a realtor, explaining that the train will cross our community about 38 times a day does not make our homes value increase! The customers that have recently purchased have stated that they would not have bought their home here had they known about the high speed railroad.

Anonymous

The noise from the train and closing 512 and main every hour is not good.

oannmarievanover@yahoo.com

I think it will overall not benefit the city or business since there is no stop here.

tex@mgunshop.net

Having to wait on trains that have no impact here is not what our city needs. We need services that BRING in customers and can take us to other destinations. How many people are really going to pay the extra cost to take a train from Orlando to Palm Beaches or Miami. The planes they come in on will take them to these cities without the hassles of disembarking plane, going to airport, getting on train, getting off train….I feel it is only going to cause a unsafe environment & much stress!

shadygrovenursery@yahoo.com

The only real impact would be traffic backed up traveling east and west across the railroad tracks.

bfox@bellsouth.net

As a Healthcare practice we are concerned with easy paths of egress to and from our facility for patients throughout the county. We are also concerned about potential interruptions for EMS and Emergency vehicles.

rondi@rhye.com

HAPPEN WILL SHAKE MY BLOG

fredsalvagebody@comcast.net

I live on one side and my business is on the other side of the tracks. Getting to and from with inventory etc will be impacted.

doug@seasidevapors.com

I feel people will not want to frequent my clients' businesses due to the loud noise and the loss of the small-town feel. We enjoy here in Sebastian.

curt@t袖@gmail.com

It appears our little town is starting to be like bigger cities. We are losing our hometown community feel? Never satisfied with what we have?

bargho@tixnerkly@aol.com

Traffic congestion, increased noise

stephanie.bochter@hotmail.com

It would be taking out land and business next to the railroad tracks me included

info@sebastianofficesupply.com

See above

mmiller.mato@gmail.com

Inconvenience due to the additional RR traffic - crossing closing, noise level

terr.nurse@sebecostalational.com

Schools, recreation programs and businesses I work with in Sebastian and in Vero Beach will be impacted negatively by the noise and physical rumble.
lisatock@stixtloc.com

Same as prior but where client is traveling to our business.

jerry@wosprnutos.com

Noise level

estigonzalez@hotmail.com

No benefit for Sebastian

cesu@kxhectown@gmail.com

Causes customer delays as well

The road that my business is on will be directly impacted by the daily traffic of these trains. The noise will bother me and I see no benefit what so ever.

bithobby@slf.net

too much noise makes delays most people I speak to don't want it

doctor@rile@yahoo.com

More people spend more money

ditch1@galleryngifts.comcast.net

I have heard many negative comments from clients. I have not heard any support for this project from members of our community.
cynthia@vandevordelaw.com

Property values will decrease

info@computerhealthcare.net

Traffic will be backed up

virginia.heeter@cockwellbanker.com

Noise pollution

barbrow@bellsouth.net

This will impact traffic flow to and from the main arteries of Sebastian.

pm2101@yahoo.com

See above

stf@tixnerkly@aol.com

Most of my clients are very elderly. The disturbance of their serenity will be very unhealthy to the body and the mind.
april@marinda.com

Staff and patients will have to contend with road closing each time the train passes through Sebastian. We have nothing to gain by way of people stopping in this area to shop or use our services.

kirke@chopman@hotmail.com

Delays in using our services. Safety concerns with crossing the tracks.

attilalaw@bellsouth.net

Traffic congestion is assumed. Interruptions of business operations, conferences etc. due to noise, vibration, etc.

michelle@nacierta@e.vers

depending on the times the train will go through town, it will either impact traffic of sleep.
vogandn@marinda.com

Disturbing the peace with loud train noise 32 times daily. I like my community the way it is, with an occasional train only.

thecatsnewworld@aol.com

My business is near the tracks and passing trains require us to stop conversations, and shake the building and the floors. My patients are also disturbed by the noise.

koep@beautul@gmail.com

In addition, I am sure there will be odors associated with the trains also, and fumes which will negatively impact our Indian River Lagoon, already having problems with run off & pollution inaddioutourism.

I will impact my business and customers greatly. The Real Estate values will plummet and we will lose buyers to the area.

ago_sew@comcast.net

more delays-health hazard for emergency vehicle traffic and noise of horns

Fewer homes will be sold along the rail. Grant: Barefoot Bay, Sebastian.

wcoppenre@gmail.com

We have business locations on both sides of the track. The number of trains added will delay staff and patients getting to their destinations.

vsoule@techinc.org

WE WILL NOT BE ABLE TO GO ABOUT BUSINESS IN A NORMAL WAY EVER AGAIN ANYWHERE ON THE EAST COAST IF THIS IS ALLOWED TO HAPPEN BECAUSE THE EXISTING TRACKS SPLIT ALL OF OUR TOWNS IN TWO!!! IT WILL BE DISASTEROUS FOR BUSINESSES, PROPERTY VALUES, EMERGENCIES, TRAVEL, TRAFFIC, SAFETY ETC!

smith@jerry@smith@e.com

People will not want to wait at train crossings to get to the "east" side of town and will do their business and shopping on the side

Anonymous

most convenient.

The noise and increased train traffic may detour clients from choosing to live in our area which is more laid back and quiet.

vicky@antacone.com

customers & clients hire the ideal

Anonymous

A populated area being split in half. 32 times a day by a high speed train can have no positive effect in our community.

adgovark@comcast.net

Will/may increase time needed to visit our store, we are only a few hundred feet from railway

info@allinwesterfl.com

Hindered access to medical facilities

Anonymous
They will go other ways to travel, go to 95 to go north and south not I-11.

IF the frequency is such that it impacts traffic, it could hurt downtown activities and businesses.

See comment above.

Same as previous question.

Crossing over from the West is stalled and safety for our children and elderly who walk or bike over the tracks at many streets.

Our business is opening a satellite office east of the railroad tracks that impact patient appointment times and emergency access.

LESS ACCESS

Most of our customers can not get from their homes or workplaces to my business without crossing tracks.

coug@seasidetaverns.com

3. What is your general level of support for the proposed high speed railroad that will be using the lands of the Florida East Coast Railroad near US Highway 1 through the Sebastian area? In the space

</tbody>
</table>
Noise levels will increase and traffic will be disrupted. Not a winner for Sebastian and I would encourage our city leaders to do their job in making Sebastian a good place to live and work.

But only if there is a stop in Indian River County

Anon

Unique burden on Indian River County and Sebastian. Excessive impact with no benefits

del@bellsouth.net

Has no effect on our business and may pave the way for new business in the future.

celbel@gulfstreamgoodwell.com

This railroad plan is not needed at all, and I strongly reject the plan

thecatman@world.com

I once lived in a house next to the tracks, and I have first hand experience with the incredibly loud and disruptive noises produced by trains including crossings bells and monster horns of incredible decibels "warning" of the approach of a train. Good God anyone could hear a train even with a horn a tenth the volume. I am rattled to the bone by train noise now, with my business near the tracks, but only infrequently now.

The trains would without question, negatively impact our peaceful community. It will endanger pedestrians, children, stray animals, sale of properties, emergency response time, and may lead to many unnecessary deaths. This train has NO benefit to Indian River County it only hurts us

no benefit-only downsides problems

keepitbeautiful@gmail.com

I don't want to see our nice little town to have high speed trains going thru it.

paradisetofloristasg@bellsouth.net

We do not need trains flying through our community at high speeds. We do not need the added noise to our community. We will not benefit from this service.

wcrooeter@gmail.com

this project is a great step in the right direction for florida's mass transit infrastructure

william.r.schultz@walgreens.com

The east coast near US Highway 1 is not rural. Increased use of these tracks will add noise and congestion to this scenic roadway, increase potential individual injury and/or major catastrophes, and ruin what is left of small town shopping.

vsource@tcsbnc.org

I STRONGLY am OPPOSED to spending MY tax dollars for the care and upkeep of the crossing areas for this PRIVATELY OWNED business!! This is NOT democracy!! It is the raping of us private citizens.

Anonymous

If maybe private now but, you know tax dollars will be in there somewhere

barryscottrt@gmail.com

No way, No How!! Anonymous

I do not see any positive aspect for Sebastian or our entire county.

tedparker@comcast.net

Do not feel it is appropriate to reject since the railroad was there and in use when we purchased the property.

sebastianquality@bellsouth.net

as long as sebastian area receives no benefits and has to pay

Anonymous

I am concerned for the safety of our drivers and their passengers at crossings, high noise level, more time wasted at additional crossings.

plantroadsolutions@comcast.net

The private company stands to benefit monetarily while our community and counties bear the burden of crossing maintenance which will only increase with added use.

Anonymous

Don't see the benefits outweigh the noise and increased safety concerns. Current rails in FL less than successful.

tupperreto@bellsouth.net

rex@riggsuphoto.net

The reason I reject the proposed high speed railroad is because there are no stops in Indian River County. This does no benefit us in any way.

bfox@bellsouth.net

Do you have a survey for Residences as well as businesses?

Anonymous

Safely as well as no stops are my main issues.

reservations@hbrams.com

The entire idea is boon-doggie.

we are taught as business people to effectively research an idea before implementing. The supposed ridership numbers are not based on reality. It is the mind-set of "build it and they will come"

cine@flyfe.com

This project will have a negative impact on the community, with zero benefits.

Anonymous

THEY COULD GO UP THE MIDDLE OF THE STATE

doug@seaisdewpapers.com

This will totally interrupt our way of life.

4. My level of support for the proposed high speed railroad would be positively influenced by the following factors (please mark all that apply):

Answer

Resident

Allow the people in the affected area to vote on it

lilem@leemngnooening.net

no government money used

athur@athur.net

To much traffic now.

bargainhunters@bellsouth.net

Move the train to mid state.

don@indianavemassage.com

Stop in Vero Beach

jenny@teemeny@bellsouth.net

Other responses

The train would not be here if the railroad did not need it for its business.

Another one is the only option I know of to completely get from miami to jacksonville.

<td><a href="mailto:info@sebastianofficesupply.com">info@sebastianofficesupply.com</a></td>
</tr>
<tr>
<td>Install tracks west of the populated areas</td>
<td><a href="mailto:miller.mia@gmail.com">miller.mia@gmail.com</a></td>
</tr>
</tbody>
</table>
I think we should strongly campaign for stops in Indian River County, especially Sebastian and Vero Beach. I think this is a great idea but more importantly, having the train stop here will benefit IRC's inhabitants and possibly bring more business to our local businesses in IRC. This needs to be looked into. We may not be as big as West Palm, Ft. Lauderdale or Orlando but Indian River County deserves to have the train stop in Vero and Sebastian. I don't think we should allow this unless mandatory stops at Vero and Sebastian are agreed to by the FECR. If you need my assistance in campaigning for this, I will be more than happy to assist.

Jenny Seemayer

jenny.seemayer@egus.com

I am not in favor of high speed trains going through downtown areas in IRC or through any area where there is high pedestrian traffic on the Treasure Coast.

It would be acceptable and even good for business for a slow train to come through and be a connector along cities on the Treasure Coast and THEN connect with the high speed train outside and away from our cities.

High speed rail needs to be located out west of our interstate highways to take advantage of the right of ways already established.

lspurlock@quiltdoc.com

I cannot see a positive result to the Sebastian area of the initiation of high speed rail service.

aeuler5206@msn.com

Join other Chambers and Community groups and oppose this action by the FECRR. Do not write letters of support as they are asking of other chambers.

This company plows all their $$$ into their real estate development throughout Florida. For ongoing maintenance and repair they place band aids on the train bridges to better understand this take a close look at the Sebastian River RR Bridge rusty old metal built in the 1920's taking brutal beating from heavy freight trains 2 miles long never anticipated for the track. The freight trains which are limited to 55 miles per hour are dangerous enough to the public on these old structures now add 110 mile per hour trains that is insane and extremely dangerous to the general public and passengers. Speaking of passengers my understanding is mostly tourist traveling from South Florida to Orlando with the closest stop to our area being West Palm Beach and Cocoa.

jerry@woodsinsure.com

Reject unless there is a stop added.

Just stay on top as you have. I appreciate ALL update and info.

Thank you

ealgonzalez@hotmail.com

Definitely oppose this high speed rail

toukietheo@gmail.com

reject it outright

toukietheo@gmail.com

These train tracks should be located further west.

doonley2@comcast.net

I would like you to keep fighting to keep this nonsense out of our town and the treasure coast in general. These trains will not benefit the general permanent population here. And will just be another inconvenience forced upon us. Not to mention the use of the general transportation line for goods from the south and north that already pass through on a frequent daily basis.

bobby@att.net

fight it with all there strength as it will not benefit our citizens

doctormei9@yahoo.com

Maybe the chamber could get new businesses to open up in the area to help provide transportation/tours to and from other areas rather than just the Sebastian Downtown corridor.

gitch13galleryandgifts@comcast.net

I do not feel that the Chamber should take either a yes or nay stance in regards to the railway but to keep communication is open with our business members and community with an unbiased opinion.

cas100@bellsouth.net

Would like to see a stop in Sebastian, or at least slow the trains down. Would not support any rail closings. Emergency response would be greatly effected. Most of the fire houses are on the west side of the tracks.

arnold aire@hotmail.com

Support the measure.

sebastianrodeo@sebastianrodeos.org

Protest it going through here. And we sure don't need a stop here. All the low lives from everywhere would be infiltrating our little town.

crocooffice@ask.com

Whatever needs to be done in order to accomplish this proposed project quickly. It has been in the works for too long.

cbboe@yahoo.com

Try to move the train to the tracks in the center of the state

info@computerhealthcare.net

Continue researching whether there might be need for a stop or stops here in this county

virginia.teeler@coldwellbanker.com

If there are no proposed stops for this area I do not see any benefit to Sebastian or surrounding areas. Additional problems with noise and traffic.

barbarawp@bellsouth.net
